7. *General policy.* All executive agencies participating in the Interagency Motor Pool System shall reduce by 20 percent the number of miles operated by motor vehicles in such systems to achieve a corresponding reduction in fuel consumed. Where agencies fail to achieve this objective, vehicles will be removed from service by GSA in accordance with the criteria established in attachment A. However, such removals will occur only after consultation with national headquarters officials of the affected agencies.

8. *GSA action.* a. GSA regional motor equipment personnel will continue to be available to meet with agency field officials to assist them in realizing the objective stated in paragraph 1.

b. The 20 percent reduction in dispatch service available from interagency motor pools will be maintained. Dispatch services will be refused between pool cities when public transportation will meet the needs of the agency.

9. *Required action by agencies.* a. Agencies shall achieve and maintain a 20 percent reduction in miles operated for each monthly reporting period. This reduction applies to the four basic vehicle classes; i.e., sedans, station wagons, light trucks, and heavy trucks. The basis for calculating such reductions is contained in attachment B.

b. Agencies shall submit GSA Form 494, Monthly Vehicle Use Record, as of the close of each business month, commencing with February 1974. This form shall be mailed so as to be received by the appropriate motor pool on or before the 5th working day after the end of the reporting period.

c. The fuel savings and mileage reduction guidelines in attachment C shall be implemented to the maximum extent feasible commensurate with the achievement of agency missions and the objective stated in paragraph 1.

d. Agencies which have achieved a significant increase in their motor vehicle utilization rate as a result of a decrease in the number of vehicles held, or newly established agencies which have insufficient prior information on which to establish a base line for measuring mileage reduction, should contact the office referenced in paragraph 10 below, for assistance in establishing the appropriate base line.

10. *Assistance.* Agencies may request the assistance of the General Services Administration in complying with the provisions of this regulation by contacting the General Services Administration (FZT), Washington, D.C. 20406, telephone (703) 557-3075.

11. *Appeal procedures.* An agency which believes that it cannot achieve a 20 percent overall reduction in mileage because of extenuating circumstances shall appeal in writing to the Administrator of General Services (A), Washington, D.C. 20405. GSA will review the appeal and forward it with recommendations to the Federal Energy Office for a final decision. Exceptions will be considered for vehicles used in emergencies or essential health services.

12. *Effect on other issuances.* This regulation augments the policy in FPMR 101-39 as it pertains to agency use of motor vehicles in the Interagency Motor Pool System. Further, FPMR Temporary Regulation G-13, dated November 28, 1973, and Supplement 1 thereto, dated December 27, 1973, are canceled; and paragraph 6 of FPMR Temporary Regulation G-15, Reduction in motor vehicle fuel consumption, dated January 28, 1974, should be changed by pen and ink to reflect the number and title of this regulation.

13. *Comments or suggestions.* Agency views concerning the effect of this regulation on agency operations or programs should be submitted to the General Services Administration (FF), Washington, D.C. 20406, no later than April 1, 1974, for consideration and possible incorporation into the permanent regulations.

ARTHUR F. SAMPSON,
Administrator of General Services.

MARCH 12, 1974.

VEHICLE REMOVAL CRITERIA

a. When an agency fails to stay within the assigned mileage ceiling the agency will be required to reduce the number of vehicles in service. The reduction will be determined by the agency's utilization rate (average number of miles traveled per vehicle for the prior month) and by the number of miles the agency has exceeded the ceiling. Figure A-1 indicates the exact number of vehicles to be removed from service.

b. Example: If an agency's utilization rate is 860 miles per vehicle per month and the agency has missed their ceiling by 15,300 miles:

1. Round actual utilization rate to nearest 50 unit interval—860 to 850.

2. Round mileage overage to nearest thousand unit interval—15,300 to 15,000.

3. Locate row 850 in figure A-1 and follow across to the 15,000 column. This intersection of the row and column will indicate the number of vehicles to be removed from service—18.

c. Should an agency fail to meet the mileage ceiling by more than 20,000 miles, the number of vehicles to be withdrawn will be calculated by adding those columns which equal the total overage; i.e., ceiling missed by 25,000 miles in the above example—add column 20 plus column 5 for a total of 30 vehicles to be withdrawn.

d. Vehicles removed from service shall not be replaced by the agency by renting, leasing, or by authorizing the use of privately owned vehicles.

V 39 54 MAR 19 74 XUM

MEASUREMENT OF MILEAGE REDUCTION

Agencies must achieve a 20 percent reduction in miles operated in each of the four basic vehicle classes; i.e., sedans, station wagons, light trucks, and heavy trucks. The base line for measuring an agency's mileage reduction will be the miles operated in the corresponding period of the base year (fiscal year 1973) adjusted for subsequent changes in vehicles assigned to the agency. GSA Central Office motor equipment personnel will calculate the adjusted base and mileage ceiling, and disseminate to agency national headquarters on a quarterly basis the mileage ceilings, by vehicle class, for the following quarter. However, agency mileage reductions will be monitored on a monthly basis. When significant fluctuations in an agency's vehicle inventory are noted during a quarter, GSA will review the quarterly mileage ceiling and in consultation with the agency establish a new quarterly mileage ceiling, if appropriate.

The formula for determining the base line and mileage ceiling is as follows:

1. $M \times \frac{V_1}{V_0}$ = Adjusted Base.

2. Adjusted Base x .80 = Mileage Ceiling.

Where:

M = Miles operated in corresponding quarter of base year (FY 73).

V_0 = Number of vehicles assigned in corresponding quarter of base year (FY 73).

V_1 = Number of vehicles assigned at beginning of present reporting quarter.

FUEL SAVING AND MILEAGE REDUCTION GUIDELINES

a. Substitute public transportation whenever possible.

b. Maintain stringent control of vehicle use for official purposes only.

c. Reduce vehicle use through curtailment of low priority programs.

d. Reduce frequency of security patrols, recruitment activities, and other activities not necessary for the safety and welfare of the general public.

e. Reduce recall of vehicles now in storage because of seasonal use.

f. Prohibit use of vehicles on Saturdays, Sundays, and holidays except for essential purposes.

g. Establish tight criteria for the use of air-conditioning in vehicles.

h. Enforce disciplinary action against drivers exceeding 50 miles per hour.

i. Terminate assignment of sedans used mainly in pool cities where public transportation is available. (Dispatch service is to be used where public transportation will not meet requirements.)

j. Replace 8-cylinder sedans used mainly for intracity operation with 6-cylinder sedans by rotating vehicles between using agencies. (Additional rotations will be made when compact sedans now being purchased for pool operations are received.)

k. Review truck assignments to determine whether smaller size vehicles can be used. (This review will emphasize replacement of pickups and other light trucks used for passenger carrying operations.)

l. Review shuttle or group movement operations to ensure passenger carrying vehicles are utilized to rated capacity.

m. Extend engine oil changes to 6,000-mile intervals for vehicles not under warranty.

n. Establish training programs to ensure observance of proper driving and maintenance practices as set forth in FPMR Temporary Regulation G–14, and in GSA Bulletins FPMR G–82 (and Supplement 1) and G–86.

NATIONAL CAPITAL PLANNING COMMISSION

[NCPC Files Nos. 0369, 0933]

HISTORIC PRESERVATION

Site and Building Plans Requirements and Urban Renewal Requirements for Proposals

At its meeting on March 7, 1974, the National Capital Planning Commission adopted amendments to its Site and Building Plans Requirements (37 FR 3011) and Urban Renewal Requirements for Proposals (37 FR 7122) relating to procedures for compliance with section 106 of Pub. L. 89–665, approved October 15, 1966 (16 U.S.C. 470 et seq.), and sections 1(3) and 2(b) of Executive Order 11593 of May 13, 1971.

Section 106 of Pub. L. 89–665 requires Federal agencies undertaking, licensing, or funding projects to "take into account the effect of the undertaking on any district, site, building, structure, or object that is included in the National Register" and to "afford the Advisory Council on Historic Preservation * * * a reasonable opportunity to comment with regard to such undertaking."

The first amendment will avoid duplicating consultations with the Advisory Council by the Federal agency submitting site and building plans pursuant to section 5 of the National Capital Planning Act of 1952 and by the Commission, as a Federal licensing agency.

The second and third amendments will insure compliance with Section 106 with respect to District undertakings subject to the Commission's "in lieu of zoning" approval and urban renewal plans and plan modifications respectively.

Adoption of the amendments constitutes partial fulfillment by the Commission of the requirement in Section 1(3) of Executive Order 11593 that Federal agencies, "in consultation with the Advisory Council on Historic Preservation (16 U.S.C. 470i), institute procedures to assure that Federal plans and programs contribute to the preservation and enhancement of non-federally owned sites, structures, and objects of historical, architectural or archaeological significance."

The amendments are as follows:

1. Subsection C. of section 3 of the Site and Building Plans Requirements (37 FR 3011) is amended by adding at the end thereof the following:

(6) *Historic Preservation.* Each submission by a Federal agency shall also include a determination by the head of the sponsoring agency, or other authorized official, as to whether the project is subject to section 106 of Pub. L. 89–665, approved October 15, 1966 (16 U.S.C. 470 et seq.), or section 1(3) of section 2(b) of Executive Order 11593 of May 13, 1971. If he so determines, then he shall submit evidence that the procedures for compliance with the applicable law or Executive Order have been initiated. Each submission by a Federal agency of final site and building plans shall include evidence that such procedures for compliance have been completed.

2. Paragraph C of section 6 of the Site and Building Plans Requirements (37 FR 3011) is amended by inserting "(1)" after "C" and by adding a new subparagraph to read as follows:

(2) If the proposed development is a public building to be erected by any agency of the Government of the District of Columbia within the boundaries of the central area of the District, as defined by concurrent action of the Commission and the District of Columbia Council, the Executive Director determines whether the proposed development is subject to Section 106 of Pub. L. 89–665, approved October 15, 1966 (16 U.S.C. 470 et seq.). If he so determines, the Executive Director will initiate procedures for compliance with section 106 of Pub. L. 89–665 at the time of initial submission. Before Commission action on final site and building plans pursuant to D.C. Code, sec. 5–428, procedures for compliance with section 106 shall be completed.

3. Subsection B. of section 2 of the Urban Renewal Requirements for Proposals (37 FR 7122) is amended by adding at the end thereof the following:

(7) *Historic Preservation Report.* A determination by the head or other authorized official of the Agency, or, with respect to proposals made by the Executive Director of the Commission, the Executive Director, as to whether the proposed urban renewal plan or modification(s) to an approved urban renewal plan is subject to section 106 of Pub. L. 89–665, approved October 15, 1966 (16 U.S.C. 470 et seq.). If he so determines, then he shall submit evidence that the procedures for compliance with section 106 of Pub. L. 89–665 have been completed.

DANIEL H. SHEAR,
Secretary.

OFFICE OF MANAGEMENT AND BUDGET

REQUESTS FOR CLEARANCE OF REPORTS

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on March 14, 1974 (44 USC 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

The symbol (x) identifies proposals which appear to raise no significant issues, and are to be approved after brief notice through this release.

Further information about the items on this Daily List may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202–395–4529).

NEW FORMS

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education: Instructions for the A–102 Application: Ethnic Heritage Program, Form OE–349, Single Time, Lowry, SEA's LEA's, Institutions of Higher Education, Public and Private Organizations.

REVISIONS

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service: Questionnaires RE: Evaluation of Type A and Computer Assisted Nutrient Standard Menus, Form ----, Single Time, Caywood, Students in Grade 5, School Lunch Managers.

SECURITIES AND EXCHANGE COMMISSION

[70–5265]

ARKANSAS POWER AND LIGHT CO.

Proposal To Issue and Sell Notes to Banks and to Dealer in Commercial Paper; Exception From Competitive Bidding

Notice is Hereby Given that Arkansas Power & Light Company, Ninth and Louisiana Sts., Little Rock, Ark. 72203 ("Arkansas"), an electric utility subsidiary company of Middle South Utilities, Inc., a registered holding company, has filed two post-effective amendments to its previously amended declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating sections 6(a) and 7 of the Act and rule 50(a)(2) promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the post-effective amendments, which are summarized below, for a complete statement of the proposed transactions.

By Order dated December 15, 1972 (Holding Company Act Release No. 17811), the Commission authorized Arkansas to issue and sell from time to time through May 31, 1974, unsecured short-term promissory notes (including commercial paper) to various commercial banks and/or a dealer in commercial paper, in an aggregate principal amount not exceeding $60 million outstanding at any one time of which not more than $40 million is to consist of commercial paper.

Arkansas now proposes to revise this program and to issue and sell from time to time through May 31, 1975, its unsecured short-term promissory notes (including commercial paper) to various commercial banks and/or a dealer in commercial paper in an aggregate principal amount outstanding at any one time of not more than $85 million, of which not more than $60 million will consist of commercial paper outstanding at any one time. As the notes mature, they will be renewed or to mature not later than February 28,1976) or be repaid out

V 39 154 MAR 19 74 XUM

of funds generated internally or derived from sales of similar securities or long-term debt and/or equity securities.

Except as herein stated, the terms and conditions of the proposed borrowings are unchanged from those set forth in the amended declaration in this proceeding and authorized by the Commission's Order of December 15, 1972. While no commitments have been made, it is expected that the banks to which such notes will be issued and sold, and the maximum amount to be issued and outstanding at any one time to each such bank, will be substantially as follows:

Name of bank	Maximum amount to be borrowed
Arkansas Bank & Trust Co., Hot Springs, Ark	$825,000
The Commercial National Bank, Little Rock, Ark	800,000
First National Bank in Little Rock, Arkansas	4,000,000
First National Bank of Eastern Arkansas, Forrest City, Ark	320,000
First National Bank of Hot Springs, Hot Springs, Ark	500,000
Irving Trust Co., New York, N.Y.	750,000
Manufacturers Hanover Trust Co., New York, N.Y	25,000,000
National Bank of Commerce, Pine Bluff, Ark	1,000,000
Peoples Bank & Trust Co., Russellville, Ark	300,000
Republic National Bank of Dallas, Texas	5,000,000
Simmons First National Bank, Pine Bluff, Ark	9,000,000
Union National Bank, Little Rock, Ark	1,300,000
Worthen Bank & Trust Co., Little Rock, Ark	3,000,000
Total	51,795,000

It is stated that, except as set forth above, Arkansas will not effect borrowings from banks pursuant to these post-effective amendments until it shall have filed a further post-effective amendment hereto setting forth the name or names of the banks from which such other borrowings are to be effected and the amount thereof and such borrowings shall have been authorized by order of the Commissioner.

Arkansas maintains a working balance with each of the above-named Arkansas banks of approximately 10 percent of the above proposed borrowings, and states that if such balances were maintained solely to satisfy compensating balance requirements, the effective interest cost on such borrowings, assuming an 8.75 percent prime rate, would be 9.7 percent. The above named non-Arkansas banks may require compensating balances of 15 percent to 20 percent of the amount of outstanding loans from those banks. Assuming an 8.75 percent prime rate and a 20 percent compensating balance, the effective interest cost on loans from such banks would be 10.9 percent.

Except as herein provided, the terms and conditions of the issuance and sale of the commercial paper, including the arrangement with Salomon Brothers, as dealers, are unchanged from those set forth in the amended declaration in this proceeding and authorized by the Commission's Order of December 15, 1972.

The net proceeds from the proposed transactions, together with other funds available from time to time to Arkansas from its operations or derived from the issuance and sale of long-term and/or equity securities, will be applied to Arkansas' construction program which is expected to require expenditures of approximately $170 million in 1974, $193 million in 1975, and $242 million in 1976.

Arkansas also proposes that the authority heretofore granted in the Commission's Order to file Rule 24 certificates of notification regarding the issuance and sale of the notes and commercial paper on a quarterly basis be extended to cover the transactions proposed in these post-effective amendments.

It is stated that no special or separable fees, commissions or expenses will be incurred in connection with the proposed transactions. It is further stated that no State commission, and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than April 1, 1974, request in writing that a hearing be held in respect of such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said post-effective amendments to the previously amended declaration which he desires to controvert; or he may request that he be notified should the Commission order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the amended declaration, as further amended by these post-effective amendments, or as it may be further amended, may be permitted to become effective in the manner provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof, or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

GENERAL PUBLIC UTILITIES CORP.

Proposed Cash Capital Contributions to Subsidiary Companies

Notice is hereby given that General Public Utilities Corp., 80 Pine St., New York, N.Y. 10005 ("GPU"), a registered holding company, has filed a declaration and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating section 12(b) of the Act and Rule 45 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

GPU proposes to make cash capital contributions, from time to time during the period ending December 31, 1974, to certain of its subsidiary companies of up to the following respective aggregate amounts:

Jersey Central Power & Light Co. ("JCP&L")	$35,000,000
Metropolitan Edison Co. ("Met Ed")	60,000,000
Pennsylvania Electric Co. ("Penelec")	30,000,000
Waterford Electric Light Co. ("Waterford")	100,000
Total	125,100,000

During 1974, JCP&L, Met Ed, Penelec, and Waterford will require an aggregate of approximately $500,125,000 for their various construction programs, $30,000,000 for the repayment of maturing long-term debt, and $7,000,000 for sinking fund purposes. The proposed capital contributions of $125,100,000 from GPU, internally generated cash aggregating approximately $80,025,000, and the proceeds (except in the case of Waterford) from proposed sales of first mortgage bonds, debentures, and preferred stock, plus, on an interim basis, the proceeds of bank borrowings, will be applied to these purposes.

The filing states that no state or federal commission, other than this Commission, has jurisdiction over the proposed transactions. GPU estimates that the fees and expenses in connection with the proposed transactions will be approximately $5,000.

Notice is further given that any interested person may, not later than April 1, 1974, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NEW ENGLAND POWER CO.

Proposed Amendment of By-Laws and Order Authorizing Solicitation of Proxies

MARCH 13, 1974.

Notice is hereby given that New England Power Company, 20 Turnpike Road, Westborough, Mass. 01581 ("NEPCO"), an electric utility subsidiary company of New England Electric System ("NEES"), a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a), 7, and 12(c) of the Act and Rule 62 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

NEPCO proposes to amend its By-laws to increase from 1,000,000 to 1,500,000 shares the aggregate number of shares of Dividend Series Preferred Stock that may be issued without a vote of at least a majority of the total number of shares of said stock then outstanding. The amendment to the By-laws will require the affirmative vote of two-thirds of the now outstanding 6% Cumulative Preferred Stock and common stock voting as one class. NEES, which owns all of the outstanding common stock of NEPCO, has indicated that it will vote in favor of the amendment, thereby assuring such affirmative two-thirds vote. The amendment will also require the affirmative vote of two-thirds of the now outstanding 780,140 shares of Dividend Series Preferred Stock voting as one class. NEPCO deems it advisable that additional authorized shares of its preferred stock be made available to meet its needs for permanent financing occasioned by its substantial construction expenditures.

NEPCO intends to submit the proposed amendment to its stockholders for their approval at a special meeting of stockholders which is to be held on April 17, 1974, in lieu of the annual meeting. In connection therewith, NEPCO proposes, pursuant to Rule 62 under the Act, to solicit proxies from holders of its outstanding Dividend Series Preferred Stock to be voted at the annual meeting.

Expenses to be incurred in connection with the proposed transactions are estimated at $6,500, including services of the system service company, at cost, of $2,200. The declaration states that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions.

NEPCO has requested that the effectiveness of its declaration with respect to the solicitation of proxies from holders of its Dividend Series Preferred Stock be accelerated as provided in Rule 62.

Notice is further given that any interested person may, not later than April 5, 1974, request in writing that a hearing be held with respect to the proposed amendment of the By-laws, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles

V 39 N 54 MAR 19 74 XUM

from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20 (a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

It appearing to the Commission that NEPCO's declaration regarding the proposed solicitation of proxies should be permitted to become effective forthwith pursuant to Rule 62:

It is ordered, That the declaration regarding the proposed solicitation of proxies be, and it hereby is, permitted to become effective forthwith pursuant to Rule 62 and subject to the terms and conditions prescribed in Rule 24 under the Act.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NORTHEAST UTILITIES

Notice of Proposal To Increase Number of Shares of Authorized Common Stock; Order Authorizing Solicitation of Stockholders' Consent

MARCH 8, 1974.

Notice is hereby given that Northeast Utilities ("Northeast") 174 Brush Hill Ave., West Springfield, Mass. 01089, a registered holding company, has filed a declaration, and an amendment thereto, with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 6(a), 7, and 12(e) of the Act and Rule 62 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the amended declaration, which is summarized below, for a complete statement of the proposed transaction.

The Declaration of Trust of Northeast Utilities, which serves as Northeast's charter and bylaws, provides that the number of shares of authorized common stock is to be fixed by resolution of Northeast's stockholders. There are currently authorized 53 million shares of common stock, of which 45,876,693 shares are now outstanding. The common stock is Northeast's sole class of common stock. Northeast now proposes to increase the number of shares of authorized common stock to 75 million.

The amended declaration states that the construction program of Northeast's operating subsidiaries will require substantial additional financing over the next few years, which financing Northeast expects will be provided through sales of additional first mortgage bonds and preferred stock by the operating subsidiaries and of additional common stock by Northeast. Northeast currently contemplates issuing approximately 5 million shares of additional common stock in mid-1974, the proceeds of which will be used to make capital contributions to its operating subsidiaries and to reduce short-term borrowings of Northeast. The size and timing of any other future sales of common stock have not been fixed at this time, although Northeast states that, because of restrictions on the amounts of bonds and preferred stock which the operating subsidiaries are permitted to issue, it may be required to provide an increased portion of the financing needs through its own borrowings and sales of additional shares of common stock. Based on projections of financing requirements through 1978, Northeast states that it believes that the proposed increase in authorized common stock will prove sufficient to cover such financing needs over the next three to four year period.

The proposed increase in authorized common stock requires approval of two-thirds of the holders of the presently outstanding common stock. Approval will be sought for the proposal at Northeast's Annual Meeting to be held on April 23, 1974. Northeast proposes to solicit consents from its stockholders for use at such time. The relevant proxy materials have been filed with the Commission, and accelerated action thereon requested, pursuant to Rule 62.

The fees, commissions, and expenses incurred or to be incurred in connection with the proposed transaction will aggregate aproximately $2,500, which includes $1,500 for legal fees. It is stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than April 2, 1974, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said amended declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney-at-law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

It appearing to the Commission that the amended declaration, insofar as it pertains to the solicitation of the consent of Northeast's common stockholders should be permitted to become effective forthwith pursuant to Rule 62:

It is ordered, That the amended declaration regarding the proposed solicitation of the consent of Northeast's common stockholders be, and it hereby is, permitted to become effective forthwith pursuant to Rule 62 and subject to the terms and conditions prescribed in Rule 24 under the Act.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[70-5350]

OHIO POWER CO.

Post-Effective Amendment Regarding Issue and Sale of Notes to Banks and Commercial Paper Dealers

MARCH 12, 1974.

Notice is hereby given that Ohio Power Company; 301 Cleveland Ave., SW., Canton, Ohio 44701 ("Ohio"), an electric utility subsidiary company of American Electric Power Company, Inc., a registered holding company, has filed a second post-effective amendment to its application in this proceeding pursuant to section 6(b) of the Public Utility Holding Company Act of 1935 ("Act") regarding the following proposed transactions. All interested persons are referred to the application, as now amended, for a complete statement of the proposed transactions.

By orders dated June 29, 1973, and September 18, 1973 (Holding Company Act Release Nos. 18018 and 18100), the Commission granted Ohio's application requesting that until December 31, 1974, the exemption from the provisions of section 6(a) of the Act afforded to it by the first sentence of section 6(b) of the Act, relating to the issue of short-term notes, be increased to the extent necessary to cover the issuance and sale of notes to banks and to dealers in commercial paper up to $170,000,000 and not in excess of the maximum amount allowable under its Articles of Incorporation and as authorized by its preferred stockholders. Ohio now proposes to issue short-term notes to banks and commercial paper dealers in an aggregate amount not to exceed $215,000,000 outstanding at any one time, including short-term notes presently outstanding. The proposed notes will consist of (1) up to $28,165,000 of bank notes as previously authorized, (2) up to $20,000,000 of new demand notes as described below and (3) the previously authorized commercial paper which may now be issued in an aggregate amount of up to $215,000,000 less the amount of any short-term bank notes outstanding. The notes are to be issued from time to time prior to December 31, 1974, as funds are required, provided that none of the notes will mature later than June 30, 1975.

Ohio proposes to issue and sell its demand notes to the trust departments of Cleveland Trust Company, Cleveland, Ohio and Toledo Trust Company, Toledo, Ohio in maximum amounts of $10,000,000 each. It is stated that each of the bank trust departments has a flow of funds, as fiduciary for various accounts, which would be available for investment in such demand notes. These demand notes will be in the form of promissory notes in denominations of not less than $1,000 bearing an interest rate equivalent to the highest rate paid daily by General Motors Acceptance Corporation on its commercial paper with a maturity of less than 180 days. Notes issued from January 1 to June 30 will mature July 1 of the same year and those issued from July 1 to December 31 will mature on January 1 of the following year. The bank trust departments will have the right to demand payment at any time and Ohio will have the right to repay, without penalty, all or any part of the principal amount of such demand notes outstanding.

On January 14, 1974, the highest rate paid by General Motors Acceptance Corporation on its commercial paper with a maturity of less than 180 days was 9%. This rate was approximately ½% less than the rate at which Ohio was then able to issue commercial paper of comparable maturities and more than 1.5% below the effective rate for bank borrowings based on the current prime rate of 9¾% and compensating balances of 15% to 20%. Based on past experience, Ohio expects that the rate on these demand notes will consistently be lower than the comparable rates for commercial paper and bank borrowings including the effect of compensating balances.

Ohio proposes that certificates of notification under Rule 24 with respect to the issuance of Ohio's demand notes shall be filed quarterly as is presently done with respect to the issuance of Ohio's commercial paper.

No state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than April 4, 1974, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said post-effective amendment to the application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as now amended or as it may be further amended, may be granted as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

SCHOONER CAPITAL CORP.

Filing of Application Pursuant to Section 17(d) of the Act and Rule 17d-1 Thereunder

MARCH 13, 1974.

Notice is hereby given that Schooner Capital Corporation, 141 Milk Street, Boston, Massachusetts 02109 ("Applicant"), a Massachusetts corporation licensed as a small business investment company under the Small Business Investment Act of 1958, has applied for an order of the Commission, pursuant to section 17(d) of the Investment Company Act of 1940 ("Act") and Rule 17d-1 thereunder, permitting Applicant to purchase $100,000 of convertible debentures of Fire Control Engineering Co. ("Fire Control"). All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

All of Applicant's stock is owned by Asset Purchase & Management Co. ("APM"), a limited partnership formed under the laws of Massachusetts. Vincent J. Ryan, Jr., the general partner of APM, is president, treasurer, and director of Applicant and owns an estimated 35% beneficial interest in Applicant's stock. Mr. Ryan is also a director of Inventure Capital Corporation ("Inventure"), registered under the Act as a closed-end, non-diversified management investment company, and was its president from 1967 until his resignation on January 9, 1973.

V 39154 MAR 1974 XUM

James R. Kingsdale, a vice-president of Applicant since January, 1973, is a director of Fire Control.

Inventure owns 75,000 shares, or approximately 13.7% of the stock of Fire Control. It acquired these shares by purchasing 25,000 shares at $3 per share on June 9, 1970 and by converting its Fire Control debenture, also acquired on June 9, 1970, into 50,000 shares at $.50 per share in November, 1973. No public market exists for Fire Control's stock. On December 5, 1973, Inventure's stockholders voted to convert Inventure into an open-end investment company. The application states that the management of Inventure intends to reduce Inventure's holdings of restricted securities to not more than 10% of its net assets.

Applicant proposes to invest $100,000 in subordinated debentures of Fire Control convertible at $.50 per share into 200,000 shares. Fire Control currently has 546,618 shares of common stock outstanding. The proposed agreement restricts Fire Control's future borrowings and other corporate actions and requires Fire Control to maintain its net worth and working capital at specified levels. Applicant will be entitled to designate one member of Fire Control's board of directors and, in the case of default of the debentures, to designate a majority of Fire Control's board of directors, so long as the condition of default continues.

Under section 17(d) of the Act and Rule 17d–1 thereunder, it is unlawful for an affiliated person of an affiliated person of a registered investment company to effect any transaction in which such investment company is a joint or joint and several participant without the permission of the Commission. In passing upon applications for orders granting such permission, the Commission is required to consider whether the participation of the investment company in such joint enterprise or arrangement on the basis proposed is consistent with the provisions, policies, and the purposes of the Act and the extent to which such participation is on a basis different from or less advantageous than that of other participants. Rule 17d–1(c) under the Act defines "joint enterprise or other joint arrangement or profit-sharing plan" to include any written or oral plan, contract, authorization or arrangement, or any practice or understanding concerning an enterprise or undertaking whereby a registered investment company and any affiliated person of an affiliated person of such a company, have a joint or a joint and several participation, or share in the profits of such enterprise or undertaking, including, but not limited to, any stock purchase plan.

Under section 2(a)(3) of the Act, Applicant is an affiliated person of an affiliated person (Mr. Ryan) of a registered investment company (Inventure). Applicant believes that its proposed investment in Fire Control coupled with Inventure's existing investment in that company might be considered to be a joint enterprise or joint arrangement within the meaning of section 17(d) of the Act and Rule 17d–1 thereunder.

Applicant states that Inventure's board of directors has been informed of the investment opportunity in Fire Control and that Inventure's management has expressed no interest in making an additional investment in Fire Control. Applicant represents that, to the extent its investments in Fire Control would strengthen that company, Applicant would be increasing the potential marketability in Inventure's holdings of Fire Control's stock, thereby facilitating the attainment of Inventure's announced objective of reducing its portfolio of restricted securities.

Applicant further states that the per share conversion price of the Fire Control debentures proposed to be purchased by Applicant is the same as the price at which Inventure converted its Fire Control debentures in November 1973. Applicant also states that the granting of the application would be consistent with the provisions, policies and purposes of the Act, and that Inventure's participation would not be in a basis different from or less advantageous than that of Applicant.

Notice is further given, that any interested person may, not later than April 8, 1974, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

TARIFF COMMISSION

[337–L–71]

CERTAIN EYE TESTING INSTRUMENTS INCORPORATING REFRACTIVE PRINCIPLES

Notice of Complaint Received

The United States Tariff Commission hereby gives notice of the receipt on February 20, 1974, of a complaint under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), filed by American Optical Corporation, of Southbridge, Massachusetts, alleging unfair methods of competition and unfair acts in the importation and sale of certain eye testing instruments incorporating refractive principles which are embraced within claim 8 of U.S. Patent No. 2,923,200 owned by the complainant. Topcon Instrument Company of America, Inc., 170 5th Avenue, New York, New York has been named as either importing or offering for sale the subject product.

In accordance with the provisions of § 203.3 of its Rules of Practice and Procedure (19 CFR 203.3), the Commission has initiated a preliminary inquiry into the issues raised in the complaint for the purpose of determining whether there is good and sufficient reason for a full investigation, and if so whether the Commission should recommend to the President the issuance of a temporary exclusion from entry under section 337(f) of the Tariff Act.

A copy of the complaint is available for public inspection at the Office of the Secretary, United States Tariff Commission, 8th and E Streets, NW., Washington, D.C., and at the New York office of the Tariff Commission located in Room 437 of the Customhouse.

Information submitted by interested persons which is pertinent to the aforementioned preliminary inquiry will be considered by the Commission if it is received not later than April 26, 1974. Extensions of time for submitting information will not be granted unless good and sufficient cause is shown thereon. Such information should be sent to the Secretary, United States Tariff Commission, 8th and E Streets, NW., Washington, D.C. 20436. A signed original and nineteen (19) true copies of each document must be filed.

Issued: March 14, 1974.

By order of the Commission.

[337–L–59]

SNIPS AND SCISSORS

Notice of Dismissal of Preliminary Inquiry

On March 13, 1974, the U.S. Tariff Commission (Commissioner Leonard dissenting; Commissioner Young not participating) dismissed, without prejudice, preliminary inquiry No. 337–L–59, Snips and Scissors, due to the apparent absence of significant imports of the subject snips and scissors. The preliminary inquiry was instituted on the basis of a complaint filed with the Commission on February 20, 1973, by J. Wiss & Sons Company, Newark, New Jersey, alleging unfair methods of competition and unfair acts in the importation and/or sale of snips and scissors in the United States in violation of section 337 of the Tariff Act of 1930. Notice of the Commission's receipt of complaint and institution of the preliminary inquiry was published in the FEDERAL REGISTER on March 9, 1973 (38 FR 6449).

Issued: March 14, 1974.

By order of the Commission.

[SEAL] KENNETH R. MASON,
Secretary.

INTERSTATE COMMERCE COMMISSION

[Notice No. 467]

ASSIGNMENT OF HEARINGS

MARCH 14, 1974.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after March 19, 1974.

MC 107456 Sub 21, Harry L. Young and Sons, Inc., and MC 129631 Sub 39, Pack Transport, Inc., now assigned April 8, 1974, at Boise, Idaho, will be held at the Holiday Inn, 3300 Vista Avenue, instead of Room 395 Federal Bldg., 550 West Fort Street.

MC 82007 Sub-7, Samuel Cooper Gregg, now assigned March 18, 1974, at Wilmington, Delaware, is cancelled and application dismissed.

MC–1668, Sub 5, Riteway Express, now assigned March 25, 1974, at New York, N.Y., is postponed indefinitely.

MC–124211 Sub 234, Hilt Truck Line, Inc., now assigned April 1, 1974, at Chicago, Ill., is postponed indefinitely.

MC–108937 Sub 39, Murphy Motor Freight Lines, Inc., now assigned May 6, 1974, at St. Paul, Minn., is postponed indefinitely.

[No. AB–1 (Sub-No. 15 and 17)]

CHICAGO AND NORTH WESTERN TRANSPORTATION CO.

Abandonment of Line; Correction

Upon consideration of the record in the above-entitled proceedings and of a staff-prepared environmental threshold assessment survey which is available for public inspection upon request; and

It appearing, that no environmental impact statement need be issued in these proceedings, because these proceedings do not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. §§ 4321 et seq.; and good cause appearing therefore:

It is ordered, That applicant be, and is hereby, directed to publish the appended notice in a newspaper of general circulation in Rock and Jefferson Counties, Wis., within 15 days of the date of service of this order, and certify to this Commission that this has been accomplished.

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission at Washington, D.C., and by forwarding a copy to the Director, Office of

V 39 54 MAR 19 74 XUM

the Federal Register, for publication in the FEDERAL REGISTER.

Dated at Washington, D.C., this 21st day of February, 1974.

By the Commission, Commissioner Deason.

[SEAL] ROBERT L. OSWALD, *Secretary.*

No. AB–1 (Sub-No. 17)

CHICAGO AND NORTH WESTERN TRANSPORTATION COMPANY ABANDONMENT BETWEEN BELOIT AND EVANSVILLE, WIS., AND BETWEEN AFTON AND JANESVILLE, WIS.

No. AB–1 (Sub-No. 15)

CHICAGO AND NORTH WESTERN TRANSPORTATION COMPANY ABANDONMENT BETWEEN JANESVILLE AND FORT ATKINSON, WIS.

The Interstate Commerce Commission hereby gives notice that by order dated February 21, 1974, it has been determined that the proposed abandonments of the lines of the Chicago and North Western Transportation Company between Beloit and Evansville, Wis., (23 miles), Afton and Janesville, Wis. (5 miles), and Janesville and Fort Atkinson, Wis. (15.1 miles), if approved by the Commission, would not constitute a major Federal action significantly the quality of the human environment within the meaning of the National Environmenal Policy Act of 1969 (NEPA), 42 U.S.C. §§ 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4322(2)(C) of the NEPA.

It was concluded, among other things, that alternate rail service will continue to be available to most of the major stations along the line, with the possible exception of Footville. The abandonments are not important factors in the long-range development plans for the general area and are consistent with local land use plans in Wisconsin. Applicant has expressed a willingness to accept conditions upon any grant of authority in order to mitigate any adverse effects which might occur. The right-of-way of the rail line, if the abandonment is approved, is ideally suited for such recreational uses as a public bike and hiking trail. The determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available for public inspection upon request at the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202–343–6989.

Interested parties may comment on this matter by the submission of representations to the Interstate Commerce Commission, Washington, D.C. 20423, on or before April 3, 1974.

[FR Doc.74–6283 Filed 3–18–74;8:45 am]

FOURTH SECTION APPLICATION FOR RELIEF

MARCH 14, 1974.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with rule 40 of the general rules of practice (49 CFR 1100.40) and filed on or before April 3, 1974.

FSA No. 42816—*Grain and Grain Products to Kansas City, Missouri.* Filed by Great Plains Railway Company (No. 2), for itself and interested rail carriers. Rates on grain and grain products, in carloads, as described in the application, from specified points in Nebraska, to Kansas City, Missouri.

Grounds for relief—Carrier competition and rate relationship.

Tariffs—Supplement 16 to Union Pacific Railroad Company tariff 3159–I, I.C.C. No. 5745, and other schedules listed in the application. Rates are published to become effective on April 10, 1974.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[Notice No. 46]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before April 8, 1974. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC–FC–75000. By order of March 14, 1974, the Motor Carrier Board approved the transfer to Nebraska Beef Express, Inc., Ralston, Nebr., of Permit No. MC–134114 (Sub-No. 1) issued to Elmer Wilson, doing business as Nebraska Beef Express, Ralston, Nebr., authorizing the transportation of meat, meat products, and meat byproducts, from Omaha, Nebr., to points in Cook and Du Page Counties, Ill., Cedar Rapids, and Waterloo, Iowa, and Milwaukee, Kenosha, Madison, and Green Bay, Wis. Mr. Arlyn L. Westergren, Attorney at Law, 530 Univac Building, 7100 W. Center Road, Omaha, Nebr. 68106.

No. MC–FC–75006. By order of March 13, 1974, the Motor Carrier Board approved the transfer to Maplewood Transfer & Storage Co., Millburn, N.J., of Certificates Nos. MC–4186, MC–4186 (Sub-No. 1), and MC–4186 (Sub-No. 2) issued January 10, 1963, November 7, 1966, and May 3, 1968, respectively, to Edgar Rimback, doing business as Maplewood Transfer & Storage Company, Millburn, N.J., authorizing the transportation of household goods, between points in New Jersey, on the one hand, and, on the other, points in Connecticut, New York, and Pennsylvania; between points in five counties in New Jersey, on the one hand, and, on the other, points in New Jersey, New York, Pennsylvania, Connecticut, Rhode Island, Massachusetts, Delaware, Maryland, and the District of Columbia; and between Millburn, N.J., and points in New Jersey within 10 miles of Millburn on the one hand, and, on the other, New York, N.Y., and points in New Jersey and Pennsylvania. Mr. Robert B. Pepper, Registered Practitioner, 168 Woodbridge Avenue, Highland Park, N.J. 08904.

No. MC–FC–75013. By order entered March 13, 1974, the Motor Carrier Board approved the transfer to Grandview Enterprises, Inc., Portland, Oreg., of the operating rights set forth in Permits Nos. MC–128355 (Sub-No. 3) and MC–128355 (Sub-No. 4), issued November 24, 1970, and December 2, 1970, respectively, to Hurliman Trucking Company, a Corporation, San Jose, Calif., authorizing the transportation of automobile and truck parts and accessories, from Chicago and Rockford, Ill., East Chicago and Nappanee, Ind., Davenport, Iowa, Baltimore, Md., Detroit, Grand Rapids, Lansing, Saginaw, and Wyandotte, Mich., Cleveland and Toledo, Ohio, and Milwaukee, Wis., to Grants Pass and Portland, Oreg.; and from Romulus, Mich., Elkhart and Madison, Ind., Quincy and Flora, Ill., Akron and Whitehouse, Ohio, and Dallas, Tex., to Grants Pass and Portland, Oreg., under a continuing contract, or contracts with Auto Wheel Service, Inc. Earle V. White, 2400 SW. Fourth Ave., Portland, Oreg. 97201, attorney for applicants.

[Notice No. 34]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MARCH 1, 1974.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC–67 (49 CFR 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published

in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specified as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

No. MC 26396 (Sub-No. 118 TA), filed February 15, 1974. Applicant: POPELKA TRUCKING CO., doing business as THE WAGGONERS, P.O. Box 990, Livingston, Mont. 59047. Applicant's representative: Charlotte Vicars (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Beehive lumber and beekeeping equipment*, from Polson, Mont., to the International Boundary line between the United States and Canada located at Montana and North Dakota, for 180 days. SUPPORTING SHIPPER: Western Bee Supplies, Inc., P.O. Box 8, Polson, Mont. 59860. SEND PROTESTS TO: Paul J. Labane, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 222, U.S. Post Office Building, Billings, Mont. 59101.

No. MC 41406 (Sub-No. 37 TA), filed February 20, 1974. Applicant: ARTIM TRANSPORTATION SYSTEM, INC., 7105 Kennedy Avenue, P.O. Box 2176, Hammond, Ind. 46323. Applicant's representative: William J. Walsh (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from Granite City and E. St. Louis, Ill., and St. Louis, Mo., to points in Iowa and Missouri and those in the Kansas City, Kans., Commercial Zone, for 180 days.

NOTE.—Applicant states that he does intend to tack with his authority in MC 41406 and Subs 18, 27, and 29 at St. Louis, Mo. SUPPORTING SHIPPER: Granite City Steel Division of National Steel Corporation, 20th & State Street, Granite City, Ill. 62040. SEND PROTESTS TO: J. H. Gray, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 345 W. Wayne St., Room 204, Fort Wayne, Ind. 46802.

No. MC 64932 (Sub-No. 524 TA), filed February 21, 1974. Applicant: ROGERS CARTAGE CO., 10735 South Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: William F. Farrell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Resins, styrenes, anhydrides, alcohols, and glycols*, liquid, in bulk, in tank vehicles, from the plantsite of Marco Chemical at Jacksonville, Ark., to points in Colorado, Iowa, North Carolina, and South Carolina, for 180 days. SUPPORTING SHIPPER: Mr. Jules P. Augsdorfer, Vice President-Marketing, Marco Chemical Division, W. R. Grace & Co., 1711 West Elizabeth Ave., Linden, N.J. 07036. SEND PROTESTS TO: Robert G. Anderson, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Everett McKinley Dirksen Bldg., 219 S. Dearborn St., Room 1086, Chicago, Ill. 60604.

No. MC 64932 (Sub-No. 525 TA), filed February 21, 1974. Applicant: ROGERS CARTAGE CO., 10735 South Cicero Ave., Oak Lawn, Ill. 60453. Applicant's representative: William F. Farrell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemical waste products*, in bulk, in tank vehicles, from Warrick, Ind., to Chicago, Ill., for 90 days. SUPPORTING SHIPPER: Mr. James E. Carr, Corporate Traffic Manager, Nalco Chemical Company, 180 N. Michigan Ave., Chicago, Ill. 60601. SEND PROTESTS TO: Robert G. Anderson, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Everett McKinley Dirksen Bldg., 219 S. Dearborn St., Room 1086, Chicago, Ill. 60604.

No. MC 108859 (Sub-No. 60 TA), filed February 11, 1974. Applicant: CLAIRMONT TRANSFER CO., 1803 Seventh Avenue North, Escanaba, Mich. 49829. Applicant's representative: John L. Bruemmer, 121 W. Doty Street, Madison, Wis. 53703. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from Sault Ste. Marie, Mich., to Warsaw, Ind., and Louisville, Ky., for 180 days.

NOTE.—Applicant intends to tack with present authority between the United States-Canada boundary line at or near Sault Ste. Marie, Ontario. It intends to interline at the two destination points. SUPPORTING SHIPPER: Abitibi Paper Company, Ltd., Toronto-Dominion Centre, Toronto, Ontario, M5K 1B3. SEND PROTESTS TO: C. R. Flemming, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 225 Federal Building, Lansing, Mich. 48933.

No. MC 110420 (Sub-No. 702 TA), filed February 14, 1974. Applicant: QUALITY CARRIERS, INC., P.O. Box 186, Pleasant Prairie, Wis. 53158. Applicant's representative: Fred H. Figge (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Aqua ammonia* (with additives); and (2) *spent aqua ammonia*, in bulk, in tank vehicles, (1) from Union, Ill., to Calumet, Mich.; Cambridge, Ohio; Northfield, Minn.; and Eau Claire, Wis.; and (2) from Calumet, Mich.; Northfield, Minn.; Cambridge, Ohio; and Eau Claire, Wis., to Joliet and Union, Ill., for 180 days. SUPPORTING SHIPPER: Southern California Chemical Co., Inc., P.O. Box 432, Union, Ill. 60180 (John E. Radigan, Plant Manager). SEND PROTESTS TO: District Supervisor John E. Ryden, Interstate Commerce Commission, Bureau of Operations, 135 West Wells Street, Room 807, Milwaukee, Wis. 53203.

No. MC 111231 (Sub-No. 184 TA), filed February 19, 1974. Applicant: JONES TRUCK LINES, INC., 610 East Emma Avenue, Springdale, Ark. 72764. Applicant's representative: James B. Blair, 111 Holcomb Street, P.O. Box 869, Springdale, Ark. 72764. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber and lumber products*, from points in Carter County, Mo., to points in Georgia, Illinois, Indiana, Iowa, Kentucky, Michigan, Ohio, Tennessee, and Wisconsin, for 180 days. SUPPORTING SHIPPER: Risby Pallet & Lumber Company, Inc., Box 125, Elsinore, Mo. 63937. SEND PROTESTS TO: District Supervisor William H. Land, Jr., Bureau of Operations, Interstate Commerce Commission, 2519 Federal Office Building, 700 West Capitol, Little Rock, Ark. 72201.

No. MC 111729 (Sub-No. 419 TA), filed February 20, 1974. Applicant: PUROLATOR COURIER CORP., 2 Nevada Drive, Lake Success, N.Y. 11040. Applicant's representative: John M. Delany (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Payroll checks and management reports*, between Indianapolis, Ind., and Hamilton, Mich.; (2) *business papers, records, audit and accounting media of all kinds*, between Bluefield, W. Va., on the one hand, and, on the other, Cumberland, Md.; Coeburn, Norfolk, Richmond, Roanoke, and Salem, Va.; Kingsport, Tenn.; Cincinnati, Cleveland, Columbus, Dayton, Hopedale, Toledo, and Youngstown, Ohio; and Monroeville, Pa.; and (3) *computer parts, business machine parts, assemblies and supplies pertaining thereto*, restricted against the transportation of packages or articles weighing in the aggregate more than 100 pounds, from one consignor to one consignee on any one day; (a) from Pittsburgh, Pa., to Clarksburg, Fairmont, and Morgantown, W. WESTERN MARYLAND RAILWAY CO., ET AL.

Abandonment of Line

Upon consideration of the record in the above-entitled proceedings and of a staff-prepared threshold environmental assessment survey which is available for public inspection upon request; and

It appearing, that no environmental impact statement need be issued in these proceedings, because these proceedings do not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Evnronmental Policy Act of 1969, 42 U.S.S. §§ 4321 et seq., and good cause appearing therefore:

It is ordered, That applicant be, and is hereby, directed to publish the appended notice in newspapers of general circulation in Mineral and Morgan Counties, W. Va., Allegany and Washington Counties, Md., and Somerset and Fayette Counties, Pa., within 15 days of the date of service of this order, and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the office of the Secretary of the Commission at Washington, D.C., and by forwarding a copy to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

Dated at Washington, D.C., this 5th day of March 1974.

By the Commission, Commissioner Tuggle.

[SEAL] ROBERT L. OSWALD, *Secretary.*

No. AB-69 (Sub-No. 1)

WESTERN MARYLAND RAILWAY COMPANY ABANDONMENT OF PORTIONS OF ITS LINE OF RAILROAD BETWEEN TONOLOWAY, MD., AND CONNELLSVILLE, PA. AND BETWEEN RIDGELY, W. VA., AND DAWSON, MD.

Finance Docket No. 27406

WESTERN MARYLAND RAILROAD COMPANY, THE BALTIMORE AND OHIO RAILROAD COMPANY, AND THE BALTIMORE AND OHIO RAILROAD COMPANY IN PENNSYLVANIA APPLICATION FOR WESTERN MARYLAND RAILROAD COMPANY TO ACQUIRE TRACKAGE RIGHTS OVER THE LINE OF THE BALTIMORE AND OHIO RAILROAD COMPANY AND THE BALTIMORE AND OHIO RAILROAD COMPANY IN PENNSYLVANIA BETWEEN CHERRY RUN, W. VA., AND CONNELLSVILLE, PA., AND BETWEEN CUMBERLAND, MD., AND WEST VIRGINIA CENTRAL JUNCTION, W. VA.

The Interstate Commerce Commission hereby gives notice that by order dated March 5, 1974, it has been determined that the proposed abandonment of portions of the line of railroad of the Western Maryland Railway Company between Tonoloway, Md., and Connellsville, Pa., and between Ridgely, W. Va., and Dawson, Md., and distance of approximately 116.55 miles, and the application for Western Maryland Railway Company to acquire trackage rights of the line of railroad of the Baltimore and Ohio Railroad Company and the Baltimore and Ohio Railroad Company in Pennsylvania between Cherry Run, W. Va., and Connellsville, Pa., and between Cumberland, Md., and West Virginia Central Junction, W. Va., a distance of 184.40 miles, if approved by the Commission, would not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. §§ 4321 et seq., and between Cumberland, Md., and West mental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that inasmuch as the traffic moving over the Western Maryland line will be diverted to the nearby parallel tracks of the Baltimore and Ohio (under the trackage rights agreement), there would be no significant effect on the area's transportation scheme. Approval of the abandonment will facilitate the sale of the Western Maryland right-of-way to a number of public and private groups interested in using the land for conservation and recreational purposes. Furthermore, failure to remove the line will necessitate construction of a railroad tunnel under a new runway to be constructed at the Cumberland Municipal Airport, and it will necessitate construction of a highway underpass near Ohio Pyle, Pa. Approval of these applications will, therefore, be consistent with local and regional land use plans. The determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available for public inspection upon request at the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-343-6989.

Interested parties may comment on this matter by the submission of representations to the Interstate Commerce Commission, Washington, D.C. 20423, on or before April 3, 1974.

IMPLEMENTATION OF THE UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970

V 39 I 54 MAR 19 74 XUM

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER A—GENERAL

PART 4—IMPLEMENTATION OF THE UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970

The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91-646, became effective January 2, 1971. Its purpose is to provide uniform and equitable land acquisition policies and relocation assistance for displaced persons in connection with Federal or federally-assisted programs.

Pursuant to section 213 of the Act, the Environmental Protection Agency issued interim regulations on August 24, 1971 (36 FR 16626). Although invited, no comments were recieved concerning the interim regulations. Since their publication, the Office of Management and Budget has issued Guidelines for Implementation of the Act (OMB Circular A-103, May 1, 1972). These revised regulations have been based on those guidelines. Additionally, these regulations reflect the Agency's experience to date in implementing the Act and reflect the results of coordination with other Federal agencies to achieve uniformity in implementation.

Pursuant to Office of Management and Budget Circular A-85, "Consultation with heads of State and local governments in development of Federal regulations," the regulations have been reviewed by State and local organizations through the Advisory Commission on Intergovernmental Relations (ACIR). As a result of the single comment received following the ACIR review, regulation 4.600 has been revised to indicate that the acquisition of easements is subject to the policies and procedures governing land acquisition.

These regulations supersede those published as interim regulations August 24, 1971. Interested parties are encouraged to submit written comments concerning the regulations to the Director, Grants Administration Division, Environmental Protection Agency, Washington, D.C. 20460. All submissions received before July 1, 1974, will be considered prior to promulgation of the final regulations and will be available for examination in Room W437E, Waterside Mall West, 401 M Street, SW., Washington, D.C.

Effective date. The interim regulations of this part shall become effective March 19, 1974.

JOHN QUARLES,
Acting Administrator.

MARCH 7, 1974.

4.605 Acquisition of improvements.
4.606 Transfer of title expense.
4.607 Litigation expenses.
4.608 Real property provided by State Agency for an EPA project.

APPENDIX A—Records.

APPENDIX B—Regional and area offices—Department of Housing and Urban Development.

AUTHORITY: Sec. 213 of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91-646 (84 Stat. 1894).

Subpart A—General

§ 4.100 Purpose and policy.

(a) This part implements the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 which provides for the uniform and equitable treatment of persons displaced from their homes, businesses, or farms by Federal and federally-assisted projects and establishes uniform and equitable land acquisition policies for Federal and federally-assisted programs.

(b) In implementing the Act, it is the policy of the Environmental Protection Agency to deal consistently and fairly with all persons whose property is taken for public projects and all persons who are displaced from their homes, businesses or farms.

§ 4.101 Applicability.

This part applies to EPA projects and to EPA assisted projects which after January 1, 1971, cause the displacement of persons or the acquisition of real property.

§ 4.102 Definitions.

As used in this part—

§ 4.102-1 The Act.

The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Pub. L. 91-646 (84 Stat. 1894) approved January 2, 1971.

§ 4.102-2 Administrator.

The Administrator of the Environmental Protection Agency or his designee.

§ 4.102-3 Business.

A lawful activity, other than a farm operation, conducted primarily,

(a) For the purchase, sale, lease, or rental of personal and real property, or the manufacture, processing, or marketing of products, commodities, or other personal property;

(b) For the sale of services to the public;

(c) By a nonprofit organization; or

(d) Solely for the purposes of section 202(a) of the Act, for assisting in the purchase, sale, resale, manufacture, processing, or marketing of products, commodities, personal property, or services by the erection and maintenance of an outdoor advertising display or displays, whether or not such display or displays are located on the premises on which any of the above activities are conducted. Section 202(a) provides entitlement to payment for actual reasonable moving and related expenses.

§ 4.102-4 Displacing agency.

The Environmental Protection Agency in the case of an EPA project or a State agency (§ 4.102-14) in the case of a project receiving financial assistance from EPA.

§ 4.102-5 Dwelling.

The place of permanent or customary and usual abode of a person. It includes a single family building, a one-family unit in a multifamily building, a unit of a condominium or co-operative housing project, and any other residential unit, including a mobile home, which is either considered to be real property under State law or which cannot be moved without substantial damage or unreasonable cost.

§ 4.102-6 Economic rent.

The amount of rent a displaced homeowner or tenant would have to pay for a comparable dwelling in an area similar to the neighborhood in which the displacement dwelling is located.

§ 4.102-7 Family.

Two or more individuals who are related by blood, adoption, marriage, or legal guardianship who live together as a family unit. Others who live together as a family unit may be treated as if they were a family, upon determination by the Administrator.

§ 4.102-8 Farm operation.

A lawful activity conducted solely or primarily for the production of one or more agricultural products or commodities, including timber, for sale or home use and customarily producing those products or commodities in sufficient quantity to be capable of providing at least one-third of the operator's income. Where such operation is obviously a farm operation, however, it need not contribute one-third to the operator's income for him to be eligible for relocation payments.

§ 4.102-9 Federally assisted.

With respect to States or State agencies, assisted by a contract, grant, loan, or contribution by the United States, except any Federal guarantee or insurance and any annual payment or capital loan to the District of Columbia.

§ 4.102-10 Initiation of negotiations.

The date on which the displacing agency makes the first personal contact with the property owner or his representative and furnishes him with a written offer to purchase real property.

§ 4.102-11 Mortgage.

A lien commonly given to secure an advance on, or the unpaid purchase price of, real property under the laws of the State in which real property is located, together with any credit instruments secured thereby.

§ 4.102-12 Owner.

A person who holds fee title, a life estate, a 99-year lease, or an interest in a cooperative housing project which includes the right of occupancy of a dwelling unit, or is the contract purchaser of any such estate or interest, or who is possessed of such other proprietary interest in the property acquired as, in the judgment of the Administrator, warrants consideration as ownership. In the case of one who has succeeded to any of the foregoing interests by devise, bequest, inheritance or operation of law, the tenure of ownership, not occupancy, of the succeeding owner shall include the tenure of the preceding owner.

§ 4.102-13 Person.

Any individual, partnership, corporation or association.

§ 4.102-14 State agency.

A department, public body, agency or instrumentality of a State or of a political subdivision of a State, or any department,. agency or instrumentality of two or more States or of two or more political subdivisions of a State or States, the National Capital Housing Authority and the District of Columbia Redevelopment Land Agency.

§ 4.102-15 Tenant.

An individual or family who rents, or is temporarily in lawful possession of a dwelling, including a sleeping room.

§ 4.103 Displaced person; qualifications.

(a) Subject to the exceptions of paragraphs (d) and (e) of this section, a person qualifies as a displaced person if, after January 1, 1971, he moves from real property, or moves his personal property from real property, as a result of the acquisition of that real property, in whole or in part, or as the result of the written order of the acquiring agency to vacate real property, for a program or project undertaken by EPA or with EPA financial assistance.

(b) A person who moves from real property, or moves his personal property from real property, as a result of the acquisition of, or the written order of the acquiring agency to vacate, other real property on which such person conducts a business or farm operation (and the acquisition of that other real property is for an EPA or EPA-assisted project) is a displaced person solely for the purposes of sections 202(a), 202(b) and 205 of the Act. Those sections provide for entitlement to payment for moving and related expenses and to relocation assistance advisory services.

(c) A person may qualify as a displaced person regardless of:

(1) Whether the property is acquired by EPA or by a State agency receiving assistance from EPA;

(2) The name or status of the person who acquires or holds fee title to the property; or

(3) Whether EPA funds contribute to the payment for the property, if the property must be acquired for an EPA or EPA-assisted program or project.

(d) A person, other than the former owner or tenant, who enters into rental occupancy of real property after its ownership passes to the displacing agency, does not qualify as a displaced person for purposes of this part.

(e) A person who enters into occupancy of real property after the initiation of negotiations for that property or after the issuance of a notice of intent to acquire that property by a given date, does not qualify as a displaced person for purposes of this part.

§ 4.104 Appeals.

(a) *EPA administered projects.* Any person aggrieved by a determination made by EPA, in connection with an EPA project or program, concerning the eligibility for, or amount of, any payment to such person under the regulations in this part, may appeal to have his application reviewed by the Administrator. Appeals shall be submitted in writing and addressed to the Administrator, Environmental Protection Agency, Washington, D.C. 20460. No appeal will be considered unless it is received by the Administrator within 90 days of the date of receipt by the person aggrieved of written denial, in whole or in part, of his application for payment. The appeal should include written substantiation. An appeal may be presented by the attorney of the person aggrieved or by the person himself. The Administrator shall promptly issue a decision on the appeal, which decision may either uphold the original determination or allow prompt payment of any amounts which are determined to be due the claimant. The decision will be in writing, and state the facts and law upon which it is based. A copy of the decision will be furnished to the person aggrieved. The decision will constitute the final EPA decision on the application for payment.

(b) *EPA-assisted projects.* An applicant for a payment under an EPA assisted project who is aggrieved by a displacing agency's determination as to the applicant's eligibility for payment or the amount of the payment may appeal that determination in accordance with the procedures established by the displacing agency. Each displacing agency shall establish procedures for reviewing appeals by aggrieved applicants for payments. The procedures shall insure that:

(1) Each applicant has the opportunity for oral and written presentation and the right to have counsel participate in such presentation;

(2) Each appeal will be decided promptly;

(3) Each appeal decision will include a written statement of the reasons upon

V 39 54 MAR 19 74 XUM

which it is based and a copy of such decision will be furnished the appellant;

(4) Prompt payment is made of any amounts which are determined to be due the claimant.

(5) The agency retains all documents associated with each appeal; and

(6) Each appellant applicant has a final appeal to the head of the displacing agency.

§ 4.105 Records.

Each displacing agency shall maintain relocation records in accordance with the requirements of Appendix A to this part and make them available during regular business hours for inspection by the Administrator. The records shall be retained by the agency for at least 3 years after completion of a project.

§ 4.106 Application for benefits.

Application for benefits under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 are to be made within eighteen months from the date on which the displaced person moves from the real property acquired or to be acquired; or the date the displacing agency makes final payment of all costs of that real property, whichever is the later date. The Administrator may extend this period upon a proper showing of good cause.

§ 4.107 Payment not to be considered income.

Displacing agencies must advise all displaced persons that no payment received under Title II of the Act shall be considered as income for the purposes of the Internal Revenue Code of 1954, or for the purposes of determining eligibility of any person for assistance under the Social Security Act or any other Federal law.

Subpart B—Moving and Related Expenses

§ 4.200 General.

Any displaced person, including one who conducts a business or farm operation, is eligible to receive a payment for moving expense. A displaced person may elect to receive actual reasonable moving and related expenses or a fixed moving expense allowance.

§ 4.201 Payment of actual moving and related expenses.

§ 4.201–1 Allowable moving expenses.

(a) Transportation of individuals, families, and personal property from the acquired site to the replacement site, not to exceed a distance of 50 miles, except where the displacing agency determines that relocation beyond this 50 mile area is justified.

(b) Packing, unpacking, crating, and uncrating of personal property.

(c) Advertising for packing, crating, and transportation when the displacing agency determines that it is necessary.

(d) Storage of personal property for a period generally not to exceed 12 months when the displacing agency determines that storage is necessary in connection with relocation.

(e) Insurance premiums covering loss and damage of personal property while in storage or transit.

(f) Removal, reinstallation, reestablishment, including such modification as deemed necessary by the displacing agency of personal property, and reconnection of utilities for machinery, equipment, appliances, and other items, not acquired as real property. Prior to payment of any expenses for removal and reinstallation of such property, the displaced person shall be required to agree in writing that the property is personal and that the displacing agency is released from any payment for the property.

(g) Property lost, stolen, or damaged (not caused by the fault or negligence of the displaced person, his agency or employees) in the process of moving, where insurance to cover such loss or damage is not available.

(h) Such other actual reasonable expenses determined by the Administrator to be allowable and directly attributable to moving because of displacement.

§ 4.201–2 Limitations.

(a) When the displaced person accomplishes the move himself, the amount of payment shall not exceed the estimated cost of moving commercially, unless the Administrator determines a greater amount is justified.

(b) When an item of personal property which is used in connection with any business or farm operation is not moved but sold and promptly replaced with a comparable item, reimbursement shall not exceed the replacement cost minus the proceeds received from the sale, or the estimated costs of moving, whichever is less.

(c) When personal property which is used in connection with any business or farm operation to be moved is of low value and high bulk, and the cost of moving would be disproportionate in relation to the value, in the judgment of the head of the displacing agency, the allowable reimbursement for the expense of moving the personal property shall not exceed the difference between the amount which would have been received for such item on liquidation and the cost of replacing the same with a comparable item available on the market. This provision will be applicable in the case of moving of junk yards, stockpiled sand, gravel, minerals, metals, and similar items of personal property.

(d) If the cost of moving or relocating an outdoor advertising display or displays is determined to be equal to or in excess of the in-place value of the display, consideration should be given to acquiring such display or displays as a part of the real property, unless such acquisition is prohibited by State law.

§ 4.201–3 Nonallowable moving expenses and losses.

No payment will be made under this subpart for:

(a) Additional expenses incurred because of living in a new location.

(b) Cost of moving structures or other improvements in which the displaced person reserves ownership except as otherwise provided by law.

(c) Improvements to the replacement site, except when required by law.

(d) Interest on loans to cover moving expenses.

(e) Loss of good-will.

(f) Loss of profits.

(g) Loss of trained employees.

(h) Personal injury.

(i) Cost of preparing the application for moving and related expenses.

(j) Payment for search cost in connection with locating a replacement dwelling.

(k) Any other expense found by the Administrator not to be a necessary, actual and reasonable cost of moving.

§ 4.201–4 Expenses in searching for replacement business or farm.

(a) Actual reasonable expenses incurred by the displaced person in searching for a replacement business or farm may be allowed as follows:

(1) Actual travel costs.

(2) Extra costs for meals and lodging.

(3) Time spent in searching at the rate of the displaced person's salary or earnings, but not to exceed $10 per hour.

(4) In the discretion of the displacing agency, necessary broker, real estate, or other professional fees to locate a replacement business or farm operation.

(b) The total amount which a displaced person may be paid for searching expenses may not exceed $500 unless the Administrator determines that a greater amount is justified based on the circumstances involved.

§ 4.201–5 Actual direct losses by business or farm operation.

Actual direct losses of tangible personal property as a result of moving or discontinuing a business or farm operation are reimbursable.

(a) When the business or farm operation is discontinued, the displaced person is entitled to the difference between the fair market value of the personal property for continued use at its location prior to displacement and the sale proceeds, or the estimated costs of moving 50 miles, whichever is less.

(b) When the personal property is abandoned, the displaced person is entitled to payment for the fair market value of the property for continued use at its location prior to displacement, or the estimated cost of moving 50 miles, whichever is less.

(c) The cost of removal of the personal property shall not be considered as an offsetting charge against other payments to the displaced person.

(d) The displaced person must make a bona fide effort to sell personal property not moved.

§ 4.205 Payment of a fixed moving expense allowance.

§ 4.205–1 Occupants of dwellings.

A person displaced from a dwelling can elect in lieu of payment for actual reasonable moving and related expenses:

(a) A dislocation allowance of $200; and

(b) A moving expense allowance, not to exceed $300, based on a moving allowance schedule for the jurisdiction in which displacement occurs.

(1) Moving allowance schedules maintained by the respective State highway departments should be used as the basis for the displacement agency's moving allowance schedules. These schedules should provide for adequacy of reimbursement in every locality.

(2) The Federal Highway Administration will make current schedules available to displacing agencies upon request.

(3) In areas where there are no highway department schedules, the displacing agency shall cooperate with other displacing agencies in the development of a single moving expense schedule for the use of all such agencies.

§ 4.205–2 Business.

A displaced person who conducts a bona fide business may elect, in lieu of payment for actual reasonable moving and related expenses a fixed amount equal to the average annual net income of the business computed in accordance with § 4.206 below but not less than $2,500 or more than $10,000, if that business:

(a) Substantially contributes to the income of the displaced person;

(b) Cannot, in the opinion of the displacing agency, be relocated without substantial loss of existing patronage taking into consideration:

(1) The type of the business;

(2) The nature of its clientele; and

(3) The relative importance of the displacement and proposed relocation sites to the business; and

(c) Is not part of a commercial enterprise having at least one other establishment engaged in the same or similar business which is not being acquired by a State agency or the United States.

(d) Is not an outdoor advertising business.

§ 4.205–3 Farm operations.

(a) A displaced person who conducts a farm operation may elect, in lieu of payment for actual reasonable moving and related expenses, a fixed amount equal to the average annual net earnings of the farm operation, computed in accordance with § 4.206 below, but not less than $2,500 or more than $10,000.

(b) In the case of a partial acquisition and displacement of a farm operation, the fixed allowance described in paragraph (a) of this section may be paid only if the displacing agency finds that:

(1) The displaced activity was a farm operation before the acquisition of the displacement site; and

(2) The property remaining after acquisition is not an economic unit.

§ 4.205–4 Nonprofit organizations.

(a) A displaced person who conducts a nonprofit organization may elect, in lieu of payment for actual reasonable moving and related expenses, a fixed amount equal to the average annual net income of the nonprofit organization computed in accordance with § 4.206 below but not less than $2,500 or more than $10,000.

(b) Where a nonprofit organization is displaced, no payment shall be made under this subpart until after the Administrator determines:

(1) That the nonprofit organization cannot be relocated without a substantial loss of its existing patronage. The term "existing patronage" as used in connection with nonprofit organizations includes the persons, community or clientele served or affected by the activities of the nonprofit organization.

(2) That the nonprofit organization is not part of a commercial enterprise having at least one other establishment not being acquired which is engaged in the same or similar activity.

§ 4.206 Computing average annual net income; businesses and farm operations.

(a) The average annual net income of a business or farm operation is its average annual net earnings before Federal, State and local income taxes during the 2 tax years immediately preceding the tax year in which it is displaced. Net earnings include compensation obtained from the business or farm operation by its owner, his spouse, or dependents or in the case of a corporate owner, by the holder of a majority of the common stock, his spouse, or dependents.

(b) For the purpose of determining majority ownership, stock held by an individual, his spouse, and his dependents shall be treated as a unit.

(c) If the 2 tax years immediately preceding displacement are not representative, or if the business or farm operation has not been in operation that long, the displacing agency may, with the concurrence of the Administrator, prescribe some other time period for computing average annual net income.

(d) If a displaced person who conducts a business or farm operation elects to receive a fixed payment under this subpart, he shall provide proof of his earnings from the business or farm operation to the displacing agency. Proof of earnings may be established by income tax returns, certified financial statements, or other similar evidence.

§ 4.210 Application for payment.

(a) Application for payment of moving and related expenses shall be in writing and filed with the displacing agency no later than 18 months after either the date of acquisition of the dwelling, business or farm by the agency or the date the applicant vacated the dwelling, business or farm, whichever is later.

(b) Applications shall include an itemization of the expenses involved and, except as provided in paragraphs (d) and (e) of this section, shall be supported by receipts and such other evidence as the displacing agency may require. Itemization of moving expenses is not required if the displaced person has elected the payment of a fixed moving expense allowance.

(c) A displaced person may not be paid for his moving expenses in advance of the actual move unless the displacing agency finds that a hardship would otherwise result.

(d) If a displaced person, his mover, and the displacing agency agree by prearrangement in writing, the displaced person may submit an unpaid bill for moving expenses for direct payment.

(e) If the displacing agency contracts with independent movers on a schedule basis and provides a displaced person with a list of movers he may choose from to move his personal property, payment shall be made directly to the mover.

Subpart C—Replacement Housing

§ 4.301 Determinations or assurances required before displacement.

(a) No project which will result in the displacement of any person will be approved until the Administrator has determined, in the case of an EPA project, or has received satisfactory assurances, in the case of an EPA supported project, that:

(1) Fair and reasonable relocation payments will be provided to displaced persons as required by Subparts B and C of this part;

(2) Relocation assistance programs offering the services described in Subpart D of this part will be provided for displaced persons;

(3) The public was or will be adequately informed of the relocation payments and services which will be available under Subparts B, C, and D of this part; and

(4) Comparable replacement dwellings will be available, or provided if necessary, a reasonable period in advance of the time any person is to be displaced.

(b) The displacing agency will not proceed with any phase of a project which will cause the displacement of any person until the Administrator has determined, in the case of an EPA project, or has received satisfactory assurances in the case of an EPA-supported project, that replacement housing will be:

(1) Decent, safe, and sanitary (as defined in § 4.303);

(2) Functionally equivalent and substantially the same as the dwelling being acquired (but not excluding newly constructed housing) with respect to:

(i) Number of rooms;

(ii) Area of living space;

(iii) Age, and

(iv) State of repair.

(3) In an area not generally less desirable in regard to public utilities and public and commercial facilities;

(4) Reasonably accessible to the displaced person's place of employment;

(5) Adequate to accommodate the displaced family or individual;

(6) In an equal or better neighborhood;

(7) Available on the market and at rents or prices within the financial means of the families and individuals displaced;

(8) Sufficient in number for the displaced persons who require them;

(9) Consistent with the requirements of Title VIII of the Civil Rights Act of 1968 (Pub. L. 90–204);

(10) Based on a current survey and analysis of available replacement hous-

V 39 54 MAR 19 74 XUM

ing and in consideration of competing demands on available housing.

(c) In case of emergency, extreme hardship or similar extenuating circumstances assurances of availability may be waived with the concurrence of the Administrator. Any waiver must be supported by appropriate findings and a determination of necessity.

§ 4.302 Replacement housing unavailable.

When it is determined that adequate replacement housing is not available and cannot otherwise be made available, the Administrator may take action or approve action for a State agency to develop replacement housing. The Administrator, in taking or approving any action to develop replacement housing will be guided by the criteria and procedures issued by the Secretary of Housing and Urban Development.

§ 4.303 Decent, safe, and sanitary housing requirements.

(a) A decent, safe, and sanitary housekeeping dwelling is one which:

(1) Meets State or local housing codes;

(2) Is sound, clean, and weathertight;

(3) Has a kitchen with fully usable sink;

(4) Has a cooking stove, or utility service connections;

(5) Has a separate complete bathroom;

(6) Has hot and cold running water in the bathroom and kitchen;

(7) Has a continuing and adequate supply of potable water;

(8) Has an adequate and safe wiring system for lighting and other electrical services; and

(9) Has heating as required by climatic conditions and local codes.

(b) A decent, safe, and sanitary nonhousekeeping dwelling is one which:

(1) Meets State or local codes for boarding houses, hotels, or other congregate living;

(2) Has heating as required by climatic conditions and local codes;

(3) Has an adequate and safe wiring system;

(4) Is sound, clean, and weathertight; and

(5) Has use of a complete bathroom with hot and cold running water and affords privacy to a person within it, including a door that can be locked if the facilities are separate from the nonhousekeeping unit.

(c) If the applicable housing code does not meet all the requirements for housekeeping or nonhousekeeping units, as appropriate, but is reasonably comparable, a copy of the local code must be submitted to the Administrator for approval as acceptable standards for decent, safe, and sanitary housing.

§ 4.310 Replacement housing payment for homeowners.

A displaced owner-occupant is eligible for a replacement housing payment, not to exceed $15,000, if he meets both of the following requirements:

(a) Actually owned and occupied the acquired dwelling from which displaced for not less than 180 days prior to the initiation of negotiations for the property.

(b) Purchases and occupies a replacement dwelling, which is decent, safe, and sanitary, not later than the end of the one-year period beginning on the date on which he receives from the displacing agency the final payment of all costs of the acquired dwelling, or on the date on which he moves from the acquired dwelling, whichever is the later date.

§ 4.311 Computation of payment—180-day owners.

The replacement housing payment of not more than $15,000 to a homeowner is comprised of the following:

(a) *Differential payment for comparable replacement dwelling.* This payment is the lower of:

(1) $15,000 less payment for any increased interest costs or incidental expenses (paragraphs b and c of this section).

(2) The amount representing the difference between the acquisition price of the acquired dwelling and the costs of a decent, safe, sanitary, comparable replacement dwelling. (See § 4.330 below for methods of determining replacement dwelling cost).

(3) The amount representing the difference between the acquisition price of the acquired dwelling and the actual purchase price of a decent, safe, sanitary dwelling voluntarily purchased and occupied by the displaced person.

(b) *Interest payment.* If there was a bona fide mortgage (a valid lien on the acquired dwelling for not less than 180 days prior to the initiation of negotiations) the displaced owner-occupant shall be compensated for any increased interest costs including points paid by the purchaser.

(1) The amount payable is the present value of the difference in interest costs and other debt service costs charged for refinancing an amount not more than the balance of the mortgage on the acquired dwelling at the time of acquisition over a period not more than the remaining term of that mortgage.

(2) The present value of the increased interest cost shall be computed at the prevailing interest rate paid on passbook savings deposits by commercial banks in the area in which the replacement dwelling is located.

(3) The interest charge on the new mortgage may not exceed the prevailing interest rate currently charged by mortgage lending institutions in the area.

(c) *Incidental expenses.* The displaced owner-occupant shall be reimbursed for actual costs incurred by him incident to purchase of the replacement dwelling. Prepaid expenses and any expense which is part of the finance charge under the Truth in Lending Act, Title I, Pub. L. 90–321, and Regulation "Z" (12 CFR Part 226) issued by the Board of Governors of the Federal Reserve System, may not be reimbursed. Incidental expenses include:

(1) Legal, closing and related costs, including title search, preparing conveyance instruments, notary fees, surveys, preparing plats, and charges incident to recordation.

(2) Lenders', FHA or VA, appraisal fees.

(3) FHA or VA application fees.

(4) Certification of structural soundness when required by the lender, FHA or VA.

(5) Credit report.

(6) Title policies or abstract of title.

(7) Escrow agent's fee.

(8) State revenue stamps or sale or transfer taxes.

§ 4.320 Replacement housing payments for tenants and certain others.

(a) A displaced tenant or owner-occupant of a dwelling for less than 180 days is eligible for a replacement housing payment not to exceed $4,000 if he meets both of the following requirements:

(1) Actually occupied the dwelling for not less than 90 days prior to the initiation of negotiations for acquisition of the property.

(2) Is not eligible to receive a payment under § 4.310.

(b) An owner-occupant of a dwelling for not less than 180 days prior to the initiation of negotiations is eligible for a replacement housing payment as a tenant, when he rents, instead of purchases, a decent, safe, and sanitary replacement dwelling not later than the end of the one year period beginning (1) on the date that he receives final payment for the acquired dwelling, or (2) on the date when he moves from the acquired dwelling, whichever is later.

§ 4.321 Computation of rental replacement housing payments.

Eligible displaced tenants or owner-occupants who elect to rent a replacement dwelling may receive a replacement housing payment, not to exceed $4,000, determined as follows:

(a) The amount payable for rent to a displaced tenant, other than a tenant of the displacing agency, is 48 times the reasonable monthly rent for a comparable replacement dwelling, less 48 times the average month's rent paid by the displaced tenant for the last 3 months before initiation of negotiations for the acquired dwelling if that rent was reasonable, and if not reasonable, 48 times the monthly economic rent for the dwelling unit as established by the displacing agency.

(b) The amount payable for rent to a displaced tenant of the displacing agency is 48 times the reasonable monthly rent for a comparable replacement dwelling less 48 times the monthly economic rent.

(c) The amount payable for rent to a displaced homeowner is 48 times the reasonable monthly rent for a comparable replacement dwelling less 48 times the monthly economic rent, but not more than the homeowner would receive if he were eligible for a payment under § 4.311.

(d) In no event, however, shall the rental payment, when added to the average month's actual or, if appropriate, economic rent, exceed the actual rent that the displaced person or homeowner pays for the replacement dwelling.

(e) In determining the reasonable monthly rent for a comparable replacement dwelling the displacing agency shall use one of the following methods:

(1) It may establish a schedule of monthly rents for each type of dwelling required. The schedule shall be based on an analysis of the available private market. If more than one agency is administering a project causing displacement in the area, it shall cooperate with those agencies in establishing a uniform schedule for the area.

(2) It may determine a reasonable rent by examining the rent of at least three comparable replacement dwellings available on the private market.

(3) If it finds that the methods described in subparagraphs (1) and (2) of this paragraph are not feasible the displacing agency may propose what it considers to be a feasible method to the Administrator for approval.

§ 4.322 Computation of replacement housing down payment—tenants and 90-day owners.

If the tenant elects to purchase replacement housing within one year from displacement instead of renting, the payment shall be computed by determining the amount necessary to enable him to make a down payment and to cover incidental expenses on the purchase of replacement housing, as follows:

(a) The down payment shall be the amount necessary to make a down payment on a comparable replacement dwelling. Determination of the amount necessary for such down payment shall be based on the amount of down payment that would be required for purchase of the dwelling using a conventional loan.

(b) Incidental expenses of closing the transaction are those described in § 4.311(c).

(c) The amount required to be paid by the purchaser as points or as an origination or loan service fee is includable if such fees are normal to real estate transactions in the area.

(d) The maximum payment may not exceed $4,000 and if more than $2,000 is required, the tenant must match any amount in excess of $2,000 by an equal amount in making the down payment.

(e) The full amount of the replacement housing payment must be applied to the purchase price and incidental costs shown on the closing statement.

§ 4.330 Determination of cost of replacement dwelling.

In determining the reasonable cost of a comparable replacement dwelling available on the private market, the displacing agency shall use one of the following methods:

(a) It may establish a schedule of reasonable acquisition costs for the various types of comparable replacement dwellings which are available on the private market. If more than one agency is administering a project causing displacements in the area, it shall cooperate with those agencies in establishing a uniform schedule for the area. The schedule must be based on a current analysis of the market to determine a reasonable cost for each type of dwelling to be purchased. In large urban areas this analysis may be confined to one area of the city, or may cover several different areas if they are comparable and equally accessible to public services and places of employment. To assure the greatest comparability of dwellings, the analysis shall be divided into classifications by type of construction, number of rooms, and price ranges.

(b) It may determine the reasonable cost of a comparable replacement dwelling by examining the probable selling prices of at least three comparable replacement dwellings which are available. Selection of the dwellings must be made by a qualified employee or agent of the displacing agency who is familiar with real property values and current real estate transactions.

(c) If it finds that the methods described in paragraphs (a) and (b) of this section are not feasible for determining the reasonable cost of a comparable replacement dwelling, it may propose what it considers to be a feasible method to the Administrator for approval.

§ 4.331 Rules for considering land values.

In determining the amount of the replacement housing payment the following provisions shall be applied.

(a) If the dwelling is located on a tract typical for residential use in the area, the maximum replacement housing amount payable is the probable selling price of a comparable replacement dwelling on a tract typical for the area, less the acquisition price of the acquired property.

(b) If the dwelling is located on a tract larger than typical for residential use in the area, the maximum replacement housing amount payable is the probable selling price of a comparable replacement dwelling on a tract typical for the area, less the estimated value of the dwelling at the present location on a homesite typical in size for residential use in the area.

(c) If the dwelling is located on a tract where the fair market value is established on a higher and better than residential use, the maximum replacement housing amount payable is the probable selling price of a comparable replacement dwelling on a tract typical for residential use in the area, less the estimated value of the dwelling assuming it was located on a tract typical for residential use in the area.

§ 4.332 Partial use of home for business or farm operation.

(a) In the case of a displaced homeowner or tenant who has allocated part of his dwelling for use in connection with a displaced business or farm operation, a replacement housing payment may not be paid for that part of the property which is allocated to the business or farm operation.

(b) The eligibility of a person to receive moving expense under this part is not affected by this section.

§ 4.333 Multiple occupants of a single dwelling.

(a) If two or more families, or an individual and a family, occupy the same dwelling, each such individual or family that elects to relocate separately is entitled to a separately computed replacement housing payment.

§ 4.334 Multifamily dwelling.

In the case of a displaced homeowner who is required to move from a one-family unit of a multifamily building which he owns, the replacement housing payment shall be based on the cost of a comparable one-family unit in a multifamily building or a single family structure without regard for the number of units in the building being acquired.

§ 4.335 Application and payment.

(a) Upon application by a displaced homeowner or tenant who meets the requirements of this subpart for a replacement housing payment, the displacing agency shall:

(1) If he has purchased or rented, and occupied a decent, safe, and sanitary dwelling, make the payment directly to him, or at his option to the seller or lessor of the decent, safe, and sanitary dwelling; or

(2) If he has purchasd or rented, but not yet occupied a decent, safe, and sanitary dwelling, upon his request make the payment into an escrow account.

(b) The application shall be in writing and filed with the displacing agency within 18 months after the date the applicant was required to vacate an acquired dwelling or 6 months after final adjudication of a condemnation proceeding, whichever is later.

§ 4.336 Certificate of eligibility pending purchase of replacement dwelling.

Upon request by a displaced homeowner or tenant who has not yet purchased and occupied a comparable replacement dwelling, but who is otherwise eligible for a replacement housing payment under this subpart, the displacing agency shall certify to any interested party, financial institution, or lending agency, that the displaced homeowner or tenant will be eligible for the payment of a specific sum if he purchases and occupies a decent, safe, and sanitary dwelling within the prescribed time limit.

§ 4.337 Inspection of replacement dwelling required.

(a) Before making a replacement housing payment to a displaced homeowner or tenant, or releasing a payment from escrow, the displacing agency shall inspect the replacement dwelling to determine whether or not it meets the criteria for decent, safe, and sanitary dwellings. The displacing agency may use the services of any public agency ordinarily engaged in housing inspection to conduct the inspection.

V 39 54 MAR 19 74 XUM

(b) A determination by the displacing agency that a dwelling meets the criteria for decent, safe, and sanitary housing is solely for the purpose of this subpart and is not a representation for any other purpose.

Subpart D—Relocation Assistance Advisory Services

§ 4.400 Requirements for relocation assistance advisory programs.

The displacing agency must provide a relocation assistance advisory program for displaced persons. The program must provide for:

(a) Explaining to displaced persons the relocation assistance and payments that are available.

(b) Assisting displaced persons to complete applications required for payments;

(c) Determining the needs of displaced persons for relocation assistance.

(d) Informing displaced persons as to the availability and cost of comparable replacement dwellings and comparable locations for displaced business and farm operations;

(e) Assisting each displaced person to obtain and move to a comparable replacement dwelling;

(f) Informing displaced persons as to Federal and State housing programs; and

(g) Providing counsel and advice to displaced persons that will minimize the hardships associated with adjusting to a new location.

§ 4.401 Extension of service.

If a displacing agency determines that any person occupying property immediately adjacent to the real property acquired is caused substantial economic injury because of the acquisition, relocation advisory services may be offered such person.

§ 4.402 Displaced person declining to accept relocation services.

A displaced person is not required to accept the relocation services provided for his benefit. He may choose to relocate on his own and still be eligible for payment if the replacement housing meets the occupancy requirements of decent, safe, and sanitary housing and application for payment is within the prescribed time limits.

§ 4.403 Information for displaced persons.

(a) The displacing agency must deliver to each displaced person either in person or by certified mail, return receipt requested:

(1) A brochure or letter explaining the relocation assistance advisory program; and

(2) If it is not included in the brochure, a notice stating the eligibility requirements for payments for replacement housing and moving expenses.

(3) In addition, if the displaced person is a homeowner or tenant, a written statement setting forth the optional types and the actual amount of replacement housing payments to which he is entitled.

(b) The information required by paragraph (a) of this section shall be furnished:

(1) To homeowners not later than the initiation of negotiations for the property or the issuance of a written notice of intent to acquire the property by a definite date, as the case may be; and

(2) To tenants within 15 days after the initiation of negotiations for the property or the issuance of a written notice of intent to acquire the property by a definite date as the case may be.

(c) The displacing agency shall notify each displaced person of his right to appeal.

§ 4.404 Public information.

(a) To insure public awareness of its relocation assistance advisory program, the displacing agency shall provide an opportunity for presentation of information and discussion of relocation services and payments at public hearings, prepare a relocation brochure, and give full and adequate public notice of the relocation program for each project to which this part applies.

(b) In areas where a language other than English is predominant, public information shall be published in the predominant language as well as in English.

§ 4.405 Coordination of relocation activities.

(a) When the displacing agency contemplates displacement in a given area, it shall furnish to the appropriate HUD area office information regarding projects which will cause displacement and shall consult with that office concerning the availability of housing. HUD Regional offices should be used in areas not served by an area office.

(1) A directory of HUD Regional and area offices is provided in Appendix B to this part. Subsequent updated directories can be obtained from the Department of Housing and Urban Development.

(b) Pursuant to the requirements and procedures promulgated by Office of Management and Budget Circular A–95 (Revised), the displacing agency shall consult appropriate local officials through the State clearinghouse.

(c) The displacing agency shall designate at least one representative who will meet periodically with the representatives of other displacing agencies to review the impact of their respective programs on the area.

(d) The displacing agency shall establish channels of communication and coordinate its displacement activities with other agencies planning or carrying out relocation in the affected area. The person assigned by the displacing agency to provide relocation assistance for a particular project shall maintain personal contact and exchange information with welfare agencies, urban renewal agencies, redevelopment authorities, public housing authorities, the Federal Housing Administration, the Veterans Administration, the Small Business Administration and other agencies providing services to displaced persons. He shall also collect and maintain information on private replacement properties in the area of the project through personal contact with real estate brokers, real estate boards, property managers, apartment owners and operators, and home building contractors.

§ 4.406 Contracting for relocation services.

(a) To prevent unnecessary expenses and duplication of activities, an agency that is required to provide relocation services or make relocation payments under this part may carry out any of those functions through the facilities, personnel, and services of a Federal, State, or local governmental or private agency having an established organization for conducting relocation assistance programs.

(b) When a central relocation agency is available in the project area or community, the displacing agency shall consider entering into an agreement with such agency. Regional and area offices of the Department of Housing and Urban Development can provide information concerning relocation service agencies. (Appendix B to this part).

(c) If a central relocation agency is not available or is unable, in the judgment of the displacing agency, to provide the necessary services within the time required, the displacing agency may provide relocation services through contracts with another public agency or a private contractor.

§ 4.406–1 Written agreement required.

If the displacing agency elects to provide relocation services or make relocation payments through another agency, it shall enter into a written agreement with that agency. The agreement must be approved by the Administrator and must contain the following:

(a) An obligation on the part of the other agency to perform the services and make the relocation payments in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, and this part.

(b) If the contract is with a public agency administering another Federal or federally assisted program, a description of the financial responsibilities of each program to finance the relocation program required by this part.

(c) A provision acknowledging that only those costs directly chargeable to the EPA or EPA assisted project are eligible for EPA funds.

(d) A provision for negotiation of major changes that become necessary in the scope, character, or estimated total costs of the work to be performed.

(e) Clauses required by EPA regulations implementing Title VI of the Civil Rights Act of 1964 (Pub. L. 88–353).

(f) A provision that the records required by Appendix A be retained by the other agency or turned over to the displacing agency and that they be retained for a period of at least 3 years after payment of the final voucher on each project, regardless of which agency retains them.

(g) A provision that the records required by Appendix A to this part be available for inspection by representatives of the Environmental Protection Agency or the General Accounting Office at any reasonable business hour.

(h) Any other provisions required by the Administrator to meet the requirements of EPA regulations and policies applicable to EPA supported projects.

Subpart E—Federally Assisted Projects

§ 4.500 State agency assurances.

The Environmental Protection Agency will not approve a grant, contract, or agreement for an EPA assisted project until the State agency provides the Administrator with satisfactory written assurances that:

(a) For projects resulting in the displacement of any person:

(1) It will adequately inform the public of the relocation payments and services which will be available as set forth in Subparts A, B, C, and D of this part.

(2) It will provide fair and reasonable relocation payments to displaced persons as required by Subparts B and C of this part.

(3) It will provide a relocation assistance program for displaced persons offering services described in Subpart D of this part; and

(4) Comparable replacement dwellings will be available pursuant to Subpart C of this part, or provided if necessary, a reasonable period in advance of the time any person is displaced.

(b) For projects resulting in the acquisition of real property:

(1) It will fully comply with the requirements of Subpart F of this part; and

(2) Adequately inform the public of the acquisition policies, requirements, and payments which will apply to the project.

§ 4.500–1 Inability to provide assurances.

If a State agency is unable to provide the assurances required by § 4.500, for any program or projects that will result in the displacement of any person or the acquisition of any real property, it must furnish the Administrator a statement specifying any provisions of the assurances required by this section which it is unable to provide in whole or in part under the laws of that State. The statement must be supported by an opinion of the Chief Legal Officer of the State agency of the legal inability to provide any part of the required assurances.

§ 4.501 Monitoring.

The Environmental Protection Agency will monitor on a continuing basis, actions taken by State agencies in relation to assurances given for EPA assisted programs and projects to insure conformance with such assurances.

§ 4.502 EPA share of costs.

(a) The cost to a State agency of providing the payments and services required by Subparts B, C, and D of this part, and the additional identifiable cost to a State agency of providing the payments and services required by Subpart F of this part, shall be included as part of the cost of the EPA assisted project and, except as provided in paragraph (b) of this section, the State agency is eligible for EPA financial assistance with respect to those costs in the same manner and to the same extent as other project costs.

(b) If EPA assistance is by grant or contribution, the Environmental Protection Agency will pay a State agency the full amount of the first $25,000 of the cost of providing the payments and services described in this part for any displaced person because of any acquisition or displacement occurring before July 1, 1972.

(c) If the Administrator determines it is necessary for the expeditious completion of a program or project, he may advance to the State agency the EPA share of the cost of any payment of assistance by such State agency pursuant to sections 206, 210, 215, and 305 of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

§ 4.503 Use of EPA financial assistance.

(a) The type of interest acquired in real property does not affect the eligibility of related relocation costs for EPA financial assistance provided the interest is sufficient to cause displacement.

(b) EPA financial assistance may not be used to pay a relocated person for any loss that is due to his negligence.

(c) EPA financial assistance may not be used for any payment to a displaced person if that person receives a separate payment which is:

(1) Required by the State law of eminent domain;

(2) Determined by the Administrator to have substantially the same purpose and effect as a payment under this part; and

(3) Otherwise included as a project cost for which financial assistance is available.

Subpart F—Acquisition of Real Property

§ 4.600 Applicability.

The requirements prescribed by this subpart apply to the acquisition of real property (including easements) for EPA administered and EPA assisted projects.

§ 4.601 Acquisition.

§ 4.601–1 Procedures.

In acquiring real property, the displacing agency shall:

(a) Adequately inform the public of the acquisition policies, requirements, and payments which apply to the project;

(b) Make every reasonable effort to acquire real property expeditiously through negotiation;

(c) Before the initiation of negotiations have the real property appraised and give the owner or his representative an opportunity to accompany the appraiser during inspection of the property;

(d) Before the initiation of negotiations, establish an amount which it believes to be just compensation for the real property, and make a prompt offer to acquire the property for that amount;

(e) Before requiring any owner to surrender possession of real property the displacing agency will:

(1) Pay the agreed purchase price; or

(2) Deposit with the court, for the benefit of the owner, an amount not less than the agency's approved appraisal of the fair market value of the property; or

(3) Pay the amount of the award of compensation in a condemnation proceeding for the property.

(f) If interest in real property is to be acquired by exercise of the power of eminent domain, institute formal condemnation proceedings and not intentionally make it necessary for an owner to institute legal proceedings to prove the fact of the taking of his real property; and

(g) Offer to acquire the entire property, if acquisition of only part of a property would leave its owner with an uneconomic remnant.

§ 4.601–2 Limitations.

In acquiring real property, the displacing agency may not:

(a) Schedule the construction or development of a public improvement that will require any person lawfully occupying real property to move from a dwelling, or to move his business or farm operation, without giving that person at least 90 days writen notice of the date he is required to move;

(b) If the displacing agency rents acquired real property to the former owner or tenant for a short term or subject to termination by the agency on short notice, charge rent that is more than the fair rental value of the property to a short-term occupant;

(c) Advance the time of condemnation;

(d) Defer negotiations, condemnation, or the deposit of funds in court for use of the owner; or

(e) Take any coercive action to compel an owner to agree to a price for his property.

§ 4.601–3 Appraisal.

(a) As a general rule only one appraisal will be obtained on each tract, unless the displacing agency determines that circumstances require an additional appraisal or appraisals.

(b) Real property acquisition records shall show that the owner or his designated representative has been given an opportunity to accompany the appraiser during his inspection of the property.

(c) Standards for appraisals used in EPA and EPA assisted programs shall be consistent with the current Uniform Appraisal Standards for Federal Land Acquisition published by the Interagency Land Acquisition Conference, U.S. Government Printing Office, Washington, D.C.

§ 4.602 Statement of just compensation.

At the time it makes an offer to purchase real property, the displacing agency shall provide the owner of that property with a written statement of the basis for the amount estimated to be just compensation. The statement shall include the following:

V 39 154 MAR 19 74 XUM

(a) An identification of the real property and the particular interest being acquired;

(b) A certification, where applicable, that any separately held interest in the real property is not being acquired in whole or in part;

(c) An identification of buildings, structures, and other improvements, including fixtures, removable building equipment, and any trade fixtures which are considered to be part of the real property for which the offer of just compensation is made;

(d) An identification of any real property improvements, including fixtures, not owned by the owner of the land;

(e) An identification of the types and approximate quantity of personal property located on the premises that is not being acquired;

(f) A declaration that the agency's determination of just compensation:

(1) Is based on the fair market value of the property;

(2) Is not less than the approved appraised value of the property;

(3) Disregards any decrease or increase in the fair market value of the property caused by the contemplated project;

(4) In the case of separately held interests in the real property, includes an apportionment of the total just compensation for each of those interests; and

(g) The amount of damages to any remaining real property.

§ 4.603 Equal interest in improvements to be acquired.

In acquiring any interest in real property each displacing agency shall acquire at least an equal interest in all building, structures, or other improvements located on that real property which will be removed or which will be adversely affected by the completed project.

§ 4.604 Notice to occupants.

(a) *Owner-occupants.* Simultaneous with the fair market value offer, owner-occupants of real property to be acquired, shall be furnished in writing, by the displacing agency, an explanation of their rights under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 and these regulations.

(b) *Tenants.* Within 15 days following the initiation of negotiations, the displacing agency shall notify affected tenants and occupants, in writing, of the initiation of negotiations and of their rights under the Act of these regulations.

§ 4.605 Acquisition of improvements.

(a) In the case of a building, structure, or other improvement owned by a tenant on real property acquired for a project to which this part applies, the displacing agency shall, subject to paragraph (b) of this section, pay the tenant the larger of:

(1) The fair market value of the improvement, assuming its removal from the property; or

(2) The enhancement of the fair market value of the real property.

(b) A payment may not be made to a tenant under paragraph (a) of this section unless:

(1) The tenant, in consideration for the payment, assigns, transfers, and releases to the displacing agency all his right, title, and interest in the improvement;

(2) The owner of the land involved disclaims all interest in the improvement; and

(3) The payment is not duplicated by any payment otherwise authorized by law.

§ 4.606 Transfer of title expenses.

As soon as possible after real property has been acquired, the displacing agency shall reimburse the owner for:

(a) Recording fees, transfer taxes, and similar expenses incidental to conveying the real property to the agency;

(b) Penalty costs for prepayment of any preexisting recorded mortgage entered into in good faith encumbering the real property; and

(c) The pro-rata portion of any prepaid property taxes which are allocable to a period subsequent to the date of vesting title in the agency or the effective date of possession of the real property by the agency, whichever is the earlier.

§ 4.607 Litigation expenses.

(a) In any condemnation proceeding brought by the displacing agency to acquire real property, it shall reimburse the owner of any right, title, or interest in the real property for his reasonable cost, disbursements, and expenses, including attorney, appraisal, and engineering fees, actually incurred because of the proceeding, if:

(1) The final judgment is that the displacing agency cannot acquire the real property by condemnation; or

(2) The proceeding is abandoned by the displacing agency concerned.

(b) In any inverse condemnation proceeding where the owner of any right, title, or interest in real property receives an award of compensation by judgment or settlement, the displacing agency shall reimburse the plaintiff for his reasonable costs, disbursements, and expenses, including reasonable attorney, appraisal, and engineering fees, actually incurred because of the proceeding.

§ 4.608 Real property provided by State agency for an EPA project.

(a) Whenever a State agency is obligated to provide the necessary real property incident to an EPA project, the Environmental Protection Agency may not accept that real property until it is determined that the State agency has made all payments and provided all assistance and assurances required of a State Agency by § 4.500.

(b) The State agency shall pay the cost of such requirements in the same manner and to the same extent as the real property acquired for such project, except that in the case of any real property acquisition or displacement occurring prior to July 1, 1972, the Environmental Protection Agency shall pay the first $25,000 of the cost of providing the required payments and assistance.

APPENDIX A—RECORDS

I. *Land acquisition.* For purpose of Title III of the Act, the acquiring agency shall keep a record of the following information concerning each acquisition of any interest in land used for an EPA supported project:

(1) The identification of the property and the estate or interests acquired, including improvements; owners and occupants.

(2) The appraisal.

(3) The offer.

(4) The date and method of acquisition.

(5) The date, amount, and purpose of payments to owners and others.

II. *General information concerning the project.* A displacing agency shall keep a record of the following general information for each EPA administered or EPA assisted project:

(1) Project and parcel identification;

(2) Name and address of each displaced person;

(3) Dates of all personal contacts made with each displaced person;

(4) Date each displaced person is given notice of relocation payments and services.

(5) Name of agency employee who offers relocation assistance.

(6) The date the offer of assistance is declined or accepted, and the name of the individual who accepts or declines the offer.

(7) Date each displaced person is required to move.

(8) Date of actual relocation, and whether relocation was accomplished with the assistance of the displacing agency, other agencies, or without assistance.

(9) Type of tenure held by each displaced person before and after relocation.

III. *Displacement from dwellings.* The displacing agency shall keep a record of the following information concerning each individual or family displaced from a dwelling in connection with the project:

(1) Number in family, or number of individuals.

(2) Type of dwelling.

(3) Fair market value, or monthly rent.

(4) Number of rooms.

IV. *Displaced businesses.* The displacing agency shall keep a record of the following information concerning each business displaced in connection with the project.

(1) Type of business.

(2) Whether or not relocated.

(3) If relocated, distance moved.

(4) Data supporting a determination that a business cannot be relocated without a substantial loss of its existing patronage and that it is not part of a commercial enterprise having at least one other establishment not being acquired by a State agency or the United States.

V. *Moving expenses.* The displacing agency shall keep a record of the following information concerning each payment of moving and related expenses in connection with the project:

(1) The date personal property is moved, and the original and new locations of the personal property.

(2) If personal property is stored temporarily:

(a) The place of storage;

(b) The duration of storage; and

(c) A statement of why storage is necessary.

(3) An account of all moving expenses that are supported by receipted bills or similar evidence of expenses;

(4) Amount of reimbursement claimed, amount allowed, and an explanation of any difference;

(5) In the case of a business or farm operation that receives a fixed allowance in lieu of moving expenses, data underlying the computation of such payment.

VI. *Replacement housing payments.* The displacing agency shall keep a record of the following information concerning each relocation housing payment made in connection with the project:

(1) The date application for payment is received.

(2) The date application for payment is approved or rejected.

(3) Data substantiating the amount of payment.

(4) If replacement housing is purchased, a copy of the closing statement indicating the purchase price, down payment, and incidental expenses.

(5) A copy of the Truth in Lending Statement, or other data, including computations, that confirm any increased interest payment.

PART III

DEPARTMENT OF LABOR

OFFICE OF THE SECRETARY

■

Comprehensive Manpower Program and Grants to Areas of High Unemployment

V 39 54 MAR 19 74 XUM

Title 29—Labor

SUBTITLE A—OFFICE OF THE SECRETARY OF LABOR

COMPREHENSIVE MANPOWER PROGRAM AND GRANTS TO AREAS OF HIGH UNEMPLOYMENT

Pursuant to section 602(a) of the Comprehensive Employment and Training Act of 1973 (Public Law 93-203, 87 Stat. 839), which authorizes the Secretary of Labor to prescribe such rules, regulations, guidelines and other published interpretations as he deems necessary to carry out the provisions of this Act, the following regulations are promulgated to faciiitate the implementation of Titles I and II at the earliest possible date.

Title I provides for the establishment of a program to provide comprehensive manpower services throughout the Nation.

Title II provides for the establishment of a program of grants to areas of substantial unemployment throughout the Nation.

Funds under Title I may be used for establishing public employment programs, as part of a comprehensive manpower plan. Funds under Title II may be used to provide manpower training services of the type authorized in Title I.

The Act also contains specific titles relating to the Secretary's responsibility to carry out manpower programs for special target groups (Title III); for the continuation of the Job Corps (Title IV); and for the establishment of a National Commission for Manpower Policy (Title V). Regulations, as necessary, will be issued for these titles at a later date.

Reference to sections of the Act is provided as appropriate in the regulations.

The regulations promulgated herein shall be effective April 18, 1974, and shall, inter alia, supersede the regulations for initial grants under Part 96, which were published February 15, 1974, in the FEDERAL REGISTER, and became effective March 1, 1974. Those regulations published February 15 will continue to be effective until April 18, 1974.

The new Part 96, published herein, relates to the same subject matter as the regulations published February 15 and retains most of the provisions and language originally published February 15. One significant change in Part 96 has been made, however, in response to comments received by the Department. That change amends the Part 96 placement goals by deleting the requirement that a goal be established by each grantee to move persons out of public service employment programs and into unsubsidized employment within 12 months of a person's entrance date. The new language in § 96.33 establishes a placement goal that 50 percent of the participants be placed in unsubsidized employment each year, but contains no language relating to average duration in a public service employment program.

As these regulations relate to public property, loans, benefits or contracts, they have been excepted from the application of the notice and comments provisions of the Administrative Procedure Act, 5 U.S.C. 553(a)(2). The policy of the Department of Labor as stated in 29 CFR 2.7 is not to use this exception as a basis for not giving opportunity for notice and comment. In this case, in order to effect promptly the purposes of the Comprehensive Employment and Training Act, it is contrary to the public interest to delay the issuance of these regulations to the extent necessary for the preparation, receipt and evaluation of the comments. Accordingly they are not issued for comments prior to publication in their final form.

Nevertheless, although these regulations are being published in final form and are made effective on April 18, 1974, it is the policy of the Department of Labor to solicit and consider comments on its regulations. Accordingly, comments will be received, just as though this document were a proposal, until May 4, 1974, after which the comments received will be evaluated and, if warranted, the regulations will be appropriately amended. Meanwhile, however in the interest of expediting the program, these regulations shall remain in force until amended.

Interested persons are invited to submit comments, data or arguments to: Assistant Secretary for Manpower, United States Department of Labor, 6th and D Streets NW., Washington, D.C. 20213. Attention: Pierce A. Quinlan, Acting Associate Manpower Administrator for the Office of Manpower Development Programs.

The regulations set forth below amend Title 29 by adding the following new parts:

Part 94—General Provisions for programs under the Comprehensive Employment and Training Act

Part 95—Programs Under Title I of the Comprehensive Employment and Training Act

Part 96—Programs Under Title II of the Comprehensive Employment and Training Act

Part 97—(Reserved for Title III, Special, Federal Responsibilities)

Part 98—Administrative Provisions for Programs Under Title I and Title II of the Comprehensive Employment Training Act

The new Part 96 makes certain changes in the Part 96 provisions published in the FEDERAL REGISTER, February 15, 1974.

The new Parts 94, 95, 96, and 98, which shall be effective April 18, 1974, read as follows:

PART 94—GENERAL PROVISIONS FOR PROGRAMS UNDER THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Sec.
94.1 Scope and purpose of the Act.
94.2 Format for the regulations promulgated under the Act.
94.3 Consolidated table of contents for Parts 94-98.
94.4 Definitions.

AUTHORITY: (Pub. L. 93-203, sec. 602(a), 87 Stat. 839), unless otherwise noted.

§ 94.1 Scope and purpose of the Act.

(a) It is the purpose of the Act to provide job training and employment opportunities for economically disadvantaged, unemployed and underemployed persons, and to assure that training and other services lead to maximum employment opportunities and enhance self-sufficiency. The purposes of the Act are to be accomplished by the establishment of a flexible and decentralized system of Federal, State and local programs.

(b) The Act is comprised of six titles as follows:

(1) Title I establishes a program to provide comprehensive manpower services throughout the Nation, including the development and creation of job opportunities, and the training, education and other services needed to enable individuals to secure and retain employment at their maximum capacity.

(2) Title II authorizes public employment and manpower training programs for unemployed and underemployed persons in areas of substantial unemployment.

(3) Title III provides for the establishment and administration by the Secretary of Labor of:

(i) Special programs for Indians, migrant workers and seasonal farmworkers;

(ii) Manpower services for youth, offenders, older workers, persons of limited English-speaking ability and other special target groups; and

(iii) Research, training and evaluation of programs and activities conducted under the Act.

(4) Title IV establishes a Job Corps within the Department of Labor to provide residential and non-residential manpower services for low-income disadvantaged young men and women.

(5) Title V, establishes a National Commission for Manpower Policy. The responsibilities of the Commission include the examination of national manpower issues, the suggestions of ways and means of dealing with such issues and advising the Secretary on national manpower issues.

(6) Title VI, sets forth the general provisions, including applicable definitions, under the Act.

§ 94.2 Format for the regulations promulgated under the Act.

(a) The regulations promulgated to carry out the Act are set forth in Parts 94 through 98 of Title 29, Code of Federal Regulations.

(b) As each substantive Title of the Act provides for the establishment of a specific type of program, the regulations promulgated in Parts 94 through 98 provide for a separate part for each basic type of activity (e.g., Part 95 deals with comprehensive manpower programs; Part 96 deals with Title II programs). Two parts are also included which deal with general matters relating to the Act: Part 94 of this subtitle deals with basic explanatory and definitional matters and Part 98 of this subtitle deals with general administrative matters.

(c) Statutory authority for the regulations contained in this Part 94 may be found in section 602(a) of the Act, as well as other substantive provision of the Act. Applicable statutory provisions, other than section 602(a), are noted generally in these regulations.

§ 94.3 Consolidated table of contents for Parts 94-98.

The table of contents for Parts 94-98 is as follows:

PART 94—GENERAL PROVISIONS FOR PROGRAMS UNDER THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Sec.
94.1 Scope and purpose of the Act.
94.2 Format for the regulations promulgated under the Act.
94.3 Consolidated table of contents for Parts 94-98.
94.4 Definitions.

PART 95—PROGRAMS UNDER TITLE I, OF THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

SUBPART A—GENERAL

95.1 Scope and purpose of Part 95.
95.2 Allocation of funds.
95.3 Eligibility for funds.
95.4 Data base for determining eligibility.

SUBPART B—GRANTING PLANNING, APPLICATION AND MODIFICATION PROCEDURES

95.10 General.
95.11 Notification of intent to apply for prime sponsorship; consortium agreements.
95.12 Prime sponsor designation.
95.13 Planning process; advisory councils.
95.14 Content and description of grant application.
95.15 Comment and publication procedures relating to submission of grant application.
95.16 Submission of grant application.
95.17 Standards for reviewing grant applications.
95.18 Application approval; grant agreement.
95.19 Application disapproval.
95.20 Use of alternative prime sponsors; services by the Secretary.
95.21 Modification of grant agreement.
95.22 Modification of Comprehensive Manpower Plan.

SUBPART C—PROGRAM OPERATION

95.30 General.
95.31 Basic responsibilities of prime sponsors.
95.32 Eligibility for participation in a Title I Program.
95.33 Types of manpower program activity available.
95.34 Training allowances.
95.35 Wages: minimum duration of training and reasonable expectation of employment.
95.36 General benefits for program participants.
95.37 Prime sponsor review.
95.38 Non-Federal status of participants.
95.39 Safety and health requirements for participants.
95.40 Training for lower wage industries; relocation of industries.
95.41 Prime sponsor contracts and subgrants.
95.42 Cooperative relationships between prime sponsor and other manpower agencies.

SUBPART D—SPECIAL GRANTS TO GOVERNORS

95.50 General.
95.51 Distribution of funds.
95.52 Grant application.
95.53 Application approval and disapproval; grant agreement.
95.54 Modifications; Limitations on use of funds.
95.55 Governor's distribution of vocational education funds.
95.56 Program operations.
95.57 Grant administration.
95.58 Nonfinancial agreement between prime sponsor and Vocational Education Board.
95.59 Coordination with prime sponsor.

PART 96—PROGRAMS UNDER TITLE II OF THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

SUBPART A—GENERAL

96.1 Scope and purpose.
96.2 Allocation of funds.
96.3 Eligibility for funds.

SUBPART B—GRANT APPLICATION

96.10 General.
96.11 Eligible applicant notification.
96.12 Content and description of grant application.
96.13 Comment and publication procedures relating to submission of grant application.
96.14 Submission of grant application.
96.15 Application approval.
96.16 Application disapproval.
96.17 Use of alternative eligible applicants.
96.18 Modification of grant agreements.
96.19 Modification of Comprehensive Title II Plan.

SUBPART C—PROGRAM OPERATION

96.20 General.
96.21 Basic responsibilities of eligible applicant.
96.22 Basic responsibilities of program agents; relationship with eligible applicants.
96.23 Acceptable public employment positions.
96.24 Maintenance of effort.
96.25 Responsibility for selecting participants.
96.26 Special limitations on programs and participant selection.
96.27 Eligibility for participation in a Title II Program.
96.28 Special consideration for most severely disadvantaged persons.
96.29 Serving significant segments of the population.
96.30 Groups to be provided special consideration.
96.31 Training and supportive services.
96.32 Linkages with other manpower programs.
96.33 Placement goals.
96.34 Compensation for participants.
96.35 Working conditions for participants.
96.36 Retirement benefits for participants.
96.37 Maintenance of a merit system.
96.38 Use of Title II funds for programs under Titles I and III-A; summer employment programs.
96.39 Limitation on funds.

SUBPART D—SPECIAL CONDITIONS FOR GRANTS TO INDIAN TRIBES ON FEDERAL AND STATE RESERVATIONS

96.40 General.
96.41 Distribution of funds.
96.42 Eligibility for funds.
96.43 Assistance by the Secretary.
96.44 Nepotism.
96.45 Nondiscrimination.
96.46 Subgrants.
96.47 Comment and publication procedures relating to submission of Indian grant applications.

PART 98—ADMINISTRATIVE PROVISIONS FOR PROGRAMS UNDER TITLE I AND TITLE II OF THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

SUBPART A—GRANT ADMINISTRATION

Sec.
98.1 General.
98.2 Payment.
98.3 Letter of credit.
98.4 Payment by Treasury check.
98.5 Financial Management systems.
98.6 Audit and evaluation.
98.7 Reporting requirements in general.
98.8 Quarterly Progress Report.
98.9 Summary of Client Characteristics Report.
98.10 Report of Federal Cash Transactions.
98.11 Reallocation of funds.
98.12 Allowable Federal costs.
98.13 Allocation of allowable costs among program activities.
98.14 Basic personnel standards for prime sponsors and eligible applicants.
98.15 Adjustments in payments.
98.16 Termination of grant.
98.17 Grant close-out procedures.
98.18 Retention of records.
98.19 Program income.
98.20 Procurement standards.
98.21 Nondiscrimination and equal employment opportunities.

SUBPART B—ASSESSMENT AND EVALUATION

98.30 General.
98.31 Responsibilities of the prime sponsor or eligible applicant.
98.32 Responsibilities of the Secretary.
98.33 Limitation.
98.34 Consultation with the Secretary of Health, Education, and Welfare.

SUBPART C—HEARINGS AND JUDICIAL REVIEW

98.40 Purpose and policy.
98.41 Review of plans and applications; violations.
98.42 Complaints; filing of formal allegations; dismissal.
98.43 Form.
98.44 Contents of formal allegations; amendment.
98.45 Investigations.
98.46 Opportunity for hearings; when required.
98.47 Hearings.
98.48 Initial certification, decisions and notices.
98.49 Judicial review.

§ 94.4 Definitions.

The following definitions consistent with 601(a) of the Act, apply to Parts 94 through 98, inclusive;

(a) "Act" means the Comprehensive Employment Training Act of 1973 (P.L. 93-203, 87 Stat. 839).

(b) "Allocation" means the distribution of funds among prime sponsors or eligible applicants according to the formulas contained in the Act.

(c) "ARDM" means the Department of Labor's Assistant Regional Director for Manpower, or his designee, having the responsibility for the area in which a prime sponsor or eligible applicant is located.

"Area of substantial unemployment" means any area, other than in relation to an Indian tribe, which

(a) has a population of at least 10,000 persons,

(b) qualifies for a minimum allocation of $25,000 under Title II of the Act, and

V 39 54 MAR 19 74 XUM

(c) has a rate of unemployment of at least 6.5 percent for a period of three consecutive months, as determined by the Secretary of Labor at least once each fiscal year.

"Area of substantial unemployment" means, in relation to an Indian tribe, an Indian reservation, as a whole, with a rate of unemployment of at least 6.5 percent for a period of three consecutive months, as determined by the Secretary of Labor at least once each fiscal year.

"Balance of county" means the area within the jurisdiction of a county, as a prime sponsor or eligible applicant, that is not included in the comprehensive manpower plan of another prime sponsor or eligible applicant.

"Balance of State" means the area within the jurisdiction of a State, as a prime sponsor or eligible applicant, which is not included in the comprehensive manpower plan of another prime sponsor or eligible applicant.

"Capital improvement" means any modification, addition, or restoration which increases the usefulness, productivity, or serviceable life of a building, structure, or major item of equipment which is classified for accounting purposes as "fixed asset" and the recorded value is increased by the cost of the improvement and subject to depreciation.

"Certification" means a legally binding statement that certain requirements have been fulfilled.

"Chief elected official" and "chief executive officer" includes their designees.

"Client community" means the group or groups of people to be served by a program or program activity; for example, the unemployed, persons of limited English speaking ability, low-income families, farm workers, migrants, and economically disadvantaged.

"Community-based organizations" means organizations which are representative of communities or significant segments of the communities (for example, Opportunities Industrialization Centers, Urban League, Jobs for Progress, Mainstream, and community action agencies).

"Compensation" as applied to a participant in Title II program means the wages and salary payable, but does not include fringe benefits or supportive services.

"Consortium" means an agreement among local units of government, consistent with the requirements of § 95.3, to plan and operate a comprehensive manpower program under the Act.

"Contractor" means any person, corporation, partnership, or public agency which enters into a contract with the Department, with a grantee, or with a subgrantee under the Act.

"Construction" means the erection, installation, or assembly of a new facility or a major addition, expansion, or extension of an existing facility, and the related site preparation, excavation, filling and landscaping or other land improvements.

"Department" means the United States Department of Labor and includes each of its operating agencies and other organizational units.

"Dependent" means:

(a) Any relative who is a member of the immediate household of and for whom the participant has or has assumed, a responsibility for support: Provided that, the following relatives need not be members of the participant's household, if the participant is the head of family:

(i) parents of the participant head of family;

(ii) children of the participant head of family;

(iii) relatives of the participant head of family who are unemployable because of physical or mental disability; or

(b) any individual who:

(i) is currently being supported by the participant head of family and is a member of the participant's immediate household; and

(ii) During the preceding twelve months, earned less than $750.

"Economically disadvantaged" means a person who is a member of a family:

(a) which receives cash welfare payments, or

(b) whose annual income in relation to family size does not exceed the poverty level determined in accordance with criteria established by the Office of Management and Budget.

"Eligible applicant" for purposes of Title II means a prime sponsor or an Indian tribe on a Federal or State reservation which includes areas of substantial unemployment.

"Employing agency" for purposes of public service employment programs means any employer designated by an eligible applicant, program agent, or other subgrantee, or by the Secretary of Labor to employ participants pursuant to public service employment programs under the Act. The term shall include an eligible applicant, program agent, or other subgrantee when acting as an employer.

"Federal reservation" means lands which have been set aside for Indian tribes and for which the United States is trustee, as identified by the Bureau of Indian Affairs, including non-trust land under the tribal jurisdiction.

"Governor" means the chief executive officer of a State, or his designee.

"Health care" includes but is not limited to preventive and clinical medical treatment, voluntary family planning services, nutritional services, and appropriate psychiatric, psychological and prosthetic services, to the extent any such treatment or services are necessary to enable a participant to obtain or retain employment under the Act.

"Indian tribe" means a tribe, group or band of American Indians or Alaskan natives identified on the basis of historical, geographical or cultural characteristics, or subpart of such a tribe, group or band.

"Low-income level" means an annual income of $7,000 with respect to income in 1969; for any later year it shall mean that amount which bears the same relationship to $7,000 as the Consumer Price Index for that year bears to the Consumer Price Index for 1969, rounded to the nearest $1,000.

"Obligation" means the amount of Federal funds which the Department has legally committed and authorized a prime sponsor or eligible applicant to expend.

"Offender" means any person who is confined in any type of correctional institution, including a community-based facility, or who is subject to any stage of the judicial, correctional or probationary process where manpower training and services may be beneficial, as determined by the Secretary of Labor, after consultation with judicial, correctional, probationary or other appropriate authorities.

"OMB" means the Office of Management and Budget.

"Participant" means an individual who qualifies and receives services or takes part in activities under provisions of the Act.

"Placement" means the hiring of an individual in unsubsidized employment, whether the job is a result of his own effort after intake service or a referral by the prime sponsor or any of its contractors or subgrantees, and whether the individual is hired at the outset of program participation as a result of intake assessment or after receiving program services. There are three levels of placement, based on the expected duration of the job:

(a) *Short-term* placements in jobs which are expected to have a duration of less than three work days;

(b) *Mid-term* (*regular*) placements in jobs which are expected to last from three work days to one-hundred-fifty days, and

(c) *Long-term* placements in jobs which are expected to have a duration of more than one-hundred-fifty days.

Placement does not include referral to another program activity, enrollment in education or training courses not supported under the Act, or entrance into the Armed Forces.

"Poverty level" means the annual income threshold below which families are considered to live in poverty, as determined in accordance with criteria established by the Director of the Office of Management and Budget.

"Prime sponsor" means a unit of government, combinations of units of government, or a rural Concentrated Employment Program grantee, as set forth in § 95.3, which has entered into a grant with the Department to provide comprehensive manpower services under Title I of the Act.

"Professional work" means work performed by an individual acting in a bona fide professional capacity as such term is used in section 13(a)(1) of the Fair Labor Standards Act.

"Program agent" for purposes of Title II means a subgrantee which is a unit of, or a combination of units of, general local government having a population of 50,000 or more, and has an area of substantial unemployment within the jurisdiction.

"Program of demonstrated effectiveness" means a manpower program, including a program conducted by a community based organization, which has a history of providing manpower services to low income persons and the disadvantaged and has demonstrated the capacity to meet contractual goals at reasonable costs.

"Public service" means service normally provided by government and includes, but is not limited to, work in such fields as beautification, conservation, crime prevention and control, education, environmental quality, fire protection, health care, housing and neighborhood improvements, manpower services, park, street and other public facility maintenance, pollution control, prison rehabilitation, public safety, recreation, rural development, solid waste removal, transportation, veteran outreach and other fields of human betterment and community improvement. It excludes building and highway construction work (except that which is normally performed by the prime sponsor or eligible applicant) and other work which inures primarily to the benefit of a private profit-making organization.

"Rate of unemployment" means the number of unemployed persons, as a percentage of the total number of persons in the civilian labor force, as determined by the Secretary.

"Secretary" means the Secretary of the United States Department of Labor or his designee.

"SESA" means State employment security agencies affiliated with the United States Employment Service, established by the Wayner-Peyser Act of 1933, as amended. The term shall include the system of public employment service offices and Unemployment Insurance offices.

"Significant segments" means those groups identified in a prime sponsor's comprehensive manpower plan as being most in need of the services to be provided by the Act.

"Special veteran" means an individual who served in the Armed Forces in Indochina or Korea, including the waters adjacent thereto, on or after August 5, 1964, who received other than a dishonorable discharge.

"State" includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

"State reservation" means an Indian reservation recognized by the State in which it is located.

"Subgrantee" means any governmental unit which receives a grant from a prime sponsor or eligible applicant under the Act.

"Sufficient size and scope" means an area or combination of areas other than an Indian reservation, which has a population of 10,000 or more persons and qualifies for a minimum allocation under Title II of $25,000.

"Supportive or manpower services" means services which are designed to contribute to the employability of participants, enhance their employment opportunities, assist them to retain employment, and facilitate their movement into permanent employment not subsidized under the Act.

"Underemployed persons" means persons who are working part-time but seeking full-time work or persons who are working full-time but receiving wages below the poverty level. For purposes of Title II and public service employment, persons who are working part-time for the employing agency may be considered underemployed and, as such, be hired only if their selection does not violate the maintenance of effort requirements of the Act.

"Unemployed persons" for Title I activities means, except in the case of welfare recipients, a person who is without a job and who wants and is available for work, defined as follows:

(a) A person who is without a job is a person who did not work during the Calendar week preceding the week in which the determination of his eligibility for participation is made. Except in the case of persons described in the undesignated paragraph following paragraph (c) below, the determination of who wants and is available for work will be made by the prime sponsor or his designee and persons who have been discouraged from seeking work but are currently available for work, shall not be excluded from eligibility.

(b) If a person is confined in a jail, penitentiary or other correctional institution and there is a reasonable expectation that release will follow the completion of training within a reasonable time, he shall be considered unemployed.

(c) A person is not to be considered to be available for work if he is without a job because of participation in an ongoing strike or lock-out at his usual place of employment.

In the case of welfare recipients, and except for purposes of sections 103 and 202 of the Act, the term "unemployed person" means an adult who, or whose family, receives supplemental security income or money payments pursuant to a State plan approved under the Social Security Act, Title IV, (Aid to Families with Dependent Children), or under the Social Security Act, Title XVI (Supplemental Security Income for the Aged, Blind, and Disabled), or would be eligible for such payments according to the standards set forth at 45 CFR Part 233 and 20 CFR Part 416 if both parents were not present in the home, and

(a) Who is available for work and

(b) Who is either without a job or working in a job providing insufficient income to enable such a person and his family to be self-supporting without welfare assistance.

"Unemployed person," for Title II activities, means:

(a) a person who is without a job and who wants and is available for work, and

(b) except for purposes of sections 103 and 202 of the Act, an adult who, or whose family, receives supplemental security income or money payments pursuant to a State plan approved under the Social Security Act, Title IV (Aid to Families with Dependent Children), or under the Social Security Act, Title XVI (Supplemental Security Income for the Aged, Blind, and Disabled) or would be eligible for such payments according to the standards set forth at 45 CFR Part 233 and 20 CFR Part 416 if both parents were not present in the home and

(i) is available for work and

(ii) who is either without a job or working on a job providing insufficient income to enable such a person and his family to be self-supporting without welfare assistance.

(c) A person is "without a job" if, during the 30 days preceding his application or selection, he has worked no more than 10 hours or has earned no more than $30 in any calendar week.

"Unemployment compensation" means the compensation payable for weeks of unemployment in accordance with the provisions of a State or Federal law, including but not limited to the unemployment compensation laws of the several States, the Railroad Unemployment Insurance Act and 5 USC Ch. 85 (Federal employees and ex-servicemen's unemployment compensation). This term shall also extend to payments to unemployed individuals under the Disaster Relief Act and other Federal Acts providing assistance to unemployed individuals either as supplemental to State unemployment compensation or in lieu of such compensation.

"Unit of general local government" means any city, municipality, county, town, township, parish, village, or other general purpose political subdivision which has the power to levy taxes and spend funds, as well as general corporate and police powers.

"Unsubsidized employment" means employment not financed from funds provided under the Act.

"Wagner-Peyser Act" means "An act to provide for the establishment of a national employment system and for cooperation with the States in the promotion of such system, and for other purposes," approved June 6, 1933 (48 Stat. 113), as amended (29 U.S.C. 49 et seq.).

95.56 Program Operations.
95.57 Grant administration.
95.58 Nonfinancial agreement between prime sponsor and Vocational Education Board.
95.59 Coordination with prime sponsor.

AUTHORITY (Pub. Law 93–203, sec. 602(a), 87 Stat. 839), unless otherwise noted.

Subpart A—General

§ 95.1 Scope and purpose of Part 95.

(a) This Part 95 contains the Department of Labor's regulations for the establishment and provision of comprehensive manpower services, including public service employment, under Title I of the Act.

(b) This Part 95 should be read in conjunction with Parts 94 through 98 of this Title 29, Code of Federal Regulations. These parts, in total, comprise the regulations promulgated by the Secretary pursuant to the authority in the Act.

(c) Definitions for abbreviations and major terms may be found in Part 94 of this subtitle.

(d) Statutory authority for the regulations contained in this Part 95 may be found in section 602(a) of the Act, as well as other substantive provisions of the Act. Applicable statutory provisions, other than section 602(a), are noted generally in the regulations in this part.

§ 95.2 Allocation of funds.

(a) *General.* (1) This § 95.2 sets out the procedures for allocating funds under Title I of the Act. Of the funds available for Title I in any fiscal year, eighty percent shall be allocated according to the procedures set forth in paragraph (b) of this section. The remaining twenty percent shall be allocated as set out in paragraphs (c) and (d) of this section (sec. 103).

(2) Allocations made to prime sponsors under this section shall be published in the FEDERAL REGISTER as soon as possible after the enactment of any fiscal year appropriation. The Secretary may publish preliminary allocations to assist prime sponsors in planning for programs under Title I of the Act.

(3) The Secretary may reallocate Title I funds as provided in § 98.11 of this subtitle.

(b) *Prime sponsor basic allocations.* (1) Eighty percent of the funds available under Title I of the Act shall be allocated as provided in this paragraph (b). Funds provided pursuant to this paragraph are for prime sponsors, as defined in § 95.3, except for a limited number of prime sponsors which are Rural Concentrated Employment Programs. This paragraph (b) does not apply to Rural Concentrated Employment Programs.

(2) One percent of the amount available under this paragraph (b) shall be allocated by the Secretary to State prime sponsors for the costs incurred in staffing and servicing State Manpower Services Councils. If such funds exceed the amount needed for these costs, the excess may be used to carry out State services under section 106(c) of the Act. Allocations under this paragraph shall be made according to the paragraph (b)(4) allocation formula.

(3) Not less than $2,000,000 of the funds under this paragraph (b) shall be allocated among Guam, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands, consistent with the factors set out in paragraph (b)(4) of this section.

(4) Allocation formula: Subject to the requirements of paragraph (b)(5) of this subsection, funds remaining after application of paragraph (b) (2) and (3) of this section shall be allocated to prime sponsors according to the following basic formula:

(i) Fifty percent of the funds subject to formula allocation shall be allocated on the basis of each prime sponsor area's proportion of the manpower funds obligated pursuant to the formula for all prime sponsor areas in the prior fiscal year;

(ii) Thirty-seven and one-half percent of the funds of a prime sponsor's proportion of the total number of unemployed persons (as defined by the Bureau of Labor Statistics) in all prime sponsor areas.

(iii) Twelve and one-half percent of the funds subject to the allocation formula shall be allocated on the basis of a prime sponsor's proportion of the number of adults in low income families in all prime sponsor areas;

(5) (i) No prime sponsor shall be allocated an amount under the paragraph (b)(4) allocation formula which is more than 150 percent of the amount of manpower funds obligated in the prior fiscal year for the area served by the prime sponsor; except that if the amount so allocated is less than 50 per cent of the amount of manpower funds to which it is entitled under the (b)(4) allocation formula, such allocation shall be increased to 50 per cent of its entitlement under the formula.

(ii) If any prime sponsor, pursuant to the paragraph (b) (4) and (5) allocation formula, is allocated less than 90 percent of the manpower funds that were obligated to that area in the previous fiscal year, that prime sponsor shall, to the extent feasible, be provided an amount from the Secretary's discretionary fund, set out in paragraph (d) of this section, that will bring its funding during the current fiscal year to the 90 percent level.

(c) *Additional prime sponsor allocations.* The paragraph describes those prime sponsor allocations that are not subject to the basic allocation procedures of paragraph (b).

(1) *Consortia incentive funds.* In order to encourage consortia, as defined in § 95.3, that also comprise substantial portions (e.g., 75%) of labor market areas, the Secretary may use up to 5 percent of the funds available for Title I of the Act to provide additional funding for such consortia. Consortia which do not serve such areas shall not be eligible for additional funds. Prior to making decisions concerning these funds, the ARDM shall consult with the Governors of the appropriate States and afford them an opportunity to make recommendations.

(2) *State manpower services allocation.* The Secretary shall allocate to the States, according to the paragraph (b)(4) allocation formula, four percent of the funds available under Title I of the Act, to enable the States to provide services, as set out in Subpart D of this Part 95.

(3) *Allocations for rural Concentrated Employment Program (CEP) prime sponsors.* The Secretary shall fund a limited number of prime sponsors which are rural Concentrated Employment Programs from any funds available to carry out Title I, except funds allocated under paragraph (b).

(4) *Vocational education allocation.* The Secretary shall allocate to the Governors, according to the paragraph (b)(4) allocation formula, 5 percent of the funds available under Title I, to provide financial assistance for vocational education. Each Governor shall allocate these funds as required in Subpart D of this Part 95.

(d) *Secretary's discretionary fund.* Any funds available under Title I that are not allocated under paragraphs (b) and (c) of this section shall be first utilized by the Secretary to assure each prime sponsor, including a limited number of rural CEP prime sponsors, of funding at the 90 percent level, as set out in paragraph (b)(5)(ii) section. The Secretary shall utilize the remainder of the funds available under this paragraph at his discretion, taking into consideration (1) the provision of incentive funds for multijurisdictional agreements entered into by States, as set out in § 95.3(b) and (d); (2) continued funding through prime sponsors of programs of demonstrated effectiveness, and (3) other factors the Secretary deems necessary to the carrying out of his responsibilities under the Act.

§ 95.3 Eligibility for funds.

(a) Funds may be allocated by the Secretary to prime sponsors (sec. 102). Prime sponsors are:

(1) States;

(2) Units of general local government which have a population of 100,000 or more persons;

(3) (i) Consortia consisting of general local governments which are (A) located in reasonable proximity to each other, (B) each of which retains responsibility for operation of the program, (C) at least one of which has a population of 100,000 or more persons, and (D) which, as a consortium, can plan and operate a comprehensive manpower program that provides administrative and programmatic advantage over other methods of delivering services under the Act;

(ii) A consortium, under this subparagraph (3), which consists of units of local government in more than one State, may be approved by the ARDM after the approval of the Governors of the States involved has been obtained.

(iii) No consortium agreement will be approved if one of the parties to the agreement is a unit of local government which is not eligible to be a prime sponsor under the Act and if, in addition, the effect of the agreement is to render ineligible the prime sponsor otherwise responsible for serving the area of the ineligible local government; provided, however, that nothing in this paragraph shall prohibit the otherwise responsible prime sponsor from granting its consent to such a consortium agreement;

(4) Any unit of general local government, or any combination of such units, without regard to population, which, in exceptional circumstances, is determined by the Secretary, after giving serious consideration to comments from the prime sponsor otherwise responsible for the area and the Governor, (i) to serve a substantial portion (e.g., 75%) of a functioning labor market area or to be a rural area with a high level of unemployment and (ii) to have demonstrated that (A) it has the capability for effectively carrying out a comprehensive manpower program under the Act, evidenced by its effective operation of programs such as a Concentrated Employment Program or other multicomponent program, (B) there is a special need for services provided by the Act (e.g., the area has a high proportion of such groups within the population as older workers, high school dropouts, or has a high unemployment rate, substantial outmigration, or unique commuting problems), and (C) it will afford administrative and programmatic advantages over other methods of delivering services under the Act; and

(5) A limited number of Concentrated Employment Program grantees existing at the time of enactment of the Act, serving rural areas having a high level of unemployment which the Secretary determines have demonstrated through prior performance, a special capability for carrying out programs in such areas and are designated for that purpose.

(b) (1) A State may enter into an agreement with any unit of local government within the State that has a population of at least 100,000 persons in order to provide services within a designated area. Such an agreement may be approved by the ARDM when the parties retain to the extent consistent with State and local law, joint and several responsibility for the program and the ARDM believes that the parties will, pursuant to the agreement, plan and operate a comprehensive manpower program which provides administrative and programmatic advantages over other methods of delivering services under the Act. All requirements for consortia in Parts 94–98 apply to such State multijurisdictional agreements unless otherwise stated.

(2) Incentive funds may be provided for an agreement under paragraph (b)(1) of this section if the agreement includes every eligible prime sponsor in the State.

(c) A consortium which comprises a substantial portion of a labor market (e.g., 75%) shall be eligible for incentive funds, as provided in § 95.2(c)(1). The ARDM shall make such determinations, taking into consideration the definition and listing of labor market areas published by the Department, and the recommendations of the Governors.

(d) Incentive funds for consortia or State agreements shall be a nationally uniform percentage increase of the amount due them under § 95.2(b)(4), but shall not exceed 10 percent of the amount.

(e) No State, unit of general local government, or consortium may apply or be designated as a prime sponsor for any area within its jurisdiction that is also within the jurisdiction of another prime sponsor unless the latter consents or fails to submit an approvable Comprehensive Manpower Plan, or has its plan terminated, in whole or in part, by the Secretary.

(f) Any unit of local government that does not intend to be served by the prime sponsor which would normally serve it under Title I shall inform that prime sponsor of its determination.

§ 95.4 Data base for determining eligibility.

In order to determine prime sponsor eligibility, the Secretary shall use the 1970 official Census or certified up dates as published by the U.S. Bureau of Census.

Subpart B—Grant Planning, Application and Modification Procedures

§ 95.10 General.

This Subpart B provides the procedures for obtaining and modifying a grant to operate programs under Title I of the Act. Specifically, this subpart describes the procedures in the grant award process—from a prime sponsor's initial intent to apply, through the grant application process, to review by the Department, approval or disapproval of the grant, and modification. This subpart also describes the functions of prime sponsor Manpower Planning Councils and State Manpower Services Councils.

§ 95.11 Notification of intent to apply for prime sponsorship; consortium agreements.

(a) For fiscal year 1975, an applicant interested in receiving financial assistance shall submit to the ARDM, the Governor, and the appropriate State A–95 clearinghouses (see OMB circular A–95) a notification of intent to apply for prime sponsorship in the format described in this part. In subsequent fiscal years, the Preapplication for Federal Assistance, Parts I and II, prescribed by OMB Circular A–102, shall be used. In either case, submission shall be by a date set by the Secretary (sec. 102(c)).

(b) All prime sponsor notifications of intent, including those from consortia, shall include the following:

(1) Name and address of each prime sponsor applicant;

(2) Geographical area to be served;

(3) Population to be served;

(4) Name of any ineligible unit of local government, located within the prime sponsor applicant's jurisdiction, that has informed the prime sponsor applicant that it will not be participating in the prime sponsor applicant's plan;

(5) Certification that each prime sponsor applicant, except for a Concentrated Employment Program prime sponsor, has required governmental authority as defined in § 94.3 and will comply with all requirements of law and regulation; and

(6) The signature of the chief elected official(s) or chief executive officer(s), as appropriate, of each prime sponsor applicant. For a consortium, the signature of the chief elected official or chief executive officer of each consortium member is required.

(c) In addition to prime sponsor notifications of intent from consortia of local governments, each consortium shall, prior to execution of the grant, submit to the ARDM for his approval, a formal agreement which includes the following:

(1) A statement that the agreement has been formed under the Comprehensive Employment and Training Act of 1973. Either an agreement shall be written to establish a consortium arrangement for the express purpose of conducting a program under the Act or an existing joint power or other agreement shall be amended to include reference to the Act as part of the agreement;

(2) Identification of the units of government which are parties signatory to the agreement (i.e., the governmental units that are members of a consortium; not those governmental units that are merely served by a consortium;

(3) Identification of any ineligible governmental unit which would normally

V 39 N 54 MAR 19 74 XUM

be within the jurisdiction of the consortium but has informed the members of the agreement of its desire not to have services provided through the consortium;

(4) Geographical areas which will be served through the agreement;

(5) Population to be served;

(6) Certification that State and local law permits services under the consortium agreement to be provided within the entire geographical area covered by the agreement, including within the jurisdiction of any local government located within the geographical area covered by the agreement (i.e., that the agreement is not prevented by State or local law from taking effect in the entire geographical area which it intends to serve);

(7) An attached letter from each unit's chief legal officer assuring that each party signatory has the legal authority, under State or local law, to enter into a consortium agreement (these letters are made part of the agreement);

(8) A statement that grant agreements with the Department shall be signed by the chief elected official or chief executive officer of each party to the consortium agreement;

(9) Certification that to the extent consistent with State or local law, each party signatory to the agreement accepts responsibility for the operation of the program (i.e., each member of the consortium, rather than any administrative arm, has ultimate responsibility for the program's operation and success);

(10) A description of the powers, functions and responsibilities reserved by the parties to the agreement and a statement of the procedure by which chief elected officials will participate in the planning and operation of the program, if they so desire; and

(11) A statement of the powers, functions and responsibilities which will be delegated to an administrative entity to operate the program and the name and organizational structure of that entity.

(d)(1) The consortium shall be the prime sponsor under the Act. An administrative unit or one member of the consortium must be designated to operate the program.

(2) The division of powers, functions and responsibilities between the consortium members and the administrative unit must be workable and clearly delineated. The administrative unit may be delegated the power to enter into contracts and subgrants and other necessary agreements, to receive and expend funds, to employ personnel, to organize and train staff, to develop procedures for program planning, operation and assessment and fiscal management of the program, to evaluate program performance and determine resulting need to reallocate resources, and to modify the grant agreement with the Department. Such delegation shall not relieve the members of the consortium of their ultimate responsibility for the use of funds. The administrative arm of the consortium should have responsibilty for the entire operation of the program, but the consortium members shall be reserved the right of evaluation and the decision to reprogram funds.

(e) A consortium established under these regulations shall have a stated duration at least equal to the period of the grant.

(f) All prime sponsor notifications of intent from applicants which are eligible only in exceptional circumstances, as defined in § 95.3(a)(4) of this Part 95, shall, in addition to the requirements of paragraph (b), of this section include in their notifications of intent a statement and justification, that they meet the requirements of § 95.3(a)(4). Consortia formed in exceptional circumstances shall also submit an agreement as required in paragraph (c) of this section.

§ 95.12 Prime sponsor designation.

Upon receipt of a completed notification of intent, the ARDM shall determine whether the applicant is eligible to be designated as a prime sponsor and shall notify the applicant of his determination. A grant application package (§ 95.14(b)) shall be sent to each applicant designated as being eligible for prime sponsorship.

§ 95.13 Planning process; advisory councils.

(a) *General.* To receive financial assistance under Title I of the Act, a prime sponsor applicant shall submit an approvable Comprehensive Manpower Plan, as set out in § 95.14 of this Part 95. In developing such a plan, a prime sponsor applicant shall utilize the advisory councils set out in this section (secs. 104, 105, and 107).

(b) *Planning process.* The prime sponsor shall establish a planning process for the development of its Comprehensive Manpower Plan. That process shall utilize, as appropriate, the advisory councils established in this section and shall also assure the participation in program planning of community-based organizations and the population to be served.

(c) *Prime sponsor Manpower Planning Council.* (1) Each prime sponsor (and prime sponsor applicant) shall appoint a Manpower Planning Council representative of the geographic area to be served. The Planning Council function is advisory. The Council's advisory authority does not free the prime sponsor from its final decisionmaking responsibilities under the Act.

(2) The Planning Council shall advise the prime sponsor in the setting of basic goals, policies and procedures for its program under the Act. It shall make recommendations regarding program plans, and provide for continuing analyses of needs for employment, training and related services in such areas. Planning Councils should monitor all manpower programs under the Act and provide for objective evaluations of manpower and related programs operating in the prime sponsor's area, for the purpose of improving the utilization and coordination of the delivery of such services. The procedures for evaluating programs relating to the Act will be developed in cooperation with the agencies affected. The Planning Council shall make recommendations based upon its analyses to the prime sponsor, which will consider them in the context of its overall decisionmaking responsibility.

(3) Each prime sponsor shall, to the extent practical, include as appointments to its Planning Council members who are representative of the client community, community-based organizations, the Employment Service, education and training agencies and institutions, business, labor, and, where appropriate, agriculture. Persons representative of other interested groups may also be appointed. The prime sponsor shall appoint a chairman of the Planning Council and provide professional, clerical, and technical staff to serve it. Funds for supportive services and related staff costs for the Planning Council may be made available from a prime sponsor's basic allocation.

(d) *State Manpower Services Council.* (1) A State prime sponsor shall establish, in addition to its Planning Council under paragraph (c) of this section, a State Manpower Services Council (SMSC) representative of the geographic area to be served. The SMSC function is advisory and does not relieve the State of its final decision-making responsibilities under the Act. The SMSC shall review and monitor all manpower activities within the State, including those of prime sponsors, and advise and make recommendations concerning manpower activities to the Governor, prime sponsors, State manpower agencies and the public.

(2) Consistent with the requirements of section 107 of the Act, the Governor shall appoint Council members, as follows:

(i) At least one third of the membership of the Council shall be composed of representatives of prime sponsors who have been designated in accordance with procedures agreed upon by such prime sponsors. (All prime sponsors within the State need not be represented; whatever the size of the Council, one-third of its membership shall be representatives of prime sponsors within the State.)

(ii) One representative shall be appointed from each of the following: The State Board of Vocational Education, the State Employment Service, and any State agency the Governor believes has an interest in manpower or manpower-related services within the State.

(iii) Representatives shall be appointed from organized labor, business and industry, the general public, community-based organizations, and from the population to be served under the Act (including representation of persons of limited English-speaking ability when such persons represent a substantial portion of the client population).

(3) The Governor shall appoint a chairman for the Council and provide the Council with professional, technical, and clerical staff. The Council shall meet as it deems necessary.

(4) Council responsibilities shall include, but not be limited to:

(i) Reviewing prime sponsor plans, proposed modifications, and comments thereon;

(ii) Reviewing State agency plans for providing services to prime sponsors;

(iii) Making recommendations for effective coordination of all manpower and manpower-related programs and supportive services within the State;

(iv) Continuously monitoring (A) the operation of programs conducted by prime sponsors in the State and (B) the availability, responsiveness, adequacy and effective coordination of State services provided by all manpower-related agencies;

(v) Submitting an annual report, which will be a public document, to the Governor, prime sponsors, State manpower agencies and such other reports and information to the Governor and prime sponsors as it believes necessary to effectively carry out the Act.

(e) *Combined planning and services councils.* In any State where the State is the only prime sponsor, the prime sponsor Planning Council may also perform the functions of the State Manpower Services Council. In such instances the membership of the prime sponsor Planning Council shall reflect the membership requirements of the State Manpower Services Council.

§ 95.14 Content and description of grant application.

(a) *General.* (1) This section describes the grant application which prime sponsor applicants will use to apply for funds under Title I of the Act. If an applicant is also applying for funds under Title II of the Act, additional requirements set out in Part 96 must also be followed. Procedures for special State grants under Title I are in Subpart D of this Part 95 (sec. 105).

(2) A copy of all forms and instructions are contained in the Forms Preparation Handbook.

(b) *Grant application forms*—(1) *Application for Federal Assistance.* The Application for Federal Assistance identifies the prime sponsor applicant and the amount of funds requested; it provides information concerning the area to be served and the number of people expected to benefit from the program. Forms provided in OMB Circular A-102 for Parts I and II of a grant application for nonconstruction are being used.

(2) *Comprehensive Manpower Plan.* The Comprehensive Manpower Plan is a statement of how the prime sponsor applicant intends to use Title I funds, and to coordinate its activities with other manpower programs and services operating within its jurisdiction. The Comprehensive Manpower Plan consists of the Program Narrative Description, the Program Transition Schedule, the Project Operating Plan, the Program and Occupational Summaries for Public Service Employment, and the Vocational Education Non-Financial Agreement, all described below. For consortium prime sponsors, the approved consortium agreement will be a part of the plan.

(i) *Program Narrative Description.* The Program Narrative Description provides for a narrative outline of the proposed program under the Act. It identifies and explains the manpower problems within the prime sponsor's jurisdiction, describes proposed program activitives and delivery systems to deal with those problems, and projects the results which may be expected from the program. The Program Narrative Description form requires a detailed statement on the program including the following specific items. The Form Preparation Handbook gives detailed instructions for these and other items on the Program Narrative Form:

(A) *Objectives and needs for assistance.* (1) Policy statement on purpose of program;

(2) Description of economic condition;

(3) Description of labor market characteristics;

(4) Assessment of skill shortages;

(5) Definition of manpower needs;

(6) Statement of groups to be served;

(7) Statement on consideration of priority groups; and

(8) Statement of goals to be accomplished.

(B) *Results and benefits expected.* (1) Statement relating planned results to needs;

(2) Description of "other activities" in Project Operating Plan;

(3) Statement of how training and services will provide participants with economic self-sufficiency; and

(4) Explanation of how training will lead to employment and enhance career development.

(C) *Approach:* (1) Description of planning system and participation of community based organizations;

(2) Statement of strategy for accomplishing goals;

(3) Description of each program activity and service;

(4) Description of methods to be used to recruit, select and determine eligibility of participants;

(5) Description of how persons of limited English-speaking ability will be served if they represent a large portion of a Prime Sponsor's program;

(6) Description of consideration given programs of demonstrated effectiveness;

(7) Description of prime sponsor's administrative system;

(8) Description of allowance payment system;

(9) Explanation of any system for accounting for placements;

(10) Explanation of reasons specific delivery agents were selected including area skill centers and justification when other than existing facilities have been selected;

(11) Description of vocational education training and services funded by State Special Grants;

(12) Description of coordination with deliverers of manpower services not supported by the Act;

(13) Justification of administrative costs planned; and

(D) *Geographic location served.* Description of geographical locations to be served.

(E) *Items relating to State applicants.* (1) Description of functions of the State Manpower Services Council;

(2) Description of State Manpower Services to be undertaken; and

(3) Copy of the narrative included with the State's Special Grant.

(F) *Public Service Employment Programs.* (1) Description of target population characteristics and significant segments which need special attention;

(2) Description of unmet public service needs and priorities;

(3) Comparison of types of jobs in public service needs described above.

(4) Justification of funding and job allocation by area;

(5) Description of strategy for matching jobs to special veterans skills;

(6) Description of plan for monitoring services to significant segments; specifically disabled and special veterans and welfare recipients;

(7) Orientation procedures for participants;

(8) Description of determination of rates of compensation when they differ from what is normally paid by employer;

(9) Description of actions to insure compliance with personnel procedures and collective bargaining agreements for jobs above entry level;

(10) Plans to improve and expand employment and advancement opportunities of the target population; and

(11) List of governmental units and union organizations to which the application must be sent for comments.

(ii) *Program Transition Schedule.* The Program Transition Schedule, required only in the plan for fiscal year 1975, requires the prime sponsor to list the categorical manpower programs currently funded under the Manpower Development and Training Act (MDTA) and the Economic Opportunity Act (EOA), indicating those which will be phased into the operation of activities under the Act and those to be phased out. Current programs under MDTA and EOA may be continued only through December 31, 1974, unless the ARDM approves, under special circumstances. The prime sponsor shall also describe the system for ensuring continuity of service for those individuals enrolled in the categorical programs operating at the time of transition.

(iii) *Project Operating Plan.* The Project Operating Plan requires a prime sponsor to provide a quantitative statement of planned expenditures, enrollment levels, and outcomes for program participants. It also requires a prime sponsor to indicate planned expenditures for administration, allowances, wages, fringe benefits, training, and services.

(iv) *Public Service Employment Occupational Summary.* The Occupational Summary requires a prime sponsor operating a public service employment program under the Act to provide a description of proposed job opportunities, occupations and wages, including a comparison of such wages with wages for similar non-subsidized jobs in the employing agency. The prime sponsor shall submit separate summaries for such pro-

V 39 54 MAR 19 74 XUM

grams under Title I and Title II of the Act.

(v) *Public Service Employment Program Summary.* The Program Summary presents a distribution of public employment jobs, and funds to be provided to prime sponsors and subgrantees. It designates the areas to be served and the population of each area. The prime sponsor shall submit separate summaries for such programs under Title I and Title II of the Act.

(vi) *Assurances and certification.* The Assurance and Certification form is a signature sheet on which the prime sponsor assures and certifies that it will comply with the Act, the regulations of the Department, other applicable laws, and applicable circulars from the Office of Management and Budget and the General Services Administration. The assurances and certifications included on the form are as follows:

(A) Compliance with the Act and Regulations;

(B) Compliance with OMB circulars A–87, A–95, A–102;

(C) Legal authority;

(D) Noncompliance;

(E) Compliance with Title VI of the Civil Rights Act of 1964;

(F) Compliance with the Uniform Relocation Assistance and Real Property Acquisitions Act of 1970;

(G) Compliance with the Hatch Act and restrictions on political activities;

(H) Prohibition on use of position for private gain;

(I) Access of Comptroller General and Secretary to records and documents pertaining to the Act;

(J) Nonsupport of religious facilities;

(K) Maintenance of required health and safety standards;

(L) Provision of appropriate workman's compensation to participants;

(M) Use of funds under the Act to supplement, rather than supplant, funds otherwise available and prohibition on displacement of employed workers by participants employed under the Act;

(N) Training only in occupations which have reasonable expectations for unsubsidized employment and which provides for the development of participants' potential consistent with their capabilities;

(O) Compliance with reporting and record-keeping requirements of the Act and regulations.

(P) Provision of required administrative and accounting controls;

(Q) Compliance with applicable standards for working conditions;

(R) Specific assurances for Title I activities, as required by the Act;

(S) Specific assurances for public service employment programs, as required by the Act;

(T) Special certifications for State applicants, as required by the Act.

§ 95.15 Comments and publication procedures relating to submission of grant application.

(a) As provided in paragraphs (b) and (c) of this section, each prime sponsor applicant shall, no later than the date of its submission of an application to the ARDM, provide an opportunity for comment on the application (secs. 105(c)(2) and 108).

(b)(1) Each prime sponsor shall publish a summary of the grant application package, including the proposed allocation of funds, in a newspaper or newspapers (including minority newspapers, where feasible) which will provide for a general circulation throughout the area to be served by the prime sponsor's plan. Such publication shall be for three consecutive issues and shall include an address and appropriate hours when the complete grant application will be available for review and the place where comments may be directed. The publication shall be made 30 days prior to the submission of the application to the ARDM, except that for Fiscal Year 1975 the publication shall be no later than the date of submission of the application to the ARDM.

(2) The information published shall include the following:

(i) The goals provided in the Project Operating Plan;

(ii) The significant segments of the population to be served, and number of planned participants in each segment;

(iii) The program activities and services to be provided by the program in each geographical area and the funds to be planned for each activity and service;

(iv) The total funds in the grant and distribution by cost categories.

(c)(1) In addition to general newspaper circulation, each prime sponsor applicant shall provide a copy of its application for the purpose of commenting thereon, to the Governor and the appropriate State A–95 clearinghouse(s). It shall provide a summary to appropriate units of local government with a population of at least 10,000 persons.

(2) For grants for fiscal year 1975, a prime sponsor applicant shall submit a copy of its application to the appropriate A–95 clearinghouse at the same time it submits its application to the ARDM. The copy of the application sent to the clearinghouse shall be accompanied by the following statement: "Due to the time constraints on implementation of Titles I and II of the Comprehensive Employment and Training Act of 1973, the program plan(s) required by sections 105, 106, and 205 of the Act is (are) being submitted to the clearinghouse and the Department of Labor simultaneously. Clearinghouses are requested to forward any comments directly to the Assistant Regional Director for Manpower. This review and comment procedure has been approved by the Office of Management and Budget only for FY 1974 Title II and FY 1975 Titles I and II program approval cycles."

(d) Comments pursuant to paragraphs (b) and (c) of this section shall be made to the prime sponsor applicant and the ARDM within 30 days of publication. The prime sponsor should provide copies of these comments to its Advisory Council.

(e) A prime sponsor applicant shall respond to any comment made pursuant to this section. It shall inform any party submitting a substantive comment of whether any plan revision will be made in response to the comment and the reasons for the prime sponsor's determination. All substantive comments and responses will be transmitted to the ARDM with the grant application, unless the comments are received after the application's submission, in which case they will be sent separately to the ARDM.

§ 95.16 Submission of grant application.

(a) Each prime sponsor applicant shall submit its grant application to the ARDM on or before a date set by the Secretary.

(b) A grant application shall include all items set out in § 95.14.

§ 95.17 Standards for reviewing grant applications.

(a) A grant application will be reviewed to determine if it meets the requirements of the Act, the regulations promulgated under the Act, and other applicable law.

(b) In reviewing a grant application as provided in paragraph (a) of this section, the ARDM shall determine whether:

(1) The application is complete.

(2) The needs and priorities identified in the application are supported and justified by the documentation provided by the prime sponsor.

(3) The planned expenditures for program activities are substantiated by documentation of the needs and priorities identified in the application.

(4) The performance goals identified in the application are reasonable in light of past program experience in the same or similar activities and the documentation provided by the prime sponsor.

(5) Appropriate arrangements have been made to involve the population to be served and community-based organizations in the planning process, through both representation on the Prime Sponsor Manpower Planning Council and participation in the specific planning of program.

(6) The prime sponsor applicant's selection of the method of delivery of services is supported by adequate documentation based on availability and capability of delivery agents and appropriateness of services for the population to be served (sec. 105(a)(3)(B)).

(7) Maximum efforts have been made to meet the goals of the prior year's plan; such efforts shall include monitoring, evaluation and remedial activities.

(8) The administrative costs in the application are reasonable and provide, to the maximum extent feasible, for Federal funds to be expended for direct program activities and services, and, if administrative costs exceed 20 percent of total costs, whether the prime sponsor has cited an adequate reason and provided supporting documentation.

(9) The prime sponsor has adequate internal administrative controls, accounting requirements, personnel standards, monitoring and evaluation procedures, availability for in-service training and technical assistance, and such other policies as may be necessary to promote the effective use of funds provided under Title I of the Act.

(10) All parties required to be afforded an opportunity to comment on comprehensive manpower plans have been afforded such an opportunity; and

(11) Any comment on a Comprehensive Manpower Plan evidences noncompliance with the Act, the regulations promulgated pursuant to the Act, or any other applicable law.

§ 95.18 Application approval; grant agreement.

(a) An application for a grant shall be approved if it meets the requirements of the Act, the regulations promulgated under the Act, other applicable law and if the ARDM determines that the prime sponsor has demonstrated maximum efforts to meet the goals of the prior year's plan.

(b) An application for a grant from a consortium, or pursuant to a State multijurisdictional agreement, shall be approved if, in addition, an agreement among the parties has been submitted to and approved by the ARDM.

(c) A prime sponsor applicant and the Governor shall be notified of action taken on the application. If an application is approved, the ARDM shall provide the prime sponsor with a grant agreement, consisting of the Grant Signature Sheet and the Assurances and Certification form, and the Comprehensive Manpower Plan which is included by reference.

(d) The Grant Signature Sheet specifies the amount obligated by the Department, the term of the grant and is signed by the ARDM and the prime sponsor.

§ 95.19 Application disapproval.

(a) An application for a grant shall be disapproved if it fails to meet any requirement of the Act, the regulations promulgated under the Act, or any other applicable law (secs. 105 and 108).

(b) No application shall be disapproved solely because of the percentage of total funds devoted to any allowable program activity.

(c) No application for a grant shall be disapproved until:

(1) The prime sponsor application has been notified that its application fails to meet a requirement of the Act, regulation promulgated under the Act, or other applicable law; and

(2) The prime sponsor applicant is provided with suggestions as to those corrective steps which may be utilized to remedy any defect found in the application; and

(3) The prime sponsor applicant has been provided with a reasonable opportunity, but not less than 30 days, to remedy any defect found in the application, but has failed to do so.

(d) When an application is disapproved, a notice of disapproval shall be transmitted to the prime sponsor and the Governor, accompanied by a statement of the grounds of the disapproval. Such disapproval shall not be effective until notice and opportunity for a hearing has been provided, as required in Subpart C of Part 98.

§ 95.20 Use of alternative prime sponsors; services by the Secretary.

If an application is not filed, as required, or is denied, or if a grant is terminated in whole or in part during a fiscal year, the Secretary may make provision for the funds so released to be used by the State or another alternative prime sponsor to service the area originally to be served by the primary prime sponsor, or the Secretary may serve such an area directly (sec. 110(a)).

§ 95.21 Modification of grant agreement.

(a) The Grant Signature Sheet shall be used as the instrument to modify an existing grant agreement when there is a change in (1) the term of the grant, (2) the amount funded by the grant, or (3) the assurances and certifications included in the grant agreement (secs. 105 and 108).

(b) When the term or amount funded by the grant is changed, the prime sponsor shall also submit revised portions of its Comprehensive Manpower Plan to specifically identify the changes.

(c) When the term or amount funded by a grant is changed the comments and publication procedures provided in § 95.15 shall be followed.

§ 95.22 Modification of Comprehensive Manpower Plan.

(a) *General.* Prime sponsors may make two types of modifications to Comprehensive Manpower Plans: major and minor. An ARDM may require a modification as described in (d) of this section.

(b) *Major plan modification.* (1) When a plan modification falls into one of the following categories it will be considered to be major plan modification:

(i) For grants of $100,000 or less:

(A) When the cumulative transfer of funds among program activities or cost categories exceeds $5,000.

(B) When the total number of individuals to be served, planned enrollment levels for program activities, planned placement terminations, or individuals to be served within significant client groups is to be increased or decreased by 15 percent or more.

(ii) For grants of over $100,000:

(A) When the cumulative transfer of funds among program activities or cost categories exceeds $10,000 or 5 percent of the total grant budget whichever is greater.

(B) When the total number of individuals to be served, planned enrollment levels for program activities, planned placement terminations, or individuals to be served within significant client groups is to be increased or decreased by 15 percent or more.

(2) A prime sponsor desiring a major modification shall submit a revised project operating plan and a narrative explanation of the proposed changes to the ARDM. This modification will be forwarded for comment to the Governor and to other interested units of local government and a summary published in a newspaper of general circulation in the prime sponsor's area. The ARDM shall notify the prime sponsor of final approval or of tentative disapproval within 10 days of receipt of the proposed modification. Final ARDM action on disapproval shall be taken within 30 days of the receipt of the proposed modification. Appeal of any such determination may be obtained through the procedures set out in Part 98 of the regulations.

(c) *Minor plan modification.* A prime sponsor may make any change in its project operating plan which is not set out in paragraph (b) of this section without prior approval, but must show any such change in the first quarterly progress report submitted to the Department after the change has been made. At the same time that this report is submitted, an updated Project Operating Plan will also be submitted. Only those lines and columns affected by the modification shall be shown.

(d) *ARDM required modification.* After consultation with a prime sponsor, modification may be required by the ARDM as necessary to respond to comments received on a grant application after the application has been approved (secs. 105 and 108).

Subpart C—Program Operations

§ 95.30 General.

This subpart sets out the program operation requirements for comprehensive manpower services under Title I of the Act. The utilization of funds under Title I is conditioned upon adherence to the Act, the regulations promulgated under the Act, and other applicable law.

§ 95.31 Basic responsibilities of prime sponsors.

A prime sponsor shall be responsible for:

(a) Compliance with plans and assurances;

(b) Compliance with Part 98 of these regulations;

(c) Establishing priorities for receipt of assistance authorized under the Act taking into account the priorities identified by the Secretary and the significant groups represented among the economically disadvantaged, unemployed and underemployed residing within his jurisdiction;

(d) Designing program operating activities which are, to the maximum extent feasible, consistent with every participant's fullest capabilities and will lead to employment opportunities enabling every participant to become economically self-sufficient, and will contribute to the occupational development or upward mobility of every participant (sec. 101);

(e) Advising every participant of his rights and responsibilities prior to entering the program and granting the opportunity for a fair hearing as provided in § 95.37; and

(f) Making maximum efforts to achieve the provisions of its plan.

V 39 54 MAR 19 74 XUM

§ 95.32 Eligibility for participation in a Title I program.

(a) A person who is economically disadvantaged, unemployed or underemployed (as defined in § 94.3) may, subject to paragraph (b) of this section participate in a program offered by the prime sponsor under Title I of the Act (secs. 2, 105(a) and 108(d))

(b) For the purpose of participating in a public service employment program under Title I of the Act, participation is permitted for persons who reside, as defined in paragraph (c) of this section, anywhere within the geographical area covered by the prime sponsor's comprehensive plan who are unemployed or underemployed, and are otherwise eligible for participation consistent with the requirements of sections 205(c) and 208 of the Act (sec. 105(a)(5)).

(c) For the purpose of defining residence in paragraph (b) of this section, the term residence shall mean an individual's permanent dwelling place or home, both at the time the individual applies and is selected for participation in a public service employment program under Title I of the Act. In determining whether a particular place is an individual's dwelling place or home, the intention of the individual is the key element. Maintenance of an "address" is not necessarily the same as maintenance of a dwelling place or home.

(d) Citizenship will not be used as a criterion to prevent permanent residents, including permanent resident aliens, from participating in a program to the extent consistent with applicable State or local law.

§ 95.33 Types of manpower program activity available.

(a) A prime sponsor may provide any type of manpower program activity which is consistent with the purposes of Title I of the Act. Such program activities include but are not limited to the development and creation of job opportunities, and the training, education and other services needed to enable an individual to secure and retain employment at his maximum capacity. Program activities should be primarily directed toward the placement of individuals in unsubsidized employment, either directly at the outset of program participation as a result of intake assessment or indirectly through provision of training or services. (sec. 101.)

(b) A prime sponsor may, consistent with these regulations, determine the operating levels and program activities in its area. It may select any of the program activities described in paragraph (d) of this section or devise other activities within the framework of the Act. No prime sponsor plan will be disapproved solely because of the percentage of funds devoted to a particular program activity (sec. 108(c))

(c) A prime sponsor shall develop special program provisions for persons of limited English-speaking ability when such persons constitute a significant portion of a prime sponsor's program. The prime sponsor shall establish operating procedures to ensure (sec. 301(b));

(1) Teaching occupational skills in the primary language of such persons for occupations which do not require a high proficiency in English;

(2) Developing new employment opportunities for persons limited in English-speaking ability;

(3) Developing opportunities for promotion within existing employment situations for such persons;

(4) Disseminating appropriate information and providing job placement and counseling assistance in the primary language of such persons;

(5) Conducting training and employment programs in the primary language of such persons; and

(6) Conducting programs designed to increase the English-speaking ability of such persons.

(d) The basic types of manpower services available to a prime sponsor include, but are not limited to, the following:

(1) *Classroom training.* (i) This program activity includes any training conducted in an institutional setting designed to provide individuals with the technical skills and information required to perform a specific job or group of jobs. It may also include training designed to enhance the employability of individuals by upgrading basic skills, through the provision of courses in, for instance, remedial education, training in the primary language of persons of limited English-speaking ability, or English-as-a-second language training.

(ii) Occupational training shall be designed for occupations in which skill shortages exist (sec. 105(a)(6)) and such training will be provided only for occupations for which there is reasonable expectation of employment (sec. 603(10)). Such determination shall be made by the prime sponsor, utilizing available community resources such as the local SESA office, the National Alliance of Businessmen, etc.

(iii) Allowances and other benefits as provided in § 95.34 may be paid to participants receiving training or education, provided that such allowances are not paid for any course having a duration in excess of 104 weeks (sec. 111(a)).

(iv) Vocational classroom training may be supported with funds provided through (A) the prime sponsor's Title I grant or (B) special grants to Governors for vocational education and services in prime sponsor areas. In order to obtain such services the prime sponsor will negotiate nonfinancial agreements with local Vocational Education Boards utilizing the procedures described in Subpart D of this Part 95.

(2) *On-the-job training.* (i) On-the-job training (OJT) refers to training conducted in a work environment designed to enable individuals to learn a bona fide skill and/or quality for a particular occupation through demonstration and practice. Such training may be conducted on a "hire first, train later" basis, or with ultimate placement with an employer other than the training organization. OJT may involve individuals at the entry level of employment or be used to upgrade present employees into occupations requiring higher skills. Training shall be designed to lead to the maximum development of participants' potentials and to their economic self-sufficiency.

(ii) *Inducements to employers.* Prime sponsors may provide payments or other inducements to public or private employers for the bona fide training and related costs of enrolling individuals in the program; provided that payments to employers organized for profit are only made for the costs of recruiting, training and supportive services which are over and above those normally provided by the employer. Direct subsidization of wages for participants employed by private employers organized for profit is not an allowable expendiutre (sec. 101(5)).

(iii) *Labor organization consultation.* Where appropriate, Labor organizations should be consulted in the design and conduct of on-the-job training programs where collective bargaining agreements exist with the employer.

(iv) *Participant benefits.* Wages and other benefits provided to OJT participants shall be in accordance with conditions specified in § 95.35.

(3) *Subsidized employment.* This program activity includes both transitional public service employment and work experience as defined below.

(i) *Transitional public service employment.* This program activity includes training, services and other activities incident to the subsidized employment of individuals in the public sector. Operating conditions and allowable expenditures, except for residency requirements, applicable when Title I funds are used for this activity are enumerated in Part 96 of these regulations.

(ii) *Work experience.* This program activity, unlike the others discussed above, is not directed primarily at the immediate placement of individuals following completion of participation. Participants in other program activities should be "job ready" when terminated, while work experience participants may have no reasonable prospects for full-time employment, and might be in need of another program activity upon completion. Work experience activities should be addressed, therefore, to enhancing the future employability of less competitive segments of the target population. Typical activities include part-time work for students, exposure to work habits and career possibilities for out-of-school youth, and readjustment to the work environment for older persons. Program outcomes may include return to school for dropouts, enrollment in post-secondary education for high school graduates, enlistment in the military services, adjustments in employer attitudes, placement of older workers in part-time work, or participation in another program activity. Work experience in the private for profit sector is prohibited.

(iii) *Participant benefits.* (A) Wages and benefits for persons employed in a public service program shall be as provided in Part 96.

(B) Allowances and related benefits for persons participating in a work experience program shall be as provided in § 95.34.

(4) *Services to participants.* This program activity is designed to provide supportive manpower services which are needed to enable individuals to obtain or retain employment or to participate in other manpower program activities leading to their eventual placement in unsubsidized employment. Such services include, but are not limited to the following:

(i) *Manpower Services.* (A) Outreach;
(B) Intake and assessment;
(C) Orientation;
(D) Counseling;
(E) Job Development;
(F) Job placement; and
(G) Transportation; and

(ii) *Supportive Services.* (A) Health care and medical services;
(B) Child care;
(C) Residential support;
(D) Assistance in securing bonds;
(E) Family planning services, provided that such services are made available to an enrollee only on a voluntary basis, and are not to be a prerequisite for participation in, or receipt of, any service or benefit from the program; and
(F) Legal services.

(5) *Other activities.* These are program activities which do not fit into any of the above categories, including, but not limited to, the following:

(i) Removal of artificial barriers to employment;
(ii) Job restructuring;
(iii) Revision or establishment of merit systems; and
(iv) Development and implementation of affirmative action plans.

§ 95.34 Training allowances.

(a) *The payment system.* To assure accountability and uniformity, and to facilitate the necessary coordination with other programs, the system for payment of allowances under the Act shall be maintained as a unified system (sec. 111(a)). In addition, the delivery system selected by the prime sponsor shall incorporate a procedure to obtain information concerning receipt of unemployment compensation by participants. The prime sponsor in selecting the delivery system for the payment of participant allowances should give consideration to the use of existing agencies which have experience in operating an allowance payment system. The payment system shall include the following elements:

(1) Determination of entitlement and computation of amount to be paid;
(2) Issuance and distribution of payments;
(3) Maintenance of payment records and preparation of required reports;
(4) Maintenance of a system to detect and collect overpayments; and
(5) Arrangements with other agencies to obtain necessary information to minimize duplication or unauthorized payments. This shall include arrangements with:

(i) The State employment security agency for verification of unemployment compensation benefits;
(ii) Local welfare agencies for verification of public assistance payments;
(iii) Training facilities for submittal of payment requests and certification of attendance; and
(iv) Other units of government for verification of training allowances under other Federal, State or local programs.

(b) *Selection of delivery agent.* The prime sponsor is required to provide a unified allowance payment system either directly or through contract with other organizations as it considers appropriate for its particular circumstances. The prime sponsor may want to give consideration to the Unemployment Insurance service when selecting the delivery agent for allowance payments.

(c) *Eligibility for allowances.* Allowances may be paid to participants receiving classroom training, education or work experience under Title I of the Act.

(d) *Application for unemployment compensation.* Participants should be encouraged to apply for unemployment compensation benefits if they are not already receiving such benefits.

(e) *Basic allowances.* Basic allowances for one week, when added to unemployment compensation payments, if any, shall equal whichever is the highest of:

(1) The minimum wage prescribed by State or local law for employment in the prime sponsor's area; or

(2) The minimum hourly wage set out under section 6(a)(1) of the Fair Labor Standards Act of 1938, as amended, multiplied by the number of hours of training, in which the trainee attends as required, or is absent for good cause; provided that for the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific, the provisions of the Fair Labor Standards applicable to those areas shall pertain.

(f) *Dependents allowances.* Basic allowances shall be increased by $5 per week for each dependent over two, up to a maximum of four additional dependents, for a total maximum basic allowance increase of $20 for six or more dependents.

(g) *Incentive allowances for persons receiving public assistance or who are in institutions.* (1) Incentive allowances, at the rate of $30 per week, are in lieu of basic allowances, and shall be paid to participants receiving public assistance who are not WIN participants, or whose needs or income are taken into account in determining such public assistance payments to others. Such allowances shall be disregarded in determining the amount of public assistance payments individuals are entitled to receive under Federal or federally assisted public assistance programs (sec. 111(a)). WIN participants already receive a similar incentive payment from WIN funds.

(2) Incentive allowances, in lieu of basic allowances, but not in excess of such allowances, may be paid institutionalized persons, including prison inmates participating in program activities. The determination as to whether such allowances will be paid, and the amounts thereof, shall be made by the prime sponsor in consultation with officials of the institution. In the case of prison inmates all or part of such payments, as determined by the prime sponsor and the head of the institution, may be held in reserve and delivered upon the participant's release from the institution.

(h) *Additional allowances.* Additional reasonable allowances may be provided to participants in any program activity for meals, travel, transportation, subsistence, emergency and other purposes.

(i) *Adjustments in allowances.* (1) No allowance to which an individual may otherwise be entitled shall be diminished in any respect because of receipt of a separation payment provided under any collective bargaining agreement.

(2) An individual's allowance may be adjusted upward to the degree that the local cost of living exceeds the national norm, as approved by the ARDM.

(3) Allowances may be reduced pro rata for part-time participation in any activity under Title I.

(4) Payment of participant allowances may be reduced pro rata for absence without good cause.

(5) Periodic increases may be provided as an incentive to participation.

(j) *Waivers of allowance payments.* (1) The payment of all or part of the allowances described in this section, except for allowances under paragraph (g)(1) of this section, may be waived by the prime sponsor in accordance with paragraph (j)(2) of this section.

(2) The criteria for a waiver of allowance payments, as provided in paragraph (j)(1) of this section, are as follows:

(i) The participants must have resources from concurrent employment or from other sources which enable them to subsist without such allowance payments; and

(ii) The waiver will increase the number of individuals which may be served and otherwise promote the purposes of the Act.

(3) The prime sponsor will notify in writing affected participants in cases of such waivers.

(k) *Repayments.* Prime sponsors may require participants to repay the amount of any overpayment of allowances under this part. An overpayment not repaid may be set off against any future allowance or other benefits under the Act to which the participant may become entitled. Where the overpayment was made in the absence of fault on the part of the participant, repayment shall be waived where such recovery would be against equity and good conscience or would otherwise defeat the purposes of the program.

V 39 54 MAR 19 74 XUM

§ 95.35 Wages; minimum duration of training and reasonable expectation of employment.

(a) *Wages.* (1) Participants in public service employment programs shall be paid wages as required by Part 96 of these regulations.

(2) Participants in employment other than public service employment shall be compensated by the employer at such rates, including periodic increases, as are reasonable considering such factors as industry, geographical region, and trainee proficiency (sec. 111(b)). In no event shall the rate be less than the highest of the following:

(i) The minimum wage rate specified in section 6(a)(1) of the Fair Labor Standards Act of 1938, as amended;

(ii) The State or local minimum wage for the most nearly comparable covered employment;

(iii) The prevailing rates of pay for persons employed in similar occupations by the same employer; or

(iv) The minimum entrance rate for inexperienced workers in the same occupation in the establishment or, if the occupation is new to the establishment, the prevailing entrance rate for the occupation among other establishments in the community or area or, any minimum rate required by an applicable collective bargaining agreement.

(3) For hours spent in the production of goods or services, the rate of compensation to be paid to trainees by employers, public or private, shall be specified in a written agreement entered into by the training or employing facility and the prime sponsor.

(4) Wages in the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific shall be consistent with applicable provisions of the Fair Labor Standards Act of 1938, as amended.

(b) *Duration of training.* An individual shall not be referred for training in an occupation which requires less than two weeks of preemployment training unless there are immediate employment opportunities available in that occupation (sec. 603(8)). Furthermore, no allowances will be paid for any course having a duration in excess of 104 weeks (sec. 111(a)).

(c) *Reasonable expectation of employment.* An individual shall not be referred to training unless the prime sponsor determines, after utilizing available and appropriate community resources, that there is a reasonable expectation of employment for such an individual in the occupation for which the person is being trained (sec. 603(10)).

§ 95.36 General benefits for program participants.

Each participant in a training or employment program under Title I of the Act shall be assured of appropriate workmen's compensation (sec. 603(6)). Each participant in an on-the-job training or public service employment program under Title I of the Act shall be assured of health insurance, unemployment insurance, retirement benefits (except as indicated in § 96.36) and other benefits at the same levels and to the same extent as other employees in the employment situation, and to working conditions and promotional opportunities neither more nor less favorable than such other employees enjoy (secs. 208(a)(4) and 603(5)).

§ 95.37 Prime sponsor review.

Each prime sponsor shall establish a procedure for resolving any issue arising between it and a participant, under Title I of the Act. Such procedures shall include an opportunity for an informal hearing, and a prompt determination of any issue which has not been resolved. When the prime sponsor proposes to take an adverse action against a participant, such procedures shall also include a notice setting forth the grounds for any adverse action proposed to be taken by the prime sponsor and giving the participant an opportunity to respond. No individual subject to the issue resolution requirements of this section may initiate the hearing procedures of Part 98 until all remedies under this section have been exhausted. Final determinations made as a result of the review process shall be provided to the participant in writing.

§ 95.38 Non-Federal status of participants.

Participants in a program under Title I shall not be deemed Federal employees for any purpose including Federal tort claims and shall not be subject to the provisions of law relating to Federal employment, including those relating to hours of work, rates of compensation, leave, unemployment compensation, and Federal employment benefits.

§ 95.39 Safety and health requirements for participants.

Participants shall not be required or permitted to work, be trained, or receive services in buildings or surroundings or under conditions which are unsanitary or hazardous or dangerous to their safety or health. In the case of participants employed or trained for jobs which are inherently dangerous (e.g., fire or police jobs), participants will be assigned in accordance with appropriate health and safety practices (sec. 603(5)).

§ 95.40 Training for lower wage industries; relocation of industries.

No participant may be enrolled in any activity or service under this Act in any lower wage industry in jobs where prior skill or training is typically not a prerequisite to hiring and where labor turnover is high, nor any authority conferred by this Act be used to assist in any relocation of an establishment from one area to another unless the Secretary determines that such relocation will not result in an increase in unemployment in the area of original location or any other area where it conducts business operations. (sec. 604(a)).

§ 95.41 Prime sponsor contracts and subgrants.

(a) *Contracts.* Contracts may be entered into between the prime sponsor and any party, public or private, for purposes set forth in an approved Comprehensive Manpower Plan.

(b) *Subgrants.* Subgrants may be entered into only between the prime sponsor and units of State and local general government, public agencies and nonprofit organizations.

(c) *Prime sponsor responsibility for development, approval and operation of contracts and subgrants.* The prime sponsor is responsible for development, approval and operation of all contracts and subgrants and shall require that its contractors and subgrantees adhere to the requirements of the Act, regulations promulgated under the Act, and other applicable law. It shall require contractors and subgrantees to maintain effective control and accountability over all funds, property and other assets covered by the contract or subgrant (sec. 105(a)(1)(B)).

(d) *Cancellation.* If a contractor or subgrantee does not comply with any requirement of the Act, the regulations promulgated under the Act, and other applicable law, the prime sponsor shall cancel the contract or subgrant. The prime sponsor may cancel for noncompliance with additional conditions established by the prime sponsor for the contract or subgrant.

(e) *Continuity of service when contract or subgrant is cancelled.* If a contract or subgrant is cancelled, the prime sponsor shall develop procedures for assuring continuity of service to participants and provide adequate notice to affected staff of the change (sec. 105(a)(1)(B)).

(f) *Contracts and subgrants extending beyond the term of the grant.* The nature of certain training programs may make it necessary for contracts or subgrants to be entered into by the prime sponsor which will extend beyond the term of the grant under the Act. The prime sponsor is authorized to enter into contracts or subgrants which extend past the termination date of the grant but such extension shall not exceed one year and shall be subject to the provisions of §§ 98.15 and 98.16. In such cases, the grantee shall continue to be responsible for the administration of such contracts and subgrants.

§ 95.42 Cooperative relationships between prime sponsor and other manpower agencies.

(1) Each prime sponsor shall, to the extent feasible, establish cooperative relationships or linkages with other manpower and manpower-related agencies in the area within its jurisdiction, in particular, with agencies operating programs funded through the Department (sec. 105(a)(3)(D)).

(2) Prime sponsors shall, to the extent feasible, notify the appropriate apprenticeship agency of training activities in apprenticeable occupations (sec. 105(a)(3)(D)).

Subpart D—Special Grants to Governors

§ 95.50 General.

(a) Funds shall be allocated to each State through a special grant for the support of:

(1) Vocational education services for prime sponsors;

(2) The State Manpower Services Council; and

(3) State manpower services.

(b) Funds available under paragraph (a) of this section shall be granted to each Governor in accordance with the formula allocation set out in § 95.2 of these regulations. Each Governor shall distribute these funds as provided in § 95.56. (secs. 103, 106, 107 and 112.)

(c) Provisions generally applicable in these regulations shall apply to special grants under this subpart unless otherwise provided.

§ 95.51 Distribution of funds.

(a) Five percent of the funds available under Title I of the Act shall be allocated to the Governors of the States to provide needed vocational education services for prime sponsors through State Vocational Education Boards as set out in § 95.2. These services are to be provided to participants under Title I of the Act.

(b) State Manpower Services Councils shall be supported with funds as set forth in § 95.2(b)(2).

(c) State manpower services provided under Section 106 of the Act shall be funded as set forth in § 95.2(c)(2).

§ 95.52 Grant application.

(a) Upon notification by the Secretary of the amount of funds available for a special grant to the State, the Governor shall submit a Special Grant Application to the ARDM on a date set by the Secretary. The ARDM shall determine whether the application shall be approved and shall notify the Governor of his determination.

(b) The Special Grant Application shall contain the following:

(1) *Application for Federal Assistance.* Forms provided in OMB Circular A–102 for Parts I and II of a grant application for non-construction projects are being used for the application for the special grant.

(2) *Special Grant Project Operating Plan.* This form will be used for grants for vocational education, State Manpower Services Councils, and State manpower services. The planned participant levels and fund expenditures by cost categories are contained on this form.

(3) *Special Grant Program Narrative.* The narrative for the special grant will be composed of three separate sections as follows:

(i) *Vocational Education Services Program Narrative.* The program narrative contains (A) a summary of all agreements required in § 95.57 between individual prime sponsors and the Vocational Education Board and (B) a copy of each such agreement. The summary should follow the procedures established for the development of individual program narratives supporting each non-financial agreement. If all of the non-financial agreements are not available when the application is submitted, the Governor shall describe the training and services which he expects to be supplied by the Vocational Education Board to each prime sponsor. Non-financial agreements received after the grant is made will be forwarded to the ARDM.

(ii) *State Manpower Services Council Program Narrative.* A description of the arrangements for the State Manpower Services Councils follows:

(A) A listing of members of the Council, identifying the group each member represents;

(B) Identification of the chairman;

(C) A statement of the procedures which will be followed in reviewing prime sponsor plans and making recommendations which will provide more effective overall coordination of manpower services in the State;

(D) A description of the system to be used in monitoring other prime sponsors and State manpower services;

(E) A description of the types of data, materials and information which will be included in the annual report to the Governor;

(F) If the Governor plans to use part of the funds authorized for the Council under section 103(d) of the Act (one percent of the allocation) for section 106 (State Services), the specific use of the funds shall also be described, including the amount and objectives to be accomplished.

(iii) *State Manpower Services Program Narrative.* The narrative for this part will provide a specific description for each activity, the planned costs, and the planned results, and will include:

(A) An explanation of the steps taken to assure that State agencies providing manpower and manpower related services either independently or as subgrantees or contractors will cooperate with prime sponsors and eligible applicants in implementation of the program;

(B) A description of methods which will be developed for the sharing of resources and facilities in order to carry out manpower programs throughout the State. The administration of such programs will be designed to meet the needs of the areas to be served with minimum duplication of the efforts of other prime sponsors and in the most efficient and economical manner;

(C) A description of the arrangements which have been made for coordinating manpower and manpower-related agencies within the State;

(D) An explanation of the arrangements made by the State to assist the Secretary under 38 U.S.C. 2012(a) in requiring each contractor and subcontractor in Title I programs under the Act to list all suitable employment openings in State Employment Service local offices. Fulfillment of this responsibility shall be based upon information developed by the Secretary; (sec. 106(b)(5))

(E) A description of any arrangements for planning areas to service geographical areas within the State, including a description of the roles and responsibilities of the planning area with particular emphasis on the steps taken to assure that plans of all State agencies for delivery of services have been effectively coordinated;

(F) A description of the provisions which have been made for (*1*) coordination with other prime sponsors in the State for manpower services provided by the State in other prime sponsors' areas; (2) exchange of information between State, intra-State and regional planning for economic development, human resource development, education and other relevant areas; and (3) coordination of all manpower plans in the State to eliminate conflict, duplication, and overlapping between programs under this Act and manpower services provided under other statutory authority;

(G) A description of any of the activities allowable under sec. 106(c) of the Act, that the State chooses to provide detailing those activities to be undertaken and the costs and goals of such activities, including:

(*1*) A description of the allowable services under the Act which are being delivered throughout the State by State agencies responsible for employment and training and related services; (sec. 106(c)(1));

(2) A description of any financial assistance the State plans to provide for special programs and services designed to meet the needs of rural areas outside major market areas; (sec. 106(c)(2));

(*3*) A description of the extent to which information will be developed and published regarding economic, industrial and labor market conditions, including but not limited to job opportunities and skill requirements, labor supply in various skills, occupational outlook and employment trends in various occupations, and economic business development and local trends (sec. 106(c)(3));

(*4*) A description of the service to be provided without reimbursement and upon request to any prime sponsor serving an area within the State, such information and technical assistance as may be appropriate to assist any such prime sponsor in developing and implementing its programs under this Act (sec. 106(c)(4)); and

(*5*) A description of any special model training and employment programs and related services, including programs for offenders similar to programs described in section 301(c) of the Act. (sec. 106(c)(5)).

(*4*) *Assurances.* All assurances developed elsewhere in these regulations for Title I apply to and will be included in the special grant application and agreement.

§ 95.53 Application approval and disapproval; grant agreement.

(a) The ARDM shall approve any grant application which meets the following standards and requirements:

(1) It contains all the required forms, information and certifications required by the regulations; and

V 39 I 54 MAR 19 74 XUM

(2) It meets the conditions for approval of grant applications under Subpart B of this Part 95.

(b) A special grant agreement shall be signed when the grant application is approved by the ARDM. This agreement is composed of a Special Grant Signature Sheet and a General and Special Assurances Form.

(c) An application for a special grant shall be disapproved if it fails to meet any requirement of the Act, the regulations promulgated under the Act, or any other applicable law. All other conditions set forth in § 95.19 shall apply to the disapproval of special grants.

§ 95.54 Modifications: limitations on use of funds.

A modification to a Governor's special grant may be accomplished in two different ways depending upon the magnitude of the modification:

(a) *Major modifications.* When a modification falls under one of the following categories it will be considered a major modification and will require the prior notification and approval of the ARDM:

(1) A change in the term of the grant;

(2) An increase or decrease in the amount of the grant;

(3) A change in any general or special assurances;

(4) When the cumulative amount of transfers among cost categories exceeds $10,000 or 5 percent of the grant, whichever is greater; or

(5) When there is a 15 percent cumulative change in the number of program participants.

(b) (1) When a modification falls into one of the above categories, the Governor shall have prepared and sent to the ARDM a request for modification. The ARDM shall, within fifteen days of receipt of the request, notify the Governor of his approval or disapproval.

(2) The request for modification will consist of the following: A grant signature sheet; a project operating plan (one for the total project and one for each prime sponsor whose plan is changed); and a program narrative justifying the proposed modification.

(c) *Minor modifications.* Any other modifications shall be considered a minor modification and as such can be made without the prior notification and approval of the ARDM. Such a modification shall be included in the Quarterly Progress Report and a revised Project Operating Plan reflecting only the items to be modified.

(d) *Limitation on use of funds.* (1) Funds for Vocational Education Services may not be used to fund any other activities included in this special grant.

(2) Funds for State Manpower Services Councils may be used for State manpower services to the extent such funds are not needed for the council.

§ 95.55 Governor's distribution of vocational education funds.

(a) (1) Upon notification of the funds available to his State for vocational education, the Governor shall inform the Vocational Education Board and each prime sponsor of the amount of funds available to be spent in each prime sponsor's area. If a prime sponsor elects not to use all or part of the funds provided for its area, it shall notify the Governor who will redistribute the funds among other eligible prime sponsors.

(2) The Governor shall determine the amount of funds to be made available in each prime sponsor area assuring that such funds do not increase by more than 20 percent the amount of funds available to that prime sponsor's area under the basic allocation formula set out in § 95.2 (b).

§ 95.56 Program operations.

(a) *Vocational education services and activities.* (1) The Governor shall provide vocational education funds he receives by special grant to the State Vocational Education Board. The State Vocational Education Board will then provide the training and services detailed in a non-financial agreement with the prime sponsor. This agreement will be developed at the local level between prime sponsors and the Vocational Education Board to provide vocational education services and activities to prime sponsor participants eligible under this Part 95. The agreement will then be forwarded to the Governor, to become part of his special grant application which shall be submitted to the ARDM.

(2) Vocational education services, which may be provided by a State Vocational Education Board, include, but are not limited to, basic or general education, educational programs conducted for offenders, institutional training and supportive services.

(3) If no Vocational Education Board exists within a State, the Governor may provide financial assistance to an alternate agency which serves the same purpose as a State Vocational Education Board.

(b) *State Manpower Services Council.* The Governor shall, from funds available under § 95.2(b)(2), provide staff and other necessary services in support of the Manpower Services Council in performing its functions under section 107 of the Act.

(c) *State manpower services.* The Governor will provide services, activities and projects, as set out in his approved Special Grant Plan program narrative, pursuant to § 95.52(b)(3)(iii).

§ 95.57 Grant administration.

(a) *Funding.* Special grants will be funded in the same way as basic grants under this Part 95.

(b) The requirements relating to grant administration contained in Part 98 are applicable to special grants to Governors, except as provided in Subpart D of Part 95.

(c) *Reports for special grants.* (1) A quarterly progress report containing financial and statistical data is required. The Governor will supply to each prime sponsor to which he is providing services a Quarterly Progress Report for funds expended in its area and will submit a summary Quarterly Progress Report, with copies of the individual prime sponsor reports attached, to the ARDM. These reports will be submitted for each Federal fiscal year quarter, to be submitted no later than thirty days after the end of the reporting quarter. Instructions for completion of this report are in the Forms Preparation Handbook.

§ 95.58 Nonfinancial agreement between prime sponsor and Vocational Education Board.

(a) Upon notification of the funds available for its area, the prime sponsor shall develop a financial, statistical and narrative plan for the expenditure of such funds by the Vocational Education Board in the prime sponsor area. This plan shall be developed consistent with the prime sponsor's Comprehensive Manpower Plan and shall be submitted to the Vocational Education Board for its approval. When approved, the plan will be signed by both the prime sponsor and the Board and will constitute a nonfinancial agreement.

(b) The Vocational Education Board shall provide services to the prime sponsor upon receipt of the necessary funds from the Governor. The nonfinancial agreement will consist of the following three sections:

(1) Prime sponsor vocational education nonfinancial agreement signature sheet;

(2) Vocational education project operating plan; and

(3) Vocational education program narrative.

(c) After the agreement is signed a copy will be sent to the Governor for his review and approval.

(d) The Governor shall develop procedures for the prime sponsors and the Vocational Education Board to follow when they desire to modify the nonfinancial agreement.

(e) The Governor shall develop procedures to assure that the Vocational Education Board provides services consistent with the Governor's vocational education plan and the non-financial agreements between the Board and the prime sponsors.

§ 95.59 Coordination with prime sponsor.

(a) The financial and statistical information from the approved Non-Financial Agreement Project Operating Plan will be entered into the relevant columns of the prime sponsor's basic grant Project Operating Plan as provided in the Forms Preparation Handbook. If the Comprehensive Manpower grant has been signed prior to final approval of the Vocational Education Agreement, a modified prime sponsor's grant Project Operating Plan will be submitted when the vocational education information is available.

(b) Information provided by the Vocational Education Quarterly Progress Report, supplied to the prime sponsor from the Governor, will be entered in the prime sponsor's basic grant Quarterly Progress Report.

PART 96—PROGRAMS UNDER TITLE II OF THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Subpart A—General

Sec.
Sec.
96.1 Scope and purpose.
96.2 Allocation of funds.
96.3 Eligibility for funds.

Subpart B—Grant Application

96.10 General.
96.11 Eligible applicant notification.
96.12 Content and description of grant application.
96.13 Comment and publication procedures relating to submission of grant application.
96.14 Submission of grant application.
96.15 Application approval.
96.16 Application disapproval.

96.40 General.
96.41 Distribution of funds.
96.42 Eligibility for funds.
96.43 Assistance by the Secretary.
96.44 Nepotism.
96.45 Non-Discrimination.
96.46 Subgrants.
96.47 Comment and publication procedures relating to submission of Indian grant applications.

AUTHORITY: Pub. Law 93–203,, sec. 602(a), 87 Stat. 839, unless otherwise noted.

Subpart A—General

§ 96.1 Scope and purpose.

(a) This part contains the Department of Labor's regulations providing for the establishment and operation of public employment programs, and other manpower programs, under Title II of the Act.

(b) Definitions for every abbreviation and major term may be found in Part 94 of this subtitle.

(c) Statutory authority for the regulations contained in this part is found in the provisions of section 602(a) of the Act, and in such other provisions of the Act as are noted at the end of each substantive provision of these regulations.

(d) These regulations amend the regulations published as Part 96 at 39 FR 5900, February 15, 1974. Each eligible applicant shall either comply with these amendments or notify the Assistant Regional Director for Manpower (ARDM) on or before April 18, 1974, that it cannot so conform, in which case the grant will be terminated (sec. 3(b)).

§ 96.2 Allocation of funds.

(a) Funds appropriated under Title II of the Act are available only for areas of substantial unemployment and may be allocated by the Secretary only to eligible applicants (secs. 204(a) and 204(c)).

(b) (1) At least 80 percent of the funds available under Title II shall be allocated among eligible applicants in accordance with a ratio comparing the number of unemployed persons residing in areas of substantial unemployment within each eligible applicant's jurisdiction to the number of unemployed persons residing in all areas of substantial unemployment (sec. 202(a)).

(2) Funds not allocated as provided in paragraph (b)(1) of this section may be distributed by the Secretary at his discretion taking into account the severity of unemployment in such areas and may include additional areas of substantial unemployment designated by the Secretary after the initial allocation of Title II funds (sec. 202(b)).

(c) An eligible applicant shall distribute to a program agent those funds that are allotted to the eligible applicant due to the level of unemployment within the program agent's jurisdiction, unless the program agent declines to operate a program under Title II of the Act, in which case, the eligible applicant will make other arrangements to serve that jurisdiction (sec. 204(d)(1)).

§ 96.3 Eligibility for funds.

(a) Funds shall be allocated by the Secretary only to eligible applicants. Eligible applicants are those prime sponsors and Indian tribes on Federal or State reservations, as defined in Subpart F of this Part 96, which include areas of substantial unemployment (sec. 204(a)).

(b) For the purpose of allocating funds, the term "eligible applicant" shall include any entity which is eligible to be a prime sponsor under Title I of the Act and Indian tribes on Federal or state reservations as described in § 96.42 (sec. 204(b)).

(c) A State shall not qualify as an eligible applicant for any geographical area within the jurisdiction of any other eligible applicant within the State unless the non-State eligible applicant has not submitted an approvable application for Title II funds (secs. 204(a) and 102(b)(1)).

(d) A unit of general local government shall not qualify as an eligible-applicant with respect to any area within the jurisdiction of another eligible unit of general local government unless such smaller unit has not submitted an approvable application for such areas (secs. 204(b) and 102(b)(2)).

(e)(1) Eligible applicants shall distribute funds to program agents, as provided in § 96.2(c) (sec. 204(d)(1)).

(2) No program agent shall receive or continue to receive funds for any area of substantial unemployment within the jurisdiction of another program agent unless the ARDM determines that the smaller program agent has not carried out its administrative responsibility for developing, funding, overseeing, and monitoring programs within its area, consistent with the application for financial assistance developed by the eligible applicant (secs. 204(d)(3) and 102(b)(2)).

(f)(1) An eligible applicant or program agent, other than a State, whose entire jurisdiction qualifies as an area of substantial unemployment shall, to the extent feasible, allocate funds for identifiable subareas which meet the unemployment rate requirements of areas of substantial unemployment in § 94.3. Such allocation to subareas shall be based on the ratio of the number of unemployed persons residing in each subarea to the total number of unemployed persons within the eligible applicant or program agent's jurisdiction.

(2) Where the eligible applicant is a State that has an unemployment rate for its jurisdiction of at least 6.5 percent, the State shall, to the extent feasible, allocate its funds under Title II to individual areas of substantial unemployment within its jurisdiction. Such allocations shall be based on the ratio of the number of unemployed persons residing in each individual area of substantial unemployment to the sum of unemployed persons residing in all such areas of substantial unemployment within its jurisdiction.

(g) If an eligible applicant finds that there is an area of substantial unemployment within its jurisdiction that has not been designated by the Secretary to receive assistance, it may recommend that such area by considered for assistance by the Secretary. In making any such recommendation, the eligible applicant must include a precise geographical definition of the area to be served and its population. Such a recommendation shall be submitted to the ARDM. The Secretary shall, within a reasonable time, make a determination of the recommendation and inform the eligible applicant of the determination and the reasons therefor.

Subpart B—Grant Application

§ 96.10 General.

This Subpart B provides the procedures for obtaining grants to operate programs under Title II of the Act.

§ 96.11 Eligible applicant notification.

(a) Eligible applicants shall be notified of their eligibility for grants under Title II. At that time, eligible applicants shall inform the ARDM, the Governor, and the State and appropriate metropolitan or

V 39 54 MAR 19 74 XUM

regional substate clearinghouse, as provided in OMB Circular A–95, of its intention to apply for a grant. If an eligible applicant desires to apply for a grant and so notifies the ARDM, a complete application package with forms and instructions will be furnished to the eligible applicant.

(b) For fiscal year 1974 grants, eligible applicants shall follow procedures contained in the "Announcement of Proposed Financial Assistance and Request for Notice of Intent to Apply for Prime Sponsorship" published at 39 FR 2743, January 23, 1974.

§ 96.12 Content and description of grant application.

(a) The grant application package shall contain:

(1) Application for federal assistance (application face sheet);

(2) Comprehensive Title II Plan;

(3) Assurances, certifications and requirements under section 205(c) of the Act; and

(4) Grant Signature Sheet.

(b) A description of these documents follows:

(1) The application for federal assistance (application face sheet) summarizes specific data concerning the application and provides certain general information necessary for the proper processing of the application. Such information includes identification of the eligible applicant, identification of A–95 clearinghouse (pursuant to OMB circular A–95), Federal funding, and type of assistance.

(2) The Comprehensive Title II Plan consists of a program summary, an occupational summary, project operating plan, and required narrative description of program operations:

(i) The Public Service Employment program summary presents the distribution of public employment jobs, comprehensive manpower services, and funds to be provided eligible applicants and subgrantees. It designates the areas to be served and the population of each.

(ii) The Public Service Employment Occupational Summary provides by occupational title, the number of jobs, monthly wage rates, man-months employed and total monthly wages. It provides for a comparison of such wages with wages for similar non-subsidized jobs in the employing agency.

(iii) The Project Operating Plan provides for a quantitative statement of the planned expenditures, enrollment levels, and outcomes for the participants in the program. In addition, the form contains planned expenditures for the following cost categories: administration, wages, fringe benefits, training and services.

(iv) Narrative descriptions are those required in § 96.14(b)(1).

(3) The Assurances and Certification Form is a signature sheet on which the eligible applicant assures and certifies that it will comply with the Act, the regulations of the Department, and applicable circulars from the Office of Management and Budget and the General Services Administration.

(4) The Grant Signature Sheet specifies the amount of funds obligated by the Department, and the term of the grant. It is signed by the ARDM and the authorized officials of the eligible applicant.

§ 96.13 Comment and publication procedures relating to submission of grant application.

(a) For FY '74 each eligible applicant that plans to apply for a grant shall, no later than the date of its submission of an application to the ARDM, provide an opportunity to comment on its application to the following:

(1) The Governor;

(2) Officials of appropriate units of general local government within the eligible applicant's jurisdiction;

(3) State and appropriate sub-state A–95 clearinghouses;

(4) Officials of labor organizations representing employees who are engaged in similar work in the same area as that proposed to be performed by the eligible applicant (section 206). For FY '76 and subsequent years each eligible applicant shall provide for a 30 day comment period as set forth in § 95.15 of this subtitle.

(b)(1) Each eligible applicant shall provide a copy of its application, for the purpose of commenting thereon, to the Governor, and the State and appropriate sub-state A–95 clearinghouse. It shall also provide a summary to appropriate units of general local government with a population of at least 10,000 persons and officials of appropriate labor organizations described in paragraph (a)(4) of this section. Units of general local government with a population of less than 10,000 persons may comment through the publication procedure set out in paragraph (c) of this section.

(2) For applications under Title II for Fiscal Year 1974 the copy sent to the clearinghouse shall be accompanied by the following statement:

> Due to the time constraints on implementation of Titles I and II of the Comprehensive Employment and Training Act of 1973, the program plan(s) required by section 205 of the Act is (are) being submitted to the clearinghouse and the Department of Labor simultaneously. Clearinghouses are requested to forward any comments directly to the Assistant Regional Director for Manpower. This review and comment procedure has been approved by the Office of Management and Budget only for FY 1974 Title II and FY 1975 Titles I and II program approval cycles.

(c) Each eligible applicant shall publish its program summary in a newspaper or newspapers (including minority newspapers, where feasible) which will provide for general circulation throughout the areas to be served by the eligible applicant's plan. Such publication shall be for 3 consecutive issues and shall include an address and appropriate hours when the complete grant application will be available for review and the place where comments may be directed. The publication shall be made 30 days prior to the submission of the application to the ARDM, except that for Fiscal Year 1975 the publication shall be no later than the date of submission of the application to the ARDM.

(d) Comments pursuant to paragraphs (b) and (c) of this section shall be made to the eligible applicant and the ARDM within 30 days of publication.

(e) An eligible applicant shall respond to any comment made pursuant to this section by providing the commenting party with appropriate information and notice regarding the actions or revisions the applicant intends to take or adopt due to the comment. All such comments and responses shall be transmitted to the ARDM as provided in § 96.14 or, if a comment is received after the application submission, separately to the ARDM.

§ 96.14 Submission of grant application.

(a) Each eligible applicant shall submit its grant application to the ARDM on or before a date set by the Secretary.

(b) Each eligible applicant shall include with its initial grant application:

(1)(i) A narrative description of the eligible applicant's methods to be used to recruit, select, and orient participants, including specific eligibility criteria, and programs to prepare the participants for their job responsibilities;

(ii) A narrative description of the eligible applicant's methods for determining, serving, and monitoring service for significant segments of its population and for groups to be provided special consideration.

(iii) In addition, for full funding of Title II grants in fiscal year 1974 and subsequent years, the program narrative description shall also include a narrative outline which identifies and explains the manpower problems within the eligible applicant's jurisdiction, and describes proposed program activities and delivery systems to deal with those problems and the results which may be expected from the program. The program Narrative Description also provides for a detailed statement on the program, specifically on (A) program objectives, (B) need for assistance, (C) results and benefits expected, (D) approach, (E) geographic area served, (F) a description of Title I and II activities to be financed by Title II funds and (G) the methods, based solely on the criteria established by these regulations, which were used by the eligible applicant in making determinations under § 96.3(f).

(2) Copies of all comments received on its application, and its responses to those comments;

(3) A list of the entities that received a copy of the application for comment, as provided in § 96.13(b) and the date that such copies were transmitted; and

(4) At the earliest possible date, a copy of the newspaper publication made pursuant to § 96.13(c).

§ 96.15 Application approval.

(a) An application for a grant shall be approved if it meets the requirement of the Act, other applicable law, and the regulations promulgated in this Part 96 (sec. 206).

(b) An eligible applicant and the Governor shall be notified of action taken on the application. If an application is approved, the ARDM shall provide a grant agreement to the eligible applicant consisting of the Grant Signature Sheet and the Assurances and Certification Form. The Comprehensive Title II Plan is incorporated by reference in the grant agreement.

§ 96.16 Application disapproval.

(a) An application for a grant shall be disapproved if it fails to meet any requirement of the Act, other applicable law or the regulations promulgated in this Part 96.

(b) No application for a grant shall be disapproved until:

(1) The eligible applicant has been notified that its application fails to meet a requirement of the Act, other applicable law, or of the regulations promulgated under the Act.

(2) The eligible applicant has been provided with suggestions as to those corrective steps which may be utilized to remedy any defect found in the application; and

(3) An eligible applicant has been provided with a reasonable time, but not less than 30 days, to remedy any defect found in the application, but has failed to do so.

(c) When an application is disapproved, a notice of disapproval shall be transmitted to the eligible applicant and the Governor accompanied by a statement of the grounds for the disapproval.

§ 96.17 Use of alternative eligible applicants.

If an application is not filed, as required, or is denied, or if a grant is terminated in whole or in part during a fiscal year, the Secretary may make provision for the funds so released to be used by one or more alternative eligible applicants to serve the area originally to be served by the primary eligible applicant, or the Secretary may serve such an area directly.

§ 96.18 Modification of grant agreements.

(a) The Grant Signature Sheet shall be used as the instrument to modify an existing grant agreement when there is a change in (1) the term of the grant, (2) the amount funded by the grant, or (3) the assurances and certifications included in the grant agreement.

(b) When the term or amount funded by the grant is changed, the eligible applicant shall also submit revised portions of its Comprehensive Title II Plan to specifically identify the changes.

(c) When a major modification is required, the comments and publication procedures provided in this Subpart B shall be followed. (sec. 206)

§ 96.19 Modification of Comprehensive Title II Plan.

(a) *General.* Eligible applicants may make two types of modifications to Comprehensive Title II Plans: Major and minor. An ARDM may require a modification in certain instances.

(b) *Major plan modification.* When a plan modification falls into one of the following categories it will be considered to be a major plan modification:

(1) When the eligible applicant adds or deletes a subgrantee.

(2) For grants of $100,000 or less:

(i) When the cumulative transfer of funds among program activities or cost categories exceeds $5,000.

(ii) When the total number of individuals to be served, planned enrollment levels for program activities, planned placement termination, or individuals to be served within significant client groups is to be increased or decreased by 15 percent or more.

(3) For grants of over $100,000:

(i) When the cumulative transfer of funds among program activities or cost categories exceeds $10,000 or 5 percent of the total grant budget whichever is greater.

(ii) When the total number of individuals to be served, planned enrollment levels for program activities, planned placement terminations or individuals to be served within significant client groups is to be increased or decreased by 15 percent or more.

(4) An eligible applicant desiring a major modification shall submit a revised project operating plan and a narrative explanation of the proposed changes to the ARDM. This modification will be forwarded for comment to the Governor and appropriate interested units in accordance with procedures set forth in § 96.13, and published in a newspaper of general circulation (including minority newspapers when feasible) in the eligible applicant's area. The ARDM shall notify the eligible applicant of final approval or of tentative disapproval within 30 days of the receipt of the proposed modification. Appeal of any such determination may be obtained through the procedures set out in Part 98 of this subtitle.

(c) *Minor plan modification.* An eligible applicant may make any change in its project operating plan which is not set out in paragraph (b) of this section without prior approval, but must show any such change in the first quarterly progress report submitted to the Department after the change has been made.

(d) *Modification required by ARDM.* After consultation with an eligible applicant, modification may be required by the ARDM as necessary to respond to the comments received on a grant application after the application has been approved.

Subpart C—Program Operation

§ 96.20 General.

This Subpart C sets out the program operation requirements for eligible applicants and subrantees. The utilization of funds under Title II of the Act is conditioned upon adherence to the requirements of this subpart, as well as adherence to the Act, other applicable law, and other terms and conditions of the regulations promulgated in this part.

§ 96.21 Basic responsibilities of eligible applicants.

An eligible applicant is responsible for:

(a) Requesting, receiving and administering funds within its jurisdiction (secs. 203(a) and 205(c)(1));

(b) Allocating funds and jobs equitably among public agencies within its jurisdiction (sec. 205(c)(23));

(c) Developing a plan to effectively implement a program of transitional public employment and related training and manpower services (sec. 203(a));

(d) Developing, to the greatest extent possible, new careers and opportunities for career advancement for participants (sec. 205(c)(4));

(e) Performing reviews at 6-month intervals on the status of each participant to assure that the participant's job has potential for advancement or suitable continued employment (sec. 207(a));

(f) Administering or supervising all activities under its approved plan including the establishment of hearing procedures, as set out in § 95.37 of this subtitle, (sec. 205(c)(1));

(g) Assuring that the program will, to the extent feasible, contribute to the elimination of artificial barriers to employment and occupational advancement within its jurisdiction (sec. 205(c)(18)); and

(h) Assuring that employing agencies take reasonable measures to provide information about their job openings with the employment service (sec. 205(c)(5)).

§ 96.22 Basic responsibilities of program agents; relationship with eligible applicants.

(a) A program agent, as defined in Subpart F, shall be delegated by the eligible applicant the administrative responsibility for developing, funding, overseeing and monitoring programs with respect to the funds made available to it under title II of the Act.

(b) A program agent shall carry out its functions consistent with the grant application developed by the eligible applicant in cooperation with the program agent and shall be responsible to the eligible applicant for carrying out its program in a manner consistent with the application (sec. 204(d)(2)).

(c) Irreconcilable differences between an eligible applicant and a program agent shall be submitted to the ARDM.

§ 96.23 Acceptable public employment positions.

(a) Funds provided under Title II shall only be used to fund public service needs which have not been met and to implement new public services (sec. 201).

(b) In developing job opportunities under this Part 96 the following requirements shall apply:

(1) The jobs provided must meet public service needs as defined in the Act and the regulations promulgated in this Part 96 (sec. 205(a));

V 39 54
MAR 19 74
XUM

(2) Program emphasis shall be on transitional employment: jobs which are likely to lead to regular, unsubsidized employment or opportunities for continued training (secs. 201 and 205(b)(4));

(3) Jobs shall be provided, to the extent feasible, in occupational fields which are most likely to expand within the public or private sector as the unemployment rate recedes (sec. 205(c)(6)).

(4) Jobs shall be allocated equitably to agencies of State and local government and subdivisions thereof, such as educational agencies, within the eligible applicant's jurisdiction, taking into account the number of unemployed persons within each area, their needs and skill levels, the needs of the agencies, and the ratio of jobs in the area at each governmental level (sec. 205(c)(23));

(5) Jobs will not be "deadened", but will contribute to career advancement and the development of the employment potentials of participants. Opportunities for continued training are to be provided to support the upward mobility of participants (secs. 205(a), 205(c)(4), and 208(a)(6)).

(6) No more than one-third of the participants in any program may be employed in a bona fide professional capacity as defined in 29 CFR 541.3 issued pursuant to section 13(a)(1) of the Fair Labor Standards Act of 1938, as amended. The exception to this limitation is the hiring of classroom teachers. (Generally, according to the F.L.S.A., a professional is an individual (i) with a professional education, usually requiring more education than a Bachelor's degree or whose work is original and creative in an artistic field;

(ii) at least 80 percent of whose work requires discretion and judgment and is intellectual in nature, and (iii) who earns at least $140 a week ($125 in Puerto Rico, Virgin Islands, or American Samoa). A less stringent test applies to individuals earning $200 or more a week. Lawyers, doctors and teachers working as such are professional without regard to their earnings (for further explanation see 29 CFR 541.3) (section 205(c)(22));

(7) The program excludes employment in building and highway construction work (except that which is normally performed by the prime sponsor or eligible applicant) and other work which inures primarily to the benefit of a private profit-making organization.

(8) Jobs in each job category shall in no way infringe upon the promotional opportunities which would otherwise be available to persons currently employed in public service jobs not subsidized under Title II (section 205(c)(24));

(9) No job will be filled in other than an entry level position in each job category until applicable personnel procedures and collective bargaining agreements have been complied with (section (c)(24)); and

(10) To the extent feasible the public services provided by the jobs should be designed to serve the residents of the areas of substantial unemployment designated for Title II funds (section 205(c)(3)).

§ 96.24 Maintenance of effort.

(a) Employment funded under Title II of the Act shall only be in addition to employment which would otherwise be financed by the eligible applicant without assistance under this title (sec. 204(c)(25)).

(b) To assure maintenance of effort, a public employment program under Title II of the Act:

(1) Shall result in an increase in employment opportunities over those which would otherwise be available;

(2) Shall not result in the displacement of currently employed workers, including partial displacement such as a reduction in hours of non-overtime work, wages, or employment benefits;

(3) Shall not impair existing contracts for service or result in the substitution of Federal funds for other funds in connection with work that would otherwise be performed; and

(4) Shall not substitute public service jobs for existing federally assisted jobs (sec. 208(a)(1)).

§ 96.25 Responsibility for selecting participants.

(a) Eligible applicants, program agents and other subgrantees, and employing agencies shall be responsible for the selection of participants. To meet this requirement, employing agencies must provide adequate documentation of each applicant's eligibility, and retain in the participant's folder the information on which this documentation of eligibility is based. Employing agencies shall also retain for a reasonable period of time the applications of persons not selected for participation and the reasons for their non-selection (sec. 205(c)(2)).

(b) Adequate documentation shall consist of a signed, and dated, complete application for employment, including the last date of employment, which attests that the information the application contains is true, to the best of the eligible applicant's knowledge.

§ 96.26 Special limitations on programs and participant selection.

(a)(1) *Political activities.* No program under this part may involve political activities, and neither the program nor the funds provided therefore, nor the personnel employed in the administration of the program, shall be in any way or to any extent engaged in the conduct of political activities in contravention of Chapter 15 of Title 5, United States Code. Prohibited activities under this section include, but are not necessarily limited to, the assignment of any participant by an eligible applicant or subgrantee or employing agency to work for or on behalf of a partisan political activity; To take part in voter registration activities; or to participate in other partisan political activities such as lobbying, collecting funds, making speeches, assisting at meetings, and doorbell ringing, and distributing political pamphlets in an effort to persuade others of any political view.

(2) Participants employed in the administration of the program and participants whose principal employment is in connection with an activity financed by other Federal grants or loans are covered by the Hatch Act. Other participants are not precluded from taking an active part in political management or in a political campaign outside of working hours, provided they do not identify themselves as spokesman for any Title II funded program. All participants may take part in nonpartisan activities outside of working hours (sec. 208(g)).

(b) *Sectarian activities.* No participant in any program under this part may be employed in the construction, operation, or maintenance of such part of any facility as is used or will be used for sectarian instruction or as a place of religious worship (sec. 208(h)).

(c) *Place of residence*—(1) *General.* (i) At the time of both application and selection, program participants shall reside in an area of substantial unemployment within the jurisdiction of the eligible applicant or program agent (sec. 205(c)(3)).

(ii) When an eligible applicant receives additional funds as a subgrantee of an adjoining eligible applicant, the recipient eligible applicant shall use these additional funds to hire residents of the eligible area or areas within the donor eligible applicant's jurisdiction. A formal subgrant agreement shall be executed in such cases.

(2) *Consortia of eligible applicants.* In a case where two or more eligible applicants form a consortium to operate a Title II program, within the geographical boundaries of the consortium, residents of any designated area of substantial unemployment within the boundaries of the consortium may be employed at any site within such boundaries; provided that the total amount of funds available for residents of each area of substantial unemployment of each participating eligible applicant equals the amount of funds that the area would have received if the consortium had not been formed.

(3) *Consortia of units of general local government formed in order to qualify as program agents; multijurisdictional eligible applicants.* The provisions of paragraph (c)(1) and (2) of this section shall apply to consortia of units of general local government formed in order to qualify as program agents and to multijurisdictional eligible applicants.

(d) *Political patronage.* No program will be funded if the eligible applicant discriminates with respect to political affiliation. Specifically, no eligible applicant, subgrantee or employing agency may select, reject, or promote a participant based on that individual's political affiliation or beliefs. The selection or advancement of employes as a reward for political services or as a form of political patronage, whether or not the political service or patronage is partisan in nature, is discrimination based on political belief or affiliation, and is prohibited (Sec. 208(f)).

(e) *Nepotism*—(1) *Restriction.* No eligible applicant, subgrantee, or employing agency may hire a person into a Title II funded position if a member of his or her immediate family is employed in an administrative capacity for the same eligible applicant, subgrantee or employing agency. However, where a State or local statute regarding nepotism exists which is more restrictive than this policy, the eligible applicant should follow the State or local statute in lieu of this policy.

(2) *Definitions.* (i) For purposes of this section, the term "member of the immediate family" includes: Wife, husbrother, brother-in-law, sister, sister-in-law, son-in-law, daughter-in-law, mother-in-law, father-in-law, aunt, uncle, niece, nephew, stepparent and stepchild.

(ii) For the purposes of this section, the term "administrative capacity" includes those who have selection, hiring or supervisory responsibilities for Title II participants, or operational responsibility for the program.

(f) *Nondiscrimination generally.* (1) Every grant made pursuant to this part shall contain a certification statement signed by the grantee concerning the provision of equal employment opportunity under the grant.

(2) No discrimination shall be permitted in any program under this part with respect to race, creed, color, national origin, sex, age, handicap, political affiliation, or beliefs (sections 208(f) 612(a) and 603(1); Vocational Rehabilitation Act).

§ 96.27 Eligibility for participation in a Title II program.

(a) A person residing, as defined in paragraph (d) of this section, in an area of substantial unemployment who has been unemployed for at least 30 days prior to application or who is underemployed is eligible to participate in a program under Title II of the Act (section 205(a)).

(b) A person participating in a public employment program under section 5 or section 6 of the Emergency Employment Act at the time of the grant award under this Act who is currently, or was at the time of his selection for such participation, geographically eligible for participation in a program under Title II of the Act may be transferred into the Title II grant program covering that geographical area, provided that maximum efforts have been made to place such an individual in unsubsidized employment or training.

(c) A participant in an employment program under this Part 96 may change jobs within a particular eligible applicant's jurisdiction without an intervening period of unemployment, but may not be employed in a job for any other eligible applicant without an intervening period of unemployment of at least 30 days.

(d) For the purpose of this section, the term resident shall mean an individual's dwelling place or home, both at the time the individual applies and is selected for participation in a program under Title II of the Act. In determining whether a particular place is an individual's dwelling place or home, the intention of the individual is the key element. Maintenance of an "address" is not necessarily the same as the maintenance of a dwelling place or home.

(e) Citizenship will not be used as a criterion to prevent permanent residents, including permanent resident aliens, from participating in a program under Title II to the extent consistent with applicable State law.

(f) The regulations in this part do not authorize the hiring of any person when any other person is on lay off from the same or any substantially equivalent job (sec. 205 (C)(9)).

§ 96.28 Special consideration for most severely disadvantaged persons.

Special consideration in filling transitional public service jobs under Title II of the Act shall be given to unemployed persons who are the most severely disadvantaged in terms of the length of time they have been unemployed and their prospects for finding employment without assistance under Title II (sec. 205(c)(7)).

§ 96.29 Serving significant segments of the population.

(a) The significant segments of an eligible applicant's population shall be served on an equitable basis. For example, individuals from each significant segment could be placed in programs under Title II in a manner consistent with their incidence in the unemployed population of the eligible applicant or other measures of equity could be utilized (secs. 205(c)(2) and 208(b)).

(b) Each eligible applicant shall monitor its program to assure that the significant segments of its population are being served in accordance with the requirements of this section.

§ 96.30 Groups to be provided special consideration.

(a) *Veterans.* Special consideration shall be given to veterans who served in the Armed Forces in Indochina or Korea, or the waters adjacent thereto, on or after August 5, 1964, and who received other than a dishonorable discharge. These veterans shall be hired in a proportion at least equal to their incidence in the unemployed and underemployed population. In order to insure special consideration for veterans, all job vacancies under Title II, except those to which former employees are being recalled, must be listed with the State Employment Service at least 48 hours before such vacancies are filled. During this period, the Employment Service will refer special veterans. Upon request, the Employment Service may also refer members of other significant segments. All other applicants are to be referred after the 48-hour period. A list of job openings, with the exception of those to which former employees are being recalled, shall be made available from time to time by the eligible applicant, to veterans organizations for the purpose of making those jobs known to the veterans described in this paragraph (sec. 205(c)(5)).

(b) *Welfare recipients.* In designing an eligible applicant's plan and placing individuals in employment under this Part 96, special consideration shall be given to welfare recipients.

(c) *Former manpower trainees.* Special consideration shall be given, in developing an eligible applicant's plan and placing individuals in employment under this Part 96, to persons who have participated in manpower training programs and for whom work opportunities are not otherwise immediately available (sec. 205(c)(9)).

§ 96.31 Training and supportive services.

Eligible applicants, subgrantees, and employing agencies may use granted funds to purchase necessary training and supportive services from public or private organizations, provided that such contracts are not entered into with private for-profit organizations for the employment of participants.

§ 96.32 Linkages with other manpower programs.

An eligible applicant shall, where appropriate, maintain or provide linkages with upgrading and other manpower programs for the purpose of (a) providing public employment participants who want to pursue work with the employer, in the same or similar work, with opportunities to do so and to find permanent, upwardly mobile careers in that field, and (b) providing those persons so employed, who do not wish to pursue permanent careers in such field, with opportunities to seek, prepare for, and obtain work in other fields.

§ 96.33 Placement goals.

(a) Public service employment programs under the Act shall, to the extent feasible, be designed to enable all individuals to move from such employment programs into unsubsidized full-time jobs in the private or public sector, and shall emphasize the development of new careers and career development opportunities (secs. 201 and 205).

(b) Each eligible applicant, program agent, and subgrantee shall be responsible for efforts to place all participants in unsubsidized employment in both the private sector and the public sector, or in training programs.

(c) To carry out the intent of paragraph (b) of this section, each eligible applicant, program agent and subgrantee shall, to the extent consistent with law and applicable collective bargaining agreements, have the goal of accomplishing on an annual basis at least one of the following:

(1) Placing half of the cumulative participants in unsubsidized private or public sector employment; or

(2) Placing participants in half the vacancies occurring in suitable occupations in an eligible applicant, program agent, or subgrantee's permanent work force which are not filled by promotion from within the agency.

§ 96.34 Compensation for participants.

(a) *Minimum wage for participants.* Each participant shall be paid at a rate no less than the highest of the following:

(1) The minimum wage which would be applicable to the employee under the

V 39 54 MAR 19 74 XUM

Fair Labor Standards Act of 1938, if section 6(a)(1) of the Act applied to the participant and if he were not exempt under section 13 thereof;

(2) The State or local minimum wage for the most nearly comparable covered employment; or

(3) The prevailing rate of pay for persons employed in similar public occupations by the same employer (secs. 208(a)).

(b) *Limitations on participant's salary.* Compensation to any participant from Title II Federal funds is limited to a maximum full-time rate of $10,000 per year, plus the cost of fringe benefits to the extent they do not exceed those paid to workers earning $10,000 a year. This limitation shall also be applicable for participants in public service employment funded under other Titles of the Act.

§ 96.35 Working conditions for participants.

(a) Title II participants shall enjoy working conditions and promotional opportunities neither more nor less favorable than those enjoyed by other employees similarly employed (sec. 208(a)(4)).

(b) When a participant is eligible for a promotion or general salary increase that would mean a salary in excess of $10,000, the participant is entitled to it if other employees similarly employed would be promoted. The employer must pay the amount above $10,000 from his own funds as well as a pro-rated share of the increased fringe benefits. Funds from other titles of the Act shall not be used to supplement the maximum salary limitation for participants.

(c) Every participant must be advised prior to entering upon employment of the name of his employer, and of his rights and benefits in connection with his employment under the Act (sec. 208(a)(8)).

(d) No participant will be required or permitted to work in buildings or surroundings or under working conditions which are unsanitary, hazardous or dangerous to his health or safety. In the case of participants employed in jobs inherently dangerous, e.g., fire or police jobs, participants will be assigned to work in accordance with reasonable safety practices. The provisions of section 2(a)(3) of Pub. Law 89-286 (relating to health and safety conditions) shall apply to such programs or activity (sec. 208(a)(5)).

(e) Participants shall receive the same fringe benefits as other employees of the employing agency similarly employed (e.g., workmen's compensation, health insurance, unemployment insurance, vacations) (sec. 204(a)(4)).

§ 96.36 Retirement benefits for participants.

(a) While the mass payment of retirement benefits is not encouraged, the Act does not prohibit payment into the retirement fund on behalf of Title II participants where such payments are warranted.

(b) Expenditures may be made from Title II funds for payments under the Social Security Act.

(c) Expenditures for retirement fund payments for Title II participants may be made under any of the following conditions:

(1) Payments are for retirement benefits that are part of a consolidated package, including such benefits as health insurance and workmen's compensation, if separation of the benefits is not allowed;

(2) Payments are for participants who are immediately hired as regular employees (that is attain regular employee status, although salary is subsidized by Title II funds);

(3) Payments are for participants whom the employing agency or another employer intends to hire into permanent jobs at some future date, provided that:

(i) Payments on behalf of such participants are made into and retained in a reserve account, and not paid into the retirement fund until the participant has acquired regular employee status; and

(ii) If regular employment occurs with other than the employing agency, retirement fund payments may be allowed only if the participant is employed within the State, and the retirement benefits are portable; and

(4) Payments are for retirement benefits required by Federal, State, or local law, or for retirement plans set up by State or local law which will not permit the exclusion of Title II participants from coverage.

§ 96.37 Maintenance of a merit system.

Each eligible applicant shall assure that it will maintain personnel policies and practices for its employees in accord with State or local laws and regulations that adequately reflect the merit principles set forth in the Intergovernmental Personnel Act of 1970 (Pub. Law 91-648). Public agencies which are eligible applicants may meet this requirement by certifying compliance with the uniform Federal Standards for a Merit System of Personnel Administration (45 CFR Part 70). Those jurisdictions whose personnel systems have not been certified previously as meeting these standards for other grant programs shall certify that they will take necessary action to establish merit-based personnel policies (sec. 208(d)).

§ 96.38 Use of Title II funds for programs under Titles I and III-A: summer employment programs.

(a) Funds available to an eligible applicant may, at its option, be utilized for residents of the areas of substantial unemployment designated under this Part 96 for programs authorized under Title I and Part A of Title III of the Act. Where Title II funds are used for activities authorized under other Titles of the Act, all provisions under this Part 96, shall apply (sec. 210).

(b) An eligible applicant planning to use Title II funds for a summer program shall reflect that decision in its Comprehensive Title II Plan or any modification thereof. The eligible applicant shall specify that the Plan provision or modification is being proposed for the purpose of using Title II funds for its summer program, and shall further specify the amount of Title II funds intended for such use.

§ 96.39 Limitation on funds.

(a) Not less than 90 percent (90%) of the funds appropriated pursuant to Title II of the Act which are used by an eligible applicant for public service employment programs shall be expended for wages and fringe benefits to persons employed in public service jobs (sec. 203(b)).

(b) The remaining 10 percent (10%) may be used for administration, training, or supportive services to participants in public service employment.

(c) An eligible applicant which does not itself administer the entire program may not retain the entire 10 percent (10%) mentioned in paragraph (b) of this section for its own unless this is agreed to by its subgrantees. At least 5 percent (5%) of a subgrantee's grant must be available to it for costs other than wages and fringe benefits.

Subpart D—Special Conditions for Grants to Indian Tribes on Federal and State Reservations

§ 96.40 General.

This Subpart D contains special conditions for grants to Indian tribes on Federal and State reservations. To the extent that any provision of this Subpart D differs from any other provision of this Part 96, the provision of this Subpart D shall govern. In all other matters the requirements of Part 96, apply to this Subpart D.

§ 96.41 Distribution of funds.

(a) Funds for programs under Title II of the Act for Indian tribes on Federal and State reservations shall be determined as follows:

(1) Funds for use under this Subpart D shall be determined on the basis of a ratio taking the total number of unemployed Indians on all Federal and State Indian reservations which have areas of substantial unemployment and comparing this number with the total number of unemployed persons in all eligible applicant jurisdictions under this Part 96.

(2) Funds determined under paragraph (a)(1) of this section shall be allotted for use in the individual Indian reservations which have areas of substantial unemployment on the best available estimates of the population or unemployment on each such reservation as compared to the total population or total unemployment on all such reservations.

(b) No funds shall be granted for any individual reservation which does not have a population of at least 1,000 Indians or is not entitled to a Title III grant of at least $50,000. Such reservations may, however, be combined to qualify for funds as provided in § 96.42 (section 204(c)).

(c) An eligible applicant which represents more than one reservation shall further allocate funds for use among reservations in accordance, to the extent feasible, with the amounts indicated by the Secretary for each reservation.

(d) Within a single reservation, or a consortium of small reservations, the eligible applicant shall allocate granted funds, taking into consideration, to the extent feasible, differences in unemployment among identifiable areas within the reservation (section 204(c)).

§ 96.42 Eligibility for funds.

(a) An independently eligible applicant, shall be an Indian tribe on a Federal or State reservation which includes areas of substantial unemployment. Such tribe must represent at least 1,000 persons or is not entitled to a Title III grant of at least $50,000, and have a governing body possessing the substantive powers which will enable it to carry out a program under this Part 96. A governing body having substantive powers is a body consisting of duly elected representatives who have the authority to provide services and to enter into contracts, and grants on behalf of the individuals who elected them, and who are recognized as having such authority by the appropriate Federal or State agencies (sec. 204(c)).

(b) If an Indian tribe does not have a governing body capable of performing the functions set out in paragraph (a) of this section, or if an Indian tribe declines to administer a program under this part, the eligible applicant for the identified area may be:

(1) The governing body of another reservation on which the tribe is located;

(2) The governing body of another reservation where several Indian tribes have combined into a consortium; or

(3) An intertribal council or organization, business council, statewide or regional organization; or another eligible applicant under this Part 96 within the same geographic area; provided that:

(i) The Indian tribe agrees to such eligible applicant;

(ii) The prospective eligible applicant operates the program in a manner consistent with the requirements of this Subpart D; and

(iii) Such body or organization is capable of performing the functions described in paragraph (a) of this section.

(c) Where a determination is made by the Secretary that a designated Indian eligible applicant does not have the capability to administer a program, the Secretary may reassign that responsibility to another eligible applicant acceptable to the tribe, provided that such applicant is capable of performing the function described in paragraph (a) of this section.

§ 96.43 Assistance by the Secretary.

If an Indian tribe which is an eligible applicant under this Subpart D is unable to submit an application to carry out a program under this Part 96, the Secretary shall assist such eligible applicant in preparing, submitting, and implementing a program (sec. 207(c)).

§ 96.44 Nepotism.

(a) No eligible applicant or subgrantee under this Subpart D shall hire, or permit the hiring of, any person in a position funded under Title II of the Act if a member of the person's immediate family is employed in an administrative capacity by the eligible applicant. For the purposes of this section, the term "immediate family" means wife, husband, son, daughter, mother, father, brother, and sister; the term "administrative capacity" means persons who have selection, hiring, or supervisory responsibilities for participants in a program under this Part 96, or operational responsibility for the program.

(b) If a subgrantee under this Subpart D has a population of less than 1,000 persons and cannot hire program participants without an immediate family member being included, the ARDM may waive the requirement of paragraph (a) of this section if adequate justification is received from such subgrantee that no other persons within the subgrantee's jurisdiction are eligible and available for participation.

(c) Where a tribal policy regarding nepotism exists which is more restrictive than this policy, the eligible applicant shall follow the tribal rule in lieu of this policy.

§ 96.45 Non-discrimination.

Section 96.26(f) shall be applicable to Indian programs funded pursuant to Title II of the Act, except to the extent that such provisions conflict with 42 U.S.C. 2000e(b).

§ 96.46 Subgrants.

In addition to the requirements concerning subgrants, Indian tribes may require that subgrantees agree, to the maximum extent feasible, to hire qualified Indians to provide services called for pursuant to the subgrant in accordance with 42 U.S.C. 2000e-2(i).

§ 96.47 Comment and publication procedures relating to submission of Indian grant applications.

(a) Each eligible Indian applicant who plans to apply for a grant shall, no later than the date of its submission of an application to the ARDM, provide an opportunity to comment on its application to the following officials in accordance with section 206 of the Act:

(1) The Governor;

(2) Appropriate officials of units of general local government; and

(3) Officials of labor organizations representing employees who are engaged in similar work in the same area.

(b) Comments by those individuals and officials listed in paragraph (a) of this section shall be made available to the eligible applicant and the ARDM within thirty days of the receipt of notice of the opportunity to comment.

(c) Eligible Indian applicants shall respond to any comments made pursuant to this section by providing the commenting party with appropriate information and notice regarding the actions or revisions the applicant intends to take or adopt, if any, due to the comment. All such comments and responses shall be transmitted to the ARDM.

PART 98—ADMINISTRATIVE PROVISIONS FOR PROGRAMS UNDER TITLE I AND TITLE II OF THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Subpart A—Grant Administration

Sec.
98.1 General.
98.2 Payment.
98.3 Letter of credit.
98.4 Payment by Treasury check.
98.5 Financial Management systems.
98.6 Audit and evaluation.
98.7 Reporting requirements in general.
98.8 Quarterly Progress Report.
98.9 Summary of Client Characteristic Report.
98.10 Report of Federal Cash Transactions.
98.11 Reallocation of funds.
98.12 Allowable Federal costs.
98.13 Allocation of allowable costs among program activities.
98.14 Basic personnel standards for prime sponsors and eligible applicants.
98.15 Adjustments in payments.
98.16 Termination of grant.
98.17 Grant close-out procedures.
98.18 Retention of records.
98.19 Program income.
98.20 Procurement standards.
98.21 Non-discrimination and equal employment opportunities.

Subpart B—Assessment and Evaluation

98.30 General.
98.31 Responsibilities of the prime sponsor or eligible applicant.
98.32 Responsibilities of the Secretary.
98.33 Limitation.
98.34 HEW consultation.

Subpart C—Hearings and Judicial Review

98.40 Purpose and policy.
98.41 Review of plans and applications; violations.
98.42 Complaints; filing of formal allegations; dismissal.
98.43 Form.
98.44 Contents of formal allegations; amendment.
98.45 Investigations.
98.46 Opportunity for hearings; when required.
98.47 Hearings.
98.48 Initial certification, decisions and notices.
98.49 Judicial review.

Subpart A—Grant Administration

§ 98.1 General.

(a) This Subpart A describes Federal requirements relating to the administration of grants by prime sponsors and eligible applicants (secs. 603(14) and 613).

(b) The Secretary will provide each prime sponsor and eligible applicant with the specific procedures to be followed to comply with the requirements of this Subpart A (secs. 603(14) and 613).

§ 98.2 Payment.

Advance payments will be made by either a letter of credit or by U.S. Treasury check to prime sponsors and eligible applicants that demonstrate the willingness and ability to establish procedures which will minimize the time between the transfer of funds to them and their disbursement of such funds.

V 39 54
MAR 19 74
XUM

§ 98.3 Letter of credit.

(a) Grants will be financed by means of a letter of credit when the following conditions are met:

(1) The grant is for $250,000 or more;

(2) A continuing relationship exists for at least twelve months;

(3) The prime sponsor or eligible applicant can assure that the timing and amount of drawdowns will be as close as possible to disbursement needs;

(4) The prime sponsor or eligible applicant's accounting system will meet the recordkeeping and reporting requirements of this subpart.

§ 98.4 Payment by Treasury check.

(a) A grantee which does not meet the requirements for the letter of credit will be paid by Treasury check. The ARDM will determine whether such payment will be made on an advance or reimbursement basis. In making such a determination the ARDM will consider the adequacy of the prime sponsor or eligible applicant's accounting and recordkeeping system with regard to items 3b and 3c of Attachment J of OMB Circular A–102.

(b) Advance by Treasury check will provide for advanced payments through use of predetermined payment schedules or upon the request of the grantee. When the request method is used, payments will be made to a grantee based upon a request to the regional office.

§ 98.5 Financial management systems.

(a) Each prime sponsor, eligible applicant, and subgrantee shall maintain a financial management system which will provide accurate, current and complete disclosure of the financial results of each grant activity by title of the Act, provide the ability to evaluate the effectiveness of program activities and meet the reporting requirements of this subpart.

(b) Each prime sponsor, eligible applicant, and subgrantee shall maintain its fiscal accounts in a manner sufficient to permit the reports required by the Secretary to be prepared therefrom.

§ 98.6 Audit and evaluation.

(a) The Secretary of Labor, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the State and local government and their subgrantees and contractors which are pertinent to a specific grant program under the Act for the purpose of making surveys, audits, examinations, excerpts and transcripts (sec. 613(2)).

(b) The Secretary shall be responsible for scheduling surveys, audits or examinations of prime sponsors, eligible applicants and their subgrantees and contractors.

(c) The Secretary shall, with reasonable frequency, survey, audit or examine, or arrange for the survey, audit or examination of prime sponsors, eligible applicants and their subgrantees and contractors using city or state auditors; or certified or licensed public accountants. Such surveys, audits, or examinations shall normally be conducted annually but not less than once every two years.

(d) Surveys, audits and examinations will conform to the standards for Audit of Governmental Organizations, Programs, Activities, and Functions, issued by the Comptroller General of the United States and guides issued by the Secretary. Surveys, audits or examinations contracted by the Secretary will conform, at a minimum to the first element of the Comptroller General's Standards: An audit to determine (1) whether financial operations are properly conducted, (2) whether the financial reports are fairly presented, and (3) whether the available information indicates that the entity has not complied with applicable laws, regulations and administrative requirements. Existing audit systems, where acceptable under the Comptroller General's Standards, such as state audits of city and county activities will be used to the maximum possible extent (sec. 613(1)).

§ 98.7 Reporting requirements in general.

Each prime sponsor or eligible applicant will be required to submit three periodic reports which will be used by the Secretary to assess its performance in carrying out the objectives of the Act. These three reports are: (a) The Quarterly Progress Report, (b) The Summary of Client Characteristics Report, and (c) The Report of Federal Cash Transactions (secs. 313(b) and 613). Detailed descriptions of these forms are in the Forms Preparation Handbook.

§ 98.8 Quarterly Progress Report.

(a) The Quarterly Progress Report will be used to measure accomplishments in achieving objectives stated in the Project Operating Plan. It also constitutes the grantee's statement of costs incurred and contains its certification of the correctness of the costs reported.

(b) A prime sponsor or eligible applicant shall include the following items in the report together with a comparison of the same items as they appear in the Project Operation Plan for the period of the report:

(1) The total number of individuals served with granted funds during the grant period;

(2) The total number of individuals (participants) placed in self-sustaining employment at termination from the project and the number entering school, other training or military service;

(3) The level of enrollment associated with the following program activities:

(i) Classroom training;

(ii) On-the-job training;

(iii) Subsidized employment, distinguishing between transitional employment in public service and work experience employment;

(iv) Services to participants; and

(v) Other activities;

(4) The distribution of total accrued expenditures among the following cost categories:

(i) Administration;

(ii) Allowances;

(iii) Wages;

(iv) Fringe benefits;

(v) Training; and

(vi) Services to participants; and

(5) The distribution of services among significant segments of the population.

(c) If performance goals are not being achieved, the ARDM may request additional information from prime sponsors and eligible applicants including reasons for the failure to achieve the goals.

(d) The Quarterly Progress Report will also permit prime sponsors and eligible applicants to report on objectives and accomplishments other than those established by the Secretary. If a prime sponsor or eligible applicant elects to include these other activities in its report, they will be used by the Secretary in his evaluation of the performance of the prime sponsor or eligible applicant's program.

(e) The Quarterly Progress Report will be submitted to coincide with the ending dates of Federal fiscal year quarters. This report should be sent by the prime sponsor or eligible applicant to be received by the ARDM no later than 30 days after the end of the reporting period. If a prime sponsor or eligible applicant's grant period ends at a date other than the Federal fiscal year quarter, a fifth report, covering the entire grant period will be required.

(f) The Quarterly Progress Report will be submitted by the prime sponsor or eligible applicant to the Governor of the State.

(g) Accountability must be maintained by the prime sponsor or eligible applicant for each of the activities authorized under the Act. Therefore, a separate report will be required for Title I and Title II and the special grant.

(h) The Secretary reserves the right to require the submittal of this report by prime sponsors and eligible applicants more frequently than quarterly in cases of major deviation from the Project Operating Plan.

(i) Specific procedures for meeting these reporting requirements will be furnished to each prime sponsor and eligible applicant in the Forms Preparation Handbook.

§ 98.9 Summary of Client Characteristics Report.

(a) The Summary of Client Characteristics Report contains aggregate characteristics data on all participants in the program. The Summary is to be submitted to the ARDM with the Quarterly Progress Report.

(b) The Summary will include characteristics data aggregated for all participants, as set forth in the report form and will include all participants terminating or placed during the reporting period.

(c) The Summary will also aggregate wages before enrollment in the program and after placement and show the median wage for these two categories.

(d) Specific reporting procedures and appropriate definitions will be furnished to each prime sponsor and eligible applicant in the Forms Preparation Handbook.

§ 98.10 Report of Federal Cash Transactions.

(a) Each prime sponsor and eligible applicant shall submit periodically a report of Federal cash transactions. The report will be used to monitor cash advances and to obtain disbursement information. This report will be submitted monthly by each prime sponsor and eligible applicant receiving an annual grant totalling $1 million or more, and quarterly by other prime sponsors and eligible applicants (sec. 613(1)).

(b) Specific reporting procedures will be furnished to each prime sponsor and eligible applicant in the Forms Preparation Handbook.

§ 98.11 Reallocation of funds.

(a) *General.* The Secretary may reallocate funds from a prime sponsor or eligible applicant under the circumstances and in accordance with the procedures described in this section (secs. 103(1) and 602(b)).

(b) *Reallocation based on nonperformance.* (1) Pursuant to section 103(1) of the Act, when the Secretary considers through review of the prime sponsor or eligible applicant's reports, monitoring or auditing of the program that its performance may be inadequate or that it may have failed to comply with the Act or regulations, he shall give due notice and opportunity for a public hearing as provided in § 98.47.

(2) If the Secretary then decides to reallocate funds based on a ground set forth in paragraph (b)(1) of this section, he shall:

(i) Revoke the prime sponsor or eligible applicant's plan for the area, in whole or in part;

(ii) Make no further payments under this Act to the prime sponsor or eligible applicant, to the extent which he deems necessary; and

(iii) Notify the prime sponsor or eligible applicant of the amount of funds which shall be returned from unexpended funds paid to the grantee during that fiscal year.

(3) The Secretary shall make provision for the reallocation of funds to be used by the State or other alternative prime sponsor to service the area which was served by the prime sponsor before the reallocation, or the Secretary may serve such an area directly. (See § 95.20).

(c) *Reallocation based on need.* (1) In a limited number of circumstances the Secretary may determine that the unobligated portion of a prime sponsor or eligible applicant's grant should be reallocated to another area because the funds are not needed where they were originally allocated. Such reallocations may be made only after the ninth month of the fiscal year for which the grant was made.

(2) Before reallocating funds as set forth in paragraph (c)(1) of this section the Secretary must determine that:

(i) The prime sponsor or eligible applicant's plan will be carried out without expending all the funds previously made available for that plan; and,

(ii) The excess funds identified under paragraph (c)(2)(1) of this section cannot reasonably be expected to be needed in the following grant period.

(d) *Reallocation.* When the Secretary determines that funds should be reallocated based on the criteria in paragraph (c) of this section he will take the following actions:

(1) *Notice of intent to reallocate funds.* When the Secretary determines that a reallocation is appropriate he will notify the prime sponsor or eligible applicant and the appropriate Governor of the proposed action to remove funds from the grant. The notice shall include the basis for the proposed reallocation.

(2) *Comments by prime sponsor or eligible applicant and the Governor.* The prime sponsor or eligible applicant and the Governor will be invited to submit comments on a proposed reallocation of funds out of their area. These comments shall be submitted to the appropriate ARDM within 30 days of receipt of the notice. The Secretary shall consider these comments before making a final determination to reallocate.

(3) *Notification of final determination.* After reviewing any comments submitted by the prime sponsor or eligible applicant or Governor, the Secretary will notify them of his decision. A final decision to reallocate funds of a prime sponsor or eligible applicant will be published in the FEDERAL REGISTER.

(4) *Reallocation procedures.* In reallocating such funds to supplement other prime sponsors', or eligible applicant grants, the Secretary shall first consider the need for additional funds by other prime sponsors or eligible applicants within the same State. A decision to increase a prime sponsor or eligible applicant's grant with reallocated funds will not be made without prior consultation with the prime sponsor or eligible applicant as to how the funds will be expended, and prior notification to the Governor. Such a decision will be published in the Federal Register with an announcement of the prime sponsor(s) or eligible applicant(s) receiving additional allocations and the amounts.

§ 98.12 Allowable Federal costs.

(a) *General.* Federal funds granted under the act may be expended only for purposes permitted under the provisions of Subpart 1–15.7 of Title 41 of the Code of Federal Regulations (OMB Circular A–87), except as modified in these regulations. Costs are intended to be directed to increase the employability of of participants.

(b) *Restriction.* Federal funds used for public service employment programs under Title I and for any programs under Title II of the Act shall not be used for the acquisition of, or for the rental or leasing of supplies, equipment, materials or real property, whether these expenses are budgeted as direct cost, indirect cost, or overhead (sec. 208(a)(7)).

(c) *Expenditures for repairs, maintenance and capital improvements and construction.* (1) Title I funds may be expended for building repairs, maintenance and capital improvements. Such costs shall be reported against the administration category. These costs must relate to a facility or building which is used primarily for programs under the Act (sec. 602(b)).

(2) No funds for construction are allowable except as part of a training program in construction occupations and then such costs are allowable only for materials. Construction costs for training programs shall be allowable only when such construction would not normally be performed by an outside contractor.

(d) *Allowable cost categories.* Allowable costs shall be reported against the following cost categories: Administration; wages; training; fringe benefits; allowances; and services (sec. 101).

(1) Costs are allocable to a particular cost category to the extent of benefits received by such category.

(2) All prime sponsors and eligible applicants are required to plan, control and report expenditures against the aforementioned cost categories.

(e) *Costs allowable by each cost category.* Within the restrictions set forth under paragraph (b) of this section, the following are the costs which will be allowable by cost category:

(1) *Administrative costs.* Administrative costs shall be limited to those necessary to effectively operate the program. Costs should not generally exceed 20 percent of the overall percentage of the total funds available for a grant, unless the Program Narrative Description under § 95.14(2)(1) sets forth an explanation of how such additional costs have been determined and a detailed documentation to support that amount (sec. 108(a)(2)).

(i) *Direct and indirect costs.* Included in administrative costs are both direct and indirect costs. Direct costs are those which can be specifically identified as relating to the project and indirect costs are those computed by application of an indirect cost rate. In determining the reasonableness of indirect costs, reliance will be placed on procedures established pursuant to OMB Circular No. A–87, including reliance on determinations made by other Federal agencies under arrangements made pursuant to A–87.

(ii) *Types of costs.* (A) Administrative costs include, but are not limited to, salaries, wages and fringe benefits of program administrators; costs of consumable office supplies used by program staff; costs incurred in the development, preparation, presentation, management and evaluation of the program; the costs of establishing and maintaining accounting and management information systems; cost incurred in the establishment and maintenance of State Manpower Services Councils, and Prime Sponsor Planning Councils; travel of program administrators; rent utilities, custodial services and indirect costs allowable to the program; training of staff and technical assistance to contractor and subgrantee staff; costs of assistance to contractor and subgrantee staff; costs of equipment and ma-

V 39 I 54 MAR 19 74 XUM

terial to be used by staff participants excluding training equipment and materials; capital improvements as permitted by these regulations; publication of Comprehensive Manpower Plan; and audit services. Prime sponsors may be able to lower these costs by using participants in the administration of the program. In such event, wages and fringe benefits or allowances for such persons shall be charged to the subsidized employment, either transitional or for work experience.

(2) *Wages.* All wages paid to participants receiving on-the-job training in public or private non-profit organizations, and all wages paid to participants of transitional subsidized employment will be allowed. Wages paid to participants while receiving on-the-job training from a private employer organized for profit cannot be supported by funds under the Act (sec. 101(5)).

(3) *Training.* Training costs include, but are not limited to the following: Salaries and fringe benefits of personnel engaged in providing training and/or counseling, tuition and entrance fees, and books and other teacher's aids.

(4) *Fringe benefits.* Fringe benefit costs include, but are not limited to the following: Annual, sick, court, and military leave pursuant to an approved leave system; employer's contribution for social security employees' life and health insurance plans; unemployment insurance; workmen's compensation insurance; and retirement benefits, provided such benefits are granted under an approved plan.

(5) *Allowances.* All allowances paid to program participants pursuant to § 95.34 of these regulations shall be charged to this cost category.

(6) *Services.* Services' costs include, but are not limited to the following pursuant to § 95.33:

(i) Cost of supportive services such as child care, health care and medical services, residential support, assistance in securing bonds and family planning.

(ii) Cost of manpower services such as outreach, intake and assessment, orientation, counseling, job development and job placement.

§ 98.13 Allocation of allowable costs among program activities.

The program activities against which program costs shall be planned, controlled and reported upon are: Classroom training; on-the-job training; subsidized transitional employment; subsidized work experience; services to participants and other activities. The cost categories under each of these activities are defined in § 98.12(d). The extent to which these cost categories are chargeable to specific program activities is set forth below (sec. 101).

(a) *Classroom training.* Cost categories chargeable are: administration, training, allowances, and services

(b) *On-the-job training.* Cost categories chargeable are: administration, training, services, wages (with public or private nonprofit employers only) and fringe benefits.

(c) *Transitional public service employment.* Cost categories chargeable are: administration, wages, fringe benefits, services and training.

(d) *Work experience.* Cost categories chargeable are: administration, training, allowances, and services.

(e) *Services to participants.* Cost categories chargeable are:

(1) *Allowances.* This includes all allowances paid to participants registered for training for short periods between components.

(2) *Services.* This includes all manpower and supportive services which are not part of another program activity and which are provided to participants by a prime sponsor, eligible applicant, contractor or subgrantee.

(3) *Administration.* This includes all allowable administrative costs directly associated with this activity and a pro rata share of each prime sponsor or eligible applicant's administrative costs under the Act not directly associated with any program activity.

(f) *Other activities.* Cost categories chargeable are: administration, training, allowances, and services.

§ 98.14 Basic personnel standards for prime sponsors and eligible applicants.

(a) Each prime sponsor and eligible applicant shall assure that it will maintain personnel policies and practices for its employees in accord with State and local laws and regulations that adequately reflect the merit principles declared in the Intergovernmental Personnel Act of 1970 (PL 91–648). Prime sponsors may meet its requirement by certifying compliance with the uniform Federal Standards for a Merit System of Personnel Administration (45 CFR Part 70) including any amendments thereto (sec. 604(14)).

(b) Except as provided in paragraph (c) of this section, any prime sponsor or eligible applicant's personnel system that has not been certified previously as meeting these standards for other Federal grant programs shall certify that it will take necessary action to provide for merit based personnel system coverage within a reasonable period.

(c) Any non-governmental prime sponsor or administrative unit for a consortium is not subject to the requirements of paragraph (b) of this section.

(d) Prime sponsors and eligible applicants are encouraged to include on their staffs individuals who are representative of the population to be served by the program.

§ 98.15 Adjustments in payments.

(a) If any funds are expended by a prime sponsor eligible applicant, subgrantee, or employing agency in violation of the Act, the regulations or grant conditions, the Secretary may make necessary adjustments in payments on account of such expenditures (sec. 108(b)(2)).

(b) The Secretary may draw back unexpended funds which have been made available in order to assure that they will be used in accordance with the purposes of the Act, or to prevent further unauthorized or illegal expenditures (secs. 103(h), and 108(b)(2)).

§ 98.16 Termination of grant.

(a) If a prime sponsor or eligible applicant violates or permits a subgrantee or an employing agency to violate the regulations, or grant terms or conditions which the Secretary has issued or shall subsequently issue during the period of the grant, the Secretary may terminate the grant in whole or in part unless the grantee causes such violation to be corrected within a period of 30 days after receipt of notice specifying the violation or the determination of the Secretary, pursuant to a hearing under Part 98, if a hearing has been held.

(b) Termination shall be effected by a notice of termination which shall specify the extent of termination and the date upon which such termination becomes effective. Upon receipt of notice of termination, the grantee shall (1) discontinue further commitments of grant funds to the extent that they relate to the terminated portion of the grant; (2) promptly cancel all subgrants, agreements, and contracts utilizing funds under this grant to the extent that they relate to the terminated portion of the grant; (3) settle, wtih the approval of the Secretary, all outstanding claims arising from such termination; (4) submit, within a reasonable period of time after the receipt of the notice of termination, a termination settlement proposal which shall include a final statement of all unreimbursed costs related to the terminated portion of the grant, but in case of terminations under paragraph (a) of this section will not include the cost of preparing a settlement proposal (secs. 108(b)(2), 110(b) and 602(b)).

§ 98.17 Grant close-out procedures.

(a) The closeout of a grant is the process by which a Federal grantor agency determines that all applicable administrative actions and all required work of the grant have been completed by the grantee and the grantor. The following procedures will be complied with during this process of determination.

(b) Upon completion of the legal grant period or at such other termination date determined by the Secretary, the following steps will be taken by each prime sponsor or eligible applicant:

(1) An immediate refund to the ARDM of any unencumbered balance of cash drawn down from the letter of credit or advanced by Treasury checks.

(2) An immediate refund to the ARDM of any interest income earned on the granted money except as provided in § 98.19.

(3) A final Quarterly Progress Report will be prepared for each grant and Title under which programs were conducted under the Act; such reports shall be sent to the ARDM.

(4) A final Report of Federal Cash Transactions shall be prepared and sent to the ARDM.

(5) A final Summary of Client Characteristics Report shall be prepared and sent to the ARDM.

(c) Upon closeout, the regional office will insure that:

(1) Prompt payment is made to the prime sponsor or eligible applicant for reimbursement of costs under the grant being closed out.

(2) After the final reports are received, a settlement is made for any upward or downward adjustments which are made to the Federal share of the costs.

(3) The letter of credit is cancelled.

(4) Final program and fiscal audits are performed as soon as possible after the completion or termination date of the grant.

§ 98.18 Retention of records.

Pursuant to the provisions set forth in Attachment C of Office of Management and Budget Circular A–102, the following shall apply with regard to the retention of records pertaining to any grant program under this Act (Secs. 603(12) and 613).

(a) Financial records, supporting documents, statistical records and all other pertinent records shall be retained for a period of three years. No Federal requirements for records retention which exceed those established by State or local governments shall be otherwise imposed, with the following qualifications:

(1) Records shall be retained beyond the three-year period if audit findings have not been resolved.

(2) Records for nonexpendable property acquired with Federal grant funds shall be retained for three years after its disposition.

(3) When grant program records are transferred to or maintained by the Secretary, the three-year retention requirement will not be applicable to the prime sponsor or eligible applicant which had administered that grant program.

(b) The retention period shall start from the date of submission of the annual or final expenditure report, whichever applies to the particular grant.

(c) The substitution of microfilm copies in lieu of original records may be authorized by the ARDM upon request of the prime sponsor or eligible applicant.

(d) The Secretary will request State and local prime sponsors to transfer grant records to the Department's custody when it is determined that such records have long-term retention value. However, suitable arrangements to avoid duplicate recordkeeping shall be made where the Department and any prime sponsor or eligible applicant needs such records for joint use.

(e) Restrictions will not be placed upon prime sponsors or eligible applicants which will limit public access to their records, unless otherwise required by law or except when such records must remain confidential because of reasons enumerated in OMB Circular A–102.

§ 98.19 Program income.

(a) The State and any agency or instrumentality of a State which is a prime sponsor or eligible applicant shall not be held accountable for interest earned on grant-in-aid funds pending their disbursement for program purposes under the Act (OMB Circular A–102).

(b) Units of local government shall be required to return to the Federal Government interest earned on advances of grant-in-aid funds in accordance with a decision of the Comptroller General of the United States (42 Comp. Gen. 289).

(c) Proceeds from the sale of real and personal property, either provided by the Federal Government or purchased in whole or in part with Federal funds, shall be handled in accordance with Attachment N of OMB Circular A–102 pertaining to Property Management.

(d) Royalties received from copyrights and patents during the grant period shall be retained by the grantee and be added to the funds already committed to the program. After termination or completion of the grant, the Federal share of royalties in excess of $200 received annually shall be returned to the Federal grantor agency. (OMB Circular A–102.)

(e) All other program income earned during the grant period shall be retained by the grantee and, in accordance with the grant agreement, shall be added to funds committed to the project and be used to further program objectives. (OMB Circular A–102.)

(f) The prime sponsor shall record the receipt and expenditure of revenues (such as taxes, special assessments, levies, fines, etc.) as a part of grant project transactions.

§ 98.20 Procurement standards.

The standards to be used for the procurement of supplies, equipment, and other materials and services with Federal grant funds are those described in Attachement O of OMB Circular A–102. These standards are furnished to assure that such materials and services are obtained in compliance with the provisions of applicable Federal laws and Executive orders.

§ 98.21 Nondiscrimination and Equal Employment Opportunities.

(a) No person shall on the ground of race, color, handicap (as defined in paragraph (g) of this section), national origin, or sex be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity funded in whole or in part with funds made available under the Act.

(b) When the Secretary determines that a prime sponsor or eligible applicant has failed to comply with the requirements of paragraph (a) of this section, he shall notify the prime sponsor or eligible applicant of the non-compliance and request the prime sponsor or eligible applicant to secure compliance. If within a reasonable time, not to exceed sixty days, the prime sponsor or eligible applicant fails or refuses to secure compliance, the Secretary may terminate financial assistance under the Act and;

(1) May refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted;

(2) May exercise the powers and functions provided by Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000(d)); and

(3) May take other actions as may be provided by law. (c) When a matter under this section is referred to the Attorney General, or when the Secretary of Labor believes that a pattern or practice of discrimination exists, the Attorney General may bring a civil action in any appropriate United States District Court, including injunctive relief.

(d) The Secretary shall enforce the provisions of paragraph (a) of this section with regard to discrimination on the basis of sex in accordance with section 602 of the Civil Rights Act of 1964. Section 603 of such Act shall apply with respect to any action taken by the Secretary to enforce these provisions.

(e) This section shall not be construed as affecting any other legal remedy that a person may have if that person is excluded from participation in, denied the benefits of, subjected to discrimination under, or denied employment in connection with any program or activity receiving assistance under the Act.

(f) The prime sponsor or eligible applicant shall be responsible for assuring that no discrimination prohibited by this section occurs in any program for which it has responsibility, and shall establish an effective mechanism for this purpose. The prime sponsor or eligible applicant may, as one possible means of establishing this mechanism, assign the responsibility for administering the Equal Employment Opportunity (EEO) program to one individual and require subgrantees and contractors to prepare affirmative action plans. In such cases, the prime sponsor or eligible applicant may include in its comprehensive manpower plan a description of its EEO program and the related affirmative action plans of its subgrantees and contractors, including the procedures established for monitoring these activities.

(g) The term "handicapped individual" means any individual who (1) has a physical or mental disability which for such individual constitutes or results in a substantial handicap to employment and (2) can reasonably be expected to benefit in terms of employability from an activity under the Act.

Subpart B—Assessment and Evaluation

§ 98.30 General.

(a) This Subpart B sets forth the assessment and evaluation responsibilities of the prime sponsor of eligible applicant (§ 98.31) and the Secretary of Labor (§ 98.32). The prime sponsor or eligible applicant shall, as part of its general responsibility to carry out the purposes and provisions of the Act, establish adequate program management for the purposes of examining, in a systematic fashion, the performance of its program in meeting the goals and objectives contained in the plan and measuring the effectiveness and impact of its program in resolving manpower problems identified in that plan (secs. 105(a)(1)(B) and 604(14)).

V 39 54 MAR 19 74 XUM

(b) The Secretary shall assess prime sponsors or eligible applicants to determine whether they are carrying out the purposes and provisions of the Act in accordance with their approved plans. The Secretary shall also evaluate the overall programs and activities conducted under the Act to aid in the overall administration of the Act (secs. 311(c)(d) and 313(b)).

§ 98.31 Responsibilities of the prime sponsor or eligible applicant.

(a) As prescribed under Subpart A of this part, the prime sponsor or eligible applicant shall submit periodic reports on the performance of its program in relation to its plan as required by the Secretary (sec. 313(b), sec. 603(12)). The prime sponsor or eligible applicant shall implement and maintain the necessary recordkeeping required to complete these periodic reports. While such recordkeeping will support reports to the Secretary, it is principally for the use of the prime sponsor or eligible applicant to provide basic internal management information.

(b) The prime sponsor or eligible applicant is required to establish internal program management procedures (sec. 603(14)). Such procedures shall be used by the prime sponsor or eligible applicant in the monitoring of day-to-day operations, to periodically review the performance of the program in relation to program goals and objectives, and to measure the effectiveness and impact of program results in terms of participants, program activities, and the community. The objective of such procedures shall be the improvement of overall program management and effectiveness.

(c) The prime sponsor or eligible applicant shall monitor all activities for which it has been provided funds under the Act to determine whether the assurances and certifications made in its plans and the purposes and provisions of the Act are being met, and to identify problems which may require the prime sponsor or eligible applicant to take corrective action in order to assure such compliance. The prime sponsor or eligible applicant shall fulfill this monitoring function through the use of internal evaluative procedures, the examination of program data, or through such special analysis or checking as it deems necessary and appropriate (sec. 105 (a) and (b), sec. 108(d), and sec. 603).

(d) The prime sponsor or eligible applicant shall cooperate with the Secretary's evaluation and assessments by providing special reports on program activities and operations as requested; the findings of evaluation of effectiveness and impact; and access to its records and program operations.

(e) When the prime sponsor or eligible applicant finds that operations do not equal planned performance, it shall develop and implement appropriate corrective action.

§ 98.32 Responsibilities of the Secretary.

(a) As used in this Section, the term "assessment" refers to the Federal review of plans and performance of individual prime sponsors or eligible applicants, and the term "evaluation" refers to the Federal study of the overall effectiveness and impact of programs and activities under the Act.

(b) The Secretary has the responsibility to determine that the prime sponsor or eligible applicant is operating in general accordance with its approved plan in carrying out the purposes and provisions of the Act, and has demonstrated maximum efforts to implement the provisions in its prior year's plan.

(1) The Secretary shall assess the prime sponsor or eligible applicant's program and activities in order to determine compliance with assurances and certifications of its plan, compliance with the purposes and provisions of the Act, and performance in the achievement of goals and objectives specified in the approved plan (sec. 105, sec. 108(d) and sec. 603)).

(2) Such assessment shall be conducted through the review of required periodic reports and shall be supplemented by special reports from the prime sponsor, or eligible applicant, the examination of records maintained by the prime sponsor or eligible applicant, selective on-site reviews including in certain instances, the investigation of allegations or complaints, or other examination as deemed necessary and appropriate by the Secretary (secs. 311(c)(d), 313(a)(b), 603(12) and 108).

(3) Assessment may also be conducted for purposes of the offering of technical assistance and/or recommendations for corrective actions to prime sponsors or eligible applicants as considered necessary.

(c) The Secretary has the responsibility to provide for the continuing evaluation of all programs and activities conducted pursuant to the Act. Such studies shall include examination of:

(1) Cost in relation to effectiveness;

(2) Impact on communities and participants;

(3) Implication for related programs;

(4) Extent to which needs of various age groups are met;

(5) Adequacy of mechanisms for the delivery of services;

(6) Comparative effectiveness of prime sponsor or eligible applicant programs with similar programs conducted by the Secretary under section 110 or Title III;

(8) Opinions of participants about the strengths and weaknesses of the programs;

(9) Relative and comparative effectiveness of programs under this Act and part C of Title IV of the Social Security Act (Work Incentive Program for welfare recipients) (sec. 313 (a) and (b));

(10) The effectiveness of programs in meeting the employment needs of disadvantaged, unemployed and underemployed persons; and

(11) The extent to which artificial barriers restricting employment and advancement opportunities in agencies receiving funds under the Act have been removed.

(d) The Secretary shall compile, on a State, regional and national basis, information obtained from periodic reports or special reports, surveys, or samples required from prime sponsors or eligible applicants, including information on:

(1) Enrolee characteristics, including age, sex, race, health, education level, and previous work and employment experience;

(2) Duration in training and employment situations including information on the duration of program participation for at least a year following the termination of participation in federally-assisted programs and comparable information on other employees or trainees or participating employers; and

(3) Total dollar cost per trainee, including breakdown between salary or allowance, training and supportive services, and administrative costs (sec. 313(b)).

(e) Evaluations carried out in accordance with paragraph (d) of this section may be conducted directly by Department of Labor staff or through contract, grant or other arrangement, as the Secretary deems necessary or appropriate (sec. 311(c)).

§ 98.33 Limitation.

No prime sponsor or eligible applicant nor the Secretary shall, in arranging for evaluation of any program under the Act, utilize for such evaluation any non-governmental individual institution, or organization which is associated with that program as a consultant, technical advisor or in any similar capacity (sec. 604(c)).

§ 98.34 Consultation with the Secretary of Health, Education, and Welfare.

The Secretary shall consult with the Secretary of Health, Education, and Welfare with respect to arrangements for services of a health, education, or welfare character in plans under this Act. This consultation shall focus on the relationship of such services to be delivered under this Act with those being delivered under other applicable laws for which the Secretary of Health, Education, and Welfare is responsible.

Subpart C—Hearings and Judicial Review

§ 98.40 Purpose and policy.

(a) The regulations set forth in this Subpart C contain the procedures established by the Secretary for carrying out his responsibilities under the Act for the review of comprehensive manpower plans and applications for financial assistance, and for the receipt, investigation, hearing and determination of questions of noncompliance with the requirements of the Act and the regulations promulgated under the authority of the Act (sec. 108).

(b) It is the policy of the Secretary to receive information concerning alleged violations of any title of the Act and the regulations promulgated pursuant thereto from any person, or any unit of Federal, State or local government. Assistance in the filing of a formal allegation may be secured from the appropriate Regional Solicitor, by any person who desires and needs such assistance.

(c) A participant in a program under the Act must exhaust the administrative remedies established by the prime sponsor or eligible applicant for resolving matters in dispute prior to utilizing the procedures under this Subpart C. The filing of such a complaint shall not, however, automatically act as a stay of the decision rendered by the prime sponsor or eligible applicant. A participant may initiate an action under this subpart within 30 days of any final decision by a prime sponsor or eligible applicant.

§ 98.41 Review of plans and applications; violations.

(a) The Secretary shall not finally disapprove any Comprehensive Manpower Plan or application for financial assistance submitted under any title of the Act, or any modifications, or amendments thereof, without first affording the prime sponsor or eligible applicant submitting the plan or application reasonable notice and opportunity for a hearing as provided in § 98.47 et seq.

(b) When information available to the Secretary indicates that a prime sponsor or eligible applicant may be:

(1) Maintaining a pattern or practice of discrimination in violation of section 603(1) or section 612(a) of the Act or otherwise failing to serve equitably the economically disadvantaged, unemployed, or underemployed persons in the area it serves;

(2) Incurring unreasonable administrative costs in the conduct of activities and program, as determined pursuant to regulation;

(3) Failing to give due consideration to continued funding of programs of demonstrated effectiveness including those previously conducted under provisions of law repealed by section 614 of the Act; or

(4) Otherwise materially failing to carry out the purposes and provisions of the Act or regulations issued pursuant to the Act;

he shall, before taking final action on such grounds, notify the prime sponsor or eligible applicant of his proposed action and provide the prime sponsor or eligible applicant a reasonable time within which to respond. All further proceedings shall be conducted as provided in § 98.47 et seq.

(c) Every other person claiming legal injury because of any action under the Act may be heard only by initiating a complaint under § 98.42.

§ 98.42 Complaints; filing of formal allegations; dismissal.

(a) Every complaint by any complainant, whether in writing or not, shall be filed as a formal allegation before the commencement of any investigation or corrective action is required under this part.

(b) All formal allegations shall be filed with the appropriate ARDM. A formal allegation so filed may be withdrawn only with the consent of the Secretary.

(c) A formal allegation pending more than six months after filing because the complainant has failed to cooperate or make himself available during investigation of the matter may be dismissed by the ARDM upon notice to the last known address of the complainant.

§ 98.43 Form.

(a) Every formal allegation shall be in writing and signed by the complainant, and shall be sworn to before a Notary Public, or other duly authorized person. A formal allegation need not be in any particular form, but should be neat, legible and suitable for flat filing.

§ 98.44 Contents of formal allegations; amendment.

(a) The formal allegation should contain the following:

(1) The full name and address of the person making the charge.

(2) The full name and address of the party against whom the formal allegation is made (hereinafter referred to as the respondent(s)).

(3) A clear and concise statement of the facts, including pertinent dates, constituting the alleged unlawful practice.

(4) Where known, the provisions of the Act, regulations, Comprehensive Manpower Plan, and application of the prime sponsor or eligible applicant believed to have been violated.

(5) A statement disclosing whether proceedings involving the acts complained of have been commenced before a State or local authority, and if so, the date of such commencement and the name of the authority.

(6) A statement that the administrative procedures established by the prime sponsor or eligible applicant have been, if applicable, followed to completion by the complainant.

(b) Notwithstanding the provisions of paragraph (a) of this section, a formal allegation will be considered to have been filed when the ARDM receives from the complainant a written statement sufficiently precise to both identify those against whom the allegations are made, and to fairly afford the respondent an opportunity to prepare a defense. A formal allegation may be amended to cure technical defects or omissions, including failure to swear to the allegation, or to clarify and amplify allegations made therein, and such amendments relate back to the original filing date. An amendment alleging additional acts not directly related to or growing out of the subject matter of the original formal allegation will be permitted only where at the date of the amendment the allegation could not have been timely filed as a separate formal allegation and the rights of any respondent will not be prejudiced.

§ 98.45 Investigations.

(a) The ARDM will make a prompt investigation of each formal allegation filed as provided in this part. The investigation may include, where appropriate, a review of pertinent practices and policies of any prime sponsor or eligible applicant, the circumstances under which the possible noncompliance with the Act or regulations issued thereunder occurred, and other factors relevant to a determination as to whether the respondent has failed to comply with requirements of the Act, the regulations, and the Comprehensive Manpower Plan.

(1) If an investigation pursuant to paragraph (a) of this section indicates to the ARDM a failure to comply with the Act, the regulations, or the Comprehensive Manpower Plan, the ARDM will so inform the respondent and the complainant and the matter, will if possible, be resolved by informal means. If informal resolution does not occur within a reasonable period of time, action will be taken as provided in this part or as otherwise provided by law.

(2) If an investigation does not warrant action pursuant to paragraph (a)(1) of this section, the ARDM will so inform the respondent and the complainant in writing.

(b) No prime sponsor or eligible applicant, participant, respondent or other person shall intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by the Act, the regulations, the Comprehensive Manpower Plan, or the application of an eligible applicant because he has made a complaint, formal allegation, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this part. The identity of every complainant shall be kept confidential except to the extent necessary to carry out the purpose of this part, including the conduct of any investigation, hearing, or judicial proceeding arising thereunder.

§ 98.46 Opportunity for hearings; when required.

An opportunity for a public hearing shall be extended in each of the following instances:

(a) When the ARDM receives a formal allegation from an affected unit of general local government that a prime sponsor or eligible applicant has changed its Comprehensive Manpower Plan so that it no longer complies with section 105 of the Act, or that in the administration of the plan there is a failure to comply substantially with any provision of the plan or with the requirements of section 603 or 604 of the Act and the matter has not been resolved informally within a reasonable period of time; or

(b) After the completion of an investigation, pursuant to § 98.45, of any formal allegation which indicates there is substantial evidence of facts supporting a conclusion of probable cause that a violation of the Act, or regulations issued pursuant thereto, has occurred or is occurring, or is about to occur, and the matter has not been resolved by informal means; or

(c) When the Secretary has reasonable cause to believe that a violation set forth in § 98.41(b) has occurred, or when the Secretary determines that fairness and the effective operation of programs under the Act would be furthered by an

V 39 54 MAR 19 74 XUM

opportunity for a public hearing, including a finding under § 98.41 that a hearing should be provided.

§ 98.47 Hearings.

(a) *Opportunity for hearing.* Whenever an opportunity for a hearing is required by the Act, or § 98.46, and the issue has not been resolved informally, the Secretary or ARDM shall give reasonable notice by registered or certified mail, return receipt requested, to the affected respondent and complainant, if any. This notice shall advise the respondent of the allegations to be heard, the proposed remedial actions which may be taken, and the matters of fact or law asserted as the basis for the action. The notice shall (1) fix a date not less than 20 days after the date of such notice within which the respondent may request the Secretary or ARDM that the matter be scheduled for hearing, or (2) advise the respondent and the complainant that the matter in question has been set by a Hearings Officer for hearing at a stated place and time. The time and place shall be fixed by a Hearings Officer in accordance with paragraph (b) of this section and shall be subject to change for cause. A respondent may waive a hearing and submit written information and argument for the record. The failure of a respondent to request a hearing under this section or to appear at a hearing for which a date has been set shall be deemed to be a waiver of the right to a hearing under this Act and this part and shall be respondent's consent to the making of a decision on the basis of such information as is available.

(b) *Time and place of hearings.* Hearings shall be held in Washington, D.C., at a time fixed by a Hearings Officer. At the request of the respondent or Department, and upon a determination by the Hearings Officer that the relative conveniences of the respondent and Department so warrant, and no issue presented involves a determination which has been made at the Department's national office or can only be made at the Department's national office, the Hearings Officer may select a place for hearing in the city of the regional office of the Department.

(c) *Right to counsel.* In all proceedings under this section, the respondent and the Department shall have the right to be represented by counsel.

(d) *Procedures, evidence, and record.* (1) The hearing, decision, and any administrative review thereof shall be conducted in conformity with sections 5–8 of the Administrative Procedure Act, and in accordance with such rules of procedure as are proper (and not inconsistent with this section) relating to the conduct of the hearing, giving of notices subsequent to those provided for in paragraph (a) of this section, taking of testimony, exhibits, arguments and briefs, requests for findings, and other related matters. Both the Department and the respondent shall be entitled to introduce all relevant evidence on the issues as stated in the notice for hearing or as determined by the Hearings Officer conducting the hearings at the outset of or during the hearing.

(2) Technical rules of evidence shall not apply to hearings conducted pursuant to this part, but rules or principles designed to assure production of the most credible evidence available, and to subject testimony to test by cross-examination, shall be applied where reasonably necessary by the Hearings Officer conducting the hearing. The Hearings Officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for the record shall be open to examination by the parties and opportunity shall be given to refute facts and arguments advanced on either side of the issues. A transcript shall be made of the oral evidence except to the extent the substance thereof is stipulated for the record. All decisions shall be based upon the hearing record and written findings shall be made.

(3) The general provisions governing discovery as provided in the Rules of Civil Procedure for the United States District Court, Title V, 28 U.S.C., Rules 26 through 37, may be made applicable in any hearing conducted under this part to the extent that the Hearings Officer concludes that their use would promote the efficient advancement of the hearing.

(4) When a public officer is a respondent in a hearing in his official capacity and during its pendency dies, resigns, or otherwise ceases to hold office, the proceeding does not abate and his successor is automatically substituted as a party. Proceedings following the substitution shall be in the name of the substituted party, but any misnomer not affecting the substantive rights of the parties shall be disregarded. An order of substitution may be entered at any time, but the omission to enter such an order shall not affect the substitution.

(e) *Consolidated or joint hearings.* In cases in which the same or related facts are asserted to constitute noncompliance with this part with respect to two or more programs to which this part applies or noncompliance with this part and the regulations of one or more other Federal departments or agencies, the Secretary may, by agreement with such other departments or agencies, where applicable, provide for the conduct of consolidated or joint hearings, and for the application to such hearings of rules of procedure not inconsistent with this part. Final decisions in such cases, insofar as this part is concerned, shall be made in accordance with § 98.48.

(f) *Hearing officers.* Hearings shall be held before an Administrative Law Judge of the Department or by such other person as may be designated by the Secretary.

§ 98.48 Initial certification, decisions and notices.

(a) *Authority of hearing officer to render decision.* The Administrative Law Judge or other designated hearing officer is authorized to make an initial decision unless the Secretary otherwise limits this authority in a particular case.

(b) *Decisions and certifications by hearing officers.* The Administrative Law Judge, or other person designated to hear the matter, shall make an initial decision, if so authorized (see § 98.47(f)) or certify the entire record including his recommended findings of fact, conclusions of laws, and proposed decision to the Secretary for a final decision, and a copy of such initial decision or certification shall be mailed to the respondent and the complainant. When an initial decision is made the respondent may, within 30 days of mailing of such notice of initial decision, file with the Secretary his exceptions to the initial decision, with his reasons therefor. In the absence of exceptions, the Secretary may on his own motion within 45 days after the initial decision serve on the respondent a notice that he will review the decision. Upon the filing of such exceptions or of such notice of review the Secretary shall review the initial decision and issue his own decision thereon including the reasons therefor. The decision of the Secretary shall be mailed promptly to the respondent and the complainant, if any. In the absence of either exceptions or a notice of review the initial decision shall constitute the final decision of the Secretary.

(c) *Decisions on record or review by the Secretary.* Whenever a record is certified to the Secretary for decision or he reviews an initial decision pursuant to paragraph (a) of this section, the respondent shall be given reasonable opportunity to file with him briefs or other written statements of its contentions. A copy of the final decision of the Secretary shall be given in writing to the respondent and to the complainant, if any.

(d) *Decisions on record where a hearing is waived.* Whenever a hearing is waived under this part a decision shall be made by the Secretary on the record and a copy of such decision shall be given in writing to the respondent, and to the complainant, if any.

(e) *Rulings required.* Each decision of an Administrative Law Judge or the Secretary shall set forth his ruling on each finding, conclusion, or exception presented, and shall identify the requirement or requirements imposed by or pursuant to the Act or regulations issued thereunder with which it is found that the respondent has failed to comply.

(f) *Content of orders.* The final decision may provide for suspension or termination of, or refusal to grant or continue Federal financial assistance, in whole or in part, under the program involved in accordance with the Act, and may contain such terms, conditions, and other provisions as are consistent with and will effectuate the purposes of the Act and regulations issued thereunder, including provisions designed to assure that no Federal financial assistance will thereafter be extended under such program to the respondent determined by such decision to be in default in its performance of an assurance given by it pursuant to the Act or regulations issued thereunder, or to have otherwise failed

to comply with the Act or regulations issued thereunder, unless and until it corrects its noncompliance, and satisfies the Secretary that it will fully comply with the Act and regulations issued thereunder.

§ 98.49 Judicial review.

Action taken pursuant to section 108 of the Act is subject to judicial review as provided in section 109 of the Act. All other action initiated under the Act and regulations issued thereunder shall be final upon a determination by the Secretary.

Signed at Washington, D.C. this 14th day of March 1974.

PETER J. BRENNAN,
Secretary of Labor.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1974, and specifies how they are affected.

Weekly List of Public Laws

This is a listing of public bills enacted by Congress and approved by the President, together with the law number, the date of approval, and the U.S. Statutes citation. Subsequent lists will appear every Wednesday in the FEDERAL REGISTER and copies of the laws may be obtained from the U.S. Government Printing Office.

NOTE: No acts approved by the President were received by the Office of the Federal Register from Friday, March 8 to Friday, March 15, 1974.

Presidential Documents

Title 3—The President

PROCLAMATION 4275

American Forestry Week and World Forestry Day, 1974

By the President of the United States of America

A Proclamation

Since the first settlers moved onto this continent centuries ago, America's forests have been one of our greatest resources. But no resource is inexhaustible. Only wise conservation and measured use can preserve our country's forest heritage.

One-third of the Nation's land area is still covered with forests. They contribute heavily to the economy and to our high standard of living by providing one-fifth of the industrial raw materials of the Nation. Moreover, our forests have long provided much more than raw materials. They are a source of water for domestic and commercial use; they provide homes and food for wildlife, and forage for livestock; and they have become America's outdoor playground, a haven for campers, hikers, hunters and fishermen.

It is only fitting that every spring we renew our commitment to the preservation of this priceless heritage.

NOW, THEREFORE, I, RICHARD NIXON, President of the United States, do hereby call on all Americans to observe the week of March 17 through 23, 1974, as "American Forestry Week," with activities and ceremonies that recognize the full range of contributions of forests and forestry to the past, to the present, and to the future of America. In conjunction with this commemoration, I ask that we join with other Nations of the world in recognizing March 21, 1974, as "World Forestry Day," an activity sponsored by the European Federation of Agriculture and endorsed by the Food and Agriculture Organization of the United Nations.

To this end, I am directing the Secretary of Agriculture to instruct the Chief of the Forest Service to work with all organizations, institutions, groups, and individuals interested in carrying out appropriate activities

V 39 I 55 MAR 20 74 XUM

in joint recognition of "American Forestry Week" and "World Forestry Day."

IN WITNESS WHEREOF, I have hereunto set my hand this eighteenth day of March, in the year of our Lord nineteen hundred seventy-four, and of the Independence of the United States of America the one hundred ninety-eighth.

Richard Nixon

[FR Doc.74-6604 Filed 3-18-74;4:53 pm]

EXECUTIVE ORDER 11771

Extending Diplomatic Privileges and Immunities to the Liaison Office of the People's Republic of China in Washington, D.C., and to Members Thereof

By virtue of the authority vested in me by the act of April 20, 1973 (87 Stat. 24; Public Law 93-22), and as President of the United States, I extend to the Liaison Office of the People's Republic of China in Washington, D.C. and to its members who are duly notified to, and accepted by, the Secretary of State the same privileges and immunities, subject to corresponding conditions and obligations, as are enjoyed by the diplomatic missions accredited to the United States and by members of the staffs thereof. This Executive Order shall be effective as of April 20, 1973.

THE WHITE HOUSE,
March 18, 1974.

Richard Nixon

MEMORANDUM OF MARCH 1, 1974

Delegation of Functions and Allocation of Funds Related to Emergency Security Assistance for Israel

Memorandum for the Secretary of State, the Secretary of Defense

THE WHITE HOUSE,
Washington, March 1, 1974.

NOTE: This memorandum, published at 39 FR 10231, March 19, 1974, is being reprinted to include material which was inadvertently omitted.

You are hereby designated and empowered to exercise the following functions vested in the President by Public Law 93–199, the Emergency Security Assistance Act of 1973, without the approval, ratification, or other action of the President. Functions not expressly delegated herein are reserved to the President.

1. Functions delegated to the Secretary of State:

   (a) the function of reporting to the Congress any determinations made by the President under Section 2 of the Act;
   (b) the function conferred in Section 6 of the Act.

2. Functions delegated to the Secretary of Defense:

   the function of providing military assistance or foreign military sales credits as determined by the President.

Pursuant to the authority contained in Public Law 93–240, the Foreign Assistance and Related Programs Appropriation Act, 1974, I hereby allocate from the appropriation for "Emergency Security Assistance for Israel" to the Secretary of Defense, $2,200,000,000.00. This allocation is subject to the limitations imposed by the provisos in the provision appropriating these funds and subject to apportionment of the necessary funds by the Office of Management and Budget. I direct the Secretary of Defense to allocate to the Secretary of State such sums from the $2,200,000,000.00 as may be necessary from time to time for payment by the United States of its share of the expenses of the United Nations Emergency Force in the Middle East, as apportioned by the United Nations in accordance with article 17 of the United Nations Charter as authorized in Section 6 of Public Law 93–199, the Emergency Security Assistance Act of 1973.

This memorandum shall be published in the FEDERAL REGISTER.

Richard Nixon

[FR Doc.74–6402 Filed 3–18–74;8:45 am]

Title 6—Economic Stabilization

CHAPTER I—COST OF LIVING COUNCIL

PART 150—PHASE IV PRICE REGULATIONS

PART 152—PHASE IV PAY REGULATIONS

Exemption of Canned Fruit and Vegetable Industries

The purpose of these amendments is to exempt prices charged for canned fruits and vegetables as described in the Standard Industrial Classification (SIC) Manual, 1972 edition, under Industry No. 2033 by the manufacturers of those products and to provide a parallel exemption under the pay regulations.

The primary reason for the price exemption is that canned fruits and vegetables are currently in very short supply. Acreage contracts which will determine the supply of canned vegetables through the summer of 1975 are currently being negotiated. Vegetable canners are faced with increasingly high costs largely because of competition with crops such as wheat, soybeans, and cotton, the prices of which have risen dramatically since last year. The prices of these alternate crops are less restricted by controls than are the prices of vegetables for canning. This is because the former are freely traded on commodities exchanges and further resold in unprocessed form under the agricultural products exemption. While the sale by the farmer of vegetables to the cannery is also exempt under the same exemption, the sale by the canner is not exempt, and this fact usually serves to moderate the price which the canner can pay the farmer. It is expected that the exemption of canned vegetables will provide the necessary incentive for canners to increase acreage devoted to the production of vegetables.

Second, the Council has received commitments to increase production from firms producing more than 30 percent of the total output of canned fruits and vegetables. These firms have committed to increase production as much as 25 percent over last year's production on some product lines. In every case, canners have agreed in writing to increase their overall acreage if decontrolled.

Finally, major canners have committed not to raise prices above those authorized on March 1, 1974, on any product lines until the new crop becomes available. The Council expects that price increases on the new crop will be restricted to the levels needed to cover increased costs of production.

Jams, jellies, marmalade, and preserves are not included in this exemption primarily because these products are not subject to the same seasonal supply problems as canned fruits and vegetables.

Although the prospect of increased acreage which is applicable to vegetable production under this exemption does not apply readily to production of most fruits, canned fruits are included with vegetables in this exemption because most of the firms which are engaged in canning process both fruits and vegetables. The Council therefore deems it appropriate to apply the exemption to the canned fruits and vegetables product line as a whole.

This exemption does not apply to prices charged or wages paid by a firm which is primarily engaged in food wholesaling or retailing and which also manufactures canned fruits and vegetables. For example, a retail grocery chain which packs the fruits and vegetables which it sells under its own label remains unaffected by these amendments.

The exemption appears as the first paragraph of § 150.58, "Additional price adjustments". This new exemption section continues the growing list of exempt sales which has been set forth heretofore under § 150.54. The Council is adding the new section for ease of citation in preference to further extending § 150.54.

Under §§ 150.11(e) and 150.161(b), a firm with revenues in its most recent fiscal year from the sale of exempt items remains subject to the profit margin constraints and reporting provisions of the Phase IV program unless it derived both less than $50 million in annual sales or revenues from the sale or lease of nonexempt items and 90 percent or more of its sales or revenues from the sale of exempt items or exempt sales.

As a complementary action to the exemption from price controls, the Council has also exempted pay adjustments affecting employees engaged on a regular and continuing basis in the operation of an establishment in the canned fruits and vegetables manufacturing industry. The exemption is set forth in new § 152.39f. "Establishment in the canned fruits and vegetables manufacturing industry" is defined as an establishment primarily engaged in the canning or manufacturing of fruits and vegetables and classified in the Standard Industrial Classification Manual, 1972 edition, under Industry Number 2033 (Canned Fruits, Vegetables, Preserves, Jams, and Jellies). The term does not include an establishment primarily engaged in the manufacturing of preserves, jams, jellies, or marmalade. The exemption is inapplicable to any employee who receives an item of incentive compensation, or who is a member of an executive control group. The exemption is also inapplicable to any employee whose duties and responsibilities are not of a type exclusively performed in or related to the canned fruits and vegetables manufacturing industry and whose pay adjustments are historically related to the pay adjustments of employees performing such duties outside the industry and are not related to the pay adjustments of other employees that are within the exemption. The exemption is further inapplicable to employees who are part of an appropriate employee unit where 25 percent or more of the members of such unit are not engaged on a regular and continuing basis in the operation of an establishment in the canned fruits and vegetables manufacturing industry or in support thereof. In addition, the exemption is not applicable to pay adjustments that are the subject of a report or request for approval filed with the Council prior to March 18, 1974, or pay adjustments that are scheduled to be effective prior to such date and a report or request for approval is required, including pay adjustments for which a report is required pursuant to § 152.76(c)(2). If parties negotiate a contract on or after March 18, 1974, which provides for pay adjustments scheduled to be effective prior to such date, a report or request for approval shall be filed with the Council in accordance with the provisions of the special rules applicable to the food industry, set forth in Subpart H of Part 152.

The wage exemption is also inapplicable if pay adjustments with respect to an appropriate employee unit are the subject of a decision and order of the Council. The exemption is further inapplicable to pay adjustments to employees of an establishment in the canned fruits and vegetables manufacturing industry which is controlled, directly or indirectly, by a firm primarily engaged in the wholesale or retail sale of food. Contract provisions which depend for their operation on the modification or termination of any rules, regulations, or orders of the Economic Stabilization Program are inoperative. In cases of uncertainty of application, inquiries concerning the scope of coverage of the pay exemption should be addressed to the Administrator, Office of Wage Stabilization, P.O. Box 672, Washington, D.C. 20044.

As with all exemptions from Phase IV controls, firms subject to this amendment remain subject to review for compliance with appropriate regulations in effect prior to these exemptions. A firm affected by these amendments will be held responsible for its pre-exemption compliance under all phases of the Economic Stabilization Program. A firm affected by these exemptions alleged to be in violation of stabilization rules in effect prior to these exemptions is subject to the same compliance actions as a non-exempt firm. These compliance actions include investigations, issuance of notices of probable violation, issuance of remedial orders requiring rollbacks or refunds, and possible penalty of $2,500 for each stabilization violation.

The Council retains the authority to reestablish price and wage controls over any of the industries exempt by these amendments if price or wage behavior is inconsistent with the policies of the Economic Stabilization Program. The Council also has the power, under §§ 150.162 and 152.6, to require firms to file special or separate reports setting forth information relating to the Economic Stabilization Program in addition to any other reports which may be required under the Phase IV controls program.

Because the purpose of these amendments is to grant an immediate exemption from the Phase IV price and pay regulations, the Council finds that publication in accordance with normal rule making procedure is impracticable and that good cause exists for making these amendments effective in less than 30 days. Interested persons may submit written comments regarding these amendments. Communications should be addressed to the Office of the General Counsel, Cost of Living Council, 2000 M Street, N.W., Washington, D.C. 20508.

(Economic Stabilization Act of 1970, as amended, Pub. L. 92-210, 85 Stat. 743; Pub. L. 93-28, 87 Stat. 27; E.O. 11695, 38 FR 1473; E.O. 11730, 38 FR 19345; Cost of Living Council Order No. 14, 38 FR 1489)

In consideration of the foregoing, 6 CFR Parts 150 and 152 are amended as set forth herein, effective March 18, 1974.

Issued in Washington, D.C., on March 18, 1974.

JAMES W. MCLANE,
Deputy Director,
Cost of Living Council.

1. In 6 CFR Part 150, a new § 150.58 is added to Subpart D to read as follows:

§ 150.58 Additional price adjustments.

(a) *Canned fruits and vegetables.* The prices which manufacturers of the following products charge for those products are exempt: The products listed in the SIC Manual, 1972 edition, under Industry No. 2033, except jams, jellies, marmalade, and preserves. This exemption does not apply to a firm primarily engaged in food wholesaling or retailing which also manufactures canned fruits and vegetables.

2. In 6 CFR Part 152, Subpart D is amended by adding thereto a new § 152.39f to read as follows:

§ 152.39f Canned fruits and vegetables manufacturing industry.

(a) *Exemption.* Pay adjustments affecting employees engaged on a regular and continuing basis in the operation of an establishment in the canned fruits and vegetables manufacturing industry or in support of such operation are exempt from and not limited by the provisions of this title.

(b) *Establishment in the canned fruits and vegetables manufacturing industry.* For purposes of this section, "Establishment in the canned fruits and vegetables manufacturing industry" means an establishment primarily engaged in the canning or manufacturing of fruits and vegetables and classified in the Standard Industrial Classification Manual, 1972 edition, under Industry Number 2033 (Canned Fruits, Vegetables, Preserves, Jams, and Jellies). Notwithstanding the preceding sentence, such term does not include an establishment primarily engaged in the manufacturing of preserves, jams, jellies, or marmalade.

(c) *Covered employees.* For purposes of this section, an employee is considered to be engaged on a regular and continuing basis in the operation of an establishment in the canned fruits and vegetables manufacturing industry or in support of such operation only if such employee is employed at an establishment in the canned fruits and vegetables manufacturing industry and only if such employee is employed by the firm which operates such establishment.

(d) *Limitations.* The exemption provided in paragraph (a) of this section shall not be applicable to—

(1) An employee who receives an item of incentive compensation subject to the provisions of §§ 152.124, 151.125, or 152.126.

(2) An employee who is a member of an executive control group (determined pursuant to § 152.130).

(3) Employees whose occupational duties and responsibilities are of a type not exclusively performed in or related to the canned fruits and vegetables manufacturing industry and whose pay adjustments are—

(i) Historically related to the pay adjustments of employees performing such duties outside the canned fruits and vegetables manufacturing industry; and

(ii) Not related to pay adjustments of another unit of employees engaged on a regular and continuing basis in the operation of an establishment in the canned fruits and vegetables manufacturing industry or in support of such operation within the meaning of paragraph (c) of this section.

(4) Employees who are members of an appropriate employee unit if 25 percent or more of the employees who are members of such unit are not engaged on a regular and continuing basis in the operation of an establishment in the canned fruits and vegetables manufacturing industry or in support of such operation.

(5) Pay adjustments with respect to which a report or request for approval has been filed or a challenge has been made or issued prior to March 18, 1974, pursuant to the provisions of Subpart F of Part 130 of this chapter, or Subpart H of this part.

(6) Pay adjustments scheduled to be effective prior to March 18, 1974, for which a report or request for approval is required pursuant to the provisions of Subpart H of this part, including pay adjustments with respect to which a report is required pursuant to § 152.76(c)(2).

(7) Pay adjustments with respect to an appropriate employee unit which is subject to a decision and order of the Council or its delegate—

(i) Issued prior to March 18, 1974; or

(ii) Issued on or after March 18, 1974, with respect to pay adjustments which are the subject of a report, request for approval, or challenge described in paragraphs (d) (5) or (6) of this section.

The limitation set forth in this paragraph (d)(7) shall be applicable for the period covered by such decision and order.

(8) Employees engaged on a regular and continuing basis in the operation of an establishment in the canned fruits and vegetables manufacturing industry if such establishment is controlled directly or indirectly by a firm primarily engaged in the wholesale or retail sale of food.

(e) *Certain contract provisions.* Contract provisions which depend for their operation upon the modification or termination of the Economic Stabilization Act of 1970, as amended, or of any rules, regulations, or orders of the Council, and which affect employees engaged on a regular and continuing basis in the operation of an establishment in the canned fruits and vegetables industry, are inoperative as unreasonably inconsistent with the goals of the Economic Stabilization Program.

(f) *Effective date.* The exemption provided in this section shall be applicable to pay adjustments with respect to work performed on and after March 18, 1974.

[FR Doc.74-6574 Filed 3-18-74;4:00 pm]

PART 152—PHASE IV PAY REGULATIONS

Exemption of Paper and Allied Products and Waste Paper

Correction

On page 9967 of the issue for Friday, March 15, 1974, a correction was published correcting FR Doc. 74-5817, which appeared at page 9535 of the issue for Tuesday, March 12, 1974. The headings of this correction should have read as set forth above, and in the third line of the correction the reference to "§ 150.40v" should have read "§ 152.40v".

Title 7—Agriculture

CHAPTER VIII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (SUGAR), DEPARTMENT OF AGRICULTURE

SUBCHAPTER I—DETERMINATION OF PRICES

[Docket No. SH-322]

PART 877—SUGARCANE: PUERTO RICO

Fair and Reasonable Prices for 1973-74 Crop

The Sugar Act of 1948, as amended, requires producers who also process sugarcane grown by other producers to pay prices determined by the Secretary of Agriculture to be fair and reasonable as one of the conditions for receiving Sugar Act payments on their own production.

Such determination may not be made until after investigation and opportunity for interested persons to testify on the fair and reasonable prices to be paid under either purchase or toll agreements. A public hearing was held in San Juan, Puerto Rico, on November 29, 1973.

The determination, which is applicable to the 1973-74 crop of Puerto Rican sugarcane, continues the provisions of the 1972-73 crop determination.

Pursuant to the provisions of section 301(c)(2) of the Sugar Act of 1948 (7 U.S.C. 1131(c)(2)), as amended, (herein referred to as "act"), after investigation, and due consideration of evidence presented at the public hearing held in San Juan, Puerto Rico, on November 29, 1973, the following determination is hereby issued.

V 39 55
MAR 20 74
XUM

The regulations previously appearing in these sections under "Determination of Prices; Sugarcane; Puerto Rico" remain in full force and effect as to the time period to which they were applicable.

AUTHORITY: Secs. 877.21 to 877.30 issued under secs. 301, 403, 61 Stat. 929, as amended, 932; (7 U.S.C. 1131, 1153).

§ 877.21 General requirements.

A producer of sugarcane in Puerto Rico who is also a processor of sugarcane, to which this part applies as provided in § 877.28 of this part (herein referred to as "processor"), shall have paid or contracted to pay for sugarcane of the 1973–74 crop grown by other producers and processed by him, prices not less than those determined in accordance with the following requirements.

§ 877.22 Definitions.

For the purpose of this part, the term:

(a) "Price of raw sugar" means the simple average of the daily spot price quotations for sugar deliverable under the New York Coffee and Sugar Exchange No. 10 domestic contract (bulk sugar) for the period January 1, 1974, through December 31, 1974, except that if the Director of the Sugar Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D.C. 20250, determines that any such price quotation does not reflect the true market value of raw sugar because of inadequate volume or other factors, he may designate the price to be effective under this determination which he determines will reflect the true market value of raw sugar.

(b) "Sugar yield period" means any period not exceeding one calendar month as may be elected by the processor to determine the yield of raw sugar. The period adopted by the processor shall be used uniformly throughout the grinding season. In instances where odd days occur because a processor begins or ends grinding on a day which does not correspond with the beginning or ending of the sugar yield period, or grinding is interrupted because of holidays or for other reasons, such odd days shall be included either in the prior or subsequent sugar yield period, or treated as a separate sugar yield period.

(c) "Raw sugar" means raw sugar, 96° basis.

(d) "Yield of raw sugar" means the yield of raw sugar per 100 pounds of net sugarcane determined for the sugar yield period in accordance with the formulae set forth in Schedule A attached hereto and made a part hereof.

(e) "Inferior varieties of sugarcane" means sugarcane of Saccharum Spontaneum or Saccharum Sinense variety (including sugarcane of the Japanese, Uba, Kavangerie, Zuinga, Caledonia, Coimbatore 213, and Coimbatore 281 varieties).

(f) "Net sugarcane" means (1) the gross weight of the sugarcane delivered to the mill determined to contain a quantity of trash not in excess of five percent of the gross weight, or (2) the gross weight of the sugarcane delivered to the mill less the quantity of trash determined to be in excess of five percent of such gross weight.

(g) "Trash" means green or dried leaves, sugarcane tops above the last formed joint, soil, stones, and all other extraneous material.

(h) "Area office" means Caribbean Area Agricultural Stabilization and Conservation Service Office, P.O. Box 11188, Santurce, Puerto Rico 00910.

§ 877.23 Payment for sugarcane.

(a) The payment for net sugarcane delivered by the producer to the processor shall be made either by the delivery to the producer of his share of raw sugar or by the payment to the producer of the money value of his share of raw sugar, whichever method is agreed upon by the producer and the processor.

(b) For each 100 pounds of net sugarcane (including inferior varieties of sugarcane) having a yield of raw sugar of 9 pounds or more, the producer's share of raw sugar shall be not less than the quantity of raw sugar determined by applying the following applicable percentage to the yield of raw sugar of the producer's net sugarcane:

Pounds of raw sugar per 100 pounds of net sugarcane	*Percentage*
9.0	63.0
9.5	63.5
10.0	64.0
10.5	64.5
11.0	65.0
11.5	65.5
12.0	66.0
12.5	66.5
13.0	67.0
13.5 and over	67.5

Intermediate points within the above scale are to be interpolated to the nearest one-tenth point.

(c) For each 100 pounds of net sugarcane (including inferior varieties of sugarcane) having a yield of raw sugar of less than 9 pounds, the producer's share of raw sugar shall be not less than the quantity determined by subtracting 3½ pounds of raw sugar from the yield of raw sugar of the producer's net sugarcane.

(d) If settlement with the producer is made in sugar, delivery shall be made, loaded in the producer's vehicle, at the mill where the sugar is produced, unless the producer and processor agree in writing to delivery at another mill: *Provided*, That the processor shall bear any increase in marketing costs resulting from such agreement.

(e) If settlement with the producer is made in cash, the processor shall pay to the producer the money value of his share of raw sugar determined on the basis of the price of raw sugar converted to an f.o.b. mill price by subtracting therefrom the admissible deductions for selling and delivery expenses on raw sugar in accordance with Schedule B, attached hereto and made a part hereof.

§ 877.24 Payment for molasses.

For each ton of net sugarcane delivered the processor shall either deliver to the producer 66 percent of the average production of blackstrap molasses per ton of net sugarcane of the 1973–74 crop processed at each mill or shall pay to the producer the money value of such quantity of molasses, whichever method is agreed upon between the producer and the processor. If settlement with the producer is made in cash, such settlement shall be based upon the average gross proceeds from the sales of molasses less the admissible deductions for selling and delivery expenses in accordance with Schedule C, attached hereto and made a part hereof. A processor operating more than one mill shall compute the average gross proceeds per gallon from the sales of molasses produced at all mills operated by such processor and shall compute the net proceeds per gallon separately for each mill operated by such processor. If a processor has not sold 1973–74 crop molasses by the time he is required to submit to the Area office a statement as required by § 877.27(b), he shall have made a provisional molasses payment to producers based upon not less than 85 percent of the average of the net proceeds per gallon realized by all other processors in Puerto Rico who made cash settlements for 1973–74 crop molasses, as determined by the Director of the Area office. Final settlement with such producers shall be made promptly after the 1973–74 crop molasses has been sold, based upon the average net proceeds therefrom and the processor shall promptly submit to the Area office a statement as required by § 877.27(b). In the event a processor has transferred all or part of its 1973–74 production of molasses to an affiliate, molasses payments to growers shall be based on the price of the molasses transferred to the affiliate, but such price shall not be less than the average net proceeds per gallon as determined by the Director of the Area office for all processors who sold 1973–74 crop molasses. Where payment is based on the average net proceeds of all processors who sold molasses, the processor is required to make a provisional molasses payment not later than June 1, 1975, based upon not less than 85 percent of the estimated average of net proceeds per gallon realized by all other processors in Puerto Rico, as determined by the Director of the Area office from reports submitted under provisions of § 877.27(b). Processor is further required to make a final molasses payment in the amount necessary to base the total molasses payment upon a price not less than the average net proceeds per gallon for all processors who sold the 1973–74 crop of molasses after the Area office has determined such net proceeds and notified the processor.

§ 877.25 Determination of net sugarcane.

(a) The net sugarcane of each producer (including the processor) which is delivered to the mill each day shall be determined as follows: The processor jointly with a representative designated by the producers or the producer organization in any mill area, shall examine the sugarcane deliveries and estimate whether the deliveries contain a quantity of trash (1) not in excess of five percent of the gross weight, or (2) in excess of five percent of the gross weight. In the absence of a producer representative the processor shall have full responsibility for examining such sugarcane deliveries and for making such estimates. As to the deliveries of sugarcane of any producer which are estimated to contain trash not in excess of five percent, the gross weight of the sugarcane delivered shall also be the net weight. As to the deliveries of sugarcane of any producer estimated by both the processor and the representative of producers or by either of such parties to contain trash in excess of five percent, the net weight shall be determined by taking a representative sample of not less than 100 pounds of sugarcane from one or more of the deliveries deemed to be representative and separating therefrom all trash. The weight of trash which is removed from the sample of sugarcane shall be expressed as a percentage of the gross weight of the sample. The net weight of the sugarcane delivery from which the sample was taken shall be determined by deducting from the gross weight of such sugarcane, a percentage thereof which represents the excess, if any, of the trash over five percent, and the same adjustments as determined above shall be applied to the gross weight of all other deliveries delivered by that producer during the same day or in the case of sugarcane handled in bulk during the same sugar yield period, which are estimated to contain trash content reasonably similar to the delivery from which the sample was taken.

(b) With respect to the sample taken as provided in paragraph (a) of this section, the processor shall make a separate determination of the weight of soil and stones contained in such sample and may charge the producer five cents per ton of net sugarcane delivered which is represented by the sample for each one percent, fractions in proportion, by which the weight of soil and stones is in excess of one percent of the gross weight of the sample.

(c) The processor may charge the producer 66 percent of the actual cost, but not to exceed $2.64, for each sample taken for trash including soil and stones to cover the cost of sampling and measuring the actual quantity of trash.

(d) Notwithstanding the foregoing paragraphs of this section, in cases where the direct cane analysis method is used, gross weight will also be net weight.

§ 877.26 Services and allowances to producers.

(a) When payment is made to the producer by the delivery of raw sugar, the processor shall store and insure all such sugar through December 31, 1974, and shall bear the cost thereof.

(b) The costs of services which were borne by the processor for the 1972–73 crop shall be borne for the 1973–74 crop.

(c) Allowances made to producers by the processor for the 1972–73 crop shall be made for the 1973–74 crop at the rates which were effective under comparable conditions in 1972–73; except that the processor is given the option of paying hauling allowances to producers on either (1) the gross weight of sugarcane, or (2) in cases where a bulk trash determination, as provided in section 877.25 (a) is made, the net weight of sugarcane as determined by deducting from the gross weight the amount of trash that is in excess of five percent: *Provided*, That if the processor elects to pay allowances on the net weight, the allowance shall be computed at not less than the rates established in Rule 12 of the Sugar Board of Puerto Rico plus ten percent of such rates. The method of paying hauling allowances elected by the processor shall be used uniformly throughout the grinding season.

(d) Nothing in paragraphs (b) or (c) of this section shall be construed as prohibiting negotiations between the processor and producer with respect to the amount of services or allowances to be made to the producer, any change to be approved in writing by the Area office upon a determination by the Director of the Area office that the change is fair and reasonable.

§ 877.27 Reporting requirements.

(a) The processor shall submit to the Area office a statement as to whether settlement with producers is to be made in sugar or in cash, together with a statement as to the sugar yield period which will be used during the grinding season. Such information shall be submitted not later than April 3, 1974, except that if the Director of the Area office determines that the failure to submit such statement by such date was unintentional, an extension of time may be granted by the Area office.

(b) If the processor makes settlement in cash, he shall submit in duplicate to the Area office statements verified by a Certified Public Accountant of the gross proceeds from the sales of molasses and the deductions made in determining the f.o.b. mill price of sugar and the net proceeds from molasses. Such statements shall be submitted not later than June 1, 1975, except that if the Director of the Area office determines that the failure to submit such statement by such date was unintentional, an extension of time may be granted by the Area office.

(c) The processor shall submit to the Area office a statement as to the option he elects in making hauling allowances to producers during the grinding season. Such information shall be submitted not later than April 3, 1974.

§ 877.28 Applicability.

The requirements of this part are applicable to all sugarcane purchased from other producers and processed by a processor who produces sugarcane (a processor-producer is defined in 7 CFR 893.1); and to sugarcane purchased by a cooperative processor from non-members. The requirements are not applicable to sugarcane processed by a cooperative processor for its members.

§ 877.29 Procedures for checking compliance.

The procedures to be followed by the Caribbean Area ASCS Office in checking compliance with the requirements of this part are set forth under the heading Part 8—"Fair Price Determination" in Handbook 5–SU, issued by the Deputy Administrator, Programs, Agricultural Stabilization and Conservation Service. Handbook 5–SU may be inspected at and copies obtained from the Caribbean Area ASCS Office, P.O. Box 11188, Santurce, Puerto Rico 00910.

§ 877.30 Subterfuge.

The processor shall not reduce the returns to the producer below those determined in accordance with the requirements of this Part through any subterfuge or device whatsoever.

STATEMENT OF BASES AND CONSIDERATIONS

General. The foregoing determination establishes the fair and reasonable price requirements which must be met, as one of the conditions for payment under the act, by a producer who processes sugarcane of the 1973–74 crop grown by other producers.

Requirements of the act. Section 301 (c)(2) of the act provides as a condition for payment, that the producer on the farm who is also directly or indirectly a processor of sugarcane, as may be determined by the Secretary, shall have paid, or contracted to pay under either purchase or toll agreements, for sugarcane grown by other producers and processed by him at rates not less than those that may be determined by the Secretary to be fair and reasonable after investigation and due notice and opportunity for public hearing.

1973–74 price determination. This determination continues the provisions of the prior determination.

A public hearing was held in San Juan, Puerto Rico, on November 29, 1973 at which interested persons were afforded the opportunity to present testimony and make recommendations with respect to fair and reasonable prices for the 1973–74 crop of sugarcane. Representatives of the Puerto Rico Farm Bureau recommended that the present system of basing selling and delivery expenses for all independent producers on an average of such expenses for all mills be changed to require that all independent producer sugar be considered as marketed within Puerto Rico for the local market and that any amount of raw sugar marketed in the Continental U.S. be considered as processor sugar, making it necessary

V 39 55 MAR 20 74 XUM

for the mills shipping raw sugar to the mainland to absorb any and all selling and delivery expenses so incurred. They estimate that such a move would increase income to the independent cane farmers in Puerto Rico by about $1.0 million. They further recommended that no basic changes be made in the present payment scale contained in the determination, but that increases be allowed in accordance with any increases authorized in transportation costs; i.e., an escalator clause to allow for increased cane hauling charges resulting from increased fuel costs.

The Sugar Corporation of Puerto Rico, an agency of the Commonwealth government, filed a supplemental brief which states that the Corporation was formed as a subsidiary of the Land Authority of Puerto Rico on February 1, 1973 to oversee the rehabilitation of the Island's sugar industry. The Sugar Corporation is the largest producer in Puerto Rico, operating all mills and refineries, and accounting for more than 70 percent of total sugar production. In its brief, the Sugar Corporation states that the present method of basing deductible selling and delivery expenses for mills shipping less than 20 percent of their sugar to mainland refineries on the average of such expenses incurred by mills shipping 20 percent or more to the mainland is appropriate and equitable and should not be changed. It states that during the 1972–73 crop season an estimated 30,000 tons of raw sugar will be marketed in the Continental U.S. from the Coloso, Guanica, and Plata mills. It maintains that the selling and delivery expenses incurred should serve as the basis for determining these expenses for the other ten mills that operated during the 1972–73 season, inasmuch as exclusion of the shipping and delivery expenses would in turn increase the price of refined sugar in the Commonwealth.

Consideration has been given to the recommendations made at the public hearing; to data on the returns, costs, and profits or losses of producing and processing sugarcane obtained by field survey for prior crops and recast in terms of price and production conditions likely to prevail for the 1973–74 crop; and to other relevant factors. Total sugar production continues to decline each year in Puerto Rico. The 252,200 tons of sugar produced from the 1972–73 crop was the smallest crop since the early 1900's. The average yield of raw sugar per ton of cane increased from 135 pounds in 1971–72 to 139 pounds in 1972–73, but compares poorly with the level of 204 pounds achieved in 1960–61.

This determination continues the provisions of the 1972–73 determination. The recommendation of the Farm Bureau that all independent producer sugar be considered as marketed locally and, therefore, exempted from deductions for selling and delivery expenses has not been adopted. The Department's responsibility for determining a fair and reasonable price will not permit adoption of the recommendation of the Farm Bureau without a corresponding change in the sharing relationship between the independent growers and the sugar mills.

The recommendation for an escalator clause to allow for increased cane hauling charges resulting from increased fuel costs has not been adopted. The Department will continue to issue price determinations for Puerto Rico on a yearly basis, and will evaluate this new factor resulting from the "energy crisis" in the context of how it affects the sharing relationship between producers and processors.

On the basis of an examination of all pertinent factors, the provisions of this determination are deemed to be fair and reasonable.

Accordingly, I hereby find and conclude that the foregoing determination will effectuate the price provisions of the Sugar Act of 1948, as amended.

NOTE: The recordkeeping and reporting requirements of these regulations have been approved by, and subsequent recordkeeping and reporting requirements will be subject to the approval of the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

Effective date. This determination shall become effective on March 20, 1974, and is applicable to the 1973–74 crop of Puerto Rican sugarcane.

Signed at Washington, D.C. on March 15, 1974.

GLENN A. WEIR,
Acting Administrator, Agricultural Stabilization and Conservation Service.

SCHEDULE A

FORMULAE FOR DETERMINING THE "YIELD OF RAW SUGAR" FOR EACH PRODUCER

(A) Where a continuous sample of the first expressed or crusher juice of the deliveries of sugarcane by a producer is used, the formula for determining the yield of raw sugar shall be:

$$R=TI\ (S-0.3B)F$$

Where:
R=Yield of raw sugar, 96° basis;
S=Polarization of the first expressed or crusher juice obtained from the sugarcane of each producer;
B=Brix of the first expressed or crusher juice obtained from the sugarcane of each producer;
T=Trash correction factor which varies inversely with the amount of trash contained in the sugarcane of each producer from 1.0 for sugarcane which contains an amount of trash not in excess of 5 percent of the gross weight of sugarcane to 0.76075 for sugarcane which contains an amount of trash in excess of 30 percent: *Provided*, That where sugarcane has been subjected to a washing process prior to milling, the amount of trash that is soil shall be excluded in determining the correction factor.
I=Inferior sugarcane correction factor which is applied only to inferior varieties of sugarcane of each producer and is determined as follows:

(a) When the purity, P, (where P=100 S÷B), of the first expressed or crusher juice of sugarcane is equal to 75 or more, the factor, I=0.9; or

(b) When the purity, P, (where P=100 S÷B), of the first expressed or crusher juice of such sugarcane is less than 75, the factor, I=0.9−0.02 (75−P);

F=Yield factor which is determined as follows:

(a) Determine the "tentative recovery of raw sugar," 96° basis, for each producer delivering sugarcane during the settlement period from the product of the formula (S−0.3B), the number of hundredweights of net sugarcane, the applicable trash correction factor, T; and where applicable the inferior sugarcane correction factor, I; and

(b) Divide the pounds of raw sugar, 96° basis, produced at the mill during the applicable settlement period by the sum of the "tentative recoveries of raw sugar" for all producers to obtain the yield factor, F.

If part of the sugarcane delivered by producers is subjected to a washing process prior to milling, the polarization and brix of the resulting dilute first expressed or crusher juice of such sugarcane shall be converted to an undiluted first expressed or crusher juice basis by application of dilution compensation factors (DCF) computed as follows:

$$\text{Brix DCF}=\frac{\text{Brix of undiluted first expressed or crusher juice sample}}{\text{Brix of diluted first expressed or crusher juice sample}}$$

$$\text{Pol DCF}=\frac{\text{Pol of undiluted first expressed or crusher juice sample}}{\text{Pol of diluted first expressed or crusher juice sample}}$$

A written description of procedures and the frequency of sampling sugarcane to be used in determining DCF factors shall be submitted by the processor to the Area office and shall be subject to approval of that office.

(B) Where the "direct cane analysis" method is used the sampling of sugarcane delivered by producers must be by the core sampler method and the formula for determining the yield of raw sugar shall be:

$$R=F\ [S-0.3\ (B+0.1\ f_c)\ ]$$

Where:
R=96° Yield % Cane, or yield of raw sugar, 96° basis;
S=Pol % Cane;
B=Brix % Cane;
f_c=Fiber % Cane;

F=Factor calculated using the values obtained during the liquidation period, weighted on the basis of the net weight of cane and substituted at the right side of the following equation:

$$F=\frac{R}{S-0.3\ (B+0.1\ f_c)}$$

Whenever the "direct cane analysis" method is used, no adjustments in the cane weight and yield shall be made for purposes of determining the yield of raw sugar.

(C) Where the sugarcane delivered by producers is sampled by hand or machine and the juice is extracted by a laboratory hand mill, the yield of raw sugar may be determined in accordance with the formula provided under (A) above after the sample mill juice Brix and sucrose for each producer has been factored to a first expressed or crusher juice basis.

(D) Where sugarcane is handled in bulk, the procedures for sampling the deliveries of sugarcane by a producer shall be representative of all the deliveries of sugarcane of such producer.

(E) All the sugarcane delivered by a producer during the settlement period shall be considered in determining the yield of raw sugar for the period, including that sugarcane for which a negative yield is obtained when applying the formulae set forth in the preceding paragraphs.

SCHEDULE B

ADMISSIBLE DEDUCTIONS FOR SELLING AND DELIVERY EXPENSES ON RAW SUGAR

Admissible deductions for selling and delivery expenses in connection with the payment for sugarcane provided in § 877.23 of the 1973–74 price determination are limited to the sum of the following expenses for each mill operated by a processor, net of any receipts which reduce such expenses:

(1) Freight from the mill directly to the bulk raw sugar loading terminal, including the cost of covering cars or trucks where necessary;

(2) The cost of receiving, handling, and loading aboard ship at the bulk terminal at the rates established by the Puerto Rico Public Service Commission and in effect at the time the sugar is delivered to the bulk sugar terminal facility:

(3) Ocean freight;

(4) Unloading at destination;

(5) Freight demurrage resulting from causes beyond the control of the shipper;

(6) Reclaiming, weighing, and loading at mill or where stored;

(7) Shore risk, marine and war risk insurance;

(8) Brokerage or commission and exchange;

(9) Weighing, testing, and sampling at destination;

When any of the necessary services included in items (1), (3), (4), (5) or (8) above are furnished by the processor, costs incurred may include for each of the services rendered:

(1) Direct and immediate supervisory labor;

(2) Maintenance labor and supplies required for the facilities used;

(3) Taxes and insurance assessed or charged to the processor on such labor and a proportionate share of retirement and pension, bonuses, and vacation expenses properly allocable to such labor;

(4) Direct supplies; and

(5) Depreciation (at rates allowed by the taxing authority), property taxes, and property insurance on the facilities used.

Administrative expenses and interest shall be excluded from the computation of costs. In the event that facilities used in providing the necessary services are also used for other purposes by the processor, only that portion of the maintenance, depreciation, property taxes, and property insurance of such facilities properly apportionable to the necessary service shall be allowed.

The Director of the Area office may permit the use of the lowest rate charged by a public utility or carrier for comparable service in lieu of the costs incurred by the processor in furnishing the necessary service in the event that the costs incurred therefor cannot be accurately determined.

In determining the f.o.b. mill price of raw sugar sold or processed in Puerto Rico, equivalent selling and delivery expenses as approved by the Director of the Area office shall be computed as follows:

(1) If the processor delivers 20 percent or more of the total quantity of raw sugar produced by the mill to mainland refiners, the allowable per hundredweight selling and delivery expenses to be applied to such total quantity shall be the average of the admissible selling and delivery expenses as approved by the Director of the Area office for that quantity of raw sugar produced by the mill which was delivered to mainland refiners.

(2) If the processor delivers less than 20 percent of the total quantity of raw sugar produced by the mill to mainland refiners, the allowable per hundredweight selling and delivery expenses to be applied to such total quantity shall be an amount equal to the average of the admissible selling and delivery expenses approved by the Director of the Area office for all 1973–74 crop raw sugar produced in Puerto Rico which was delivered to mainland refiners except that such average of all selling and delivery expenses shall be increased (or reduced as appropriate) by an amount representing the difference between the estimated per hundredweight inland transportation costs which would have been incurred by the processor had all such 1973–74 crop raw sugar been delivered to the bulk sugar terminal to which the Area office determines the sugar could have been transported at the lowest inland transportation costs, and the average per hundredweight of all admissible inland transportation costs for all 1973–74 crop raw sugar that was delivered to the mainland. The average of the admissible selling and delivery expenses shall, as provided above, be increased when the estimated inland transportation costs are greater than such average, and be reduced when the estimated inland transportation costs are less than such average.

The statement as required by § 877.27 of the determination shall include the following certification:

CERTIFICATION

I, hereby certify that as a result of the audit performed on the books of Central ---------- as of ----------, the deductions as set forth herein are properly chargeable as selling and delivery expenses for sugar in accordance with the determination of fair and reasonable prices for the 1973–74 crop of Puerto Rican sugarcane.

SCHEDULE C

ADMISSIBLE DEDUCTIONS FOR SELLING AND DELIVERY EXPENSES FOR MOLASSES

Admissible deductions for selling and delivery expenses in connection with the molasses payment provided in § 877.24 of the 1973–74 price determination are limited to the sum of the following expenses actually incurred at each mill operated by a processor, net of any receipts which reduce such expenses:

(1) Operation of pumps to deliver molasses from mill tank to shipside or other delivery point;

(2) Freight incurred or which would have been incurred on direct shipment from tanks located at the mill to shipside, or to a waterfront tank facility, or to local buyers when such molasses is sold on a delivered price basis;

(3) Operation of tank barges, tugs, or other marine equipment used in delivering molasses to shipside;

(4) Weighing and testing;

(5) Wharfage, including charges arising from utilization of waterfront facilities such as pipelines (including fees paid for right of way privileges), pumps, and tanks (a) to store molasses in anticipation of shipment; and (b) to deliver such molasses within the hold of the ship;

(6) Shore risk insurance (limited in coverage from mill to shipside);

(7) Freight demurrage resulting from causes beyond the control of the shipper;

(8) Brokerage paid to a bona fide broker.

When any of the necessary services included in items (1) through (8) above are furnished by the processor, costs incurred may include for each of the services rendered:

(1) Direct and immediate supervisory labor;

(2) Maintenance labor and supplies required for facilities used;

(3) Taxes and insurance assessed or charged to the processor on such labor and a proportionate share of retirement and pensions, bonuses and vacation expenses properly allocable to such labor;

(4) Fuel, energy or direct supplies; and

(5) Depreciation (at rates allowed by the taxing authorities), property taxes and property insurance on the facilities used.

Administrative expenses and interest shall be excluded from the computation of costs. In the event that facilities used in providing the necessary services are also use for other purposes by the processor, only that portion of the maintenance, depreciation, property taxes, and property insurance of such facilities, properly apportionable to the necessary service, shall be allowed.

The Director of the Area office may permit the use of the lowest rate charged by a public utility or carrier for comparable service in lieu of the cost incurred by the processor in furnishing the necessary service in the event that the costs incurred therefore cannot be accurately determined.

The statement as required by § 877.27 of the determination shall include the following certification:

CERTIFICATION

I, hereby certify that, as the result of the audit performed on the books of Central ---------- as of ----------, the gross proceeds from the sales of molasses as herein stated are true and correct and the deductions set forth herein are properly chargeable as selling and delivery expenses for molasses in accordance with the determination of fair and reasonable prices for the 1973–74 crop of Puerto Rican sugarcane.

[FR Doc.74-6368 Filed 3-19-74;8:45 am]

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 991—HANDLING OF HOPS OF DOMESTIC PRODUCTION

Salable Quantity and Allotment Percentage for the 1974–75 Marketing Year

Notice was published in the February 19, 1974, issue of the FEDERAL REGISTER (39 FR 6118) regarding a proposal to establish, for the 1974–75 marketing year, beginning August 1, 1974, a salable quantity of 60,270,000 pounds, and an allotment percentage of 100 percent, for hops grown in Washington, Oregon, Idaho, and California. The salable quantity is the total quantity of hops that may be freely marketed from any crop grown in those states and handled by handlers. The salable quantity is prorated among producers by applying the allotment percentage to each producer's allotment base.

The salable quantity and allotment percentage herein established are based on a recommendation of the Hop Administrative Committee and other available information in accordance with provisions of Marketing Order No. 991, as amended (7 CFR Part 991), regulating the handling of hops of domestic production, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The notice afforded interested persons the opportunity to submit written data, views, or arguments with respect to the proposal. None were received.

V 39 55
MAR 20 74
XUM

The salable quantity and allotment percentage are derived from the following Committee determinations for the marketing year beginning August 1, 1974:

(1) Total domestic consumption of 37,500,000 pounds of hops;

(2) Minus imports of 10,000,000 pounds of hops to result in domestic consumption of U.S. hops of 27,500,000 pounds;

(3) Plus total U.S. exports of 29,000,000 pounds of hops to equal 56,500,000 pounds total usage of U.S. hops;

(4) Minus a desirable inventory adjustment, as of September 1, 1975, of 1,500,000 pounds;

(5) Plus an adjustment of 5,270,000 pounds to provide for adequate supplies should some producer allotments of hops not be fully produced.

Thus, the salable quantity during the 1974–75 marketing year would be 60,270,000 pounds.

The proposed salable percentage is computed by subtracting from this salable quantity 1,000,000 pounds for additional allotment bases (for hops of the Fuggle variety pursuant to §§ 991.138(b) and 991.138c and dividing the remainder by 59,270,000 pounds, the total of all allotment bases less the 1,000,000 pound additional allotment bases for Fuggle variety hops.

After consideration of all relevant matter presented, including that in the notice, the information and recommendation submitted by the Committee, the applicable provisions of the marketing order, and other available information, it is found that to establish a salable quantity and allotment percentage as hereinafter set forth will tend to effectuate the declared policy of the act.

Therefore, the salable quantity and allotment percentage to be applicable to the 1974–75 marketing year (August 1, 1974–July 31, 1975) are established as follows:

§ 991.212 Allotment percentage and salable quantity for hops during the marketing year beginning August 1, 1974.

The allotment percentage during the marketing year beginning August 1, 1974, shall be 100 percent, and the salable quantity shall be 60,270,000 pounds.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated March 14, 1974, to become effective April 30, 1974.

CHARLES R. BRADER,
Deputy Director,
Fruit and Vegetable Division.

[FR Doc.74–6441 Filed 3–19–74;8:45 am]

CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK), DEPARTMENT OF AGRICULTURE

[MILK ORDER NO. 30]

PART 1030—MILK IN THE CHICAGO REGIONAL MARKETING AREA

Temporary Revision of Shipping Percentages

This temporary revision is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the provisions of § 1030.11(b)(6) of the order regulating the handling of milk in the Chicago Regional marketing area.

Notice of proposed rulemaking was published in the FEDERAL REGISTER (39 FR 9198) concerning a proposed decrease in the supply plant shipping percentages for the month of March 1974. Interested persons were afforded an opportunity to file written data, views, and arguments thereon. None were filed in opposition.

After consideration of all relevant material, including the proposal set forth in the aforesaid notice, data, views, and arguments filed thereon, and other available information, it is hereby found and determined that for the month of March 1974 the supply plant shipping percentage of 20 percent that is applicable during the months of January, February and March to a plant that was a pool plant during each of the preceding months of August through December shall be decreased to 10 percent and the shipping requirement of 10 percent applicable to each plant in a unit or two or more plants pursuant to § 1030.11(b)(7)(iii) shall be reduced to zero.

Pursuant to the provisions of § 1030.11(b)(6) the supply plant shipping percentages set forth in § 1030.11(b)(4) and § 1030.11(b)(7)(iii) shall be increased or decreased by up to 10 percentage points during the months of August–March if necessary to obtain needed shipments or to prevent uneconomic shipments.

Central Milk Sales Agency (CMSA), a group of cooperative associations representing over 75 percent of the producers supplying the Chicago Regional market, requested that the Director of the Dairy Division investigate the need to reduce the supply plant shipping percentage for the month of March 1974. CMSA states that a downward revision of 10 percentage points in the supply plant shipping percentage and in the shipping percentage applicable to individual plants within a unit is necessary to prevent uneconomic shipments of milk during the month of March 1974.

To fulfill their fluid milk requirements, distributing plants obtain a major portion of their milk supplies from supply plants, since about 80 percent of the market's milk supply is assembled at supply plants. In recent months, however, Class I sales have been significantly below a year ago. In January, for instance, producer milk pooled as Class I was more than 4 percent below January 1973. Thus, there is a reduced demand for such supply plant milk in Class I use and a reduction in required shipments is, accordingly, appropriate.

CMSA estimates that shipments of milk from supply plants to distributing plants in February are 16.9 percent below such shipments in January, and are more than 26 percent below such shipments in February 1973. It is expected, therefore, that the percentage of supply plant milk needed to be shipped to distributing plants from many supply plants during March 1974 will be less than the required 20 percent.

A reduction in the required shipments of supply plant milk during the month of March will allow greater flexibility in obtaining milk as among supply plants in the market and may prevent uneconomic movements of milk merely for purposes of pool plant qualification.

It is concluded that it is necessary to reduce the pool supply plant shipping percentages by 10 percent for the month of March 1974 to prevent uneconomic shipments.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This temporary revision is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that during March 1974 it will prevent uneconomic shipments to pool distributing plants;

(b) This temporary revision does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this temporary revision.

Therefore, good cause exists for making this temporary revision effective for the month of March 1974.

It is therefore ordered, That the aforesaid provision of the order is hereby revised for March 1974.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 604–674)

Effective date: March 20, 1974.

Signed at Washington, D.C., on: March 14, 1974.

H. L. FOREST,
Director, Dairy Division.

[FR Doc.74–6369 Filed 3–19–74;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 12660; Amdt. 39–1803]

PART 39—AIRWORTHINESS DIRECTIVES

Dowty Rotol Propellers

A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring replacement of sets of rollers after each report of significant propeller induced vibration in flight, repetitive replacement of sets of rollers, inspections for broken rollers and proper preload in bearing assemblies, and replacement of propeller blades and blade retaining bolts, if necessary, until through hardened sets of rollers are installed on Dowty Rotol type (c) R.209/4–40–4.5/2 propellers was published in the FEDERAL REGISTER on April 5, 1973 (38 FR 8667).

Interested persons have been afforded an opportunity to participate in the making of the amendment. No objections were received.

This amendment is made under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

DOWTY ROTOL. Applies to Dowty Rotol type (c) R.209/4–40–4.5/2 propellers installed on, but not necessarily limited to, Nihon Model YS–11 and YS–11A Series airplanes equipped with Rolls-Royce Dart Model 542 Series engines.

Compliance is required as indicated.

To prevent propeller failure and cracking of full width case hardened rollers in the bottom (C.F.) race of the propeller blade bearings accomplish the following:

(a) For propellers having blade bearing assemblies that incorporate Modification No. (c) VP2416 (SB61–509) or Modification No. (c) VP2677 (SB61–709) having sets of rollers P/N's 601026724 or 601026940, comply with paragraphs (b) and (c)—

(1) Before further flight, after each report of significant propeller induced vibration in flight, except that the airplane may be flown in accordance with FAR § 21.197 to a base where the repair can be performed; and

(2) If initial compliance is not required by paragraph (a)(1), within the next 600 hours' time in service after the effective date of this AD or before the accumulation of 2,000 hours' time in service on blade bearing bottom (C.F.) race rollers, whichever occurs later.

(b) Replace sets of rollers specified in paragraph (a) in accordance with Dowty Rotol Service Bulletin No. 61–542–8, Revision 2, dated December 20, 1972, or an FAA-approved equivalent—

(1) With new parts of the same part number and thereafter continue to replace sets of rollers specified in paragraph (a) in accordance with subparagraph (a)(1) and at intervals not to exceed 2,000 hours' time in service on blade bearing bottom (C.F.) race rollers, and comply with paragraph (c) at each replacement; or

(2) With through hardened sets of rollers which incorporate Modification No. (c) VP2762 (SB61–771) or Modification No. (c) VP2814 (SB61–795).

(c) At each set of roller replacement required by paragraphs (a) and (b), determine the number of broken rollers and the preload in each bearing assembly in accordance with Dowty Rotol Service Bulletin No. 61–542–8, Revision 2, dated December 20, 1972 or an FAA-approved equivalent. If ten or more rollers are found to be broken or if the preload is found to be less than .0035 inches, before further flight remove the associated propeller blade and blade retaining bolt from service, mark them in a manner that will prevent their further use, and replace them with parts of the same part number or FAA-approved equivalents.

(d) The replacement of sets of rollers required by paragraphs (a) and (b) and the inspections required by paragraph (c) may be discontinued when through hardened sets of rollers which incorporate Modification No. (c) VP2762 (SB61–771) or Modification No. (c) VP2814 (SB61–795) are installed in accordance with Dowty Rotol Service Bulletin No. 61–542–8, Revision 2, dated December 20, 1972 or an FAA-approved equivalent.

This amendment becomes effective April 19, 1974.

Issued in Washington, D.C., on March 14, 1974.

C. R. MELUGIN, JR.,
Acting Director,
Flight Standards Service.

[FR Doc.74–6424 Filed 3–19–74;8:45 am]

[Airspace Docket No. 74–SO–25]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the NAS Albany, Ga., control zone.

The NAS Albany control zone is described in § 71.171 (39 FR 354). In the description, an extension is predicated on the 031° bearing from NAS Albany UHF Radio Beacon. The procedure for which this extension was designated to provide controlled airspace protection for aircraft executing the HI–NDB(UHF)RWY 22 Instrument Approach Procedure has been cancelled. It is necessary to alter the description by revoking this extension. Since this amendment lessens the burden on the public, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation regulations is amended, effective immediately, as hereinafter set forth.

In § 71.171 (39 FR 354), the NAS Albany, Ga., control zone is amended to read:

NAS ALBANY, GA.

Within a 5-mile radius of NAS Albany (lat. 31°35'50" N., long. 84°05'06" W.).

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in East Point, Ga., on March 11, 1974.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.74–6315 Filed 3–19–74;8:45 am]

[Airspace Docket No. 74–SO–29]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone and Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the Valdosta, Ga. (Moody AFB) control zone and the Valdosta, Ga., transition area.

The Valdosta (Moody AFB) control zone is described in § 71.171 (39 FR 354) and the Valdosta transition area is described in § 71.181 (39 FR 440). In each description, an extension is predicated on Moody VOR 173° radial. The VOR Runway 36R Instrument Approach Procedure final approach radial has been changed to Moody VOR 178°. It is necessary to alter the descriptions to reflect this change. Since this amendment is minor in nature, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation regulations is amended, effective immediately, as hereinafter set forth.

In § 71.171 (39 FR 354), the Valdosta, Ga. (Moody AFB) control zone and in § 71.181 (39 FR 440), the Valdosta, Ga., transition area are amended as follows: "• • • 173° radial • • •" is deleted and "• • • 178° radial • • •" is substituted therefor, wherever it appears.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in East Point, Ga., on March 12, 1974.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.74–6317 Filed 3–19–74;8:45 am]

[Airspace Docket No. 74–RM–1]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

On January 31, 1974, a notice of proposed rule making was published in the FEDERAL REGISTER (39 FR 3966) stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the transition area at Great Falls, Mont.

Interested persons were given 30 days in which to submit written comments, suggestions, or objections. No objections have been received and the proposed amendment is hereby adopted without change.

Effective date. This amendment shall be effective 0901 G.m.t., May 23, 1974.

(Sec. 307(a), Federal Aviation Act of 1958, (49 U.S.C. 1348(a)); sec. 6(c) Department of Transportation Act (49 U.S.C. 1656(c))

Issued in Aurora, Colorado, on March 11, 1974.

M. M. MARTIN,
Director,
Rocky Mountain Region.

In § 71.181 (39 FR 440) amend the 700-foot transition area for Great Falls, Mont., to read as follows:

GREAT FALLS, MONT.

That airspace extending upward from 700 feet above the surface within a 17-mile radius of Malmstrom AFB (latitude 47°30'05" N., longitude 111°11'20" W.), within 3.5 miles each side of the Truly RBN 180° bearing, extending from the 17-mile radius area to 9 miles south of the RBN and within 3 miles each side of the Great Falls VOR 157° radial, extending from the 17-mile radius area to 21.5 miles southeast of the VOR.

[FR Doc.74–6316 Filed 3–19–74;8:45 am]

V 39 55 MAR 20 74 XUM

[Airspace Docket No. 74-WA-4]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Extension of Effective Date

On February 1, 1974, FR Doc. 74-2675 was published in the FEDERAL REGISTER (39 FR 4075), amending Part 71 of the Federal Aviation regulations, by redescribing V-69 and V-69W between Shreveport, La., and El Dorado, Ark., effective May 23, 1974. Due to technical problems, commissioning of the Monroe, La., VORTAC has been delayed from May 23, 1974, to July 18, 1974, thereby delaying the realignment of the VOR Federal Airways associated with that VORTAC. V-69 and V-69W will be realigned simultaneously with the relocation of the Monroe VORTAC, and action is taken herein to amend the effective date for the realignment of these airways.

Since the delay of the commissioning date of the relocated VORTAC due to technical problems is an administrative matter within the normal expertise of the FAA, and is one upon which the public would have no particular reason to comment, notice and public procedure thereon are unnecessary and this amendment to the FEDERAL REGISTER Document may become effective immediately.

In consideration of the foregoing, effective on March 20, 1974, FR Doc. 74-2675 is amended, as follows: "effective 0901 G.m.t., May 23, 1974," is deleted and "effective 0901 G.m.t., July 18, 1974," is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Washington, D.C., on March 13, 1974.

GORDON E. KEWER,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.74-6320 Filed 3-19-74;8:45 am]

[Docket No. 13573; Amdt. No. 908]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Recent Changes and Additions

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAPs) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAPs for the changes and additions covered by this amendment are described in FAA Forms 3139, 8260-3, 8260-4, or 8260-5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in Amendment No. 97-696 (35 FR 5609).

SIAPs are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591. Copies of SIAPs adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAPs may be purchased from the FAA Public Document Inspection Facility, HQ-405, 800 Independence Avenue, SW., Washington, D.C. 20591 or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150.00 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30.00 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.21 is amended by originating, amending, or canceling the following L/MF SIAPs, effective March 7, 1974.

Fairbanks, Alaska—Fairbanks Int'l. Arpt., LFR-A, Amdt. 9

2. Section 97.23 is amended by originating, amending, or canceling the following VOR-VOR/DME SIAPs, effective May 2, 1974:

Beckley, W. Va.—Raleigh County Memorial Arpt., VOR Rwy 10, Amdt. 6
Butte, Mont.—Bert Mooney Silver Bow Co. Arpt., VOR Rwy 11, Amdt. 1
Helena, Mont.—Helena Arpt., VOR-A, Amdt. 10
Helena, Mont.—Helena Arpt., VOR/DME B, Amdt. 2
Minneapolis, Minn.—Crystal Arpt., VOR-A, Amdt. 5
Minneapolis, Minn.—Aneka County Janes Field, VOR Rwy 6, Amdt. 5
Montgomery, Ala.—Dannelly Field, VOR Rwy 33, Amdt. 16
New Haven, Conn.—Tweed-New Haven Arpt., VOR Rwy 2, Amdt. 14
So. St. Paul, Minn.—So. St. Paul Municipal-Richard E. Fleming Field, VOR-A, Amdt 6
So. St. Paul, Minn.—So. St. Paul Municipal-Richard E. Fleming Field, VOR-B, Amdt. 6
St. Paul, Minn.—Lake Elmo Arpt., VOR-A, Amdt. 2

• • • effective March 28, 1974:

Memphis, Tenn.—Memphis Int'l. Arpt., VOR Rwy 35L, Amdt. 1
Ruston, La.—Ruston Municipal Arpt., VOR Rwy 34, Orig.

• • • effective March 13, 1974:

Princeton, N.J.—Princeton Arpt., VOR-A, Amdt. 3

• • • effective March 12, 1974:

Eureka, Calif.—Murray Field, VOR-A, Amdt. 2

3. Section 97.25 is amended by originating, amending, or canceling the following SDF-LOC-LDA SIAPs, effective May 2, 1974:

Helena, Mont.—Helena Arpt., LOC/DME Rwy 26, Amdt. 1, canceled
Montgomery, Ala.—Dannelly Field, LOC (BC) Rwy 27, Amdt. 5

• • • effective March 4, 1974:

Moline, Ill.—Quad-City Arpt., LOC (BC) Rwy 27, Amdt. 14

4. Section 97.27 is amended by originating, amending, or canceling the following NDB/ADF SIAPs, effective May 2, 1974:

Phoenix, Ariz.—Phoenix Sky Harbor Int'l. Arpt., NDB-A, Amdt. 1, canceled

• • • effective April 18, 1974:

Manhattan, Kans.—Manhattan Municipal Arpt., NDB Rwy 31, Amdt. 9

• • • effective April 4, 1974:

Red Oak, Iowa—Red Oak Municipal Arpt., NDB Rwy 17, Orig.

• • • effective March 13, 1974:

Kankakee, Ill.—Greater Kankakee Arpt., NDB Rwy 4, Amdt. 3

• • • effective March 4, 1974:

Moline, Ill.—Quad-City Arpt., NDB Rwy 9, Amdt. 18

5. Section 97.29 is amended by originating, amending, or canceling the following ILS SIAPs, effective May 2, 1974:

Atlanta, Ga.—The William B. Hartsfield Atlanta Int'l. Arpt., ILS Rwy 8, Amdt. 44
Atlanta, Ga.—The William B. Hartsfield Atlanta Int'l. Arpt., ILS Rwy 9R, Amdt. 4
Helena, Mont.—Helena Arpt., ILS Rwy 26, Amdt. 2
New Haven, Conn.—Tweed-New Haven Arpt., ILS Rwy 2, Amdt. 3
New York, N.Y.—LaGuardia Arpt., ILS Rwy 22, Amdt. 11

• • • effective March 28, 1974:

Covington, Ky.—Greater Cincinnati Arpt., ILS Rwy 36, Amdt. 26
Los Angeles, Calif.—Los Angeles Int'l. Arpt., ILS Rwy 6R, Amdt. 2
Memphis, Tenn.—Memphis Int'l. Arpt., ILS Rwy 35L, Amdt. 1

• • • effective March 4, 1974:

Moline, Ill.—Quad-City Arpt., ILS Rwy 9, Amdt. 18

6. Section 97.33 is amended by originating, amending, or canceling the following RNAV SIAPs, effective March 4, 1974:

Moline, Ill.—Quad-City Arpt., RNAV Rwy 30, Amdt. 2

CORRECTION: In Docket No. 13571, Amendment 907, to Part 97 of the Federal Aviation Regulations, published in the FEDERAL REGISTER under § 97.23, effective April 25, 1974—Change effective date of Nome, Alaska—Nome Arpt., VOR Rwy 27, Amdt. 9, to March 28, 1974.

(Secs. 307, 313, 601, 1110, Federal Aviation Act of 1948; 49 U.S.C. 1438, 1354, 1421, 1510, Sec. 6(c) Department of Transportation Act, 49 U.S.C. 1655(c) and 5 U.S.C. 552(a)(1)).

Issued in Washington, D.C., on March 14, 1974.

JAMES M. VINES,
Chief, Aircraft Programs Division.

NOTE.—Incorporation by reference provisions in §§ 97.10 and 97.20 (35 FR 5610) approved by the Director of the FEDERAL REGISTER on May 12, 1969.

PARTS 141—STATEMENTS AND REPORTS (SCHEDULES)

Uniform Systems of Accounts; Equity Method of Accounting for Long-Term Investments in Subsidiaries; Correction

Correction

In FR Doc. 74-5313, correcting FR Doc. 73-2660 and appearing at page 8916 of the issue for Thursday, March 7, 1974, the date below the headings should read "February 21, 1973.".

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 74-97]

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

PART 6—AIR COMMERCE REGULATIONS

Containerized and Palletized Cargo

On August 3, 1973, a notice of proposed rulemaking was published in the FEDERAL REGISTER (38 FR 20895), which proposed to amend §§ 4.7a, 4.63, and 6.6 of the Customs regulations to provide for the use of qualifying words on vessel and aircraft cargo manifests covering containerized or palletized cargo for the purpose of indicating that the manifests were prepared on the basis of information furnished by the shipper.

Interested persons were given 30 days from the date of publication of the notice to submit relevant written data, views, or arguments regarding the proposal. After consideration of all comments received, it has been determined that the proposed amendments should be adopted as set forth in the notice except for the following two changes:

1. The abbreviation for "shipper's load and count" in § 4.7a(c)(2) is changed from "'SLC'" to "'SLAC'".

2. In §§ 4.7a(c) and 6.6(c), the word "liability" is changed to "responsibility".

The proposed amendments, modified to include these changes, are adopted as set forth below.

Effective date. These amendments shall become effective on April 19, 1974.

[SEAL] VERNON D. ACREE,
Commissioner of Customs.

Approved: March 12, 1974.

JAMES B. CLAWSON,
Acting Assistant Secretary of the Treasury.

1. Section 4.7a, Customs Regulations, is amended by adding a new paragraph (c) to read as follows:

§ 4.7a Inward foreign manifest; information required; alternative forms.

• • • • • •

(c) *United States Customs Inward Foreign Manifest.* For shipments of containerized or palletized cargo, Customs officers shall accept United States Customs Inward Foreign Manifest, Customs Form 7527-A, or Inward Foreign Manifest, Customs Form 7527-B, which indicate that the manifest has been prepared on the basis of information furnished by the shipper, although the use of words of qualification in no way limits the responsibility of a master to submit accurate manifests or in any way qualifies the oath taken by the master as to the accuracy of his manifest.

(1) If the inward manifest covers only containerized or palletized cargo, the following statement may be placed on the manifest:

The information appearing on the manifest relating to the quantity and description of the cargo is in each instance based on the shipper's load and count. I have no knowledge or information which would lead me to believe or to suspect that the information furnished by the shipper is incomplete, inaccurate, or false in any way.

(2) If the manifest covers conventional cargo and containerized or palletized cargo, or both, the use of the abbreviation "SLAC" for "shipper's load and count," or an appropriate abbreviation if similiar words are used, is approved provided the abbreviation is placed next to each containerized or palletized shipment on the manifest and the following statement is placed on the manifest:

The information appearing on this manifest relating to the quantity and description of cargo preceded by the abbreviation "SLAC" is in each instance based on the shipper's load and count. I have no information which would lead me to believe or to suspect that the information furnished by the shipper is incomplete, inaccurate, or false in any way.

The statements specified in paragraph (c)(1) and (2) of this section shall be placed on the last page of the inward manifest. Words similar to "the shipper's load and count" may be substituted for those words in the statements, although vague expressions such as "said to contain" or "accepted as containing" are not acceptable. The use of an asterisk or other character instead of appropriate abbreviations, such as "SLAC," is not acceptable.

(R.S. 251, as amended, secs. 431, 624, 46 Stat. 710, as amended, 759; 19 U.S.C. 66, 1431, 1624)

2. Section 4.63 is amended by adding a new paragraph (f) to read as follows:

§ 4.63 Outward cargo declaration; shippers' export declaration.

• • • • • •

(f) Customs officers shall accept an outward manifest covering containerized or palletized cargo which indicates by the use of appropriate words of qualification (see § 4.7a(c)) that the manifest has been prepared on the basis of information furnished by the shipper.

(R.S. 251, as amended, R.S. 4197, as amended, sec. 624, 46 Stat. 759; 19 U.S.C. 66, 1624, 46 U.S.C. 91)

3. Section 6.6 is amended by adding a new paragraph (c) to read as follows:

§ 6.6 Documents: form.

• • • • • •

(c) Customs officers shall accept an inward or outward air cargo manifest covering containerized or palletized cargo which indicates by the use of appropriate words of qualification (see § 4.7a(c) of this chapter) that the manifest has been prepared on the basis of information furnished by the shipper. However, the use of qualifying words in no way limits the responsibility to submit accurate manifests or in any way qualifies the declaration as to the accuracy of the manifest.

(Sec 431, 46 Stat. 710, as amended; 19 U.S.C. 1431)

(R.S. 251, as amended, sec. 624, 46 Stat. 759, sec. 1109, 72 Stat. 799, as amended; 19 U.S.C. 66, 1624, 49 U.S.C. 1509)

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 50—FROZEN VEGETABLES

Establishment of Definitions and Standards of Identity and Quality for Frozen Peas

Correction

In FR Doc. 74-2138 appearing at page 3541 in the issue of Monday, January 28, 1974, make the following changes:

1. In the table in § 50.1(f):

a. Delete the heading "Acceptable Quality Level 6.5".

b. Delete the heading "Number of primary containers:" and add "(Primary container)" directly below the heading "Lot size".

c. The heading "size of container" should read "size container".

d. The two letters "*n*" and the two letters "c" should appear directly above the columns of figures.

2. The heading to the table in § 50.2(b) should read "Round hole sieve size through which peas will pass."

3. In § 50.3, after the last line of paragraph (b), insert, as a separate paragraph, "(c) Alcohol-insoluble solids determinations.".

4. In § 50.3(c)(1)(ii) delete the footnote "3".

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

RESTRUCTURING OF CHAPTER

[Order 563–74]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Designating Officials To Act as Attorney General

This order amends the Department regulations designating officials of the Department of Justice to act as Attorney General in case of a vacancy in that Office.

By virtue of the authority vested in me by 28 U.S.C. 508, paragraph (a) of § 0.132 of 28 CFR Chapter I, is amended to read as follows:

§ 0.132 Designating officials to perform the functions and duties of certain offices in case of vacancy therein.

(a) In case of vacancy in the office of Attorney General, the Deputy Attorney General shall, pursuant to 28 U.S.C. 508, perform the functions and duties of and act as Attorney General. In case of vacancy in both the office of Attorney General and the office of Deputy Attorney General, the Solicitor General shall perform the functions and duties of and act as Attorney General.

* * * * *

Dated: March 12, 1974.

WILLIAM B. SAXBE,
Attorney General.

[FR Doc.74–6334 Filed 3–19–74;8:45 am]

Title 36—Parks, Forests and Public Property

CHAPTER II—FOREST SERVICE, DEPARTMENT OF AGRICULTURE

PART 295—USE OF OFF-ROAD VEHICLES

Operating Conditions

In a notice of proposed rulemaking published on October 23, 1973 (38 FR 29232), the Forest Service requested public comment on a proposal for operating conditions of off-road vehicles on National Forest System lands.

Comments were received from governmental Agencies (national, State, and local), organizations, companies, and formal groups, as well as many private individuals. The majority of respondents expressed support for the regulations in general, but numerous suggestions were made for change or improvement.

Section 295.6, *Operating Conditions*, had been reserved in newly promulgated Part 295 as published in the FEDERAL REGISTER on September 25, 1973 (38 FR 26723). Part 295 contains definitions and regulations which apply to § 295.6.

The proposed § 295.6 has been rephrased in language which will clearly specify prohibition of given action in the operation of off-road vehicles. Several subheadings have been added to help clarify the meaning of the regulations and avoid ambiguity.

Several respondents misunderstood the licensing provisions. Accordingly, the language was changed to reflect the Forest Service intent that no new licensing be proposed, but that off-road vehicles operating on National Forest System lands comply with the State laws which apply to the licensing and operation of such vehicles. The language regarding operation by young people has been revised. Its intent is that protection of land, wildlife, and vegetational resources will be enhanced when young riders are accompanied or supervised by a mature person who should be better able to understand the complex ecological relationships and advise on proper conduct. This provides a place for young people to ride even though some respondents recommended excluding them.

In response to some respondents' contention that paragraph (a)(1) of § 295.6 was vague and reflected "street standards" for operation of vehicles, renumbered paragraph (c) provides more descriptive language which will help protect and reduce conflicts with other users of the National Forests.

Some respondents opposed setting any speed limits for off-road vehicles outside campgrounds. The intent is to protect soil, vegetation, and wildlife resources on specific areas where local Forest Officers determine the need and post the speed limits.

There were many comments about excessive damage to land, wildlife, and vegetative resources in paragraph (a)(4). In renumbered paragraph (f) of this section rewording makes this subsection apply where excessive damage is created by the operation of off-road vehicles, rather than when such damage is likely.

The Forest Service Manual 2351.5 provides for meeting applicable local resource standards for air, noise, plant cover, soil stability, water quality, fish and wildlife, and esthetics.

Many commented that the word "excessive" should be deleted from paragraph (f) of this section in relating to damage. Strictly interpreted, a regulation so worded could be used to eliminate off-road vehicles from use of the National Forests. This is not consistent with Executive Order 11644 and its direction to designate areas and trails on public lands where off-road vehicles can be used as well as where such vehicles are restricted or prohibited.

Proposal paragraph (c) regarding the use of mufflers and spark arresters was divided into two new subsections to improve clarity. Operable mufflers are required for internal combustion engines in paragraph (h). A spark arrester may be required for internal and external combustion engines as determined by the Forest Officer at the time when areas and trails are designated for off-road vehicles use. This will allow designations and requirements which will meet specific local needs. For example, an area designated for off-road vehicles use during the period from October to April when at least 4 inches of snow is on the ground may not require spark arresters. In general, spark arresters may not be needed on snowmobiles. An addition to paragraph (i) provides that the Forest Service will determine whether spark arresters meet the prescribed standards.

Proposal paragraph (d) has been renumbered as paragraph (j) and reworded to provide that an operable braking system is required in recognition that some off-road vehicles rely upon engine compression for reducing speed rather than brakes. When a vehicle uses brakes for reducing speed, they must be in operable condition. Paragraph (k) provides for operable headlights and a taillight when off-road vehicles are used during hours of darkness even though this time of use may be minimal.

Paragraph (f) has been renumbered as paragraph (l) and reworded to reflect suggestions of the Environmental Protection Agency (EPA). Noise emission standards refer to the sound emitted from the off-road vehicle. Environmental noise refers to combinations of sound in the environment and may include off-road vehicles in addition to other sources of sound. We understand that noise emission standards will be proposed by EPA for adoption in 1974. Many respondents asked for requirements of snow depth before operation of snowmobiles and that off-road vehicles be prohibited during soil moisture conditions conducive to rutting of soil and erosion. Such provisions will be made when local situations are considered and when areas and trails are designated following public participation as indicated in §§ 295.3 and 295.4.

Suggestions that these regulations require insurance for bodily injury, property damage and liability for uninsured vehicles, and that reflectorized material be mandatory on off-road vehicles, were considered. Such requirements would be applicable under paragraph (g) when States enact the necessary laws and regulations.

Several suggested that the Forest Service conduct training courses for off-road vehicle operation similar to extant hunter-safety training conducted in many States. The International Snowmobile Industry Association has developed programs to educate snowmobile operators and to require youthful snowmobile operators to obtain safety certificates. Other interested industry associations and responsible groups might consider similar programs for other types of off-road vehicles.

The final consideration relates to adding a sentence to the end of § 295.3, *Planning designation of areas and trails*, to make explicit an understanding that was intended and can be inferred in §§ 295.1–295.9. The authority to designate areas and trails where off-road vehicles can be used, and where they are restricted or prohibited, was delegated by administrative instructions in the Forest Service Manual, Chapter 2350, by the Chief to Regional Foresters and Forest Supervisors. These officials would plan the designation of areas and trails, achieve public participation, review of proposals and then adopt the designations, and make information of these actions available to the public. The sentence to be added at the end of § 295.3 makes explicit that Regional Foresters and Forest Supervisors are authorized to make the designations. Because this addition embodies direction implicit in the existing §§ 295.1 to 295.9, formal rulemaking procedures are unnecessary.

In consideration of the foregoing, 36 CFR Part 295 is amended as follows:

1. Section 295.3 is amended by adding a sentence at the end of the section to read as follows:

§ 295.3 Planning designation of areas and trails.

* * * Regional Foresters and Forest Supervisors are authorized to designate areas and trails for off-road vehicles use, use restrictions, and closures to any or all types of such use.

2. Proposed 295.6 is adopted, as changed, to read as follows:

§ 295.6 Operating conditions.

The following acts are prohibited when off-road vehicles are operated on areas or trails of National Forest System lands:

(a) Operation without a valid operator's license or learner's permit if required by the laws of the State in which the vehicle is being operated for that particular type of off-road vehicle;

(b) Operation by an unlicensed person under 18 years of age unless accompanied by or within sight of a responsible adult who has a valid operators license if a license is required by the State for the type of vehicle being operated;

(c) Operation in a manner disregarding the rights and safety of others, or so as to endanger, or be likely to endanger, any person or property;

(d) Operation in excess of established speed limits;

(e) Operation while the operator is under the influence of alcohol or drugs;

(f) Operation in a manner creating excessive damage or disturbance of the land, wildlife, or vegetative resources;

(g) Operation not in conformance with applicable State laws and regulation requirements established for off-road vehicles;

(h) Operation when an internal combustion engine is not equipped with a properly installed muffler in good working condition;

(i) Operation when an internal or external combustion engine is not equipped with a properly installed spark arrester, provided that such equipment is specified when an area or trail is designated for use by off-road vehicles. Such spark arrester shall meet and be qualified to either the Department of Agriculture, Forest Service Standard 5100-1a, or the 80 percent efficiency level when determined in accordance with the appropriate Society of Automotive Engineers (SAE) Recommended Practices J335 or J350. Qualification of spark arresters to either the Forest Service Standard of SAE Recommended Practices shall be determined by the Forest Service;

(j) Operation without an operable braking system;

(k) Operation from one-half hour after sunset to one-half hour before sunrise without working headlights and taillight;

(l) Operation which does not comply with:

(1) Any applicable noise emission standard established by the Administrator, Environmental Protection Agency, under authority of section 6 of the Noise Control Act of 1972 (Pub. L. 92–574);

(2) Any applicable U.S. Department of Agriculture or State standards for permissible levels of environmental noise. In case of overlapping standards, the most stringent standards will govern.

Effective date. This amendment is effective March 20, 1974.

Dated: March 14, 1974.

ROBERT W. LONG,
Assistant Secretary for Conservation, Research, and Education.

PART 50—POLICIES OF GENERAL APPLICABILITY

Sterilization of Persons by Federally Assisted Family Planning Projects; Third Deferral of Effective Date

This notice defers for an additional 30 days the effective date of regulations published and effective on February 6, 1974 on sterilization restrictions in fed-

V 39 155 MAR 20 74 XUM

erally funded programs and projects (39 FR 4730, 4733).

The effective date of the regulations has previously been delayed for 30 days (39 FR 5315) and 10 days (39 FR 9178, March 8, 1974) to permit resolution by the United States District Court for the District of Columbia of legal issues raised in Relf v. Weinberger, Civil Action No. 1557–73, and in National Welfare Rights Organization v. Weinberger, Civil Action No. 74–243.

On March 15, 1974 the United States District Court entered its judgment and order in the two lawsuits referred to above declaring that the family planning sections of the Public Health Service Act (42 U.S.C. 300 et seq., 708(a)(3)) and of the Social Security Act (42 U.S.C. 602(a)(15), 1396d(a)(4)(C)) do not authorize the provision of Federal funds for the sterilization of any person who (1) has been judicially declared mentally incompetent, or (2) is in fact legally incompetent under the applicable state laws to give informed and binding consent to the performance of such an operation because of age or mental capacity. The court further ordered that the officials of this Department be enjoined from providing funds under the aforesaid family planning sections for the sterilization of either of the two categories of persons just described. The court further ordered that the sterilization restriction regulations be amended to conform with the directives just described and that they further be amended to state that Federal funds will not be provided under the aforesaid family planning sections for the sterilization of a legally competent person without requiring that such person be advised at the outset and prior to the solicitation or receipt of his or her consent to such an operation that no benefits provided by programs or projects receiving Federal funds may be withdrawn or withheld by reason of his or her decision not to be sterilized, and without further requiring that such advice also appear prominently at the top of the consent document mentioned in those regulations.

In order for the Department, in compliance with the order of the United States District Court, to consider what action must be taken to amend its sterilization restriction regulations, and to take such action, I have determined that their effect should be delayed an additional 30 days. Accordingly, notice is hereby given that the effective date of the regulations is delayed for an additional 30 days until April 17, 1974, and the previous notice of the Department on Sterilization Guidelines—Departmental Policy, 38 FR 20903, is continued in effect until that date.

Dated: March 15, 1974.

FRANK CARLUCCI,
Acting Secretary.

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

PART 0—COMMISSION ORGANIZATION

Correct Addresses of Common Carrier Bureau Field Offices

1. This order is for the purpose of correcting the addresses of the New York Field Office and the St. Louis Field Office of the Common Carrier Bureau as set forth in § 0.93 of the Commission's rules and regulations.

2. Authority for this amendment is contained in sections 4(i), 5(d), and 303(r) of the Communications Act of 1934, as amended, and in § 0.231(d) of the Commission's rules. The prior notice and effective date provisions of the Administrative Procedure Act (5 U.S.C. 553) do not apply inasmuch as this amendment is editorial.

3. Consequently, *it is ordered*, effective March 26, 1974, that §0.93 is amended to read as set forth below:

§ 0.93 Field offices.

Common Carrier Bureau field offices are located in Room 1309X, 90 Church Street, New York, N.Y. 10007; and Room 546, 210 N. Twelfth Street, St. Louis, Mo. 63101.

Adopted: March 12, 1974.

Released: March 13, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] JOHN M. TORBET,
Executive Director.

[Docket No. 19810; RM–2153]

PART 73—RADIO BROADCAST SERVICES

TV Station in Myrtle Beach, S.C.; Table of Assignments

In the matter of amendment of § 73.606(b), television table of assignments, TV broadcast stations (Myrtle Beach, South Carolina).

1. On September 6, 1973, the Commission adopted a notice of proposed rulemaking in the above-entitled matter (FCC 73–911, 38 FR 26008) proposing to amend the Television Table of Assignments contained in § 73.606(b) of the Commission's rules by assigning Channel 43 to Myrtle Beach, South Carolina as its first commercial television assignment. Comment and reply comment dates were designated as October 23 and November 1, 1973. These dates were extended to October 30 and November 8, 1973, respectively. The Notice was issued in response to a petition for rulemaking, RM–2153, by Greater Myrtle Beach Television Corporation (Myrtle Beach) which proposes to apply for a construction permit to operate a station on Channel 43 at Myrtle Beach if the channel is assigned.

2. Myrtle Beach and Platt Broadcasting Company, Inc. (Platt) [1] filed supporting comments. No comments in opposition were received. In the Notice it was pointed out that the various statistics cited by Myrtle Beach in its petition as to the growth of Myrtle Beach and other communities in the area (including Myrtle Beach Base and Surfside Beach Town) and various population divisions (the Myrtle Beach Division, Lois West Division, Lois South Division, and Lois East Division), and the abundance of other information submitted showing the tremendous growth of the Myrtle Beach area was sufficient enough indication of the need for an assignment for the Commission to propose making an assignment to Myrtle Beach. However, since channel assignments are made to a specific community, Myrtle Beach was requested to furnish data and information in its comments specifying the relationship of the various communities and population areas to the city of Myrtle Beach, the length of the tourist season, and the breakdown of statistics between the city of Myrtle Beach and county district of Myrtle Beach. Both Myrtle Beach and Platt have responded with the necessary exhibits (maps and population tables) in answer to the request of the Notice and thereby leave no doubt as to the merits of an assignment to Myrtle Beach. In addition both Myrtle Beach and Platt state that applications will be filed for authority to construct and operate a station if an assignment is made.

[1] Platt is a South Carolina corporation which has been formed for the purpose of obtaining authorizations to construct and operate a UHF television broadcast station at Myrtle Beach, South Carolina. The sole stockholders of the company are Dr. and Mrs. V. F. Platt, Jr.

3. Myrtle Beach is located in an area where unassigned but available UHF television broadcast channels are not considered scarce. Of the 14 channels available for assignment to Myrtle Beach, Channel 43 appears to be the most efficient assignment. Its assignment meets all minimum mileage separation requirements of the Commission's rules, requires no channel juggling of existing assignments in the Table, and has the least adverse preclusionary effect on possible channel assignments to other cities within the assignment area.

4. In view of the foregoing, the Commission believes that the public interest would be served by assigning Channel 43 to Myrtle Beach, South Carolina. Accordingly, pursuant to the authority contained in sections 4(i), 303, and 307(b) of the Communications Act of 1934, as amended, *it is ordered*, That, effective April 19, 1974, the Table of Assignments in § 73.606(b) of the Commission's rules is amended insofar as the city listed below is concerned to read as follows:

City	*Channel No.*
Myrtle Beach, South Carolina	43

5. *It is further ordered*, That this proceeding IS TERMINATED.

Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307.

Adopted: March 7, 1974.

Released: March 12, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.74–6393 Filed 3–19–74;8:45 am]

[Docket No. 19826; RM–2214]

PART 73—RADIO BROADCAST SERVICES

TV Station in Wheeling, W. Va.; Table of Assignments

In the matter of amendment of § 73.606(b), table of assignments, Television Broadcast Stations. (Wheeling, West Virginia)

1. The Commission here considers the notice of proposed rule making, adopted September 11, 1973 (FCC 73–953), proposing amendment of the Television Table of Assignments (§73.606(b) of the Commission's rules and regulations) to reserve Channel 41 at Wheeling, West Virginia, for noncommercial educational use. The only comments filed are those of the petitioner West Virginia Board of Regents, which as pertinent here is the licensee of noncommercial educational television broadcast Station WWVU–TV, Morgantown, West Virginia, and translator Station W41AA, Channel 41 at Wheeling.

2. The issues are as stated in the Notice. Wheeling, population 48,188, has three television assignments: Channels 7, 14, and 41; Channel 7 is occupied by Station WTRF–TV; Channel 14 is unavailable for use pending further action in Docket No. 18261 which concerns the use of that channel for the land mobile service; and Channel 41 is licensed to the West Virginia Board of Regents as Translator Station W41AA.

3. The West Virginia Board of Regents more or less reiterates the information previously stated in its petition and briefly outlined in our Notice. As part of its program to provide a permanent state-wide system of educational television for West Virginia, the Board of Regents together with the West Virginia Educational Broadcasting Authority [1] is constructing a seven station translator network throughout the state for the purpose of extending the programming of Station WWVU–TV to areas unserved in West Virginia by educational television. WWVU–TV broadcasts 77 hours of weekly programming including a full week-day school service, programming from the Public Broadcasting Service, the Eastern Educational Television Network, and the Public Television Library. As concerns the instant proposal, the translator network would extend educational programming (which as of the date of the petition served approximately 85 percent of the state's population) to ten additional counties in the Northern Panhandle. Local commercial television service at Wheeling is provided by Wheeling's Station WTRF–TV as well as many out-of-state stations including Stations WSRB–TV, Channel 9, Steubenville, Ohio, and stations at Pittsburgh, Pennsylvania, and Youngstown, Ohio. Station W41AA on Channel 41 provides educational noncommercial service. The Board of Regents as part of its comments includes letters of support from sixteen educational authorities and community leaders.

4. As stated in the Notice, the purpose of the proceeding is that the Board of Regents wants to assure itself that Channel 41 is reserved for noncommercial use with the possibility of the translator being activated as a broadcast station. In the circumstances, it would appear that the public interest, convenience, and necessity would be served by reserving Channel 41 at Wheeling, West Virginia, for noncommercial educational use.

5. In view of the foregoing and pursuant to authority found in §§ 4(i), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, § 73.606(b) of the Commission's Rules and Regulations, the Television Table of Assignments, as concerns Wheeling, West Virginia, is amended, effective April 19, 1974, as follows:

City	*Channel No.*
Wheeling, West Virginia	7, 14 [2], *41

6. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Adopted: March 7, 1974.

Released: March 12, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 28—PUBLIC ACCESS, USE, AND RECREATION

De Soto National Wildlife Refuge, Iowa and Nebr.

The following special regulations are issued and are effective on March 20, 1974.

§ 28.28 Special regulations, public access, use, and recreation, for individual wildlife refuge areas.

IOWA–NEBRASKA

DE SOTO NATIONAL WILDLIFE REFUGE

Public recreational activities on DeSoto National Wildlife Refuge, Missouri Valley, Iowa, are permitted from April 15 through September 30, 1974, inclusive, subject to the following special conditions:

(1) *Authorized activities.* Public recreational activities are limited to fishing, picnicking, swimming, boating, water skiing, sightseeing, mushroom picking, and nature observation.

(2) *Open season.* The open season for general public recreation use is from April 15, 1974, through September 30, 1974. During this period, the area is open daily from 6 a.m. through 10 p.m., C.D.S.T. Between the dates of September 16 and September 30, 1974, all water oriented recreational activities, except boat and bank fishing, are prohibited. Swimming will be permitted from May 25 and September 2, 1974, between the hours of 11 a.m. and 7 p.m., and only in the designated beach area. Admittance onto the refuge is prohibited one hour prior to the scheduled closing time. Two separate mushroom picking areas are open daily to the public during the month of May, hours of use are the same as for the general use area.

(3) *Open area.* The area open for general public use comprises approximately 2,000 acres and the special mushroom

[1] The latter is the licensee of noncommercial educational Station WMUL–TV, Channel *33, Huntington, and WSWP–TV, Channel *9, Grandview, West Virginia.

[2] Following the decision in Docket No. 18261, channels so indicated will not be available for television use until further action by the Commission.

V 39 55 MAR 20 74 XUM

picking areas comprise approximately 1,100 acres. These areas are delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West 6th Avenue, Denver, Colorado 80215. Maps of the open areas are also posted or available for handout at entrance points.

(4) *Access.* Entry onto the open area is permitted only at gates or points of entry specifically posted for this purpose.

(5) *Other provisions.* (a) The use of air mattresses, innertubes, beach balls and all other flotation devices, other than life preservers, is prohibited on refuge waters.

(b) The possession of bottles or cans is prohibited on the designated swimming beach.

(c) The use of fire is permitted, but only in grills.

(d) Access to refuge waters with air boats or house boats is prohibited.

(e) Access to refuge waters with boats that have toilets that flush directly into the water is prohibited, unless such toilets are sealed from use.

(f) The maximum number of power boats greater than 25 horsepower that will be permitted on refuge waters at any one time is 100. Power boats above 25 horsepower may be launched only at the designated launching ramp at the south beach.

(g) The possession of open alcoholic beverages is prohibited on any boat propelled by mechanical power while the craft is in operation.

(h) The lake being long and narrow requires that all boaters keep to the right and maintain a highway type traffic pattern. Turns shall always be made to the operator's left except when beaching or docking a boat.

(i) A portion of the refuge lake is posted as a "No Wake Zone". Boaters using this area shall travel at an idling speed sufficiently slow to prevent a wake that would rock another boat.

(j) All boats are prohibited from loading or unloading passengers from the swimming area.

(k) All boat and bank fishermen will be permitted to use the entire lake.

The provisions of this special regulation supplement the regulations which govern public access, use, and recreation on wildlife refuge areas generally which are set forth in 50 CFR 28, and are effective through September 30, 1974.

JAMES E. FRATES,
Refuge Manager, DeSoto National Wildlife Refuge, Missouri Valley, Iowa.

MARCH 11, 1974.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY OFFICE

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Reseller Rule in Puerto Rico

This amendment to 10 CFR 212.91 is to make clear that the special provisions of that regulation under which certain entities of a refiner may be considered to be resellers shall not apply to any entity of a refiner which operates in Puerto Rico and which is owned or controlled by a refiner that is subject to the price regulations of Subpart E of Part 212 of the Federal Energy Office.

This action is being taken to insure that the Puerto Rican subsidiaries of refiners will be subject to the price regulations applicable to refiners until a determination is made as to whether such treatment is appropriate. The question of whether certain Puerto Rican subsidiaries of refiners should be considered as refiners, as resellers, or should be subject to some other form of price regulation, involves difficult questions which can best be resolved in a public rulemaking proceeding. A notice of proposed rulemaking and public hearing is therefore also being issued today, and it is intended to elicit information upon which a final decision with respect to this issue will be made.

Because the purpose of these amendments is to provide immediate guidance and information with respect to the mandatory petroleum price regulations and to preserve the present price structure in Puerto Rico pending resolution of the rulemaking proceeding referred to above, the Federal Energy Office finds that normal rulemaking procedure is impracticable and that good cause exists for making these amendments effective in less than 30 days.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, E.O. 11748, 38 FR 33575; Economic Stabilization Act of 1970, as amended, Pub. L. 92-210, 85 Stat. 743; Pub. L. 93-28, 87 Stat. 27; E.O. 11730, 38 FR 19345; Cost of Living Council Order No. 47, 39 FR 24)

In consideration of the foregoing, Part 212 of Chapter II, Title 10 of the Code of Federal Regulations is amended as set forth below effective immediately.

Issued in Washington, D.C., March 18, 1974.

WILLIAM N. WALKER,
General Counsel,
Federal Energy Office.

1. Section 212.91 is amended to read as follows:

§ 212.91 Applicability.

This subpart applies to each sale of a covered product (other than the first sale of crude petroleum) by resellers, reseller-retailers, and retailers, and to each sale of crude petroleum (other than the first sale) by a refiner. For purposes of this subpart, "reseller" includes any entity of a refiner (other than an entity which operates in Puerto Rico) which is engaged in the business of purchasing and reselling covered products, provided that the entity does not purchase more than 5 percent of such covered products from the refiner including any entities which it directly or indirectly controls and provided further that the entity has historically and consistently exercised the exclusive price authority with respect to sales by the entity.

[FR Doc.74-6633 Filed 3-19-74;11:32 am]

[APPENDIX; RULINGS]
[RULING 1974-7]

TRUCK STOP LEASES

FACTS. Firm A is the lessee operator of a truck stop facility which provides retail fuel sales of gasoline and diesel fuel, restaurant services, vehicle repair facilities and other sales and service activities. Firm A leased the real property used for its truck stop facility under a single lease which, under the terms prevailing on May 15, 1973, provided for rental of the entire property, with the rent based on a percentage of total sales of fuel and a percentage of total sales of other products and services, subject to a certain minimum dollar amount.

Upon the expiration of this lease, after the implementation of the Cost of Living Council Phase IV rules for petroleum product prices which were subsequently uncorporated into the FEO regulations as Subpart G of 10 CFR Part 212, the lessor seeks to establish a new lease for the truck stop which (1) treats the fuel sales portion of the real property as a separate property, with a separate and higher rental than was formerly required; and (2) treats the non-fuel sales portion of the real property as a separate property, with a separate and higher rental than was formerly required.

ISSUE #1. May the lessor establish separate rents for different uses of real property which was under a single lease for several uses on May 15, 1973?

ISSUE #2. May the lessor increase the rent above that which prevailed on May 15, 1973, either for the fuel sales portion of the real property or for the non-fuel sales portion of the real property, pursuant to an escalation clause or termination clause in the lease agreement in effect on May 15, 1973, or otherwise?

RULING. No. A lessor of real property used in retailing gasoline may not now treat separately uses of real property that were formerly treated in a single lease agreement, nor may it raise the rent with respect to any use of such property beyond the rent charged pursuant to the contractual terms prevailing on May 15, 1973.

The real property covered by the single lease in effect on May 15, 1973, is regarded as the "real property used in retailing gasoline," as to which the lessor may not increase the rent under 10 CFR 212.103. The fact that the old lease provided separate formulas for the rent attributable to the particular uses of the real property does not provide a basis for the lessor to make separate leases for these uses or to increase the rent, either separately or together, for these uses. The separate rental terms for different uses of the real property are included among "the contractual terms prevailing on May 15, 1973" which, under 10 CFR 212.102 define the "base rent with respect to a lease of real property used in the retailing of gasoline" which a lessor may not increase, under 10 CFR 212.103.

Thus, a lessor which leased real property used in the retailing of gasoline—irrespective of other uses of the real property—may not exceed in any respect the rental for either the "fuel area" or the "non-fuel area", that was being charged on May 15, 1973, pursuant to the contractual terms prevailing on May 15, 1973.

WILLIAM N. WALKER,
General Counsel,
Federal Energy Office.

MARCH 16, 1974.

V 39 55 MAR 20 74 XUM

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

United States Customs Service

[19 CFR Part 19]

SMELTING AND REFINING WAREHOUSES

Filing of a Monthly Statement by the Principal of Two or More Bonded Warehouses Under the Same Blanket Bond

Notice is hereby given that under the authority of R.S. 251, as amended (19 U.S.C. 66), and sections 312, 624, 46 Stat. 692, as amended, 759 (19 U.S.C. 1312, 1624), it is proposed to amend § 19.17(g) of the Customs regulations to require that, where two or more bonded smelting and refining warehouses are included under one blanket smelting and refining bond, the principal shall set forth the bonded charges for each plant in an overall monthly statement filed with Customs.

Section 19.17(g) currently provides that where two or more smelting and refining warehouses are included under one blanket smelting and refining bond, the principal of these warehouses shall file with Customs an overall monthly statement showing, as of the close of the preceding month, the inventory of all metals on hand at each plant covered by the blanket bond and the total of bonded charges for all plants. Each Customs district is responsible for ascertaining the accuracy of the inventory report with regard to the amounts held at smelting and refining plants within the district. However, because companies report only the total sum of bonded charges, the individual district offices are unable to determine whether all bonded charges in their districts have been included in the total. To enable the district offices to determine whether all bonded charges in their district have been included in the monthly statement, the proposed amendment requires that the monthly statement submitted by the principal of two or more bonded smelting and refining warehouses show the bonded charges for each plant covered under its blanket bond.

Accordingly, it is proposed to revise paragraph (g) of § 19.17 of the Customs regulations to read as follows:

§ 19.17 Application to establish warehouse; bond.

• • • • •

(g) Where two or more smelting and refining warehouses are included under one blanket smelting and refining bond, an overall statement shall be filed by the principal of the warehouses with Headquarters, United States Customs Service, and with each district director involved, by the 28th of each month, showing as of the close of the preceding month the inventory of all metals on hand at each plant covered by the blanket bond, and the bond charges at each of the plants. Each district director in whose district one or more plants are located shall be responsible for verifying the accuracy of the inventory report insofar as the amounts held at plants under his jurisdiction are concerned. All discrepancies which cannot be reconciled by the district director shall be reported immediately to Headquarters, United States Customs Service. If Headquarters finds that the aggregate quantity of dutiable metal at the several plants does not equal the quantity charged against the blanket bond, duties shall be collected for the quantity determined to be deficient.

Prior to the adoption of the proposed amendment, consideration will be given to any relevant data, views, or arguments which are submitted in writing to the Commissioner of Customs, Attention: Regulations Division, Washington, D.C. 20229. To insure consideration of such communications, they must be received on or before April 19, 1974.

Written material or suggestions submitted will be available for public inspection in accordance with § 103.8(b) of the Customs regulations (19 CFR 103.8(b)) at the Regulations Division, United States Customs Service, Washington, D.C., during regular business hours.

[SEAL] VERNON D. ACREE,
Commissioner of Customs.

Approved: March 12, 1974.

JAMES B. CLAWSON,
Acting Assistant Secretary of the Treasury.

[FR Doc.74-6431 Filed 3-19-74;8:45 am]

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

[8 CFR Part 242]

SPECIAL INQUIRY OFFICERS

Authority to Determine Deportability

Pursuant to section 553 of title 5 of the United States Code (80 Stat. 383), notice is hereby given of the proposed amendment of § 242.8(a) pertaining to the authority of special inquiry officers.

Although it has been the Service view that in deportation proceedings conducted under the present regulations special inquiry officers have authority, as an incident of determining deportability to dispose of any contentions invoking Articles 32 and 33 of the Convention Relating to the Status of Refugees, litigants have questioned that interpretation of the regulations. In order to remove such doubts and to end unnecessary litigation, the amendment is being proposed so that such authority will be expressly stated. The proposed amendment is not intended as a concession that in any particular situation Article 32 or 33 enlarges or adds to the rights of an alien under the immigration laws of the United States.

In accordance with section 553 of Title 5 of the United States Code (80 Stat. 383), interested persons may submit to the Commissioner of Immigration and Naturalization, Room 7100-C, 425 Eye Street NW., Washington, D.C. 20536, written data, views, or arguments, in duplicate, with respect to the proposed rule. Such representations may not be presented orally in any manner. All relevant material received by April 19, 1974, will be considered.

PART 242—PROCEEDINGS TO DETERMINE DEPORTABILITY OF ALIENS IN THE UNITED STATES: APPREHENSION, CUSTODY, HEARING, AND APPEAL

In § 242.8(a), the first sentence is amended to read as follows:

§ 242.8 Special inquiry officers.

(a) *Authority.* In any proceeding conducted under this part the special inquiry officer shall have the authority to determine deportability and to make decisions, including orders of deportation as provided by section 242(b) of the Act; to consider claims for relief from deportation under Articles 32 and 33 of the Convention Relating to the Status of Refugees, as amended by the Protocol Relating to the Status of Refugees; to reinstate orders of deportation as provided by section 242(f) of the Act; to determine applications under sections 244, 245, and 249 of the Act; to determine the country to which an alien's deportation will be directed in accordance with section 243(a) of the Act; to order temporary withholding of deportation pursuant to section 243(h) of the Act, and to take any other action consistent with applicable provisions of law and regulation as may be appropriate to the disposition of the case. • • •

(Sec. 103, 66 Stat. 173; 8 U.S.C. 1103)

Dated: March 14, 1974.

L. F. CHAPMAN, Jr.,
Commissioner of Immigration and Naturalization.

Operation and Maintenance Charges

Correction

In FR Doc. 74-4556 appearing on page 7583 of the issue for Wednesday, February 27, 1974, immediately following the 22d line of the first paragraph, which reads "the LeClair-Riverton Irrigation District", insert "assessment charges for Indian land for".

Bureau of Land Management

[43 CFR Part 3500]

LEASING OF MINERALS OTHER THAN OIL AND GAS; GENERAL

Use of Identification Numbers

The purpose of this proposed amendment is to require applicants for a lease under 43 CFR 3500 to supply an identification number. Holders of existing leases would be required to supply such number upon written request.

The proposed amendment would simplify procedures and reduce administrative costs in computing acreages held by individuals or companies, in compliance with limitations on holdings provided by law. (30 U.S.C. 181 et seq. and 30 U.S.C. 351–359.) The present system relies on the applicant's name as stated on the application or lease. Slight variations in names or different addresses result in separate computer reports. Substantial effort is then required to manually compute aggregate acreages. The proposed system would result in one complete computer report.

In accordance with the Department's policy on public participation in rulemaking (36 FR 8336) interested parties may submit written comments, suggestions, or objections with respect to the proposed rules to the Director (210), Bureau of Land Management, Washington, D.C. 20240 until April 19, 1974.

Copies of comments, suggestions, or objections made pursuant to this notice will be available for public inspection in the Office of Public Affairs, Bureau of Land Management, Room 5643, Interior Building, Washington, D.C., during regular business hours (7:45 a.m.–4:15 p.m.).

It is hereby determined that the publication of this proposed rulemaking is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

In 43 CFR Chapter II, Part 3500 is amended by adding § 3502.7a.

§ 3502.7a Identification number.

Each applicant for lease or permit or each successful bidder in a competitive lease sale must submit an identification number with his application or bid. For an individual this number shall be his Social Security number. For a corporation, partnership, or association, the number shall be its Internal Revenue Service Employer identification number. Subsidiaries shall file both their own IRS number and that of their parent corporation. Lessees and permittees of all previously issued leases or permits shall submit their identification numbers within 30 days of receipt of a request from the appropriate Bureau office.

JACK O. HORTON,
Assistant Secretary of the Interior.

MARCH 14, 1974.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 932]

[Docket No. AO-352-A2]

HANDLING OLIVES GROWN IN CALIFORNIA

Cancellation of Hearing and Termination of Proceeding

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the rules of practice and procedure, as amended, governing proceedings to fromulate marketing agreements and orders (7 CFR Part 900), a notice setting forth certain proposals, and a location, date, and time for a public hearing thereon was published in the FEDERAL REGISTER (36 FR 3199), with respect to proposed further amendment of the marketing agreement, as amended, and Order No. 932, as amended (7 CFR Part 932), regulating the handling of olives grown in California. The proposals were submitted by the Olive Administrative Committee, the administrative agency established pursuant to the marketing agreement and order.

During the course of said hearing, Consolidated Olive Growers, Inc. (a cooperative now trading as Lindsay Olive Growers) introduced a modification of material issue 8 (relative to amending § 932.52 *Outgoing regulations*) which modification would have broadened the scope of the original proposal on that issue. Supporting and opposing testimony was received on the proposed modification and numerous briefs were filed.

On July 21, 1971, the Deputy Administrator, Regulatory Programs, issued a recommended decision (36 FR 13839) which included the aforesaid modification. Subsequently, the Olive Administrative Committee, on the basis of a majority vote within the committee, filed an exception to the proposed modification which had been included in the recommended decision. Recommendation of the proposed modification was withdrawn by the final (Secretary's) decision of September 3, 1971 (36 FR 18093). Said decision also ordered that the olive industry be provided with further opportunity to present evidence on material issue 8 and set December 8, 1971, as the tentative date for reopening the hearing.

Prior to the scheduled date for reopening the hearing, Consolidated Olive Growers, Inc., forwarded to the Department a request for indefinite postponement of the hearing pending resolution of differences among principals in the industry and development of support of its proposal. On December 2, 1971, the Deputy Administrator, Regulatory Programs, issued a Notice of Postponement of Hearing With Respect to Proposed Further Amendment of the Marketing Agreement and Order (36 FR 23222).

The economic situation, particularly as it relates to the olive industry, has changed greatly since 1971 and the matter is no longer being pursued actively by Lindsay Olive Growers. Accordingly, the firm, on February 11, 1974, forwarded to this Department a request for termination of the proceeding.

In view of the foregoing it is concluded that no useful purpose would be served by further indefinite postponement of a reopened hearing. Therefore, the notice of a reopened hearing with respect to material issue 8 (36 FR 18093), including the postponement thereof (36 FR 23222), is hereby withdrawn and the proceeding terminated.

Done at Washington, D.C., this 14th day of March 1974.

JOHN C. BLUM,
Deputy Administrator Regulatory Programs.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Part 253]

AID TO FISHERIES

Commercial Fisheries Research and Development

Notice is hereby given that it is proposed to revise Part 253, Subchapter F, Chapter II of Title 50 of the Code of Federal Regulations. This revision is pursuant to section 8 of the Commercial Fisheries Research and Development Act of 1964, as amended (16 U.S.C. 779–779f).

Part 253 sets forth procedures to be used by the Secretary in providing financial assistance to State agencies for research and development of the commercial fisheries resources of the Nation. The proposed revision, among other things, would permit a State to voluntarily release funds available to it under subsection 5(a) of the Act so that such funds may be made available to any other State. Section 253.4(a) is revised as follows:

§ 253.4 Use of funds.

(a) *Apportionment of subsection 4(a) funds.* (1) On July 1 of each year, or as soon thereafter as practicable, the Secretary shall notify the respective States of the amount of funds authorized under subsection 4(a) of the Act and apportioned to each State under subsection 5(a) of the Act. Funds apportioned to a State in any fiscal year shall remain

V 39 I 55 MAR 20 74 XUM

available to it for obligation until the end of the succeeding fiscal year.

(2) Any State which is unable to use any or all of the funds apportioned to it may voluntarily release all or any part of such apportioned funds. Such release must be in writing and signed by the State official in charge of the agency designated under Section 253.3(a) of these regulations or some other appropriate State official. Any apportioned funds released by a State may be made available by the Secretary to any other State, to supplement the funds apportioned to such other State in the fiscal year in which the released funds were apportioned, when the Secretary determines that such State is able to make prompt and effective use of such funds to carry out the purposes of the Act: *Provided, however,* That in the fiscal year in which such released funds were apportioned, no State may have available to it funds in excess of 6 percent of the total funds apportioned in that fiscal year. The voluntary release of apportioned funds by a State shall not affect the apportionment of funds to that State or any other State in succeeding fiscal years.

Interested persons may submit written comments, suggestions, or objections concerning this proposed revision to the Director, National Marine Fisheries Service, Washington, D.C. 20235, until the close of business on April 8, 1974.

Issued at Washington, D.C. and dated March 15, 1974.

ROBERT W. SCHONING,
Director, National Marine Fisheries Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 74-SW-9]

CONTROL ZONE

Proposed Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation regulations to alter the Big Spring, Tex., control zone.

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. All communications received on or before April 19, 1974, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested persons at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, Fort Worth, Texas. An informal docket will also be available for examination at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

It is proposed to amend Part 71 of the Federal Aviation regulations as hereinafter set forth.

In § 71.171 (39 FR 354), the Big Spring, Tex., control zone is amended to read:

BIG SPRING, TEX.

That air space within a 5-mile radius of Webb AFB, Big Spring, Tex. (latitude 32°12'51" N., longitude 101°31'24" W.); within a 5-mile radius of Howard County Airport, Big Spring, Tex. (latitude 32°18'05" N., longitude 101°26'20" W.); within 2 miles each side of the Big Spring VORTAC 190° T (180° M) radial extending from the Webb AFB 5-mile radius zone to 1 mile S of the VORTAC; within 2 miles each side of the Big Spring VORTAC 151° T (141° M) radial extending from the Howard County Airport 5-mile radius zone to the VORTAC; within 3 miles each side of the Webb VORTAC 007° T (357° M) radial extending from the Webb AFB 5-mile radius zone to 8 miles N of the VORTAC; and within 3 miles each side of the Webb VORTAC 177° T (167° M) radial extending from the Webb AFB 5-mile radius zone to 8 miles S of the VORTAC. This control zone will be effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airman's Information Manual.

Alteration of the Big Spring control zone is necessary due to relocation of the Webb. Tex., VORTAC and the adjustments to the instrument approach procedures predicated thereon. Alteration of the control zone will provide the necessary controlled airspace to contain the instrument approach procedures.

This amendment is proposed under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Fort Worth, TX., on March 11, 1974.

ALBERT H. THURBURN,
Acting Director, Southwest Region.

[FR Doc.74-6319 Filed 3-19-74;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 74-SO-27]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation regulations that would alter the Cherry Point, N.C., transition area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before April 19, 1974 will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 645, 3400 Whipple Street, East Point, Ga.

The Cherry Point transition area described in § 71.181 (39 FR 440) would be amended as follows: "* * * longitude 76°53'00" W.); * * *" would be deleted and "* * * longitude 76°53'00" W.); within a 6-mile radius of Beaufort-Morehead City Airport, Beaufort, N.C. (latitude 34°44'00" N., longitude 76°39'45" W.); within 3 miles each side of the 132° bearing from Marine Cherry Point RBN, extending from the 6-mile radius area to the 8.5-mile radius area * * *" would be substituted therefor.

The proposed alteration is required to provide controlled airspace protection for IFR operations at Beaufort-Morehead City Airport. A prescribed instrument approach procedure to this airport, utilizing the Marine Cherry Point Nondirectional Radio Beacon, is proposed in conjunction with the alteration of this transition area.

This amendment is proposed under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on March 12, 1974.

PHILLIP M. SWATEK,
Director, Southern Region.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

NORTH CAROLINA STATE IMPLEMENTATION PLAN

Proposed Compliance Schedules

Section 110 of the Clean Air Act, as amended, and the implementing regulations of 40 CFR Part 51 require each State to submit a plan which provides for the attainment and maintenance of the national ambient air quality standards throughout the State. On May 31, 1972 (37 FR 10842), pursuant to section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved portions of North Carolina's State Implementation Plan.

On November 2, 1973, pursuant to 40 CFR 51.15 and 51.6, the State of North Carolina submitted for the Environmental Protection Agency's approval additional compliance schedules. This publication proposes that certain of the compliance schedules be approved. Each proposed compliance schedule establishes a date by which an individual air pollution source must attain compliance with an emission limitation of the State implementation plan. This date is indicated in the succeeding tables under the heading "Final Compliance Date." In many cases the schedule includes incremental steps toward compliance, with interim dates for achieving those steps. While the tables below do not list these interim dates, the actual compliance schedules do.

The schedules in table (a) of this notice are additions to the table published in the FEDERAL REGISTER of June 20, 1973, (38 FR 16144) as satisfying the compliance schedule requirements for State implementation plans. This list of June 20 is also amended in this publication by the deletion of certain schedules for which the final compliance date has been extended. This group of schedules is here presented in a new table (b) as satisfying the requirements for revisions in State implementation plans. In no case does the extension exceed one year beyond the previous final compliance date, and in most cases the extension is in the range of three to six months.

All of the compliance schedules listed here are available for public inspection at the following locations:

Air Programs Office
Environmental Protection Agency
Region IV
1421 Peachtree Street NE.
Atlanta, Georgia 30309

State of North Carolina
Office of Water and Air Resources
226 West Jones Street
Raleigh, North Carolina 27611

Each compliance schedule has been adopted by the Water and Air Quality Control Committee of the Board of Water and Air Resources and submitted to EPA after notice and public hearing in accordance with the procedural requirements of 40 CFR Part 51. Each also satisfies the substantive requirements of 40 CFR Part 51 pertaining to compliance schedules, and has been determined to be consistent with the approved control strategies for the State of North Carolina.

All interested parties are encouraged to submit written comments on the proposed compliance schedules. These comments will be weighed carefully by EPA before the agency decides to approve or disapprove these changes in the North Carolina plan. Comments will be accepted through April 19, 1974. These should be addressed to the Director, Air and Water Programs Division, Environmental Protection Agency, Region IV, 1421 Peachtree Street NE., Atlanta, Georgia 30309, Attention: Mr. Thomas A. Strickland.

(42 U.S.C. 1857c-5)

Dated: March 11, 1974.

RUSSELL E. TRAIN,
Administrator.

It is proposed to amend Part 52 of 40 CFR Chapter I as follows:

1. Section 52.1774 is amended by adding new lines in correct alphabetical sequence to the table in paragraph (a) and by deleting from this table certain lines which, in revised form, constitute a new paragraph (b), as follows:

§ 52.1774 Compliance schedules.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 2, 83]

[Docket No. 19946]

SHIP STATIONS

Proposal Relating to Frequencies; Correction

In the matter of amendment of Parts 2 and 83—to make available the frequency 157.1 MHz for use by non-Government ship stations; to require that 157.1 MHz be fitted in VHF equipment first installed in ship stations after July 1, 1974; and to designate 156.3 MHz for search and rescue communications.

The notice of proposed rule making, FCC 74-193, in the above matter, released March 6, 1974, and published in the FEDERAL REGISTER on March 11, 1974 (39 FR 9462), is corrected as follows: Paragraph 3 is deleted in its entirety and the following paragraph 3 is substituted.

3. Under this proposal, the VHF ship station licensee would be required (see § 83.106) to fit the frequencies 156.8, 156.3 and 157.1 MHz, one or more working frequencies, and all other frequencies necessary for the service of that vessel. While we are not proposing that 157.1 MHz be installed aboard vessels which are currently fitted with VHF; we anticipate that many will install 157.1 MHz for convenience in communications with the United States Coast Guard. The frequency 157.1 MHz will be limited in usage to communications with U.S. Coast Guard coast stations or intership with U.S. Coast Guard ship stations. Further, use of 157.1 MHz by vessels to communicate with the Coast Guard is expected to substantially reduce the number of such communications now being made on 156.8 MHz. While reduction of the loading on 156.8 MHz is highly desirable, we would stress that the Commission is not proposing or amending its rules to permit a ship station to shift its receiver watch from 156.8 MHz to 157.1 MHz. When a Coast Guard station, either ship or coast station, desires to contact a non-Government ship station, the Coast Guard will normally originate the call on 156.8 MHz; similarly, a non-Government ship station will originate calls to a Coast Guard station on 156.8 MHz.

Released: March 13, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

[FR Doc.74-6395 Filed 3-19-74;8:45 am]

FEDERAL TRADE COMMISSION

[16 CFR Part 303]

[Docket No. 206-14]

FIBER PRODUCTS IDENTIFICATION

Special Types of Products

Notice of proposed amendment of § 303.10, *Fiber content of special types of products*, to Cover Certain Graft Copolymer Man-made Fibers (Toyobo Co., Ltd., Applicant).

On February 2, 1971, Toyobo Co., Ltd., a corporation of Japan with principal offices at 8 Dojima Hamadori, 2 Chome, Kita-Ku, Osaka, Japan, filed an application pursuant to § 303.8 (16 CFR 303.8) of the rules and regulations under the Textile Fiber Products Identification Act, 72 Stat. 1717, et seq., 79 Stat. 124, 15 U.S.C. 70, et seq. (hereinafter referred to as "Act"), requesting that 16 CFR 303.7, setting forth generic names and definitions of manufactured textile fibers, be amended by adding thereto a new generic name and definition to cover its fiber called "Chinon" or "K-6." According to the application the fiber is comprised of about 30 percent by weight of casein which has been chemically modified by the grafting thereon of vinyl monomers, including acrylonitrile. The new generic definition proposed by applicant is as follows:

A manufactured fiber in which the fiber-forming substance is a graft copolymer of protein and vinyl monomers, the protein comprising 25 to 60 percent by weight of the fiber and the vinyl monomers comprising 40 to 75 percent by weight, at least one half the vinyl monomers by weight comprising acrylonitrile.

By letter of April 5, 1971, the Commission assigned to applicant's fiber the temporary designation "TO-0001," in accordance with § 303.8 (16 CFR 303.8) of the Commission's rules and regulations under the Act.

On February 25, 1972, a notice of proposed rule making was issued by the Commission in this proceeding and subsequently published in the FEDERAL REGISTER at 37 FR 4725. Such notice announced that the Commission was considering matters raised by the application and that interested parties could participate by submitting their views, arguments, or other pertinent data, in writing, to the Commission.

Applicant has provided the following description of its fiber.

• • • [T]he new fiber is prepared as described in • • • U.S. Patent 3,104,154 [Sept. 17, 1963] • • • issued to Toyo Spinning Co., Ltd., applicant's previous name. The process for making the fiber involves dissolving in zinc chloride solution casein, a naturally occurring protein found in milk, and vinyl monomers which are predominantly acrylonitrile. The vinyl monomers are then polymerized in the solution to form a graft copolymer i.e. chains of the vinyl polymer project from protein molecules and together constitute a single polymeric mass which is in solution and which is extruded to form filaments.

The resulting filaments are a chemical hybrid, i.e. they are neither protein nor acrylic fiber. Thus, the product is not a mixture of the two materials and it is not possible to isolate or even to regenerate by chemical means the protein portion and the vinyl or acrylonitrile monomer portion, i.e. the chemical reaction involved is irreversible.

In the final fiber about 25-60 percent by weight comes from the initial protein, and about 40-75 percent from vinyl monomer units of which at least one-half by weight are acrylonitrile units.

The only party (other than applicant) who made submittals in this proceeding as E. I. du Pont de Nemours & Co., Inc. Du Pont recommended that paragraph (g) of § 303.7, the azlon definition, be amended to include applicant's fiber and that paragraph (b) thereof, the modacrylic definition, be amended to exclude the fiber.

After a thorough study of this matter, it has been tentatively determined by the Commission that TO-0001 should, for purposes of the Act and regulations thereunder, be designated in terms of what it is, i.e., a graft copolymer of azlon and acrylic (or azlon and modacrylic, if the acrylonitrile monomers of the vinyl component are less than 85 percent, but more than 35 percent by weight of such component), rather than by a new generic name. Therefore, the Commission proposes that a new paragraph, paragraph (d), be added to § 303.10 [16 CFR 303.10] so as generally to extend the coverage of this section to fibers composed of graft copolymers. The proposed new paragraph reads as follows:

§ 303.10 Fiber content of special types of products.

• • • • • •

(d) (1) Where a manufactured textile fiber is essentially a graft copolymer, the components of which, if appearing as separate fibers, would each fall within different existing definitions of textile fibers as set forth in § 303.7, the fiber content disclosure as to such fiber shall, for all purposes under these rules and the Act, (i) disclose that it is a graft copolymer fiber, (ii) set out the components contained in the fiber by appropriate generic names specified in § 303.7 in order of their predominance by weight, and (iii) set out the respective percentages of such components by weight.

(2) Examples of proper fiber content designations under this paragraph are:

100% Graft Fiber
(70% Acrylic, 30% Azlon)

80% Graft Fiber (70% Acrylic, 30% Azlon)
15% Polyester
5% Rayon

Interested parties may participate in this proceeding by submitting in writing on or before May 20, 1974, their views, arguments, or other pertinent data to the Division of Special Statutes, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580.

This action is taken pursuant to section 7(c) of the Act, 72 Stat. 1721, 15 U.S.C. 70e(c), in accordance with 5 U.S.C. 553 and Subpart B of Part 1 of the Commission's procedures and rules of practice, 16 CFR 1.11, et seq.

By direction of the Commission, dated March 12, 1974.

[SEAL] CHARLES A. TOBIN,
Secretary.

[FR Doc.74-6313 Filed 3-19-74;8:45 am]

POSTAL SERVICE

[39 CFR Part 777]

Relocation Assistance Procedures

In order to facilitate and promote compliance on a voluntary basis with the requirements of Titles I and II of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Public Law 91-646, 84 Stat. 1894; 42 U.S.C. 4601-38 (1970)), the Postal Service has proposed regulations to be used by all elements of the Service in providing relocation assistance for persons displaced as a result of Postal Service facility programs.

Interested persons are invited to submit such written comments and suggestions concerning the proposed regulations as they may desire. Communications should identify the subject matter by the above title and should be submitted on or before May 15, 1974, in duplicate to Director, Office of Real Estate, Real Estate and Buildings Department, Room 7575, 475 L'Enfant Plaza West, S.W., Washington, D.C. 20260. The proposals contained in this notice may be changed in light of the comments received.

Following are the specific regulations proposed by the Postal Service. It is planned to codify the regulations under a new Part 777 in Subchapter K of Title 39, Code of Federal Regulations, when they are adopted.

ROGER P. CRAIG,
Deputy General Counsel.

Accordingly, it is proposed to amend the regulations of the Postal Service as follows: In 39 CFR, Part 777 is added to Subchapter K, Special Regulations and reads as follows:

PART 777—RELOCATION ASSISTANCE PROCEDURES

Sec.
777.1 Purpose and policy.
777.2 General procedures.
777.3 Information on relocation assistance
777.4 Definitions.
777.5 Project development.
777.6 Moving and related expenses.
777.7 Replacement housing payments for owner-occupants.
777.8 Replacement housing payments for non-eligible owner-occupants.
777.9 Replacement housing payments for tenants and certain others.
777.10 Relocation assistance advisory services.
777.11 Appeals.

AUTHORITY: 39 U.S.C. 401.

§ 777.1 Purpose and policy.

(a) The purpose of these regulations is to establish policy guidance for implementation of titles I and II of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Public Law 91-646; 84 Stat. 1894; 42 U.S.C. 4601-38 (1970)), hereinafter referred to as the Act, to assure prompt and equitable relocation assistance for persons displaced as a result of United States Postal Service facility programs. Regulations pertaining to Title III of the Act which relate to uniform real property acquisition policies are set forth in section 18, Postal Contracting Manual, Publication 41. All references herein to sections or subsections are references to sections to subsections of this regulation, unless otherwise noted.

(b) To the extent that the Act is a Federal law "dealing with public or Federal contracts, property, works • • • budgets or funds" within the meaning of 39 U.S.C. 410(a), it and any Executive Orders or other regulations based upon it are inapplicable to the exercise of the powers of the Postal Service. However, it is the policy of the Postal Service to comply voluntarily with the Act, orders and regulations to the extent practical and feasible, consistent with the public interest and fulfillment of the primary mission of the Postal Service.

(c) The rules, policies, and procedures contained herein are intended to establish means to provide relocation services and payments for replacement housing and moving and incidental expenses in order that individuals do not suffer disproportionate injuries as a result of programs designed for the benefit of the public as a whole.

(d) The regulations embodied in this part, adopted in furtherance of the policy of voluntary compliance, shall not be deemed to be a consent to suit by a party outside the Postal Service and are not enforceable against the Postal Service by such a party. No party outside the Postal Service is authorized to use noncompliance with these regulations against the Postal Service in any manner.

§ 777.2 General procedures.

Procedures, policies and forms prescribed in Section 18 of the Postal Contracting Manual relating to the acquisition of real property and interests therein will be followed, except as they are modified by this regulation.

(a) A written notice of displacement must be given to each individual, family, business, or farm operation to be displaced. Such notice shall be served personally or by registered mail at the earliest possible time.

(b) In order to qualify for benefits under Title II of the Act, as a displaced person, either of two conditions must be fulfilled:

(1) The person must have moved (or moved his personal property) as a result of the receipt of a written notice to vacate which notice may have been given before or after initiation of negotiations for acquisition of the property as prescribed by regulations. (When negotiations are initiated prior to issuance of a written notice, all persons contacted should be advised that the benefits of the Act are available only when the person moves subsequent to receipt of a written notice); or

(2) The subject real property must, in fact, have been acquired, and the person must have moved as a result of its acquisition (except in those instances covered by sections 217 and 219 of the Act). A move made after acceptance of an offer to sell (contract of purchase) but before closing is a move made as the result of acquisition of subject property.

(c) In addition, certain of the benefits provided by Title II of the Act are available as follows:

(1) Whenever the acquisition of, or notice to move from, real property used for a business or farm operation causes any person to move from the other real property used for his dwelling, or to move his personal property from such other real property, such person may receive the benefits provided by sections 202(a) and (b) and 205 of the Act.

(2) If it is determined that any person occupying property immediately adjacent to the real property acquired is caused substantial economic injury because of the acquisition, such person may receive advisory services under section 205(c) of the Act.

(d) Contracts or options to purchase real property shall not incorporate provisions for making payments for relocation costs and related costs in Title II of the Act. Appraisers shall not give consideration to, nor include in their real property appraisals, any allowances for the benefits provided by Title II. In the event of condemnation the estimated compensation shall be determined solely

V 39 55 MAR 20 74 XUM

on the basis of the appraised value of the real property with no consideration being given to or reference contained therein to the payments to be made under Title II of the Act. Insofar as practicable, a person negotiating for the acquisition of real property will not negotiate the relocation benefits to which a displaced person may be entitled.

(e) Applications for benefits under the Act must be made within 18 months from the date on which the displaced person moves from the real property acquired or to be acquired. The Contracting Officer may extend this period upon a proper showing of good cause.

(f) A displaced person who makes proper application will be paid promptly after a move and, in hardship cases, as determined by the Contracting Officer, an advance of funds may be authorized. Final settlement will be adjusted accordingly.

(g) The provisions of the Act apply to the acquisition of all real property for, and the relocation of, all persons displaced by Postal Service projects.

(h) Relocation benefits under title II of the Act available in leasehold cases depend upon the circumstances under which the leasing action takes place. In cases where the Postal Service initiates action to lease a specific property, all pertinent provision of title II of the Act apply to both owners and tenants. In cases where the owner voluntarily offers his property for lease to the Postal Service or in response to any open advertisement by the Postal Service, any tenants who are displaced are entitled to benefits under title II of the Act. The owner in such a case is not entitled to title II benefits.

(i) The Director, Office of Real Estate, shall provide for the periodic review of all programs for which he is responsible to insure compliance with the provisions of titles II and III of the Act.

§ 777.3 Information on relocation assistance.

The Contracting Officer shall insure that the public receives adequate knowledge of programs involving relocations and that persons to be displaced be fully informed, at the earliest possible time, of such matters as the relocation payments and assistance available; the specific plans and procedures for assuring that suitable replacement housing will be available for homeowners and tenants, in advance of displacement; the eligibility requirements and procedures for obtaining such payments and assistance; and the right of administrative review of appeal in accordance with § 777.11.

§ 777.4 Definitions.

For the purposes of these instructions the following items are defined:

(a) "The Act" means the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, P.L. 91-646.

(b) The term "Contracting Officer" means the Postal Service official authorized to acquire real property in question and to administer the associated relocation program. Such term includes a duly appointed successor or authorized representative.

(c) The term "person" means any individual, partnership, corporation, or association.

(d) The term "displaced person" means any person or family who, on or after January 2, 1971, moves from real property or moves his personal property from real property as a result of:

(1) Postal Service acquisition of such property in whole or in part; or

(2) Receiving a written notice to vacate from the Postal Service.

(e) A "family" means two or more individuals who are related by blood, adoption, marriage, or legal guardianship who live together as a family unit. If the Contracting Officer considers that circumstances warrant, others who live together as a family unit may be treated as if they were a family for the purpose of determining benefits under Title II of the Act.

(f) The term "business" means any lawful activity, excepting a farm operation, conducted primarily—

(1) For the purchase, sale, lease or rental of personal or real property, or for the manufacture, processing, storage or marketing of products, commodities, or any other personal property;

(2) For the sale of services to the public;

(3) By a non-profit organization, or

(4) Solely for the purpose of § 777.6(e) of these regulations for assisting in the purchase, sale, resale, manufacture, processing, or marketing of products, commodities, personal property or services, by the erection and maintenance of an outdoor advertising display or displays, whether or not such display or displays are located on the premises on which any of the above activities are conducted.

(g) The term "farm operation" means any activity conducted solely or primarily for the production of one or more agriculture products or commodities, including timber, for sale or home use, and customarily producing such products or commodities in sufficient quantity to be capable of contributing materially to the operator's support.

(h) The term "mortgage" means such classes of liens as are commonly given to secure advances on, or the unpaid purchase price of real property, under the laws of the State in which the real property is located, together with the credit instruments, if any, secured thereby.

(i) The term "comparable replacement dwelling" means one which is:

(1) Decent, safe and sanitary.

(2) When compared to the dwelling being taken, functionally equivalent and substantially the same with respect to:

(i) Number of rooms,

(ii) Area of living space,

(iii) Age,

(iv) State of repairs.

(3) Open to all persons regardless of race, color, religion, sex, or national origin and consistent wth the requirements of the Civil Rights Act of 1964 and of title VIII of the Civil Rights Act of 1968.

(4) In areas not generally less desirable than the dwelling to be acquired in regard to:

(i) Public utilities,

(ii) Public and commercial facilities.

(5) Reasonably accessible to the displaced person's place of employment.

(6) Available on the market to the displaced person.

(7) Within the financial means of the displaced family or individual.

(j) The term "initiation of negotiation" for a property means the date of the first personal contact by the Postal Service representative with the owner or his representative where price was discussed.

(k) The term "decent, safe and sanitary" where applied to a dwelling means one which is in sound, clean and weathertight condition, and which meets applicable State and local building, plumbing, electrical, housing and occupancy codes and similar ordinances and regulations. Where the local codes do not contain minimum standards or where the standards are inadequate, the following criteria may be used by the Contracting Officer in determining if a dwelling unit is decent, safe and sanitary;

(1) A housekeeping unit must include a kitchen with fully usable sink; a stove, or connection for same; a separate complete bathroom; hot and cold running water in both the bath and kitchen; an adequate and safe wiring system for lighting and other electrical services; and heating as required by climatic conditions and local codes.

(2) A nonhousekeeping unit is one which meets local code standards for boarding houses or other congregate living. As a minimum it must include complete bathroom facilities with hot and cold running water which provides privacy, including a door that can be locked if such facilities are separate from the unit; an adequate and safe wiring system for lighting and other electrical services; and heating as required by climatic conditions and local codes.

(l) "Dwelling" means the place of permanent or customary and usual abode of a person or persons. It includes a single-family building, a one-family unit in a multi-family building; a unit of condominium, or cooperative housing project; a mobile home, or any other residential unit. Part-time and seasonal homes are not included.

(m) "Owner" means a person who holds fee title, a life estate, a 99-year lease, or an interest in a cooperative housing project which includes the right of occupancy of a dwelling unit, or is the contract purchaser of any such estates or interests, or who is possessed of such other proprietary interest in the property acquired as, in the judgment of the Contracting Officer, warrants consideration as ownership. In the case of one who has succeeded to any of the foregoing interests by devise, bequest, inheritance, or operation of law, the tenure of ownership, not occupancy, of the succeeding owner shall include the tenure of the preceding owner.

(n) Section 205(c)(3) of the Act requires that the replacement dwelling is within the financial means of the displaced individual or family. In making this determination, the average monthly rental or housing cost (e.g., monthly mortgage payments, insurance for the dwelling unit, property taxes, and other reasonable recurring related expenses) which the displaced person will be required to pay, in general, should not exceed 25 percent of the monthly gross income or the present ratio of housing payment to the income of the displaced family or individual, including supplemental payments made by public agencies.

(o) "Economic rent" is the amount of rent a displaced tenant would have had to pay for a comparable dwelling unit in an area similar to the neighborhood in which the dwelling unit to be acquired is located.

§ 777.5 Project development.

(a) *Availability.* The Postal Service will not proceed with a phase of any project, which phase will cause the displacement of any person, until it has been determined with a reasonable period of time prior to displacement that there will be available to the persons displaced comparable replacement dwellings. This determination or assurance shall be based on a current survey and analysis of available replacement housing.

(b) *Waiver.* The determination required by § 777.5(a) may be waived only in emergency or other extraordinary situations where immediate possession of real property is of crucial importance. The determination of emergency will be made by Headquarters, after receipt of appropriate findings and recommendation for the necessity of the waiver by the General Manager, Regional Real Estate Division.

§ 777.6 Moving and related expenses.

(a) *Moving expense.* Any displaced person, upon application, may receive payments for the actual reasonable expenses in moving himself, his family, business, farm operation or other personal property subject to the limitations in paragraph (a)(2) of this section and the exclusions in paragraph (c) of this section. A person who lives on his business or farm property may be eligible for both moving and related expenses as a dwelling occupant in addition to being eligible for payment with respect to displacement from a business or farm operation.

(1) The following moving expenses will be allowed:

(i) Transportation of individuals, families, and personal property from the acquired site, not to exceed a distance of 50 miles, except where the Contracting Officer determines that relocation beyond the 50-mile area is justified.

(ii) Packing, crating, and uncrating of personal property.

(iii) Advertising for packing, crating, uncrating and transportation when the Contracting Officer determines that it is necessary.

(iv) Storage of personal property for a period generally not to exceed twelve months when the Contracting Officer determines that storage is necessary in connection with relocation.

(v) Insurance premiums covering loss and damage of personal property while in storage or transit.

(vi) Removal, reinstallation and reestablishment, including such modification as deemed necessary by the Contracting Officer, of machinery, equipment, appliances and other items, not acquired as real property, including reconnection of utilities, and which were not acquired by the Postal Service. Prior to payment of any expenses for removal and reinstallation of such property, the displaced person shall be required to state in writing that the property is personalty and that the Postal Service is released from any payment for the property.

(vii) Property lost, stolen, or damaged, (not caused by the fault or negligence of the displaced person, his agents or employees) in the process of moving, where insurance to cover such loss or damage is not commercially available.

(viii) Such other reasonable expenses which in the opinion of the Contracting Officer were necessarily incurred by the displaced person.

(2) The following items are limitations on moving and related expenses:

(i) When the displaced person accomplishes the move himself, the amount of payment shall not exceed the estimated cost of moving commercially. The moving cost to the displaced person shall be supported by receipted bills or other proof of expenses incurred.

(ii) When an item of personal property which is used in connection with any business or farm operation is not moved but sold and promptly replaced with a comparable item, and the business or farm operation is re-established, reimbursement shall not exceed the replacement cost, minus the proceeds received from the sale, or the cost of moving the item, whichever is less.

(iii) When personal property which is used in connection with any business or farm operation to be moved is of low value and high bulk, and the cost of moving would be disproportionate in relation to value in the judgment of the Contracting Officer, the allowable reimbursement for the expense of moving the personal property shall not exceed the difference between the amount which would have been received for such item on liquidation and the cost of replacing the same with a comparable item available on the market. This provision will be applicable in the case of moving of junk yards, stockpiled sand, gravel, minerals, metals and similar types of personal property.

(b) *Actual direct losses by business or farm operation.* Any displaced person, upon application, may receive payments for actual direct losses of tangible personal property as a result of moving or discontinuing a business or farm operation, subject to the exclusions in paragraph (c) of this section and with a limitation to be determined by the Contracting Officer subject to the following criteria:

(1) When the displaced person does not move personal property, he shall be required to make a bona fide effort to sell it, and will be reimbursed for the reasonable sale costs incurred.

(2) When personal property is sold and the business or farm operation reestablished, the displaced person is entitled to the payment provided in paragraph (a)(2)(ii) of this section.

(3) When the business or farm operation is discontinued, the displaced person is entitled to the differences between the in place value of the personal property and the sale proceeds, or the estimated cost of moving 50 miles, whichever is less.

(4) When the personal property is abandoned, the displaced person is entitled to payment for the difference between the in place value and the amount which would have been received from the sale of the item, or the cost of moving 50 miles, whichever is less.

(c) *Exclusions from moving expenses and losses.* The following items shall not be included in determining moving expenses or losses of personal property:

(1) Additional expenses incurred because of living in a new location.

(2) Cost of moving structures, improvements or other real property in which the displaced person reserved ownership.

(3) Improvements to the replacement site, except when required by law.

(4) Interest on loans to cover moving expenses.

(5) Loss of goodwill.

(6) Loss of profits.

(7) Loss of trained employees.

(8) Personal injury.

(9) Cost of preparing the application for moving and related expenses.

(10) Cost of searching for a new dwelling.

(11) Such other items as the Contracting Officer determines should be excluded.

(d) *Expenses in searching for replacement business or farm.* Any displaced person, upon application, may receive payments for actual reasonable expenses in searching for replacement business or farm.

(1) *To be allowed.* (i) Actual travel costs.

(ii) Costs for meals and lodging away from home.

(iii) Time spent in searching at the rate of the displaced person's salary or earnings, but not to exceed $10 per hour.

(iv) Broker, realtor, or other professional fees to locate a replacement business or farm operation, when the Contracting Officer determines it is necessary and authorizes such fees in writing prior to their incurrence.

(2) *Limitation.* The total amount which a displaced person may be paid for searching expenses shall not exceed $500, unless the Contracting Officer determines

V 39 55 MAR 20 74 XUM

that a greater amount is justified based on the circumstances involved.

(e) *Payment in lieu of moving and related expenses*—(1) *Dwellings.* Any displaced person eligible for payments under paragraph (a) of this section may apply to receive a moving expense allowance not to exceed $300 and a dislocation allowance of $200 in lieu of the payments authorized by paragraph (a) of this section. Acceptance of such allowance shall constitute a waiver of the payments authorized by that section.

(i) The moving expense allowance will be based on the moving allowance schedule maintained by the State Highway Department of the State concerned. The General Manager, Real Estate Division, of each Region will maintain the current moving allowance schedules of the States within the region.

(ii) Where there are no State highway department schedules, the Contracting Officer may join with other Federal agencies, if any, causing displacement in the locale in the development of a single moving expense schedule for the use of all displacing agencies.

(iii) A displaced person who elects to receive a moving expense allowance based on a schedule shall be paid under the schedule used in the jurisdiction in which the displacement occurs, regardless of where he relocates.

(iv) Only one dislocation allowance will be paid per dwelling unit regardless of the number of persons or families in occupancy.

(2) *Business and farm operation.* Any displaced person eligible for payments under paragraph (a) of this section who is displaced from his place of business or from his farm operation may apply to receive a fixed payment in an amount equal to the average annual net earnings of the business or farm operation, except that payment shall not be less than $2,500 nor more than $10,000, in lieu of the payments authorized by paragraphs (a), (b), and (d) of this section and subject to the following conditions:

(i) A business, in order to qualify as displaced person for payment under this Section, must contribute at least ⅓ of the average annual total gross to the income of the displaced owner. This standard eliminates those part-time family occupations which do not contribute materially to a displaced person's income.

(ii) Loss of existing patronage. No fixed payment to a business can be made unless the Contracting Officer determines that the business cannot be relocated without a substantial loss of existing patronage, and that it is not a part of a commercial enterprise having at least one other establishment engaged in a similar business not being acquired. Such determination shall be made by the Contracting Officer only after consideration of all pertinent circumstances, including the following factors:

(A) The type of business conducted by the displaced concern.

(B) The nature of the clientele of the displaced concern.

(C) The relative importance of the present and proposed location to the displaced business and the availability of a suitable replacement location for the displaced business.

(iii) Average annual net earnings as used herein means one-half of any net earnings of the business or farm operation, before Federal, State and local income taxes, during the two taxable years immediately preceding the taxable year in which the displacement occurs or during such other period as the Contracting Officer determines to be more equitable for establishing such earnings and includes any compensation paid by the business or farm operation to the owner, his spouse, or his dependents during such period. Income derived from capital gains resulting from liquidation in anticipation of Postal Service acquisition should be excluded. Normal capital gains may be included as a part of earnings if the gain occurred as a normal incident to the business or farm operation. If a business or farm operation has no net earnings or has suffered losses during the period used in the computation, it may nevertheless receive the $2,500 minimum payment.

(iv) Where a non-profit organization is displaced, no payment shall be made until after Contracting Officer has determined:

(A) That the non-profit organization cannot be relocated without a substantial loss of its existing patronage. The term "existing patronage" as used here means the persons, community or clientele served or affected by the activities of the non-profit organization.

(B) That the non-profit organization is not part of a commercial enterprise having at least one other establishment not being acquired which is engaged in the same or similar activity. This restriction shall not apply to such organizations that customarily serve through multiple locations within a general area, for example churches.

(v) Farms—partial acquisition. In the case where an entire farm operation is not acquired, this payment shall be made only if the Contracting Officer determines that the farm met the definition of a farm operation prior to the acquisition and that the property remaining after the acquisition can no longer meet the definition of a farm operation.

§ 777.7 Replacement housing payments for owner-occupants.

(a) In addition to other payments authorized by these regulations an additional payment, not in excess of $15,000 shall be made, upon application, to any displaced person who is displaced from a dwelling actually owned and occupied by such displaced person for not less than one hundred and eighty days prior to the initiation of negotiations for the acquisition of the property. A displaced owner-occupant who is determined to be ineligible for payment under this Section may be eligible for a payment under § 777.8. The payment will include the following elements:

(1) The amount, if any, which represents the difference between the acquisition price of the acquired dwelling and the reasonable cost of a comparable replacement dwelling.

(2) The amount, if any, which will compensate the displaced owner-occupant for any increased interest costs in acquiring the comparable replacement dwelling.

(3) Actual costs reasonably incurred incident to the purchase of the replacement dwelling.

(b) The additional payment authorized shall be made only to such displaced person who purchases and occupies a replacement dwelling which is decent, safe, and sanitary not later than the end of (1) one year from the date he is given final payment of all costs for the acquired dwelling, or (2) on the date which he moves from the acquired dwelling, whichever is the later date.

(c) A displaced person may, in lieu of purchasing a comparable decent, safe and sanitary replacement dwelling, contract for the rehabilitation of an existing dwelling purchased by him, contract for the purchase of a dwelling to be constructed on a site provided by a builder or developer or contract for the construction of a dwelling on a site which he owns or acquires for that purpose. If the date of completion of rehabilitation of construction of a replacement dwelling is delayed, for reasons not within the reasonable control of the displaced person, beyond the time required for eligibility for payment, the Contracting Officer may determine the date of occupancy as the date the displaced person enters into a contract for such rehabilitation and construction, or for the purchase.

(d) *Computation of replacement housing payment.* The Contracting Officer may establish the amount necessary to purchase a comparable replacement dwelling by the use of a schedule or by a comparative method.

(1) Schedule method. The Contracting Officer may establish a schedule of reasonable acquisition cost for comparable replacement dwellings in the various types of dwellings required and available on the private market. The schedule will be based on a current analysis of the market sufficient to determine an amount for each type of dwelling required. When more than one Federal agency is causing the displacement in a community or an area, the Postal Service may cooperate with other agencies on the mehod for computing the replacement housing payment and may use the uniform schedules of housing in the community or areas developed by such cooperation.

(2) Comparative method. The Contracting Officer may determine the economic price of a comparable replacement dwelling by selecting a dwelling or dwellings most representative of the dwelling unit acquired, available to the displaced person and which meets the definition of comparable replacement dwelling. Asking prices are to be adjusted to reflect actual market sales experience. A single dwelling shall only be used when additional comparable dwellings are not available.

(3) When neither of the above methods is feasible, the Contracting Officer shall develop criteria for computing the payment.

(e) *Limitations.* The amount established as the differential payment for the replacement housing establishes the upper limit of this portion of the replacement housing payment.

(1) If the displaced person voluntarily purchases and occupies a decent, safe and sanitary dwelling at a price less than the reasonable acquisition cost of comparable replacements dwellings, the differential payment will be that amount required to pay the difference between the acquisition price of the acquired dwelling and the actual purchase price of the replacement dwelling.

(2) If the displaced person voluntarily purchases and occupies a decent, safe and sanitary dwelling at a price less than the acquisition price of the acquired dwelling, no differential housing payment will be made.

(3) If a displaced person voluntarily purchases and occupies a decent, safe and sanitary dwelling at a price greater than the reasonable acquisition cost of comparable replacement dwellings, the differential payment will be limited to the difference between the amount of a comparable replacement dwelling and the acquisition price of the acquired dwelling.

(4) If the acquired dwelling is located on a tract larger than typical for residential use in the area, the maximum differential replacement housing amount payable is the market value of a comparable replacement dwelling on a tract typical for the area, less the market value of the dwelling at the present location on a homesite typical in size for residential use in the area.

(5) If the acquired dwelling is located on a tract where the use is established to be higher and better than residential use, the maximum replacement housing amount payable is the market value of a comparable replacement dwelling on a tract typical for residential use in the area, less the market value of the acquired dwelling assuming it was located on a tract typical for residential use in the area.

(f) *Interest payment.* The Contracting Officer shall determine the amount, if any necessary, to compensate a displaced person for increased interest cost. The interest payment shall be based on the present value of the interest differential including points paid by the purchaser on the amount of the new loan, not to exceed the unpaid balance of the previous mortgage for its remaining term as of the date of acquisition. Such payment shall be paid only if the dwelling acquired was encumbered by a bona fide mortgage, which is one constituting a valid lien on the property for not less than 180 days prior to the initiation of negotiations.

(1) In no event shall the payment be calculated on an interest rate greater than the prevailing conventional mortgage rate charged by commercial banks in the locale of the replacement dwelling and which is available to the displaced person.

(2) The discount rate to determine present value shall be the prevailing interest rate paid on savings deposits by commercial banks in the general area where the replacement dwelling is located.

(g) *Incidental expenses.* The incidental expense payment is the amount necessary to reimburse the homeowner for actual costs incurred by him incident to the purchase of the replacement dwelling such as:

(1) Legal, closing, and related costs including title search, and preparing conveyance contracts, notary fees, surveys, preparing plats, and charges incident to recordation.

(2) Lenders, FHA, or VA appraisal fees.

(3) FHA application fee.

(4) Certification of structural soundness when required by lender, FHA or VA.

(5) Credit report.

(6) Title policies or abstract of title.

(7) Escrow agent's fee.

(8) State revenue stamps or sale or transfer taxes. No fee, cost, charge, or expense is reimbursable as an incidental expense which is determined to be a part of the finance charge under the Truth in Lending Act, Title I, Public Law 90–321, and Regulation "Z" (12 CFR Part 226) issued pursuant thereto by the Board of Governors of the Federal Reserve System. Prepaid items such as insurance and tax escrow are also excluded.

§ 777.8 Replacement housing payments for non-eligible owner-occupants.

(a) *Rental by displaced owner-occupant.* A displaced owner-occupant not eligible under § 777.7 because he elects not to purchase a replacement dwelling, but who wishes to rent may receive a rental replacement housing payment not to exceed $4,000. The payment shall be computed in the same manner as shown § 777.9 except that present rental rate shall be economic rent as determined by market data.

(b) *Non-qualifying owner-occupant.* (1) A displaced owner-occupant who does not qualify for a replacement housing payment under § 777.7 because of the 180-day occupancy requirement and who elects to rent may be eligible for a rental replacement housing payment under § 777.9 if he meets the occupancy requirement of that Section. The payment will be computed in the same manner as shown in § 777.9 except that the present rental rate shall be economic rent as determined by market data.

(2) A displaced owner-occupant who does not qualify for a replacement housing payment under § 777.7 because of the 180-day occupancy requirement and who elects to purchase a replacement dwelling may be eligible for a replacement housing downpayment under § 777.9 if he meets the occupancy requirement of that Section. The payment will be computed in the same manner as shown in § 777.9.

§ 777.9 Replacement housing payments for tenants and certain others.

(a) *Eligibility.* Any person displaced from any dwelling not eligible under § 777.7 is eligible for either of the payments authorized under this Section if such dwelling was actually and lawfully occupied by such displaced person for not less than 90 days prior to the initiation of negotiations for acquisition of such dwelling. Such payments will be made only if the displaced person occupies a comparable replacement dwelling not later than the end of (1) one year from the date he is given final payment of the purchase price and related incidental expenses of the acquired dwelling, or (2) of the date which he moves from the acquired dwelling, whichever, is the later date.

(b) *Computation of rental replacement housing payment.* A displaced person eligible under this Section is eligible to receive, upon application, in addition to amounts otherwise authorized, the amount necessary to enable him to leave or rent a comparable replacement dwelling for a period of four years, but not to exceed $4,000.

(1) *Determination of comparable rent.* The Contracting Officer may establish the amount necessary to rent a comparable replacement dwelling by establishing a schedule or by using a comparative method. When more than one Federal agency is causing the displacement in a community or an area, the Postal Service may cooperate with other agencies on the method for computing the rental replacement housing payment and may use the uniform schedules of average rental housing in the community or area.

(i) *Schedule method.* The Contracting Officer may establish a rental schedule for renting comparable replacement dwellings in the various types of dwellings required and available on the private market. The schedule should be based on a current analysis of the market to determine an amount for each type of dwelling required.

(ii) *Comparative method.* The Contracting Officer may determine the average month's rent by selecting one or more dwellings representative of the dwelling unit acquired, which is available on the private market and meets the definition of a comparable replacement dwelling.

(iii) *Alternate to paragraph (b)(1)(i) and (ii) of this section.* When neither method is feasible, the Contracting Officer shall develop criteria for computing the payment in such instances.

(2) *Calculation of payment.* The rental replacement housing payment should be computed by determining by one of the methods set out above, the amount necessary to rent a comparable replacement dwelling for four years, and subtracting from such amount 48 times the average month's rent paid by the displaced tenant in the last three months prior to initiation of negotiation if such rent is reasonable, and if not reasonable, 48 times the economic rent for the oc-

V 39 55 MAR 20 74 XUM

cupied dwelling unit as established by the Contracting Officer.

(3) *Exceptions.* The Contracting Officer may establish the average month's rent by using more than three months, if he deems it advisable. If rent is being paid to the Postal Service or to any other agency of Federal, State, or local government, economic rent shall be used in determining the amount of the payment to which the displaced tenant is entitled.

(4) *Disbursement of rental replacement housing payment.* All rental replacement housing payments $1,000 or less will be made by lump sum payment. Those in excess of $1,000 will be made in four equal annual installments commencing upon approval of the application. However, the Contracting Officer may authorize lump sum payment regardless of the amount when in his opinion circumstances warrant.

(c) *Replacement housing downpayment.* A displaced person eligible under this section who elects to purchase instead of renting is eligible to receive, upon application, the amount necessary to enable him to make a downpayment on the purchase of a replacement dwelling but not to exceed $4,000, except that if such amount exceeds $2,000, such person must equally match any such amount in excess of $2,000, in making the downpayment. The payment shall be computed by determining the amount necessary to enable him to make a downpayment and to cover incidental expenses on the purchase of replacement housing.

(1) *Downpayment portion.* The maximum downpayment available under this Section shall be the amount required for a conventional loan on a comparable replacement dwelling. The Contracting Officer shall determine the amount by establishing the value of a comparable replacement dwelling as set out in this section, and determining the downpayment required on a mortgage loan available to the displaced person on such comparable dwelling by commercial banks in the general area in which the replacement dwelling is located.

(2) *Incidental expenses.* Incidental expenses of closing the transaction are those as described in § 777.7(g).

(3) *Application of payment.* The full amount of the payment made under this Section must be applied to the purchase price of the dwelling and such downpayment and incidental costs shown on the closing statement.

§ 777.10 Relocation assistance advisory services.

(a) *Services.* Whenever the acquisition of real property for a program or project undertaken by the Postal Service will result in displacement of a person, the Contracting Officer shall provide relocation assistance and other advisory service to the displaced persons in order to minimize hardships to such persons, which shall include such measures, facilities, or services as may be necessary or appropriate in order to:

(1) Determine the need, if any, of displaced persons for relocation assistance;

(2) Provide current and continuing information on the availability, prices, and rentals of comparable decent, safe and sanitary sales and rental housing, and of comparable commercial properties and locations for displaced businesses;

(3) Assure that, within a reasonable period of time prior to displacement, there will be available comparable replacement dwellings, except that assurance may be waived as specified in § 777.5;

(4) Assist a displaced person displaced from his business or farm operation in obtaining and becoming established in a suitable replacement location;

(5) Supply information concerning Federal and State housing programs, disaster loan programs, and other Federal or State programs offering assistance to displaced persons;

(6) Provide other advisory services to displaced persons in order to minimize hardships to such persons in adjusting to relocation;

(7) Assist displaced persons in preparation and submission of claims for benefits;

(8) Prior to initiation of acquisition, provide persons, who are potential displacees, a brochure or pamphlet outlining the benefits to which they may be entitled under the Act and information concerning other assistance which might be furnished them. Such brochures should contain information that any payment received under Title II of the Act will not be considered as income for the purpose of the Internal Revenue Code of 1954, or for the purpose of determining eligibility or the extent of eligibility of any person for assistance under the Social Security Act or any other Federal law.

(b) *Cooperation with other Government agencies.* In providing the above services, the Contracting Officer may consult State and local relocation agencies to determine the availability of housing resources and to assure coordination of all relocation activities in the community. When more than one Federal agency is causing displacement in a community or area, the Contracting Officer in cooperation with the heads of other agencies involved, shall take positive action to assure the maximum coordination of relocation activities. To assure simplification and coordination in administering relocation activities, the Contracting Officer, acting in conjunction with other Federal agencies, should consider contracting with a single agency to assume full responsibility for providing relocation services and assistance in a given community or area.

§ 777.11 Appeals.

Persons aggrieved by a determination as to their eligibility for a relocation payment or by the amount of such payment must be advised of their right to have their application reviewed in accordance with section 213(b)(3) of the Act. Any such grievance must be submitted within twelve months of denial of all or part of a relocation claim. When such grievances develop every effort should be made to resolve them at the regional level; however, when the grievance cannot be resolved, it should be referred to Headquarters. In referring appeals of aggrieved applicants to Headquarters, the applicant's case file must be submitted together with a complete report outlining the nature of the grievance. The file and report will be submitted to the attention of Director, Office of Real Estate, who will issue a dispositive decision on the matter. Such decision shall not be subject to further administrative review or appeal.

FEDERAL ENERGY OFFICE

[10 CFR Part 212]

PUERTO RICO

Proposed Price Regulations and Public Hearing

Notice is hereby given that the Federal Energy Office will receive written comments and hold a public hearing in San Juan, Puerto Rico with respect to whether certain entities operating in Puerto Rico which are owned or controlled by refiners should be subject to the price regulations applicable to refiners, to the price regulations applicable to resellers, or to some other form of price regulation. By an amendment to the rule with respect to resellers, the Federal Energy Office today has made clear that certain of such entities are subject to the refiner price regulations, and this proceeding is to determine whether that treatment or some other treatment under the Mandatory Petroleum Price Regulations is appropriate.

The background of this proceeding and some of the issues it raises are as follows:

Certain refiners subject to the price regulations of Subpart E own, control, or are otherwise affiliated with entities which operate in Puerto Rico.

Certain of these entities purchase the products they sell in Puerto Rico from Commonwealth Oil and Refining Company (CORCO) and/or from Gulf Oil Company, both of which produce gasoline in Puerto Rico. Certain of these entities also supply crude oil to CORCO, either themselves or through related entities, under various contractual terms.

If the entities which purchase the products they sell in Puerto Rico from CORCO and Gulf were to be treated as resellers, they would be permitted, generally, to pass through directly to their customers the cost of the products they purchase. If such entities were to be treated as refiners, the cost of the products purchased in Puerto Rico would be included as part of the affiliated refiner's overall cost of its products, and would be passed through to all customers of the refiner, throughout the United States, including Puerto Rico.

Because CORCO refines principally Venezuelan crude oil which is exempt from price regulation, its products are being sold at generally higher prices than the prices charged by refiners which use domestic crude oil subject to price regulation. Thus, if the entities of a refiner operating in Puerto Rico are treated separately under the price regulations as "resellers," the prices charged in Puerto Rico would generally reflect the higher prices of exempt crude oil, whereas if they are treated as part of their affiliated "refiners," the prices charged in Puerto Rico would generally reflect the lower average price of all crude oil, both domestic and foreign, of that refiner.

On the one hand, it may be urged that Puerto Rico should not pay prices that reflect directly the higher prices of foreign crude oil. On the other hand, it may be urged that the entities operating in Puerto Rico have historically been treated as separate entities and that not to treat them now as resellers would require them to face financial hardship in Puerto Rico.

Among the relevant facts which the interested parties to this proceeding should address themselves to are the following:

(1) The place in the overall corporate structure of the refiner which is occupied by the Puerto Rican entity of the refiner and by the entity of the refiner, if any, which has supplied crude oil or other products to Puerto Rico.

(2) The arrangements under which the Puerto Rican entity and/or other entities, have historically supplied and/or purchased crude oil and other products in Puerto Rico, the identity and quantities of such products and where they are sold, and the effects of the Mandatory Petroleum Allocation Program on the current operation of such arrangements.

(3) The extent to which profits and/or losses of the Puerto Rican entity of a refiner, and/or of related entities which have supplied or purchased products in Puerto Rico, have gone to the refiner.

(4) The effects of any proposed rule on prices in Puerto Rico, on prices in the United States mainland, on the overall market structure in Puerto Rico, on the entities operating in Puerto Rico, and on the refiners and their related entities.

(5) The historical relationship of prices charged and changes in prices charged by Puerto Rican entities to prices charged and changes in prices charged by the refiner in the United States mainland.

Information concerning the filing of written comments and the time and place of the public hearing in San Juan, Puerto Rico, which is tentatively scheduled for April 4 and 5, 1974, will be published as soon as the necessary arrangements have been made. This notice is being issued today so that all interested parties will have as much advance notice as possible, consistent with the expedited treatment which is planned for this proceeding.

Issued at Washington, D.C., on March 18, 1974.

WILLIAM N. WALKER,
General Counsel.

DEPARTMENT OF STATE

[Public Notice CM-120]

GOVERNMENT ADVISORY COMMITTEE ON INTERNATIONAL BOOK AND LIBRARY PROGRAMS

Notice of Meeting

The Government Advisory Committee on International Book and Library Programs will meet in open session in Room 634 in the United States Information Agency, 1717 H Street, NW., Washington, D.C. from 9 a.m. to 4:30 p.m. on April 4, 1974.

The committee will discuss international book exhibits, plans for the November 1974 meeting of the International Federation of Library Associations, forthcoming meetings on satellite communications and report on publishing in Mexico.

Dated: March 11, 1974.

CAROL M. OWENS,
Executive Secretary.

[Public Notice CM-121]

STUDY GROUP 1 OF THE U.S. NATIONAL COMMITTEE FOR THE INTERNATIONAL TELEGRAPH AND TELEPHONE CONSULTATIVE COMMITTEE (CCITT)

Notice of Meeting

The Department of State announces a scheduled meeting of U.S. CCITT Study Group 1 (U.S. Government Regulatory Problems) concerned with preparation for a meeting of a Working Party of CCITT Study Group III of the International Telecommunication Union to be held in Geneva, Switzerland, June 10–14, 1974. The meeting will take place on Tuesday, April 16, 1974 at 10 a.m. in Room 621 of the Federal Communications Commission, 1919 M Street, NW., Washington, D.C.

This meeting of Study Group I will address matters related to general tariff principles covering the lease of telecommunication circuits. The agenda will include approval of one or more U.S. Contributions to the aforementioned meeting of the Working Party and the completion of the U.S. response to a questionnaire on CCITT Recommendation D.1 issued by Study Group III.

Members of the general public who desire to attend the meeting on April 16 will be admitted up to the limit of the meeting room.

Dated: March 11, 1974.

RICHARD T. BLACK,
Chairman,
U.S. National Committee.

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Treasury Department Order 229-1]

FISCAL SERVICE

Reorganization

By virtue of the authority vested in me as Secretary of the Treasury, including particularly the authority conferred in Reorganization Plan No. 26 of 1950, as amended (31 U.S.C. 1001, note), it is ordered that:

1. The functions assigned to the Office of the Treasurer of the United States by paragraph 2 of Treasury Order No. 229, dated January 14, 1974, are transferred to the Bureau of Government Financial Operations. The latter bureau shall make periodic reports to the Treasurer of the United States showing currency held in custody, issued, retired, and in circulation.

2. The securities functions that are performed in the Securities Division of the Bureau of Government Financial Operations are transferred to the Bureau of the Public Debt.

3. Any provisions of law and all regulations issued with respect to the functions transferred hereby, which are in effect on the effective date of this Order, shall continue in effect until amended or superseded.

4. As determined by the Assistant Secretary for Administration, the positions, personnel, records, property, funds, and other resources related to the functions transferred hereby are transferred with the functions.

5. This Order is effective as of the first day of the first pay period following the date of this Order.

Dated: March 11, 1974.

[SEAL] GEORGE P. SCHULTZ,
Secretary of the Treasury.

Office of the Secretary

PORTABLE ELECTRIC TYPEWRITERS FROM JAPAN

Antidumping Proceeding

On February 14, 1974, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), indicating a possibility that portable electric typewriters from Japan are being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*).

There is evidence on record concerning injury to or likelihood of injury to or prevention of establishment of an industry in the United States.

Having conducted a summary investigation as required by § 153.29 of the Customs Regulations (19 CFR 153.29) and having determined as a result thereof that there are grounds for so doing, the U.S. Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

A summary of information received from all sources is as follows:

The information received tends to indicate that the prices of the merchandise sold for exportation to the United States are less than the constructed value.

This notice is published pursuant to § 153.30 of the Customs Regulations (19 CFR 153.30).

[SEAL] JAMES B. CLAWSON,
Acting Assistant Secretary of the Treasury.

USAF SCIENTIFIC ADVISORY BOARD

Notice of Meetings

MARCH 14, 1974.

The Air Force Systems Command Science and Technology Advisory Group will hold a closed meeting on March 22, 1974, from 9 a.m. until 5 p.m., at the Air Force Cambridge Research Laboratories, L. G. Hanscom Field, Maine.

The Group will hold classified discussions and receive competition sensitive information on the Air Force Cambridge Research Laboratories Program.

The USAF Scientific Advisory Board Geophysics Panel Task Group on Meteorological Effects on Microwave Propagation will hold a closed meeting on April 10, 1974, from 8:30 a.m. until 4:30 p.m., at the Pentagon, Washington, D.C.

The Committee will receive classified briefings on forecast capabilities and research efforts on meteorological effects on microwave propagation systems.

For further information, please contact the Scientific Advisory Board Secretariat at 202-697-8404.

STANLEY L. ROBERTS,
Colonel, USAF, Chief, Legislative Division, Office of the Judge Advocate General.

[FR Doc.74-6333 Filed 3-19-74;8:45 am]

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

HOWARD UNIVERSITY MEDICAL SCHOOL

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74-00178-99-46500. Applicant: Howard University Medical School, 520 W Street NW., Washington, D.C. 20001. Article: Ultramicrotome, Model Om U3. Manufacturer: C. Reichert Optische Werke AG, Austria. Intended use of article: The article is intended to be used in graduate course in ultrastructure to train students in the techniques of electron microscopy including fixation, embedding, sectioning and the use of the electron microscope.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientic value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: Examination of the applicant's thin sections under the electron microscope will provide optimal information when such sections are uniform in thickness and have smoothly cut surfaces. Conditions for obtaining high quality sections depend to a large extent on the properties of the specimen being sectioned (e.g., hardness, consistency, toughness etc.), the properties of the embedding media and the geometry of the block. In connection with a prior case (Docket No. 69-00118-33-46500) which relates to the duty-free entry of a similar foreign article, the Department of Health, Education, and Welfare (HEW) advised that "Smooth cuts are obtained when the speed of cutting (among such [other] obvious factors as knife edge condition and angle), is adjusted to the characteristics of the material being sectioned." In connection with another prior case (Docket No. 69-00665-33-46500) relating to the duty-free entry of a similar foreign article, HEW advised that "The range of cutting speeds and a capability for the higher cutting speeds is * * * a pertinent characteristic of the ultramicrotome to be used for sectioning materials that experience has shown difficult to section." In connection with still another prior case (Docket No. 70-00077-33-46500) relating to the duty-free entry of a similar foreign article, HEW advised that "ultrathin sectioning of a variety of tissues having a wide range in density, hardness etc." requires a maximum range in cutting speed and, further, that "The production of ultrathin serial sections of specimens that have great variation in physical properties is very difficult." The foreign article has a cutting speed range of 0.5 to 10 millimeters/second (mm/sec.). The most closely comparable domestic instrument is the Model MT-2B ultramicrotome manufactured by Ivan Sorvall, Inc. (Sorvall). The Sorvall Model MT-2B ultramicrotome has a cutting speed range of 0.09 to 3.2 mm/sec. We are advised by HEW in its memorandum of February 8, 1974 that cutting speeds in the excess of 4 mm/sec. are pertinent to the applicant's research studies. We, therefore, find that the Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Director, Special Import Programs Division.

[FR Doc.74-6383 Filed 3-19-74;8:45 am]

MEDICAL COLLEGE OF OHIO, ET AL.

Notice of Consolidated Decision on Applications for Duty-Free Entry of Ultramicrotomes

The following is a consolidated decision on applications for duty-free entry of ultramicrotomes pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq). (See especially § 701.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74-00200-33-46500. Applicant: Medical College of Ohio at Toledo, P.O. Box 6190, 945 S. Detroit Avenue, Toeldo, Ohio 43614. Article: Ultramicrotome, Model Om U3. Manufacturer: C. Reichert Optische Werke AG, Austria. Intended use of article: The article is intended to be used to section single light microscopically pre-selected cells or structures of 50 Angstrom units thickness or less for electron microscopy as part of research involving such phenomena as elucidation of melanogenesis of tissue cultures of malignant cells during their cell cycles. The article will also be used to obtain aforementioned thin sections of various tissues in order to demonstrate disease processes on electron microscopic level; which will serve as a very significant visual aid in education of medical students in formal classes as well as in training programs of resident physicians. Application received by Commissioner of Customs: November 5, 1973. Advice submitted by the Department of Health, Education, and Welfare on: February 15, 1974.

Docket Number: 74-00202-33-46500. Applicant: State University of New York, Stony Brook, N.Y. 11790. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section a variety of pathological specimens from many injured tissues and organs. Investigations will be conducted on the overall structure and detailed structure of plasma membranes, internal membranes, myofilaments, basal lamina and nuclei. A number of different experiments in which ultrastructural lesions in plasma membranes will be created and the detailed changes occurring in the damaged membrane and in the remainder of the cell assessed will be performed. Studies of changes in nucleus and cytoplasm after exposure to carcinogens will also be conducted. Application received by Commissioner of Customs: November 7, 1973. Advice submitted by Department of Health, Education, and Welfare on: February 15, 1974.

Docket Number: 74-00203-33-46500. Applicant: University of Kansas Medical Center, Department of Pathology and Oncology, 39th and Rainbow Boulevard, Kansas City, Kansas 66103. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section a variety of tissues used in ultrastructural studies. The tissues include substances of variable density, including lymph node, bone, kidney, embryos and a variety of neoplasms from both humans and experimental animals. The tissues will be sampled to determine pathologenetic mechanisms of diseased tissues. Materials such as filaments, crystals, viruses and immune complexes will be searched for in neoplasms and other organs and tissues. Application received by Commissioner of Customs: November 7, 1973. Advice submitted by Department of Health, Education, and Welfare on: February 15, 1974.

Docket Number: 74-00204-33-46500. Applicant: University of Wisconsin (Madison), Madison, Wisconsin 53706. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section brain and spinal cord tissue of guinea pigs being fed methyl mercury, the bony noses of tuna fish suffering from "puffy snout" disease, the skin of sharks having an unidentified epidermal ulcer disease and the soft tissue of calves and cattle being fed various mycotoxins. The materials vary in hardness from the tooth-like epidermal structure (denticles) of sharks skin and the bony nasal bones of tuna, to the very soft brain tissue. Application received by Commissioner of Customs: November 2, 1973. Advice sub-

V 39 55 MAR 20 74 XUM

mitted by Department of Health, Education, and Welfare on: February 15, 1974.

Docket Number: 74–00206–33–46500. Applicant: University of Pennsylvania, Department of Neurology, 3400 Spruce Street, Philadelphia, Pa. 19104. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of biological, mainly mammalian tissues derived from humans that exhibit both normal and pathologic structure. The experiments to be conducted include experiments on the development of muscle in animals and the study of muscular dystrophy, glycogen storage disease and mitochondrial disorders in humans. Application received by Commissioner of Customs: November 6, 1973. Advice submitted by Department of Health, Education, and Welfare on: February 15, 1974.

Comments: No comments have been received with respect to any of the foregoing applications. Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for such purposes as these articles are intended to be used, is being manufactured in the United States. Reasons: Each of the foreign articles provides a range of cutting speeds from equal to or less than 0.5 millimeters/second (mm/sec) to equal to or greater than 10 mm/sec. The most closely comparable domestic instrument is the Model MT–2B ultramicrotome which is manufactured by Ivan Sorvall, Inc. (Sorvall). The Model MT–2B has a range of cutting speeds from 0.09 to 3.2 mm/sec. The conditions for obtaining high quality sections that are uniform in thickness depend to a large extent on the hardness, consistency, toughness and other properties of the specimen materials, the properties of the embedding materials and the geometry of the block. In connection with a prior application (Docket No. 69–00118–33–46500) which relates to the duty-free entry of an article in the category of instruments to which the foregoing applications relate, the Department of Health, Education, and Welfare (HEW) advised that "Smooth cuts are obtained when the speed of cutting (among such [other] obvious factors as knife edge condition and angle), is adjusted to the characteristics of the material being sectioned." In connection with another prior case (Docket No. 69–00665–33–46500) relating to the duty-free entry of an article in the same category as those described above, HEW advised that "The range of cutting speeds and a capability for the higher cutting speeds is * * * a pertinent characteristic of the ultramicrotome to be used for sectioning materials that experience has shown difficult to section." In connection with still another prior case (Docket No. 70–00077–33–46500) relating to the duty-free entry of an article similar to those described above, HEW advised that "ultrathin sectioning of a variety of tissues having a wide range in density, hardness etc." requires a maximum range in cutting speed and, further, that "The production of ultrathin serial sections of specimens that have great variation in physical properties is very difficult." Accordingly, HEW advises in its respectively cited memoranda, that cutting speeds in excess of 4 mm/sec are pertinent to the satisfactory sectioning of the specimen materials and the relevant embedding materials that will be used by the applicants in their respective experiments.

For these reasons, we find that the Sorvall Model MT–2B ultramicrotome is not of equivalent scientific value to the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used.

The Department of Commerce knows of no other instrument or appartus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which is being manufactured in the United States.

MIDLAND MACROMOLECULAR INSTITUTE

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 73–00522–33–63550. Applicant: Midland Macromolecular Institute, 1910 West St. Andrews Drive, Midland, Mich. 48640. Article: Jasco Recording Spectropolarimeter, Model J–20. Manufacturer: Japan Spectroscopic Company, Japan. Intended use of article: The article is intended to be used for fundamental studies on the conformation and/or configuration of synthetic and naturally occurring (biological) macromolecules in solution. These will be determined from the optical rotatory dispersion (ORD) and circular dichroism (CD) properties of the macromolecules. Studies will be made by subjecting polymer samples to changes in solvent, temperature, and chemical treatment. Related polymer samples with differing chemical or biological histories will be similarly evaluated. Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides the capabilities to make both optical rotary dispersion (ORD) and circular dichroism (CD) measurements in the same instrument. The National Bureau of Standards (NBS) advised in its memorandum dated February 19, 1974 that the capability described above is pertinent to the purposes for which the article is intended to be used. NBS also advised that it knows of no domestic instrument of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

A. H. STUART,
Director, Special Import Programs Division.

[FR Doc.74–6387 Filed 3–19–74;8:45 am]

TEXAS A & M UNIVERSITY

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 73–00365–01–07500. Applicant: Texas A & M University, College Station, Tex. 77843. Article: Precision Calorimetry System, LKB 8700. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used in several research projects which include the following:

(1) Measurements of heat of formation of complexes in aqueous solutions by titration calorimetry.

(2) Measurements of heat and equilibrium constants of ionization of weak organic acids and bases by both titration and batch calorimetry.

(3) Measurements of heats and equilibrium constants of enzyme catalyzed reactions by both titration and batch calorimetry.

(4) Measurement of heats of vaporization of a series of hydrocarbons and their halogen derivatives.

Further studies anticipated include:

(1) Semi-micro scale heats of combustion of organic phosphorous compounds of importance in biochemistry.

(2) Heats of mixing of volatile nonelectrolytes in order to test theories of solutions.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article is capable of measuring heats of vaporization and heats of reaction of solutions under pressure. We are advised by the National Bureau of Standards (NBS) in its memorandum dated February 15, 1974 that the characteristics of the article described above are pertinent to the applicant's intended program of thermochemical research. The most closely comparable domestic instrument available at the time the foreign article was ordered was the Model 1000B solution calorimeter manufactured by Tronac, Incorporated (Tronac). At the time of order the Model 1000B did not have the capability for measuring heats of vaporization; nor was an accessory available to provide this capability. Further, the Tronac instrument did not have the capability of measuring heats of solution under pressure. We therefore find that the 1000B was not of equivalent scientific value to the foreign article for the applicant's intended purposes at the time the foreign article was ordered. NBS further advises that it knows of no instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Director, Special Import Programs Division.

[FR Doc.74–6386 Filed 3–19–74;8:45 am]

UNIVERSITY OF CHICAGO

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74–00220–98–41700. Applicant: The University of Chicago, The James Franck Institute, 5640 S. Ellis Avenue, Chicago, Illinois 60637. Article: Electro Photonics Model SUA–10 Mode Locked Oscillator. Manufacturer: Electro-Photonics Limited, United Kingdom. Intended use of article: The article is intended to be used for studies of the reaction kinetics and energy transfer in photoexcited molecules. In particular, the cis-trans isomerization in linear polyene molecules will be studied by observing Raman scattering of light off the photoexcited molecule. The objective of these experiments is a better understanding of the primary visual process by understanding the photochemistry of molecules which model the visual chromophore.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides frequency characterized light pulses of several picoseconds duration. The most closely comparable domestic instrument is a dye laser system manufactured by Candela Corporation (Candela). The shortest pulse provided by the Candela system is on the order of 100 nanoseconds. We are advised by the National Bureau of Standards (NBS) in its memorandum dated February 20, 1974, that the shorter pulse duration capability of the article is pertinent to the applicant's studies involving processes occurring in the picosecond range. We therefore, find that the Candela laser system is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

UNIVERSITY OF MINNESOTA, ET AL.

Notice of Consolidated Decision on Applications for Duty-Free Entry of Nitrogen 15 Analyzers

The following is a consolidated decision on applications for duty-free entry of Nitrogen 15 Analyzers pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.). (See especially § 701.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 73–00326–01–01100. Applicant: University of Minnesota, Department of Soil Science, St. Paul, Minn. 55101. Article: Nitrogen-15 analyzer complete with Isocommerz Sample Prep Kit. Manufacturer: Isocommerz, East Germany. Intended use of article: The article is intended to be used to analyze samples for N–15/N–14 ratios in samples where N–15 enriched compounds have been introduced for tracer studies. The relative abundance of N–15 and N–14 will be determined using an emission principle. Application received by Commissioner of Customs: January 9, 1973. Advice submitted by the National Bureau of Standards on: February 19, 1974.

Docket Number: 73–00430–01–01100. Applicant: University of Alaska, Fairbanks, Alaska 99701. Article: Nitrogen 15 Analyzer, Model NIA and accessories. Manufacturer: Japan Spectroscopic Co., Ltd., Japan. Intended use of article: The article is intended to be used to further ongoing studies of the marine and lacustrine nitrogen cycle with particular emphasis placed on cycling of nitrogen in northern production waters such as Prince William Sound, Gulf of Alaska, Bering Sea, Arctic Ocean, and arctic and alpine lakes. 15/N studies in the area of nitrogen pollution and sewage treatment in cold climates will also be initiated. A study of the productivity and nutrient cycling of seagrass has been started. Extensive studies of the fresh water nitrogen cycle in Alaskan environments using 15/N are also to be continued. The article will also be used for educational purposes in a course entitled *"Stable Isotope Tracer Techniques."* Application received by Commissioner of Customs: March 5, 1973. Advice submitted by the National Bureau of Standards on: February 19, 1974.

Docket Number: 73–00468–01–01100. Applicant: University of Minnesota, Department of Chemistry, Minneapolis, Minn. 55455. Article: Nitrogen-15 analyzer. Manufacturer: Isocommerz, East Germany. Intended use of article: The article is intended to be used for the analysis of the amount of nitrogen-15, an isotope of natural nitrogen, which is found in compounds isolated from plants which have been previously fed N–15 labelled compounds. The objective of this research is to learn about the fate of alkaloids such as nicotine, in the tobacco plant. Application received by Commissioner of Customs: April 2, 1973. Advice submitted by the National Bureau of Standards on: February 19, 1974.

Comments: No comments have been received with respect to any of the foregoing applications. Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for such purposes as these articles are intended to be used, is being manufactured in the United States. Reasons: Each foreign article is capable of determining the abundance of ^{15}N (Nitrogen 15) relative to that of ^{14}N. The National Bureau of Standards

V 39 55 MAR 20 74 XUM

advised in the cited memoranda that the capability described above is pertinent to the purpose for which each of the articles is intended to be used. NBS also advised that it knows of no domestically manufactured instrument which is scientifically equivalent to any of the foreign articles to which the foregoing applications relate for such purposes as these articles are intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which is being manufactured in the United States.

V.A. HOSPITAL, IOWA CITY, IOWA

Notice of Decision on Application for Duty-Freee Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 74-00214-00-46040. Applicant: Veterans Adminstration Hospital, Highway 6, Iowa City, IA 52240. Article: Rotating Specimen Stage for Elmiskop 101, Electron Microscope. Manufacturer: Siemens AG, West Germany. Intended use of article: The article is an accessory to an existing electron microscope to be used to rotate specimen tissue as 360 degrees in the microscope during oral disease projects and pathology projects.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The application relates to a compatible accessory for an instrument that had been previously imported for the use of the applicant institution. The article is being furnished by the manufacturer which produced the instrument with which the article is intended to be used and is pertinent to the applicant's purposes.

The Department of Commerce knows of no similar accessory being manufactured in the United States, which is interchangeable with or can be readily adapted to the instrument with which the foreign article is intended to be used.

AGENT/DISTRIBUTION SERVICE

Rate Increase

Effective April 1, 1974, the price of the Agent/Distributor Service (ADS) will be increased from $10 to $25. The ADS provides the U.S. business community with up to three names of selected overseas firms which have expressed interest in the proposal to act as representatives (agents) or distributors.

The names of selected prospects are obtained by the U.S. Foreign Service, telegraphed to the Department of Commerce, processed, and submitted to the applicant through the appropriate Regional or District Office of the Department of Commerce. Request forms (DIB-424R) are available from the nearest Department of Commerce Regional or District Office. These offices assist in the preparation of the form and in the selection of export markets.

(Catalog of Federal Domestic Assistance Program No. 11.113, International Commercial Information.)

Dated: March 13, 1974.

MURRAY P. RENNERT,
Acting Deputy Assistant Secretary for International Commerce.

Patent Office

PUBLIC ADVISORY COMMITTEE FOR TRADEMARK AFFAIRS

Meeting

The Public Advisory Committee for Trademark Affairs was established by the Secretary of Commerce to advise the Patent Office of the Department of Commerce on steps which can be taken in order to increase the efficiency and effectiveness of the administration of the Trademark Act and to provide a continuing source of knowledge from the private sector to the Government in the field.

The next meeting will be held on March 28th and 29th, 1974, at the Morgan Guarantee Bank, New York City, New York, beginning at 9 a.m. each day in the Board Room.

The following agenda is to be considered:

1. Improved systems for recordation and retrieval of information relating to trademark registrations and improved systems for keeping records and production information.
2. Continuation of the WIPO Working Group on Mechanized Trademark Searching.
3. Examiners' training course.
4. Examiners' field trip program.
5. Quality Review Program.
6. Training of examiners in the International Classification System.
7. Status of the Mail Room and recommendations relating thereto.
8. Subcommittee report on Section 8 requirements re specimens, use, and the notice to registrants.
9. Report on the status of Trademark Operations and implementation of the prior Advisory Committee recommendations relating thereto with particular emphasis on recommendations not implemented relating to organization, processing and search room matters.
10. Review of status and content of the new Trademark Manual of Examining Procedures.

The membership of the Advisory Committee consists of nine members of the Patent Office—Trademark Affairs Committee of the United States Trademark Association.

Meetings of the Advisory Committee are open to the public. Public attendance, depending on available space, may be limited to those persons who have notified the Advisory Committee Management Officer in writing, prior to the meeting, of their intention to attend the March 28-29 meeting.

Any member of the public may file a written statement with the Committee before, during, or after the meeting, and, to the extent that time for the meeting permits, the Committee Chairman may allow public presentation of oral statements at the meeting.

All communications regarding this Advisory Committee Meeting should be addressed to Mr. Rene D. Tegtmeyer, Committee Management Officer for Trademark Affairs, Room 3-11D27, U.S. Patent Office, Washington, D.C. 20231.

Dated: March 5, 1974.

C. MARSHALL DANN,
Commissioner of Patents.

Approved: March 15, 1974.

BETSY ANCKER-JOHNSON,
Assistant Secretary for Science and Technology.

Food and Drug Administration

[FAP 4H2967]

OAKITE PRODUCTS, INC.

Notice of Filing of Petition for Food Additive

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409 (b)(5), 72 Stat. 1786; 21 U.S.C. 348(b)(5)), notice is given that a petition (FAP 4H2967) has been filed by Oakite Products, Inc., 50 Valley Road, Berkeley Heights, NJ 07922, proposing that § 121.2547 *Sanitizing solutions* (21 CFR 121.2547) be amended to provide for the safe use of sodium dodecylbenzene sulfonate as a component of sanitizing solutions intended for use on food-processing equipment and utensils and on glass bottles and other glass containers intended for holding milk.

The environmental impact analysis report and other relevant material have been reviewed, and it has been determined that the proposed use of the additive will not have a significant environmental impact. Copies of the environmental impact analysis report may be seen in the office of the Assistant Commissioner for Public Affairs, Rm. 15B-42 or the office of the Hearing Clerk, Food and Drug Administration, Rm. 6-86, 5600 Fishers Lane, Rockville, MD 20852, during working hours, Monday through Friday.

Dated: March 12, 1974.

ANIMAL RESOURCES ADVISORY COMMITTEE

Notice of Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Animal Resources Advisory Committee, Division of Research Resources, May 6-7, 1974, National Institutes of Health, Building 31, Conference Room 2. The meeting will be open to the public on May 6 from 9 a.m. to 10:30 a.m., during which time there will be a brief staff presentation on the current status of the Animal Resources Program. The Committee will select future meeting dates. The meeting will be closed to the public from 10:30 a.m. to 5 p.m. on May 6 and from 9 a.m. to 5 p.m. on May 7 to review, discuss, and evaluate and/or rank grant applications in accordance with provisions set forth in section 552(b)4 of Title 5, U.S. Code, and section 10(d) of Pub. L. 92-463. Attendance by the public will be limited to space available.

Mr. James Augustine, Health and Science Reports Officer, Division of Research Resources, Building 31, Room 5B39, Bethesda, Maryland 20014, 496-5545, will provide summaries of the meeting and rosters of the Committee members.

Dr. John E. Holman, Executive Secretary of the Committee, Building 31, Room 5B35, Bethesda, Maryland 20014, 496-5507, will provide substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.306, National Institutes of Health)

Office of the Secretary

HEALTH SERVICES ADMINISTRATION

Statement of Organization, Functions, and Delegations of Authority

This amendment to the Statement of Organization, Functions, and Delegations of Authority of the Department of Health, Education, and Welfare, reflects the implementation of the Reorganization Order effective July 1, 1973 signed by Acting Secretary Frank Carlucci (36 FR 18261, July 9, 1973), with respect to the organization of the Health Services Administration as an operating health agency of the Department. There is hereby established a new Part 3, Health Services Administration, as set forth below.

Sec. 3-A *Mission.* The Health Services Administration (3000) provides a national focus for programs and health services for all people of the United States with emphasis on achieving the integration of service delivery and public and private financing systems to assure their responsiveness to the needs of individuals and families in all levels of society.

To these ends, the Health Services Administration (3000): (1) Administers health service delivery programs supported by project grants, contracts or other arrangements; (2) provides leadership to and supports efforts designed to integrate health service delivery programs with public and private health financing programs; (3) administers formula grant-supported health services programs; (4) assures quality and contain costs of service provided through the public financing programs; (5) provides or arranges for personal health services, including both hospital and out-patient care, to designated beneficiaries; and (6) provides advice and support to the Assistant Secretary for Health in the formulation of health policies.

Sec. 3-B *Organization and functions.* The Health Services Administration (3000) is directed by an Administrator (HSA) who is responsible to the Assistant Secretary for Health. The Administration consists of the following major components, with functions as indicated:

OFFICE OF THE ADMINISTRATOR (3AA0)

Provides leadership and direction to the programs and activities of the Health Services Administration.

Immediate Office of the Administrator (3AA1). (1) Manages and directs the activities of the Health Services Administration; (2) provides leadership for the execution of Administration responsibilities related to the conduct and improvement of health services for the people of all socioeconomic levels in the United States; and (3) provides advice and support to the Assistant Secretary for Health in coordinating health services facilities and in the formulation of national health policy.

Executive Secretariat (3AA105). (1) Serves as the focal point in the control of written communications from and to the Administrator including their receipt, review, action assignment and follow-up to insure timely and appropriate action; (2) establishes standards for and insures the quality of written communications throughout the Administration; (3) maintains for the Administrator a docket of pending requests and a structured device for insuring timeliness of response; (4) plans, develops and maintains a central system of response to public and official requests for program information and guidance; (5) establishes and main-

V 39 55 MAR 20 74 XUM

tains central files for the Administrator; and (6) establishes and assures implementation of Administration correspondence procedures and policies.

Office of Equal Employment Opportunity (3AA107). (1) Provides leadership and policy and program direction to Equal Employment Opportunity Programs of the Health Services Administration; (2) provides staff advice and support to the Administrator in executing Federal equal employment opportunity policies; (3) plans and develops programs and procedures designed to eliminate discriminatory employment practices; (4) receives and provides for the investigation of complaints of alleged discrimination; and (5) maintains liaison with the Equal Employment Opportunity staff of the Assistant Secretary for Health regarding program administration and the resolution of complaints.

Office of Communications and Public Affairs (3AA3). Under the direction of the Associate Administrator for Communications and Public Affairs, who is a member of the Administrator's immediate staff: (1) Provides leadership and general policy and program direction, conducts and coordinates communications and public affairs activities of the Health Services Administration; (2) provides communications and public affairs expertise, and staff advice and support to the Administrator in program and policy formulation and execution; (3) develops and implements policies related to external media relations and internal employee communications; (4) establishes and implements procedures for development, review, processing, quality control, and dissemination of HSA communications materials; (5) serves as Communications and Public Affairs Officer for the Administrator including the establishment and maintenance of productive relationships with the communications media; (6) provides central communications services to all HSA programs in such areas as graphics and audio-visual; and (7) serves as focal point for coordination of HSA communications activities with those of other health agencies within HEW and with regional, State, local, voluntary and professional organizations.

Office of Public Information (3AA303). (1) Provides information to the news gathering and reporting media on HSA activities; (2) prepares news releases and other news material issued by the Administrator and other key officials of HSA; (3) coordinates and arranges news conferences, briefings, interviews, and appearance of the Administrator and key HSA officials on radio and television and with the print media, and (4) carries out projects on special information programs.

Office of Editorial Operations (3AA305). (1) Develops and coordinates the application of HSA policies, plans, and strategies for dissemination of health information to the public; (2) plans the preparation of, coordinates the gathering of material for, edits, and produces both public and scientific publications with HSA-wide implications; (3) prepares speech material and background information for the Administrator and other key HSA officials; and (4) prepares fact sheets on various elements of the Agency for dissemination internally and externally.

Office of Service Support (3AA307). (1) Develops and implements policies and practices for coordinating, reviewing, and approving publishing plans and activities; (2) reviews and approves distribution plans for health publications produced by the Agency; (3) maintains liaison with key HSA officials to foster informational programs and activities; (4) establishes and provides technical assistance on standards, procedures, and systems governing the management of public affairs operations within HSA; and (5) insures effectiveness of public affairs programs and operations through ongoing evaluation for accuracy and appropriateness.

Office of Audiovisual Communications (3AA309). (1) Develops and implements policies and guidelines on the use of audiovisual materials in fostering HSA programs and projects; (2) provides technical assistance to HSA operating Bureaus on the application of audiovisual techniques and the production of audiovisual materials; and (3) provides complete audiovisual services as required, including the planning and production of audiovisual materials for use by the media and the overseeing of production of audiovisual materials by contractors.

Office of Planning, Evaluation and Legislation (3AA5). Under the direction of the Associate Administrator for Planning, Evaluation and Legislation who is a member of the Administrator's immediate staff: (1) Serves as the Administrator's primary staff unit and principal source of advice on program planning, program evaluation, operational planning, regulation development, and legislative affairs; (2) develops in collaboration with financial management staff the long-range program and financial plan for the Administration; (3) oversees, in coordination with the Office of the Assistant Secretary for Health, communications between HSA and higher levels of government (including the Office of the Secretary, the Office of Management and Budget, and Congress) on all matters that involve long range plans, the regulation development process, evaluations of program performance, or legislative affairs; (4) develops long range goals, objectives, and priorities for HSA; (5) directs all activities within HSA which have the goal of comparing the costs of the agency's programs with their benefits, including the preparation and implementation of comprehensive program evaluation plans; (6) oversees the development of annual operating objectives and coordinates HSA's participation in the operational planning system; (7) directs all the legislative affairs of HSA, including the development of legislative proposals and a legislative program; (8) acts as the focal point in HSA for the preparation, development, and monitoring of program regulations; and (9) conducts policy analyses and develops policy positions in programmatic areas for HSA.

Office of Analysis (3AA503). (1) Participates in the analysis of policy issues in the planning, evaluation, regulation, and legislative areas, using its own staff expertise on each one of HSA's programs; (2) provides technical assistance to support the statistical, economic, operations research, and other scientific analyses of policy questions undertaken in HSA; (3) provides technical assistance to the other components of the Office of Planning, Evaluation, and Legislation; (4) analyzes trends and makes forecasts about national health services delivery systems for use in the program management and decision-making process; and (5) develops appropriate roles for Federal health service delivery programs in achieving solutions to problems of illness and disease.

Office of Evaluation and Operational Planning (3AA505). (1) Serves as the Administrator's primary staff unit and principal source of advice on operational planning and program evaluation; (2) oversees communications between HSA and higher levels of government on all matters that involve operational objectives or evaluations of program performance; (3) maintains liaison with other Federal and non-Federal health agencies on matters within its area of responsibility; (4) directs all activities within HSA which have the goal of comparing the costs of the agency's programs with their benefits; (5) identifies for the Administrator any missing program performance data required for use in the management and direction of HSA programs; (6) prepares and implements comprehensive program evaluation strategies to obtain needed evaluative data; (7) monitors on-going information systems which produce evaluative data about the agency's programs; (8) performs analyses of the impact of agency programs on specific groups within the population including minorities; (9) oversees the development of annual operating objectives and coordinates HSA's participation in the operational planning system; (10) collects and analyzes periodic reports of progress toward the achievement of annual objectives; (11) identifies problem areas in achieving operational objectives and recommends actions to be taken in response to those problems; and (12) provides staff support for the Administrator on matters involving management conferences with higher level officials.

Office of Program Planning (3AA507). (1) Serves as the Administrator's primary staff unit and principal source of advice on program planning; (2) oversees communications between HSA and higher levels of government on all matters that involve program plans; (3) maintains liaison with other Federal and non-Federal health agencies on matters within its areas of responsibility; (4)

develops long range goals, objectives, and priorities for HSA; (5) develops in collaboration with financial management staff the long-range program and financial plan for the Administration; (6) analyzes budgetary data with regard to planning guidelines; (7) prepares policy analysis papers and other planning documents as required in HSA's forward planning process and (8) collaborates with the Office of Management in the development of the current and budget year financial plans.

Office of Legislation (3AA509). (1) Serves as the Administrator's primary staff unit and principal source of advice on legislative affairs; (2) acts as the focal point in the agency for the preparation, development, and monitoring of HSA's regulations; (3) oversees communications between HSA and higher levels of government on all matters that involve legislative affairs and regulation development; (4) oversees the legislative affairs of HSA; (5) develops legislative proposals and a legislative program for HSA's area of responsibility; (6) prepares HSA's analyses, position papers, and reports on proposed legislation; (7) assists in the preparation of testimony and backup materials on HSA legislative program for presentation to Congressional Committees; (8) monitors hearings and Congressional activities affecting HSA; (9) coordinates the preparation of information requested by, and provides technical assistance to, Congressional Committees, Members of Congress, or their staffs in relation to HSA's legislative program and (10) coordinates the distribution of legislative materials and serves as a legislative reference center.

Office of Management (3AA9). Under the direction of the Associate Administrator for Management, who is a member of the Administrator's immediate staff: (1) Provides Administration-wide leadership, program direction, and coordination of all phases of management; (2) provides management expertise, and staff advice and support to the Administrator in program and policy formulation and execution; (3) plans, directs and coordinates the Administration's activities in the areas of management policy, financial management, personnel management, grants and contracts management, procurement, real and personal property accountability and management, systems management, and administrative services; (4) plans and conducts an Equal Employment Opportunity program for the Office of the Administrator; and (5) provides direction to the Executive Officer for the Office of the Administrator.

Office of Contracts and Grants (3AA903). (1) Formulates and issues Administration policies, procedures, standards and instructions for procurement management (including negotiated contracts) and grants management; (2) provides advice and consultation on interpretation and application of regulatory issuances, and Department and PHS policies and procedures affecting procurement (contracting) and grants management; (3) establishes standards and guides for, and evaluates the Administration's grants and procurement management operations; (4) compiles, analyzes and publishes data essential to the administration of contracting and grants activities; (5) executes, administers and terminates negotiated contracts; (6) reviews and recommends action concerning requests for waivers, appeals, deviations, determinations and findings, and protects against awards required to be directed to the Office of the Secretary; (7) coordinates Administration positions and actions with respect to grants audit requirements and results; and (8) exercises surveillance over the exercise of delegated procurement authorities by HSA filed installations.

Office of Financial Management (3AA905). (1) Collaborates in the development of the long range program and financial plan for the Administration; (2) develops policies and instructions for budget preparation and presentation; (3) prepares budget submissions; (4) participates in budget hearings; (5) allocates resources, dollars and positions; (6) manages a system of budgetary fund and position controls; (7) directs planning and implementation of fiscal systems and procedures; (8) provides accounting services for activities of the Office of the Assistant Secretary for Health, Health Services Administration, Health Resources Administration, Alcohol, Drug Abuse, and Mental Health Administration, and Center for Disease Control; (9) prepares financial reports; (10) participates in development of policies and procedures concerning financial aspects of grants and negotiated contracts; (11) furnishes financial advice to contracting officers; and (12) maintains liaison with the Office of the Assistant Secretary for Health, Office of the Secretary, and Office of Management and Budget.

Office of Management Policy (3AA907). (1) Conducts organization and management studies and surveys; (2) initiates or reviews proposals for establishing or modifying organizational structure or function, delegations of authority, and management objectives, policies, and standards; (3) negotiates solutions to intra- and inter-agency problems of organization, functions, delegations, procedures, or coordination; (4) conducts Administration-wide management improvement programs including manpower utilization and productivity measurement; (5) participates in program and legislative planning to assure recognition of management problems; (6) manages the documentation and issuance system of the Administration; (7) provides staff support in the establishment, organization, operation, and termination of HSA public advisory committees; and (8) conducts the records and forms management programs of the Administration.

Office of Personnel (3AA909). (1) Plans, directs, and coordinates personnel management programs to meet the particular needs of the Health Services Administration; (2) provides personnel management advisory services to the Administrator, Associate Administrator for Management, and other key officials throughout the Administration; (3) develops policies, procedures, and standards for personnel matters involving both Commissioned Officers and civil service employees in those areas where special Health Services Administration requirements exist; (4) provides staff guidance and support to headquarters and field components in the areas of manpower planning, employment, employee development, upward mobility, labor relations, employee relations, security, position and pay management and in the self-evaluation of personnel activities; and (5) maintains liaison with the Office of the Assistant Secretary for Health, the Office of the Secretary, the Civil Service Commission, and other agencies concerned with personnel management.

Office of Property Management (3AA911). (1) Plans, directs, and coordinates property management programs (including personal and real property) covering Headquarters and field activities; (2) provides advice on matters relating to the development and execution of property management policies and programs; (3) develops procedures and provides training for property management operations; (4) interprets regulatory issuances and provides guidance and technical assistance in property management areas; (5) evaluates Health Services Administration property management programs, systems and activities (including on-site reviews); (6) administers a Health Services Administration-wide program for safety management; (7) administers the Perry Point Supply Service Center and (8) maintains necessary liaison with other organizations concerned with property management activities.

Office of Systems Management (3AA913). (1) Serves as the focal point in HSA for the development of Agency-wide systems and for ADP policy, planning, and evaluation; (2) Facilitates coordination within the Administration to ensure compatibility between Administration, PHS, and Department ADP activities; (3) Develops HSA information systems; (4) Develops and implements an HSA ADP evaluation program to evaluate ADP resource utilization and to assess the utility of computer application systems; (5) Establishes the Data Base Administration program within HSA; (6) Develops, operates, and manages the Parklawn central computer facility performing a service function for CDC, HRA, HSA, OASH, and ADAMHA, and providing services to other Federal components as requested; (7) Coordinates with officials of these organizations to ensure that operational equipment and systems needs are met and that adjustments are made as changes in Program emphasis occur; (8) Participates in the development of Public Health Service-wide information systems; (9) Evaluates and obtains data management systems and other software to meet user information system requirements; (10) Participates in audits of information systems; (11) Participates in the development and implementation of a PHS National-wide communications network; and (12) De-

V 39 55

XUM

velops and implements a program to evaluate ADP resource utilization within the Parklawn complex.

Executive Office (3AA915). (a) For the Office of the Administrator plans, directs, and coordinates administrative management activities; (b) Provides administrative management services including personnel, financial, materiel management and general administrative services; (c) Develops and implements management policies, procedures, systems and practices; (d) Serves as the focal point for liaison with the Office of the Assistant Secretary for Health on financial, personnel, organization, supply, and other management concerns of OA; and (e) Acts for the Associate Administrator for Management concerning space, parking, and communications management for HSA headquarters and represents him in matters relating to the management of the Parklawn Building.

BUREAU OF COMMUNITY HEALTH SERVICES (3B00)

The Bureau of Community Health Services serves as a national focus for efforts to improve the organization and delivery of health services in the context of the major health care financing programs. To this end, the Bureau (1) facilitates the development of locally-based programs of health services delivery; (2) initiates activities which provide alternate methods of health service delivery and health maintenance; (3) enhances the capacity of existing health service programs for full participation in the major public health financing systems—Medicare and Medicaid; (4) administers programs providing specific services to specific populations including family planning, maternal and child health care, and migrant care; (5) directs programs, including the National Health Service Corps, which assure accessibility to health care in underserved areas; and (6) improves quality and contains costs of services provided in grant-initiated health service delivery programs.

Office of the Director (3B01). (1) Provides leadership and direction for Bureau activities including Equal Employment Opportunity, and control of written communications; (2) provides guidance and coordination to each major categorial program provided for by legislation or appropriation, by acting as a central point of reference for program continuity and information; (3) establishes program policies, goals and objectives; (4) provides program development and support services for Bureau activities; (5) communicates and interprets program policies, guidelines, and priorities to Regional Offices; (6) stimulates, coordinates and evaluates development and progress of the Bureau activities; (7) maintains relationships with HSA, other HEW operating agencies, other Federal agencies, and through the Regional Offices, State and local governments, consumer groups, and national organizations concerned with health affairs.

Program Office for National Health Service Corps (3B04); Program Office for Maternal and Child Health (3B05); Program Office for Family Planning (3B06); Program Office for Migrant Health (3B07); Program Office for Neighborhood Health Centers (3B08); Program Office for Health Maintenance Organizations (3B09).

Under the direction of an Associate Bureau Director who is a member of the Bureau Director's immediate staff: (1) Carries out the Bureau of Community Health Service's nationwide role in efforts to improve the organization and delivery of health services by serving as both the advocate and point of accountability for the specific categorical programs; (2) develops and establishes national policies and objectives for such programs; (3) provides leadership and direction for legislative activities in the program area, including both the development of proposals and plans and the interpretation of enacted legislation and reports; (4) develops long and short-range program goals and objectives; (5) is accountable for the administration of funds and other resources for grants, contracts, and technical assistance, utilizing the full resources of the Bureau in fulfilling the program's mission and responsibilities; (6) tracks BCHS and Regional Office activities in program matters to insure that delegated responsibilities are being carried out, including direct and indirect communications, Regional Office conferences and field visits as warranted; (7) coordinates the development of, and establishes regulations, guidelines, and standards for professional services, and for the effective organization and administration of health programs, and the improvement of health services and staff development specific to the program of concern; (8) interprets policies, regulations, guidelines, standards, and priorities to higher echelons, within PHS, to Regional Offices, grantee agencies, institutions and organizations; (9) provides coordination with other programs providing health services including voluntary official and other community agencies; (10) establishes and provides liaison in program matters with other programs within BCHS and HSA, within PHS, with the Department and with other Federal agencies, consumer groups and national organizations concerned with health matters, and through the Regional Offices, with State and local governments.

Office of Program Support (3B19). (1) Plans, directs, and evaluates the administrative management support activities of the Bureau; (2) provides guidance to the Bureau on financial management activities, including program policy interpretation in budget formulation and execution, preparation of program planning and budgeting data and financial management of grants; (3) participates and advises the Bureau Director in the allocation of the Bureau's personnel and funding resources; (4) interprets and implements agency management policies, procedures and systems and develops additional policies and procedures to satisfy other internal management requirements of the Bureau; (5) interprets policy and provides direction in the conduct of the Bureau's contract and formula and project grant activities; (6) provides program support services to the operating components of the Bureau on matters relating to the professional public and other Federal and non-Federal organizations; (7) provides administrative support services to the programs of the Bureau in the conduct of day-to-day operations; (8) serves as the Bureau Director's principal advisor on all matters relating to Bureau management and administrative support activities; and (9) maintains close liaison with the Associate Administrator for Management, HSA, with other officials of the Office of the Administrator, HSA, and as required and appropriate with officials of the Office of Assistant Secretary for Health and the Office of the Secretary on matters relating to the Bureau management and administrative support activities.

Office of Program Development (3B31). (1) Serves as the Bureau Director's principal staff arm for program planning and coordination, including the development of program alternatives and policy positions; (2) oversees planning and tracking functions in support of policy formulation and program implementation; (3) advises the Bureau Director and his immediate staff on program policy and operational implications arising from activities of the Office; (4) collaborates with the Program Support Office in the development and implementation of the 5-year program and financial plan for the Bureau's program planning and budgeting system; (5) coordinates the development of legislative program with planning; and (6) conducts special inquiries and studies.

Division of Policy Development (3B41). (1) Directs and administers the development of (a) policy, regulations, guidelines, related standards necessary for the operation, management and evaluation of legislated health care programs administered by the Bureau; and (b) criteria, methods and guides for program performance, and for the annual allocation of funding resources; (2) provides related consultation to Regional Office staffs, and through the Regional Offices, to State and local agencies, grantees and other representatives of the health care delivery system.

Division of Clinical Services (3B45). (1) Plans, directs, administers and coordinates the Bureau's Clinical Services and related professional health care activities at both the national and international level through programs of grants, contracts and direct staff consultation, guidance and technical assistance support; (2) establishes program objectives, standards and policies for guidance, through the Regional Offices, of state, local and other concerned organizations; (3) administers programs for: (a) research and development, (b) applied research in maternal and child health, crippled children and family planning

services; (c) staff training and development for regional, state and local agencies and grantees, and (d) areas of special concern such as mental retardation, lead poisoning, metabolic disorders, etc.; (4) collaborates in the development and dissemination of materials on research findings, trends and developments and other appropriate informational and educational matters.

Division of Health Services Financing (3B51). (1) Directs and administers the development of (a) policy, standards, and strategies in the organization and administration of financial and related business management aspects of health care programs administered by the Bureau, (b) mechanisms for determining the need, the present status, and the potential capability for maximizing third party reimbursement, (c) new or improved technologies, and practices for management of financial systems, and (d) measures and indicators of the effectiveness of these systems; (2) provides related technical advice and consultation to Regional Office staffs, and through Regional Offices to State and local agencies, grantees and other representatives of the health care delivery system; (3) collaborates with other Bureau organizations to facilitate the use and dissemination of research findings and to inform the public about the health delivery needs, trends, and developments of special population groups served by the Bureau.

Division of Organization Development (3B55). (1) Directs and administers a program to improve the organization and structure of health care delivery systems based on analyses of deficiencies in existing systems so as to reduce costs and increase quality and efficiency; (2) participates in the development and assessment of measures and indicators of program effectiveness; (3) provides related consultation to Associate Bureau Directors, PHS Regional Office staffs, State and local agencies, grantees and other representatives of the health care delivery system.

Division of Monitoring and Analysis (3B59). (1) Plans, directs, and administers: (a) the development, management, and application of evaluative tools and indicators to measure State, local and other grantee performance, (b) the monitoring, through Regional Offices, of the performance of Bureau health care projects, including PHS Regional Office management of these projects, as it relates to the efficiency and quality of services provided, and (c) the conducting of analyses and studies designed to supplement knowledge of existing patterns and trends in health care delivery systems in order to identify gaps in services and develop cost and quality comparisons and relative benefits of delivery mechanisms; and (2) provides and coordinates consultative services to PHS Regional Offices, and through the Regional Offices, to State and local agencies, and others responsible for the health care delivery system.

BUREAU OF QUALITY ASSURANCE (3H00)

Provides national leadership and direction to efforts to assure that health care services provided under the Medicare, Medicaid, and other Federal programs are medically necessary and furnished in the most economical manner consistent with recognized professional standards of care, and serves as the national focus for assuring accountability to health care consumers for the quality of health care services. To this end, the Bureau: (1) In coordination with the Social Security Administration (SSA) the Social and Rehabilitation Service (SRS), and components of the Public Health Service (PHS): (a) Develops quality assurance standards and appropriate health policies, coordinates their implementation among the health programs for which the Federal government has responsibility, and evaluates their impact on the utilization, quality, and cost of health care services; (b) develops conditions and standards of participation for providers and suppliers of health services under the Medicare and Medicaid programs, including health and safety standards, and coordinates their application, monitoring, and appraisal; (c) develops, interprets, and implements policies for professional standards review and related peer review and utilization review programs under Medicare and Medicaid including responsibility for entering into agreements with Professional Standards Review Organizations (PSROs) and Professional Standards Review (PSR) State Councils; (d) develops, interprets, and evaluates health care and health-related policies with respect to the implementation of the End-Stage Renal Disease provision of the Social Security Act, and coordinates with Medicare the implementation and monitoring of these policies; (e) develops and implements principles of reimbursement for PSROs, PSR State Councils, and develops policies with respect to the operational aspects of peer and utilization review programs including their monitoring, and evaluation; (2) identifies issues for Office of the General Counsel (OGC) analysis on such legal and technical aspects as peer review, utilization review and health standards policies; (3) determines information and data reporting, collection, and systems requirements for PSRO, and coordinates their implementation with SSA, SRS, and the Health Resources Administration (HRA); (4) in cooperation with SSA and HRA, determines information requirements and develops systems to implement such requirements to assure the quality of services provided under the End-Stage Renal Disease Program: (5) coordinates activities of other agenices involved in the monitoring and appraisal of peer review and health-related Federal programs to determine the impact on quality, utilization, access, and cost of care; (6) in collaboration with HRA undertakes demonstration and research projects to develop improved methods and techniques for conducting peer review and assuring quality of care; (7) conducts ongoing programs of informational and technical advice and assistance to peer review organizations and the medical community generally; (2) provides programmatic and technical direction to the PHS Regional Office staffs responsible for peer review and health standards programs; and (9) provides analytic and technical support to the National Professional Standards Review Council.

Office of the Director (3H01). (1) Provides leadership and general direction to Bureau activities including Equal Employment Opportunity and the control of written communication, and provides guidance and coordination to each major Bureau component by acting as a central point of reference for program continuity and information; (2) establishes Bureau policies, goals, and objectives; (3) communicates and interprets program policies, guidelines, and priorities to PHS Regional Offices; (4) coordinates and evaluates development and progress of the Bureau activities; and (5) maintains relationships with other HEW operating agencies, other Federal agencies, State and local governments, consumer groups, and national organizations concerned with health affairs.

Office of Program Support (3H19). (1) Plans, directs, and evaluates the administrative management support activities of the Bureau; (2) Provides guidance to the Bureau on financial management activities, including program policy interpretation in budget formulation and execution, preparation of program planning and budgeting data and financial management of agreements; (3) participates and advises the Bureau Director in the allocation of the Bureau's personnel and funding resources; (4) interprets and implements agency management policies, procedures and systems and develops additional policies and procedures to satisfy other internal management requirements of the Bureau; (5) interprets policy and provides direction in the conduct of the Bureau's contract and agreement activities; (6) provides program support services to the operating components of the Bureau on matters relating to the professional public and other Federal and non-Federal organizations; (7) provides administrative support services to the programs of the Bureau in the conduct of day-to-day operations; (8) serves as the Bureau Director's principal advisor on all matters relating to Bureau management and administrative support activities; and (9) maintains close liaison with the Associate Administrator for Management, HSA, with other officials of the Office of the Administrator, HSA, and as required and appropriate with officials of the Office of Assistant Secretary for Health and the Office of the Secretary on matters relating to the Bureau management and administrative support activities.

Office of Program Development (3H31). (1) Serves as the Bureau Director's principal staff arm for program planning and coordination, including the development of program alternatives and policy positions; (2) oversees planning and tracking functions in support of policy formulation and program implementation; (3) advises the Bureau Director and his immediate staff on program policy and operational implications arising from activities of the Bureau; (4) collaborates with the Office of Program Support and operating Divisions in the

V 39 55 MAR 20 74 XUM

development and implementation of the 5-year program and financial plan for the Bureau's program planning and budgeting system; (5) coordinates the development of information relating to the legislative needs of the Bureau; and (6) conducts special inquiries and studies.

Division of Provider Standards and Certification (3H41). (1) In coordination with SSA, SRS, and components of PHS, develops, evaluates, and implements health and safety standards and other medical care policies for providers and suppliers of health services under Medicare, Medicaid, and other Federal reimbursement and support programs; (2) in participation with SSA, SRS, and other components of HEW, administers, monitors and evaluates the HEW health provider and supplier certification programs; (3) participates with SSA and SRS in the conduct of training, informational, and other activities for improving the provider and supplier certification program; (4) provides consultation on provider and supplier standards and their implementation to other Federal agencies, Regional Offices, State health departments, and other State and local agencies; (5) in cooperation with SSA, plans, develops, and implements the medical and other health-related policies for the End-Stage Rental Disease Program; and (6) participates as the Bureau focal point in policy operations and procedural matters relative to long-term care activities.

Division of Peer Review (3H43). In coordination with SRS and SSA: (1) Plans, directs, and develops peer review and quality assurance policies, including utilization review, medical review, and independent professional review; (2) develops policies and procedures for the application of norms and professional standards of care; and (3) defines and develops policies and procedures related to the application and implementation of peer review programs.

Division of PSRO Program Operations (3H45). (1) Coordinates with SSA and SRS the implementation and ongoing operational activities of Federal programs, including Medicare and Medicaid, with respect to peer and utilization programs, and other quality assurance policies; (2) develops, implements, and applies with SSA and SRS on an ongoing basis policies relating to fiscal management of peer review program, including the principles of reimbursement for PSROs and PSR State Councils, the budgeting, accounting, reports management, statistical reporting, and auditing requirements applicable to such peer review organizations and PSR State Councils; (3) directs the administration in coordination with SSA–SRS, and evaluation of peer review and quality assurance program management policies including the application of policies and guidelines relating to the organization, membership, and management of PSROs and State Councils, the negotiation of PSRO agreements in collaboration with PHS Regional staff, and the coordination with the Office of Regional Operations, Office of the Assistant Secretary for Health, the Regional operations and relationships among SSA–SRS–PHS Regional staffs; (4) provides advice and assistance to PHS Regional offices, PSROs, and State Councils with respect to fiscal and program management activities; and (5) prepares issues for OGC analyses relating to legal aspects of peer review and quality assurance and coordinates with SSA–SRS–OGC the development of appropriate policies with respect to legal aspects of peer review and quality assurance programs.

Division of Program Appraisal and Data Planning (3H47). (1) Develops, in collaboration with SSA–SRS–HRA, peer review data systems policies, procedures, and requirements, including specifications of peer review data systems required for effective implementation of the PSRO provisions of the Social Security Act; (2) in coordination with other appropriate components of DHEW, develops policies for the evaluation and evaluates the impact of peer review activities on the utilization, quality and cost of health services; (3) coordinates the development, monitoring, and evaluation of peer review demonstration projects, experimental projects and special research projects designed to elicit information or data relevant to the formulation and implementation of policies on peer review, health standards, and the End-Stage Renal Disease Program; (4) in collaboration with SSA, and other Bureau components, assists in evaluating the impact of End-State Renal Disease Program; and (5) designs and implements statistical and other reporting systems necessary to carry out effectively health program monitoring and evaluation activities.

INDIAN HEALTH SERVICE (3S00)

The Indian Health Service (IHS) assures a comprehensive health services delivery system for American Indians and Alaska Natives with sufficient options to provide for maximum tribal involvement in meeting their health needs. The goal for the Indian Health Service is to raise the health level of the Indian and Alaska Native people to the highest possible level.

To carry out its mission and to attain its goal, the Indian Health Service: (1) Assists Indian tribes in developing their capacity to man and manage their health programs through activities including health and management training, technical-assistance, and human resource development; (2) facilitates and assists Indian tribes in coordinating health planning, in obtaining and utilizing health resources available through Federal, State, and local programs, in operation of comprehensive health programs, and in health program evaluation; (3) provides comprehensive health care services, including hospital and ambulatory medical care, preventive and rehabilitative services, and development of community sanitation facilities; (4) serves as the principal Federal advocate for Indians in the health field to assure comprehensive health services for American Indians and Alaska Natives.

Office of the Director (3S01). Provides overall direction and leadership for the Indian Health Service by: (1) Establishing goals, objectives, policies and priorities in pursuit of the IHS mission; (2) delivering high quality, comprehensive health services; (3) coordinating the Indian Health Service activities and resources internally and externally with those of other governmental and nongovernmental programs, promoting optimum utilization of all available health resources; (4) developing and demonstrating alternative methods and techniques of health services management and delivery providing Indian tribes and other Indian community groups with optional ways of participating in the Indian health program; and (5) developing individual and tribal capacities to participate in the operation commensurate with means and modalities which they deem appropriate to their needs and circumstances.

Office of Tribal Affairs (3S11). The Office: (1) Advises on the tribal affairs implications of Service policies, plans, and programs and operations; (2) coordinates the development of optimal, supportive relationships with tribal governments, intertribal governing bodies, national Indian interest groups, and other individuals and groups interested and active in Indian affairs; (3) participates in the Service-wide executive policy formulation and execution.

Office of Program Support (3S19). The Office: (1) Provides management support services for the Indian Health Service; (2) maintains official policy manuals; (3) advises on the management services implications of the Service policies, plans, programs and operations.

Office of Research and Development (3S20). The Office: (1) Develops and demonstrates new methods and techniques for Indian community participation in and management of their health program; (2) provides consultation and technical assistance to all operating and management levels of the Indian Health Service and Indian tribes in the evaluation, design and implication of health management systems and health delivery systems; (3) coordinates health research and development activities within the Service directed to the improvement of the health of the Indian people.

Division of Program Formulation (3S32). (1) Coordinates formulation of Service-wide executive policy and participates in its execution; (2) coordinates the development of program strategies and innovative directions for the Service, and advises on the strategic implications of program and management policies, plans and operations; (3) assists in the formulation, and evaluation of legislation and regulations; (4) provides Service-wide leadership in the development of long-range plans and planning strategies, and the evaluation of health needs and operations in relation to Service strategies, policies and long-range plans.

Division of Program Operations (3S34). (1) Participates in Service-wide executive policy formulation and execution; (2) advises on the operational implications of the Service's plans, programs and operations; (3) provides Service-wide leadership in program operations and internal coordination in relation to Service goals, objectives, policies and priorities; (4) provides direction and coordination for day-to-day operations of Area Offices.

Division of Indian Community Development (3S42). (1) Participates in Service-wide executive policy formulation, and execution; (2) identified the needs for and characteristics of optional methods and techniques for Indian program participation; (3) implements new methods and techniques for Indian community participation in and management of their health programs; (4) coordinates provision of technical assistance, training and consultation to tribes and other Indian communities desiring to implement local control options; (5) advises on the Indian community development implications of the Service's plans, programs and operations; (6) provides direction and coordination for day-to-day operations of special programs.

Division of Resource Coordination (3S44). (1) Participates in the Service-wide executive policy formulation and execution; (2) provides leadership in coordinating development of optimal liaison with governmental agencies and organizations within the Department of Health, Education, and Welfare and without, which have authorities, programs and resources applicable, or potentially applicable to Indian health needs; (3) advises on the resource coordination implications of Service policies, plans, programs and operations; (4) coordinates development of the Service budget; (5) coordinates the development and implementation of health services standards, quality control, evaluation of health programs, and operational planning activities.

BUREAU OF MEDICAL SERVICES (3U00)

The Bureau of Medical Services provides direct health care services and support for such services to certain legal beneficiaries of the Public Health Service, including meeting the occupational health needs of Federal employees, and provides national leadership to assist and encourage the development of comprehensive area emergency medical services systems. To this end the Bureau provides: (1) Comprehensive direct health care for designated Federal beneficiaries and selected community groups; (2) Occupational health care and safety services for Federal employees; (3) Training for health services personnel; (4) The conduct of intramural clinical and health services research; (5) National leadership for assistance and guidance in the development, improvement, expansion, and integration of comprehensive area emergency medical services systems.

Office of the Director (3U01). (1) Provides leadership and general direction to Bureau activities, including Equal Employment Opportunity and the control of written communication, and provides guidance and coordination to each major Bureau component by acting as a central point of reference for program continuity and information; (2) Establishes Bureau policies, goals, and objectives; (3) Communicates and interprets program policies, guidelines, and priorities to the PHS Regional Offices; (4) Coordinates and evaluates development and progress of the Bureau activities; and (5) Develops and directs a comprehensive medical program for prisoners in Federal prisons and correctional institutions; and development and progress of the Bureau activities; and (6) Maintains relationships with other HEW operating agencies, other Federal agencies, State and local governments, consumer groups, and national organizations concerned with health affairs.

Office of Program Development (3U14) Provides staff support to the Bureau Director for: (1) Program planning and evaluation, including development of improved methodologies for planning and evaluation; (2) consultation and guidance in policy development for the Bureau; and (3) leadership, guidance, and coordination for Bureau professional and technical health manpower development responsibilities.

Office of Program Support (3U19) Plans, directs, and coordinates the Bureau's management activities, including: (1) The development, coordination, and evaluation of administrative program, policies and procedures; (2) the conduct and coordination of the Bureau's financial management, materiel management, and data management programs; (3) participation in administrative staff recruitment, training and assignment; (4) provision of consultative services to and continuing liaison with other programs of the Public Health Service; (5) provision of architectural and engineering services in collaboration with the PHS Office of Resource Management; and (6) the formulation, implementation, coordination, and evaluation of legislation, regulations, policies, instructions, and procedures as they affect the Bureau.

Division of Federal Employee Health (3U45). (1) Provides on, and stimulates the development of, and improved occupational health and safety programs throughout the Government; (2) elevates upon request Federal agency occupational health services in relation to standards; (3) administers employee occupational health programs for other Federal agencies on a reimbursable basis; (4) conducts research studies, training and demonstration projects; (5) develops occupational medical standards and methods for Federal employee occupational health programs; and (6) promotes activities designed to protect the working health and safety of Federal employees in order to maximize their productivity.

Division of Hospitals and Clinics (3U55). (1) Directs and coordinates the provision of direct health and medical services to certain legal authorized beneficiaries in PHS hospitals and outpatient clinics, including care by contract physicians and hospitals; (2) coordinates, with other elements of the Bureau, the requirements and resources necessary for effective beneficiary services; (3) provides for training and manpower development, the coordination of research activities, and special health programs and projects of the Bureau; and (4) develops and directs a comprehensive medical services program for Federal employees who sustain an injury or illness as a result of their employment and provides technical advice in the adjudication of compensation claims.

Division of Emergency Medical Services (3U61). Provides national leadership for assistance, guidance, and encouragement in the development, improvement, expansion, and integration of comprehensive area emergency medical services systems to meet the needs of States and local communities and other eligible entities pursuant to the Emergency Medical Services Systems Act of 1973 (Pub. L. 93–154). To this end: (1) Serves as the focal point within the Department for the development of objectives, plans, and policies for all aspects of an emergency medical services systems program; (2) promulgates national standards and guidelines for emergency medical services systems; (3) coordinates emergency medical services systems activities within the Department and with Federal and other agencies, consumer groups, and professional organizations; (4) provides staff and support for the Interagency Committee on Emergency Medical Services; (5) collects, analyzes, catalogues and disseminates all data useful in the development and operation of emergency medical services systems; (6) provides budget authority and technical cooperation to the Health Resources Administration for implementation of emergency medical services systems research and training; (7) through the PHS Regional Offices, provides grants and contracts to States, communities, and other eligible entities in the planning, development, initial operation, and improvement and expansion of their emergency medical services systems and subsystems; (8) through the PHS Regional Offices and the Headquarters office, provides technical assistance and consultation to States, communities, and organizations in the development of emergency medical services systems and subsystems.

Division of Coast Guard Medical Services (3U71). (1) Develops and directs a comprehensive medical program for military personnel of the Coast Guard; and (2) provides medical and dental care to Coast Guard military personnel and eligible dependents through hospitals, clinics, infirmaries, sick bays, motorized dental units, and contract resources located throughout the United States and foreign countries and aboard Coast Guard vessels.

V 39 55 MAR 20 74 XUM

Sec. 3–C *Order of succession.* During the absence or disability of the Administrator or in the even of a vacancy in that office the first official listed below who is available shall act as Administrator, except that during a planned period of absence the Administrator may specify a different order of succession.

(1) Deputy Administrator; (2) Associate Administrator; (3) Director of Indian Health Service; (4) Director of Federal Health Programs Service; (5) Director of the Bureau of Community Health Services; and (6) Director of the Bureau of Quality Assurance.

Sec. 3–D *Delegations of authorities.* (1) The Administrator shall continue to exercise all authorities given to him under the Reorganization Order, effective July 1, 1973 (38 FR 18261, July 9, 1973), and under the Redelegation by the Assistant Secretary for Health, effective July 1, 1973 (38 FR 18260, July 9, 1973). All delegations or redelegations to any other officer or employee of the Health Services Administration which were in effect immediately prior to July 1, 1973, continue in effect in them or their successors, pending issuances of redelegations.

Dated: March 12, 1974.

S. H. CLARKE,
Acting Assistant Secretary for Administration and Management.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

NATIONAL HIGHWAY SAFETY ADVISORY COMMITTEE; AD HOC TASK FORCE ON ADJUDICATION

Notice of Public Meeting

On March 29–30, 1974, the National Highway Safety Advisory Committee's Ad Hoc Task Force on Adjudication will hold an open meeting at the Rodeway Inn, 29th and Chinden Boulevard, Boise, Idaho.

The National Highway Safety Advisory Committee is composed of 35 members appointed by the President in accordance with the Highway Safety Act of 1966 (23 U.S.C. 401 et seq.). The Committee consists of representatives of State and local governments, State legislatures, public and private interests contributing to, affected by, or concerned with highway safety, other public and private agencies, organizations, and groups demonstrating an active interest in highway safety, and research scientists and other experts in highway safety.

The Advisory Committee advises, consults with, and makes recommendations to the Secretary of Transportation on matters relating to the activities of the Department in the field of highway safety. The Committee is specifically authorized (1) to review research projects or programs, and (2) to review, prior to issuance, standards proposed to be issued by the Secretary under the national highway safety program.

The Ad Hoc Task Force on Adjudication will meet on March 29 from 9 a.m. to 5 p.m. and on March 30 from 9 a.m. to 12 noon at the Rodeway Inn in the Bannock Room with the following agenda:

Traffic Offense Adjudication and Rehabilitation Alternatives for Problem Drivers
New Business

The above meetings will be held, subject to approval by the Secretary of Transportation.

Further information may be obtained from the Executive Secretariat, National Highway Traffic Safety Administration, Department of Transportation, 400 Seventh Street SW., Washington, D.C. 20590, telephone 202–426–2872.

This notice is given pursuant to section 10(a)(2) of Public Law 92–463, Federal Advisory Committee Act (FACA), effective January 5, 1973.

Issued: March 15, 1974.

CALVIN BURKHART,
Executive Secretary.

ATOMIC ENERGY COMMISSION

[Docket No. STN 50–437]

OFFSHORE POWER SYSTEMS

Notice of Exception

Section 105c(7) of the Atomic Energy Act of 1954, as amended (the Act), provides that the Atomic Energy Commission may, with the approval of the Attorney General, except from any of the requirements of section 105c of the Act such classes or types of licenses as the Commission may determine would not significantly affect the applicant's activities under the antitrust laws as specified in subsection 105a.

An application for a manufacturing license has been submitted to the Commission by Offshore Power Systems (the applicant) a joint venture between Westinghouse Electric Corp. and Tenneco Power Systems, Inc. In the application Offshore Power Systems requests authority to manufacture eight utilization facilities to be sold to one or more utilities for operation in a marine environment.

Subsequent to the filing of the application the applicant requested, pursuant to 28 CFR Part 50, that the Department of Justice perform a business review to determine the Antitrust Division's enforcement intentions with respect to the joint venture. The Department of Justice has completed its business review process, and, on the basis thereof, rendered favorable advice to the applicant in a letter dated October 5, 1973. A copy of the Department's letter is on file in the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

On the basis of favorable antitrust review by the Department of Justice, the Commission has determined that the class or type of license reflected in the application submitted by Offshore Power Systems would not significantly affect the applicant's activities under the antitrust laws as specified in section 105a of the Act and, accordingly, has, with the approval of the Attorney General, excepted such class or type from the requirements of section 105c of the Act.

This determination applies only to the above-described class or type of manufacturing license as reviewed by the Department of Justice. The provisions of section 105c of the Act remain fully applicable in regard to applications for the construction and operation of facilities manufactured pursuant to such manufacturing licenses.

(Sec. 105c(7), 84 Stat. 1473 (42 USC 2135(c)(7))

Dated at Germantown, Maryland, this 14th day of March, 1974.

For the Atomic Energy Commission.

PAUL C. BENDER,
Secretary of the Commission.

[Docket No. 50–201]

NUCLEAR FUEL SERVICES, INC. AND NEW YORK STATE ATOMIC AND SPACE DEVELOPMENT AUTHORITY

License No. CSF–1; Applications for Amendments; Conversion to Full-Term Operating License; Time for Submission of Views on Antitrust Matter

Nuclear Fuel Services, Inc., and New York State Atomic and Space Development Authority (the applicants), have filed applications for amendments to License No. CSF–1, including any construction permit required for authorization to perform certain modifications to the West Valley Fuel Reprocessing Plant and authorization to operate the modified Facility for a term of 40 years. Pursuant to the Commission's order of November 13, 1973, published in the FEDERAL REGISTER on November 20, 1973 (38 FR 31985), the applications will be processed in accordance with the requirements of section 103 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations pertaining to applications for a license pursuant to section 103 of the Act.

An application was tendered by Nuclear Fuel Services, Inc., on October 3, 1973. Following a preliminary review for completeness, it was amended and resubmitted on December 13, 1973. The application for the New York State Atomic and Space Development Authority was submitted on December 13, 1973. The applications were docketed on December 17, 1973.

The West Valley Fuel Reprocessing Plant is located in the Western New York Nuclear Service Center in the town of Ashford, near Riceville, Cattaraugus County, New York, about thirty miles south of Buffalo. After modification, the reprocessing facility will have an operating capacity of approximately 750 metric tons of uranium per year.

A Note of Hearing with opportunity for public participation is being published separately.

Any person who wishes to have his views on the antitrust aspects of the applications presented to the Attorney General for consideration shall submit such views to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attn: Chief, Office of Antitrust and Indemnity, Directorate of Licensing, Regulation, on or before May 20, 1974.

The request should be filed in connection with Docket No. 50–201A.

Copies of the applications are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545, and at the Memorial Library of Little Valley, Main Street, Little Valley, New York.

The applicants have also filed, pursuant to the National Environmental Policy Act of 1969, and the regulations of the Commission in Appendix D to 10 CFR part 50, an environmental report dated December 13, 1973. The report has been made available for public inspection at the aforementioned locations. The report, which discusses environmental considerations related to the proposed modifications and subsequent operation of the modified West Valley Fuel Reprocessing Plant is also being made available at the State Clearinghouse, New York State Office of Planning Services, 488 Broadway, Albany, New York 12207 and at the Southern Tier West Regional Planning Board, 303 Court Street, Little Valley, New York 14755.

After the report has been analyzed by the Commission's Director of Regulations or his designee, a draft environmental statement will be prepared by the Commission's Regulatory staff. Upon preparation of the draft environmental statement, the Commission, will among other things, cause to be published in the FEDERAL REGISTER a summary notice of availability of the draft statement with a request for comments from interested persons on the draft statement. The summary notice will also contain a statement to the effect that comments of Federal agencies and State and local officials will be made available when received. Upon consideration of comments submitted with respect to the draft environmental statement, the Regulatory staff will prepare a final environmental statement, the availability of which will be published in the FEDERAL REGISTER.

Dated at Bethesda, Maryland, this 5th day of March 1974.

For the Atomic Energy Commission.

LELAND C. ROUSE,
Chief, Fuel Fabrication and Reprocessing Branch, Directorate of Licensing.

[FR Doc.74–6324 Filed 3–19–74;8:45 am]

[Docket Nos. STN 50–477, STN 50–478]

PUBLIC SERVICE ELECTRIC AND GAS CO.

Receipt of Application for Site Construction Permits and Facility Licenses and Availability of Applicant's Environmental Report; Time for Submission of Views on Antitrust Matters

Public Service Electric and Gas Company (the applicant), on behalf of itself and Atlantic City Electric Company and Jersey Central Power & Light Company, pursuant to section 103 of the Atomic Energy Act of 1954, as amended, has filed an application, which was docketed on March 1, 1974, for authorization to construct all necessary site related structures and to install two floating nuclear power plants, each of which incorporates a pressurized water reactor. An application filed by Offshore Power Systems for a license to manufacture these and other floating nuclear plants is currently under review. The floating nuclear plants will be manufactured in Jacksonville, Florida, and towed to selected sites. The Public Service Electric and Gas Company application was tendered on December 19, 1973. Following a preliminary review for completeness, the application was found acceptable for docketing on February 11, 1974.

The application has been docketed under one of the options of the Commission's standardization policy for nuclear power plants, wherein applications may be filed utilizing reactors manufactured at a location different from where they will eventually be located. Docket Nos. STN 50–477 and STN 50–478 have been assigned to the application and should be referenced in any correspondence relating to the application.

The proposed nuclear facilities, designated by the applicant as the Atlantic Generating Station, Units 1 and 2, are to be moored behind a protective breakwater in the Atlantic Ocean approximately 2.8 statute miles off the southeastern coast of New Jersey. Each unit is to be designed for initial operation at 3411 megawatts thermal and a net electrical output of approximately 1150 megawatts.

A Notice of Hearing with opportunity for public participation is being published separately.

Any person who wishes to have his views on the antitrust matters of the application presented to the Attorney General for consideration should submit such views to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Office of Antitrust and Indemnity, Directorate of Licensing, on or before May 20, 1974. The request should be filed in connection with Docket Nos. STN 50–477A and STN 50–478A.

A copy of the application is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545, and at the Stockton State College Library, Pomona, New Jersey 08240.

The applicant has also filed, pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in Appendix D to 10 CFR Part 50, an Environmental Report dated March 1, 1974. The report, which discusses environmental considerations related to the construction and operation of the proposed facilities, is being made available for public inspection at the aforementioned locations and at the Division of State and Regional Planning, Department of Community Affairs, P.O. Box 2768, Trenton, New Jersey, 08625.

After the Environmental Report has been analyzed by the Commission's Director of Regulation or his designee, a draft environmental statement will be prepared by the Commission's Regulatory staff. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of availability of the draft statement, with a request for comments from interested persons on the draft statement. The summary notice will also contain a statement to the effect that comments of Federal agencies and State and local officials will be made available when received. Upon consideration of comments submitted with respect to the draft environmental statement, the Regulatory staff will prepare a final environmental statement, the availability of which will be published in the FEDERAL REGISTER.

Dated at Bethesda, Maryland, this 7th day of March 1974.

For the Atomic Energy Commission.

KARL R. GOLLER,
Chief, Light Water Reactors Group 13, Directorate of Licensing.

[FR Doc.74–6323 Filed 3–19–74;8:45 am]

[Docket No. 50–201]

NUCLEAR FUEL SERVICES, INC., AND NEW YORK STATE ATOMIC AND SPACE DEVELOPMENT AUTHORITY

Applications for Construction Permit; Consideration of Conversion of License; Hearings

Pursuant to the Atomic Energy Act of 1954 as amended (the Act), and the regulations in Title 10 (CFR Part 50 Licensing of Production and Utilization Facilities, and Part 2, Rules of Practice, notice is hereby given that a hearing will be held by an Atomic Safety and Licensing Board (Board), to consider the applications filed under the Act by Nuclear Fuel Services, Inc., and the New York State Atomic and Space Development Authority (the applicants), for a construction permit to perform certain modifications of the subject nuclear fuel reprocessing facility.

The facility is located in the Western New York Nuclear Service Center in the town of Ashford, near Riceville, Cattaraugus County, New York, about thirty miles from Buffalo. The facility is currently authorized under Provisional Operating License No. CSF–1 to operate at a capacity of about 300 metric tons of uranium per year. The modifications which would be authorized by the construction permit would increase the operating capacity to approximately 750 metric tons of uranium per year. The hearing which will be scheduled to begin in the vicinity of the site of the facility, will be conducted by a Board (Board designated by the Chairman of the Atomic Safety and Licensing Board Panel), consisting of Dr. Hugh C. Paxton, Dr. William E. Martin, and Thomas W. Reilly, Esq., Chairman.

Pursuant to 10 CFR § 2.785, an Atomic Safety and Licensing Appeal Board will exercise the authority and the review function which would otherwise be exercised and performed by the Commis-

V 39 55 MAR 20 74 XUM

sion. Notice as to the membership of the Appeal Board will be published in the FEDERAL REGISTER at a later date.

Upon completion by the Commission's Regulatory staff of a favorable safety evaluation of the applications and an environmental review, and upon receipt of a report by the Advisory Committee on Reactor Safeguards, the Director of Regulation will consider making affirmative findings on Items 1–3, a negative finding on Item 4, and an affirmative finding on Item 5 specified below as a basis for the issuance of a construction permit to the applicants:

ISSUES PURSUANT TO THE ATOMIC ENERGY ACT OF 1954, AS AMENDED

1. Whether in accordance with the provisions of 10 CFR § 50.35(a): (a) The applicants have described the proposed modifications of the facility including, but not limited to, the principal architectural and engineering criteria for the design, and have identified the major features or components incorporated in the modified facility for the protection of the health and safety of the public;

(b) Such further technical or design information as may be required to complete the safety analysis and which can reasonably be left for later consideration, will be supplied in amendments to the safety analysis report;

(c) Safety features or components, if any, which require research and development have been described by the applicants and the applicants have identified, and there will be conducted a research and development program reasonably designed to resolve any safety questions associated with such features or components; and

(d) On the basis of the foregoing, there is reasonable assurance that (i) such safety questions will be satisfactorily resolved at or before the latest date stated in the applications for completion of modifications to the facility, and (ii) taking into consideration the site criteria contained in 10 CFR Part 100, the proposed modifications can be made and the modified facility can be operated at the proposed location without undue risk to the health and safety of the public.

2. Whether the applicants are technically qualified to design and construct the proposed modifications to the facility;

3. Whether the applicants are financially qualified to design and construct the proposed modifications to the facility; and

4. Whether the issuance of a permit for construction of the modifications to the facility will be inimical to the common defense and security or to the health and safety of the public.

ISSUE PURSUANT TO NATIONAL ENVIRONMENTAL POLICY ACT OF 1969 (NEPA)

5. Whether, in accordance with the requirements of Appendix D of 10 CFR Part 50, the construction permit should be issued as proposed.

In the event that this proceeding is not a contested proceeding, as defined by 10 CFR § 2.4(n), the Board will determine: (1) Without conducting a de novo evaluation of the construction permit applications, whether the applications and the record of the proceeding contain sufficient information, the review of the applications by the Commission's regulatory staff has been adequate to support the proposed findings to be made by the Director of Regulation on Items 1–4 above, and to support, insofar as the Commission's licensing requirements under the Act are concerned, the issuance of the construction permit proposed by the Director of Regulation; and (2) whether the review conducted by the Commission pursuant to NEPA has been adequate.

In the event that this proceeding becomes a contested proceeding, the Board will consider and initially decide, as issues in this proceeding, Items 1–5 above as a basis for determining whether a construction permit should be issued to the applicants.

With respect to the Commission's responsibilities under NEPA, and regardless of whether the proceeding is contested or uncontested, the Board will, in accordance with section A.11 of Appendix D of 10 CFR Part 50: (1) Determine whether the requirements of section 102 (2) (C) and (D) of NEPA and Appendix D of 10 CFR Part 50 have been complied with in this proceeeding; (2) independently consider the final balance among conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; and (3) determine whether a construction permit should be issued, denied, or appropriately conditioned to protect environmental values.

The Board will convene a special prehearing conference of the parties to the proceeding and persons who have filed petitions for leave to intervene, or their counsel, to be held within sixty (60) days after the notice of hearing is published or at such other time as the Board deems appropriate, for the purpose of dealing with the matters specified in 10 CFR 2.751a.

The Board will convene a prehearing conference of the parties, or their counsel, to be held subsequent to any required special prehearing conference, and within sixty (60) days after discovery has been completed or at such time as the Board may specify, for the purpose of dealing with the matters specified in 10 CFR 2.752.

The Board will set the time and place for any special prehearing conference, prehearing conference and evidentiary hearing, and the respective notices will be published in the FEDERAL REGISTER.

Any person who does not wish, or is not qualified to become a party to this proceeding may request permission to make a limited appearance pursuant to the provisions of 10 CFR 2.715. A person making a limited appearance may make an oral or written statement for the record. He does not become a party, but may state his position and raise questions which he would like to have answered to the extent that the questions are within the scope of Items 1–5 above. Limited appearances will be permitted at the time of the hearing at the discretion of the Board, within such limits and on such conditions as may be fixed by the Board. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission, and others in the manner specified below not later than April 19, 1974.

Any person whose interest may be affected by the proceeding, who wishes to participate as a party in the proceeding must file a written petition under oath or affirmation for leave to intervene in accordance with the provisions of 10 CFR 2.714. A petition for leave to intervene shall set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and any other contentions of the petitioner including the facts and reasons why he should be permitted to intervene, with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. Any such petition shall be accompanied by a supporting affidavit identifying the specific aspect or aspects of the subject matter of the proceeding as to which the petitioner wishes to intervene and setting forth with particularity both the facts pertaining to his interest and the basis for his contentions with regard to each aspect on which he desires to intervene. A petition that sets forth contentions relating only to matters outside the jurisdiction of the Commission will be denied.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have all rights of the applicant's to participate fully in the conduct of the hearing, such as the examination and cross-examination of witnesses, with respect to their contentions related to the matters at issue in the proceeding.

A petition for leave to intervene must be filed with the Secretary on or before April 19, 1974. A petition for leave to intervene which is not timely will not be granted unless the Board determines that the petitioner has made a substantial showing of good cause for failure to file on time and after the Board has considered those factors specified in 10 CFR 2.714(a) (1)–(4) and 2.714(d).

An answer to this notice, pursuant to the provisions of 10 CFR 2.705, must be filed by the applicants by April 9, 1974.

CONSIDERATION OF CONVERSION OF PROVISIONAL OPERATING LICENSE TO FULL-TERM OPERATING LICENSE

The Atomic Energy Commission (the Commission) will also consider the issuance of a full-term operating license to the applicants which would authorize the applicants to possess, use and operate the modified facility for a term of forty (40) years, upon the receipt of a

report on the applications from the Advisory Committee on Reactor Safeguards (ACRS), the submission of a favorable safety evaluation of the applications by the Commission's Director of Licensing, the completion of the environmental review required by the Commission's Regulations in 10 CFR Part 50, Appendix D, and the finding by the Commission that the applications for the full-term facility license, as amended, complies with the requirements of the Atomic Energy Act of 1954, as amended, and the Commission's Regulation in 10 CFR Chapter I.

Prior to issuance of the foregoing amended operating license, the Commission will inspect the facility to determine whether it has been constructed in accordance with the applications, as amended, and the provisions of the above-noted construction permit. In addition, the full-term license will not be issued until the Commission has made the Findings, reflecting its review of the applications under the Atomic Energy Act of 1954, as amended, which will be set forth in the proposed license, and has concluded that the issuance of the license will not be inimical to the common defense and security or to the health and safety of the public.

On or before April 19, 1974, the applicants may file a request for a hearing, and any person whose interests may be affected by this proceeding may file a petition for leave to intervene with respect to the proposed issuance of a full-term facility operating license. Requests for a hearing and petitions to intervene shall be filed in accordance with the provisions of 10 CFR 2.714 as described in more detail above and must be filed with the Secretary of the Commission and others as specified below.

A petition for leave to intervene which is not timely will not be granted unless the Board determines that the petitioner has made a substantial showing of good cause for failure to file on time and after the Board has considered those factors specified in 10 CFR 2.714(a) (1)–(4) and 2.714(d).

If a request for a hearing or petition for leave to intervene is filed within the time prescribed in this Notice, the Board designated for the Construction Permit hearing will rule on the request and/or petition, and will issue a Notice of hearing or an appropriate Order.

In view of the joint application for a Construction Permit and full-term operating license for the modified facility, this joint notice is being issued at this time. Persons desiring to participate under 10 CFR 2.714 or 2.715 in both the Construction Permit proceeding and Operating License proceeding, if any, must clearly so indicate in any request for a hearing and/or petition for leave to intervene.

GENERAL MATTERS

Papers required to be filed in this proceeding shall be filed by mail or telegram addressed to the Secretary of the Commission, United States Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or may be filed by delivery to the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Pending further order of the Board, parties are required to file, pursuant to the provisions of 10 CFR § 2.708, an original and twenty (20) conformed copies of each such paper with the Commission. A copy of any petition for intervention or request for limited appearance should also be sent to the Chief Hearing Counsel, Office of the General Counsel, Regulation, U.S. Atomic Energy Commission, Washington, D.C. 20545 and to Newman, Reis and Axelrad, 1025 Connecticut Avenue, Washington, D.C. 20036, attorneys for Nuclear Fuel Services Inc., and to Debevoise, Plimpton, Lyons & Gates, 229 Park Avenue, New York, N.Y. 10017, ATTN: Oscar M. Ruebhausen, Esq., attorneys for New York State Atomic and Space Development Authority.

For further details, see the applications for amendments to Provisional Operating License No. CSF–1 dated December 13, 1973, and amendments thereto, and the applicants' environmental report dated December 13, 1973, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., between the hours of 8:30 a.m. and 5 p.m. on weekdays. Copies of those documents are also available at the Memorial Library of Little Valley, Main Street, Little Valley, New York, for inspection by members of the public between the hours of 2 p.m. and 5 p.m., Monday, Tuesday, Thursday, and Friday and from 7 p.m. to 9 p.m. on Monday and Friday.

As they become available, a copy of the safety evaluation report(s) by the Commission's Directorate of Licensing, the Commission's draft and final environmental statements, the report(s) of the Advisory Committee on Reactor Safeguards (ACRS), the proposed construction permit, the proposed amended facility operating license, the transcripts of the prehearing conferences and of the hearing, and other relevant documents will also be available at the above locations. Copies of the Directorate of Licensing's safety evaluation report(s), the Commission's final environmental statement(s), the proposed construction permit, the proposed amended facility operating license, and the ACRS report(s) may be obtained, when available, by request to the Deputy Director for Fuels and Materials, Directorate of Licensing; Regulation, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Dated at Germantown, Maryland, this 8th day of March, 1974.

U.S. ATOMIC ENERGY COMMISSION,
PAUL C. BENDER,
Secretary of the Commission.

[FR Doc.74-6425 Filed 3-19-74;8:45 am]

[Docket Nos. STN 50-477, STN 50-478]

PUBLIC SERVICE ELECTRIC AND GAS CO.

Hearing on Application for Site Construction Permits

Pursuant to the Atomic Energy Act of 1954, as amended (the Act), and the regulations in 10 CFR Part 50, Licensing of Production and Utilization Facilities, and Part 2, Rules of Practice, notice is hereby given that a hearing will be held by an Atomic Safety and Licensing Board (Board), to consider the application filed under the Act by the Public Service Electric and Gas Company on behalf of itself, Atlantic City Electric Company, and Jersey Central Power and Light Company for permits to construct site related structures and to install two floating nuclear power plants, each of which incorporates a pressurized water reactor designated as the Atlantic Generating Station, Units 1 and 2. The reactors will be manufactured in Jacksonville, Florida, and towed to the site. Each reactor will be designed for initial operation at 3411 thermal megawatts with a net electrical output of approximately 1150 megawatts. The proposed facilities are to be mounted on a platform and moored behind a protective breakwater in the Atlantic Ocean approximately 2.8 statute miles off the southeastern coast of New Jersey. The application has been docketed under one of the options of the Commission's standardization policy for nuclear power plants, wherein applications may be filed utilizing reactors manufactured at a location different from where they will eventually be located.

The hearing, which will be scheduled to begin in the vicinity of the site of the proposed facilities, will be conducted by an Atomic Safety and Licensing Board, which has been designated by the Chairman of the Atomic Safety and Licensing Board Panel, consisting of Dr. Marvin M. Mann, Dr. John R. Lyman, and Daniel M. Head, Esq., Chairman.

Pursuant to 10 CFR 2.785, and Atomic Safety and Licensing Appeal Board will exercise the authority and the review function which would otherwise be exercised and performed by the Commission. Notice as to the membership of the Appeal Board will be published in the FEDERAL REGISTER at a later date.

Upon completion by the Commission's regulatory staff of a favorable safety evaluation of the application and an environmental review and upon receipt of a report by the Advisory Committee on Reactor Safeguards, the Director of Regulation will consider making affirmative findings on Items 1–3, a negative finding on Item 4, and affirmative findings on Items 5 and 6 specified below as a basis for the issuance of construction permits to the applicant:

1. Whether in accordance with the provisions of 10 CFR 50.35(a):

(a) The applicant has described the proposed design of the facilities including, but not limited to, the principal architectural and engineering criteria for the design, and has identified the major features or components incorporated therein for the protection of the health and safety of the public;

(b) Such further technical or design information as may be required to complete the safety analysis and which can reasonably be left for later consideration, will be supplied in the final safety analysis report;

V 3955 MAR 20 74 XUM

(c) Safety features or components, if any, which require research and development have been described by the applicant and the applicant has identified, and there will be conducted a research and development program reasonably designed to resolve any safety questions associated with such features or components; and

(d) On the basis of the foregoing, there is reasonable assurance that (i) such safety questions will be satisfactorily resolved at or before the latest date stated in the application for completion of construction of the proposed facilities, and (ii) taking into consideration the site criteria contained in 10 CFR Part 100, the proposed facilities can be constructed and operated at the proposed location without undue risk to the health and safety of the public.

2. Whether the applicant is technically qualified to design and construct the proposed facilities;

3. Whether the applicant is financially qualified to design and construct the proposed facilities; and

4. Whether the issuance of permits for construction of the facilities will be inimical to the common defense and security or to the health and safety of the public.

5. Whether, in accordance with the requirements of Appendix D of 10 CFR Part 50, the construction permits should be issued as proposed.

6. Whether the proposed site on which the facilities are to be operated falls within the postulated site parameters specified in the application filed by Offshore Power Systems for a manufacturing license.

In the event that this proceeding is not a contested proceeding, as defined by 10 CFR 2.4(n), the Board will determine: (1) Without conducting a de novo evaluation of the application, whether the application and the record of the proceeding contain sufficient information, the review of the application by the Commission's regulatory staff has been adequate to support the proposed findings to be made by the Director of Regulation on Items 1–4 and 6 above, and to support, insofar as the Commission's licensing requirements under the Act are concerned, the issuance of the construction permits proposed by the Director of Regulation; and (2) Whether the review conducted by the Commission pursuant to NEPA has been adequate.

In the event that this proceeding becomes a contested proceeding, the Board will consider and initially decide, as issues in this proceeding, Items 1–6 above as a basis for determining whether the construction permits should be issued to the applicant.

With respect to the Commission's responsibilities under NEPA, and regardless of whether the proceeding is contested or uncontested, the Board will, in accordance with section A.11 of Appendix D of 10 CFR Part 50: (1) Determine whether the requirements of section 102(2)(C) and (D) of NEPA and Appendix D of 10 CFR Part 50 have been complied with in this proceeding; (2) independently consider the final balance among conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; and (3) determine whether the construction permits should be issued, denied, or appropriately conditioned to protect environmental values.

As indicated above, the reactors will be manufactured in Jacksonville, Florida. The application by Offshore Power Systems for a manufacturing license is presently pending before another Atomic Safety and Licensing Board (Docket No. STN 50–437). The Commission will treat as resolved in this proceeding those matters which have been resolved in the manufacturing license proceeding unless there exists significant new information that substantially affects the conclusions reached at the earlier manufacturing license proceeding or other good cause. This proceeding, but not the manufacturing license proceeding, will consider the specific site proposed for the Atlantic Generating Station.

The Board will convene a special prehearing conference of the parties to the proceeding and persons who have filed petitions for leave to intervene, or their counsel, to be held within sixty (60) days after the notice of hearing is published or at such other time as the Board deems appropriate, for the purpose of dealing with the matters specified in 10 CFR 2.751a.

The Board will convene a prehearing conference of the parties, or their counsel, to be held subsequent to any required special prehearing conference, and within sixty (60) days after discovery has been completed or at such other time as the Board may specify, for the purpose of dealing with the matters specified in 10 CFR 2.752.

The Board will set the time and place for any special prehearing conference, prehearing conference and evidentiary hearing and the respective notices will be published in the FEDERAL REGISTER.

Any person who does not wish, or is not qualified, to become a party to this proceeding may request permission to make a limited appearance pursuant to the provisions of 10 CFR 2.715. A person making a limited appearance may make an oral or written statement on the record. He does not become a party, but may state his position and raise questions which he would like to have answered to the extent that the questions are within the scope of Items 1–6 above. Limited appearances will be permitted at the time of the hearing at the discretion of the Board, within such limits and on such conditions as may be fixed by the Board. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission and others in the manner specified below.

Any person whose interest may be affected by the proceeding, who wishes to participate as a party in the proceeding must file a written petition under oath or affirmation for leave to intervene in accordance with the provisions of 10 CFR 2.714. A petition for leave to intervene shall set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and any other contentions of the petitioner including the facts and reasons why he should be permitted to intervene, with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. Any such petition shall be accompanied by a supporting affidavit identifying the specific aspect or aspects of the subject matter of the proceeding as to which the petitioner wishes to intervene and setting forth with particularity both the facts pertaining to his interest and the basis for his contentions with regard to each aspect on which he desires to intervene. A petition that sets forth contentions relating only to matters outside the jurisdiction of the Commission will be denied.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have all the rights of the applicant to participate fully in the conduct of the hearing, such as the examination and cross-examination of witnesses, with respect to their contentions related to the matters at issue in the proceeding.

A petition for leave to intervene must be filed with the Secretary of the Commission and others as specified below by April 19, 1974. A petition for leave to intervene which is not timely will not be granted unless the Board determines that the petitioner has made a substantial showing of good cause for failure to file on time and after the Board has considered those factors specified in 10 CFR 2.714(a)(1)–(4) and 2.714(d).

An answer to this notice, pursuant to the provisions of 10 CFR 2.705, must be filed by the applicant by April 9, 1974.

Papers required to be filed in this proceeding shall be filed by mail or telegram addressed to the Secretary of the Commission, United States Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or may be filed by delivery to the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. Pending further order of the Board, parties are required to file, pursuant to the provisions of 10 CFR 2.708, an original and twenty (20) conformed copies of each such paper with the Commission. A copy of the petition or request for limited appearance should also be sent to the Chief Hearing Counsel, Office of the General Counsel, Regulation, U.S. Atomic Energy Commission, Washington, D.C. 20545 and to Troy B. Conner, Jr., Esq., Conner, Hadlock & Knotts, 1747 Pennsylvania Avenue, NW., Washington, D.C. 20006 and Richard Fryling, Jr., Esq., 80 Park Place, Newark, New Jersey 07101, attorneys for the applicant.

For further details, see the application for construction permits dated March 1, 1974, and the applicant's environmental report dated March 1, 1974, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., between the hours of 8:30 a.m. and 5 p.m. on weekdays. Copies of those documents are also available at the Stockton State College, Pomona, New Jersey 08240, for inspection by members of the public between the hours of 8 a.m. and 10 p.m. Monday through Thursday, 8 a.m. and 6 p.m. on Friday, 9 a.m. and 4 p.m. on Saturday and 2 p.m. and 10 p.m. on Sunday. As they become available, a copy of the safety evaluation report by the Commission's Directorate of Licensing, the Commission's draft and final environmental statements, the report of the Advisory Committee on Reactor Safeguards (ACRS), the proposed construction permits, the transcripts of the prehearing conferences and of the hearing, and other relevant documents, will also be available at the above locations. Copies of the Directorate of Licensing's safety evaluation report and the Commission's final environmental statement, the proposed construction permits, and the ACRS report may be obtained, when available, by request to the Deputy Director for Reactor Projects, Directorate of Licensing, United States Atomic Energy Commission, Washington, D.C. 20545.

Dated at Germantown, Maryland, this 11th day of March, 1974.

U.S. ATOMIC ENERGY COMMISSION,
PAUL C. BENDER,
Secretary of the Commission.

PRODUCTS

Notice of Issuance and Availability of Regulatory Guides

The Atomic Energy Commission has issued two new guides, Regulatory Guide 6.1, Leak Testing Radioactive Brachytherapy Sources, and Regulatory Guide 6.2, Integrity and Test Specifications for Selected Brachytherapy Sources, in its Regulatory Guide series. This series has been developed to describe and to make available to the public methods acceptable to the AEC Regulatory staff for implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain information needed by the staff in its review of applications for permits and licenses.

The new guides are the first to be issued in Division 6, Products, of the Regulatory Guide series. Regulatory Guides 6.1 and 6.2 indicate acceptability, subject to conditions, of the use of American National Standards Institute standards N44.2–1973 and N44.1–1973, respectively, in implementing certain parts of the Commission's regulations.

Regulatory Guides are available for inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. Comments and suggestions in connection with improvements in the guides are encouraged and should be sent to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff. Requests for single copies of the issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides should be made in writing to the Director of Regulatory Standards, U.S. Atomic Energy Commission, Washington, D.C. 20545. Telephone requests cannot be accommodated.

Other Division 6 Regulatory Guides currently being developed include the following:

Guide to the Contents of Applications for Licenses for Radioisotopic Power Generators for Certain Land and Sea Uses.
Containment of Byproduct Material in Certain Devices to be Distributed for Use Under General License
Quality Control Sampling Procedures for Exempted and Generally Licensed Items Containing Byproduct Material

(5 U.S.C. 552(a))

Dated at Bethesda, Maryland this 12th day of March 1974.

For the Atomic Energy Commission,
LESTER ROGERS,
Directory of Regulatory Standards.

CIVIL AERONAUTICS BOARD

[Dockets 26404; 26454; Order 74-3-67]

MILITARY FURLOUGH FARES

Order Dismissing Complaints

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 14th day of March 1974.

In the matter of military furlough fares proposed by various carriers.

By tariff revisions[1] marked to become effective March 15, 1974, Delta Air Lines, Inc. (Delta) and United Air Lines, Inc. (United) propose major modifications in the current military fares program.[2] United's proposal, applicable on and after April 1, 1974, would offer a 25 percent discount from the normal coach fare level on a reservation basis, except on Fridays and Sundays when military traffic will be carried on a standby basis only.[3] As is now the case, military passengers will continue to be accommodated in the first-class section on a standby basis in the event space is not available in coach; will be permitted to travel during all holiday periods; and will be afforded reservations (regardless of day) if traveling on emergency leave. Delta's proposal is the same, except that it does not propose to black out reservations on Fridays and Sundays.

In support of their proposals, United and Delta allege, inter alia, that a uniform policy on the acceptance of military traffic will eliminate a source of possible confusion and irritation that results from the present two-level system; aid in simplifying tariff application; smooth out the boarding process; and ensure that military fares are more consistent with reductions in both the civilian discount structure and in the available airline capacity necessitated by the current fuel shortage.

United further alleges that income levels of military personnel have increased substantially in recent years, to a point where they now compare favorably with those of civilian employees. Consequently, United argues, it is no longer in the public interest to risk displacement of full-fare traffic for the personal benefit of military passengers. To the contrary, it is allegedly imperative that the military-discount program carry a realistic financial burden. United views this objective as increasingly important in light of the present fuel shortage and its effect in reducing overall available capacity (particularly during peak travel periods). Applying various profit impact criteria and employing several costing methods, United has estimated that its proposal will yield an approximate contribution to pre-tax earnings of between $2.9 million and $5.6 million.

The Department of Defense (DOD) has filed complaints against both proposals requesting suspension and investigation. In support thereof, the complainant alleges, inter alia, that the new program fails to conform to either the present or future needs of the national defense; that the Board has previously determined national defense considerations to be of paramount importance in assessing the reasonableness of military discount-fare levels; and that, in the case of United's proposal, the imposition of identical rate levels for both reservation and standby traffic is unlawful. DOD also refutes United's argument that the current program is no longer necessary or reasonable in light of the increased income levels of military personnel. It is DOD's contention that the current military-discount program significantly contributes to attracting and keeping individuals within the volunteer framework; abolition of the standby program and unwarranted increases in the reservation program could only compound the military's need for salary increases as well as contribute to a deterioration in the morale and welfare of servicemen stationed far from home.

United and Delta have answered DOD's complaints alleging, inter alia, that the economic justifications for their proposals are in full accordance with the Board's Economic Regulations; that ap-

[1] Revisions to Airline Tariff Publishers, Inc., Agent, C.A.B. Nos. 142 and 202.

[2] Other carriers which have filed to match the proposals include American Airlines, Inc., Continental Air Lines, Inc., National Airlines, Inc., Northwest Airlines, Inc., Western Air Lines, Inc., and Frontier Airlines, Inc.

[3] Currently, military standby fares are offered at a 50 percent discount from the applicable coach fare; military reservation fares provide a 33⅓ percent discount and are generally blacked out during peak travel periods, *e.g.*, 2 p.m. through midnight Fridays and Sundays.

V 39 55 MAR 20 74 XUM

propriate consideration of the national interest has been included in their justifications; that the plethora of benefits which allegedly accrue to the military under the current discount program will continue under the revised program; and that there is no legal requirement that the new military-fare discount be identical to that offered previously. United further alleges that DOD's argument for suspension and investigation purely as a matter of "fairness alone" is without merit, since established Board procedures adequately satisfy the requirements of due process. It is United's contention, therefore, that allowing DOD its "day in court" is neither required nor warranted since the complaint fails to establish that the revised tariff is in any way unlawful.

Upon consideration of the tariffs, the complaints, the carriers' answers thereto, and all other relevant matters, the Board concludes that the complaints have not set forth sufficient facts to warrant investigation and hence the request therefor, and consequently the request for suspension, will be denied and the complaints dismissed.[4]

A major thrust of DOD's complaint concerns the question of whether the instant proposals adequately consider issues of national defense as required by section 102(a) of the Federal Aviation Act of 1958.[5] The facts support United's contention, however, that military-discount fares are not, per se, specifically mandated by the Act. They are not among those specifically enumerated in section 403(b); and in any event, with respect to those particular categories specified, this section is permissive rather than obligatory.

DOD also argues that the proposed fare level will deprive military personnel of the same discount opportunities extended to other members of the traveling public. The Board is unable to concur in DOD's position in this regard, since military personnel can always avail themselves of those fare programs such as night coach or excursion fares which are available to all segments of the public and which offer significant discounts from the normal coach fare. Moreover, even assuming that national defense considerations still justify the existence of military fares, this does not necessarily require continuation of special fares at levels which are uneconomic and considerably out of line with other discount fares.

At the time the current military-fare program was introduced in the early to mid 1960's, the United States was involved in the Vietnam conflict, military draft was prevalent, and the level of salaries paid military personnel was considerably below that of civilian employees. The current environment, however, significantly differs from that of the past; the United States' military involvement in Vietnam has ended, the imposition of the draft was terminated on June 30, 1973, and current salaries offered the military are considerably more in line with those of the civilian work force. For these reasons, we are not persuaded that the instant tariff proposals will adversely impact on the national defense, nor cause undue financial hardship to servicemen who desire or require a means of rapid and inexpensive air transportation.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 102(a), 204(a), 403, 404, and 1002 thereof,

It is ordered That:

1. The complaints in Dockets 26404 and 26454 be and hereby are dismissed; and

2. Copies of this order be served upon the Department of Defense, Delta Air Lines, Inc., and United Air Lines, Inc., as well as American Airlines, Inc., Continental Air Lines, Inc., National Airlines, Inc., Northwest Airlines, Inc., Western Air Lines, Inc., and Frontier Airlines, Inc.

This order will be published in the FEDERAL REGISTER.

O'Melia member, dissented.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[Docket 26470; Order 74-3-68]

NORTHWEST AIRLINES INC., ET AL.

Order of Investigation and Suspension

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 1st day of March, 1974.

Transpacific passenger fares proposed by Northwest Airlines, Inc., Philippine Air Lines, Inc. and China Airlines, Ltd.

On January 31, 1974, Northwest Airlines, Inc. (Northwest), Philippine Air Lines, Inc. (PAL) and China Airlines, Ltd. (CAL), filed tariff revisions[1] which would implement an order from the Government of the Republic of the Philippines to make available special fares to persons holding a valid Philippine passport and maintaining permanent residence in the United States or Canada in connection with the Philippine-Government-sponsored "Operation Homecoming." The fares, at round-trip levels of $555 (West Coast gateway cities to Manila) and $464 (Honolulu to Manila), would be subject to a minimum/maximum-stay requirement of 30–90 days, permit no stopovers, and would be available only to groups of at least ten persons holding valid Philippine passports or U.S. passports with evidence of Philippine ancestry, their spouses and/or dependents.[2]

In support of its new filing, Northwest alleges that the "Homecoming Fare" has provided that carrier with $609,550 in new revenue over a two-month period; that the fare has been particularly effective in generation of Hawaii-Manila traffic; and that it permits travel of Philippine ethnic persons in the interest of better relations between the United States and the Philippine people.

Pan American World Airways, Inc., (Pan American) has filed a complaint, Docket 26395, requesting investigation and suspension on the grounds that the proposed fares are both unjustly discriminatory and unreasonable. Pan American alleges that since, of the three filing carriers, PAL is the only carrier able to offer direct U.S.-Phillippines service, it is clear that PAL is the primary party in interest; the proposed fares are patently discriminatory in that the fares would be available only to Philippine nationals; the proposed fares will be highly prejudicial to Pan American in that they represent a substantial reduction from presently effective fares; the proposed fares are uneconomic and appear to be an integral part of the Philippine Government's attempt to prejudice the competitive position of U.S. carriers in the Philippine market in which serious capacity limitations have been imposed upon U.S. carriers. Because of this latter factor, Pan American will be unable to benefit significantly, if at all, even were such drastically reduced group fares to prove generative.

In response to Pan American's complaint, PAL alleges that the subject tariffs were filed on the initiative of Northwest; the fares are generative and have provided additional revenues to Northwest; the alleged prejudice to Pan American can be completely cured by its subscription to these fares; Pan American would benefit from the influx of new business and the fares would be economic. Finally, PAL states that the Homecoming program is one of national importance to the Philippines, and the Philippine Government and the Board must take into consideration any applicable requirements of foreign countries and weigh such requirements in the balance.

Although PAL indicates that the fares complained against may be superficially discriminatory, it alleges that the advantages lie more in the absence of restrictive conditions and limitations than in the level. The fares at issue are alleged to be far less discriminatory than the military dependents' fares to Manila, which are less than the fares at issue and

[4] However, the Board has determined to require the carriers to amend the effectiveness of the tariffs to a date not earlier than April 16, 1974.

[5] The Declaration of Policy in section 102 states in part: "In the exercise and performance of its powers and duties under this Act, the Board shall consider the following, among other things, as being in the public interest . . . (a) the encouragement and development of an air-transportation system properly adapted to the present and future needs of the foreign and domestic commerce of the United States, of the Postal Service, and of the national defense."

[1] Air Tariffs Corporation, Agent, Tariff C.A.B. No. 44. See Appendix.

[2] Similar fares have been in effect since November 28, 1973, at somewhat lower levels, and are presently marked to expire on February 28, 1974. The Board did not take any action against the fares due to their very limited duration and application limited to the low season.

available under more favorable conditions of travel. The transpacific fares for dependents of U.S. military personnel are in furtherance of the government policy of the United States in the same fashion that the Homecoming fares are in support of the Philippine national policy of promoting home visits by its citizens. Northwest has not submitted an answer to Pan America's complaint.

Upon consideration of the tariffs, the complaint, the answer, and all relevant factors, the Board finds that the fares may be unjust, unreasonable, unjustly discriminatory, unduly preferential or unduly prejudicial and should be suspended pending investigation. The limitation on availability of the fares to U.S. residents/citizens of Philippine origin or background raises a clear question of discrimination against other United States residents not eligible for the fares. On the other hand, the concept of special discounted fares for the military and their dependents has been tested on various occasions by the Board and the courts and has not been found to constitute an unjust discrimination. In any event, it may be noted that the cited military fares are presently under investigation in Military Overseas Fares, Docket 25904.

In view of the fact that our action herein rests on the issue of prima facie unjust discrimination, we need not reach the question of reasonableness of the fares. This issue, however, will be included in the investigation.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, and particularly sections 204(a), 403, 801 and 1002(j) thereof,

It is ordered, That:

1. An investigation be instituted to determine whether the fares and provisions on the tariff pages specified in the Appendix and rules, regulations and practices affecting such fares and provisions, are or will be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and if found to be unlawful, to take appropriate action to prevent the use of such fares and provisions or rules, regulations, or practices;

2. Pending hearing and decision by the Board, the fares and provisions on the tariff pages specified in the Appendix[1] are suspended and their use deferred to and including March 15, 1975 unless otherwise ordered by the Board, and that no changes be made therein during the period of suspension except by order or special permission of the Board;

3. This order shall be submitted to the President[2] and shall be come effective March 16, 1974;

4. The investigation ordered herein be assigned for hearing before an Administrative Law Judge of the Board at a time and place hereafter to be designated; and

5. Copies of this order be served upon Philippine Air Lines, Inc., China Airlines, Ltd., Pan American World Airways, Inc., and Northwest Airlines, Inc., which are hereby made parties to this proceeding.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] PHYLLIS T. KAYLOR,
Acting Secretary.

[Docket 25881]

AMERICAN AIRLINES, INC. AND HUGHES AIR CORP.

Notice of Hearing

In the matter of American Airlines, Inc. and Hughes Air Corp. d/b/a Hughes Airwest Route Exchange Agreement.

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that a public hearing in this proceeding is assigned to be held on April 2, 1974, at 10 a.m. (local time), in Room 726, Universal Building, 1825 Connecticut Avenue, NW., Washington, D.C., before the undersigned.

Dated at Washington, D.C., March 14, 1974.

[SEAL] ALEXANDER N. ARGERAKIS,
Administrative Law Judge.

[FR Doc.74-6435 Filed 3-19-74;8:45 am]

[Docket 26238; Order 74-2-118]

AIRLINES PARTICIPATING IN AIR EXPRESS SERVICE

Order Authorizing Discussions

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 27th day of February 1974.

Petition of Airlines participating in air express service for authorization of inter-carrier discussions concerning the creation of industry-wide priority cargo service.

In Order 73-12-36, adopted December 7, 1973, the Board decided the Express Service Investigation, Docket 22388. The Board found, inter alia, that the certificated air carriers providing scheduled interstate and overseas air transportation are under an obligation to offer priority service, under tariffs so providing, as part of their duty to provide adequate interstate and overseas air transportation.[1] The Board recognized that some inter-airline coordination would be necessary and, accordingly, stated its receptivity to requests for inter-carrier discussions about the provision of highly expedited priority cargo service.[2]

The airlines participating in the present air express service have now filed a petition requesting Board authorization for such discussions.[3] The petition asks for authorization to enter into inter-carrier discussions concerning the creation of an industry-wide priority cargo service. It says these discussions would principally concern operational problems involved in the interlining of priority cargo traffic. The division of rates between interlining carriers, and the tariff structure with respect to the size and weight of shipments and types of commodities would be considered and discussed, but rate levels would not be discussed in the initial phases of these meetings.

The petition says that the presence of observers from the Board or other governmental agencies at the meetings would not be objected to, but that there does not appear to be any necessity for shipper representatives to be present at these meetings. The petition also asserts that air express service may terminate in the immediate future, and that in order to avoid a lapse in priority cargo service it is requested that the airlines be authorized to meet at the earliest date possible, and that the Board issue the discussion authorization without allowing the usual time for replies to the petition.[4]

Responses to this petition have been received from the Air Freight Forwarders Association (AFFA), the Society of American Florists (SAF), the Pet Industry Parties (PIP),[5] the National Air Transportation Conferences, Inc. (NATC),[6] and REA Express, Inc. (REA).

AFFA requests that it be given the opportunity to participate in the requested discussions because of the nature of the subjects to be discussed and the air freight forwarders' interest and concern with those subjects. It contends that air freight forwarders can be expected to be the major users and marketers of the highly expedited service that the airlines will discuss. AFFA says that there will have to be substantial cooperation between air freight forwarders and the airlines in the planning as well as the use of the new expedited service, and that this can only be accomplished by its participation in, not merely observance of, the discussions.

SAF also asks for participation in the discussions. It says that florists have a vital interest in future space alloca-

[1] Filed as part of the original document.

[2] This order was submitted to the President on March 4, 1974.

[1] Order 73-12-36, at page 41, finding number 6.

[2] Id., at page 39.

[3] These airlines are Air Canada, Airlift International, Alaska, Allegheny, American, Aspen, Braniff, Air France, Continental, Delta, Eastern, Flying Tiger, Frontier, Hughes Airwest, National, New York Airways, North Central, Northwest, Ozark, Pan American, Piedmont, SFO Helicopter Airlines, Seaboard World, Southern, Texas International, Trans World, United, and Western.

[4] Since replies have already been received within the usual time, this request need not be considered.

[5] PIP consists of two corporations and twenty membership organizations whose members market live animals and related supplies throughout the world utilizing air transportation services.

[6] NATC is a trade association of Part 298 commuter air carriers and air taxi operators.

V 39 55 MAR 20 74 XUM

tions and priorities and that airline discussions without shipper impact would be nonproductive.

PIP supports the petition provided that interested shipper parties be permitted to participate in all inter-carrier discussions concerning the creation of priority air cargo service. They say the substitution of priority service by the airlines for air express service and the details of the new service will have a direct effect on the continued usage of air transportation by live animal shippers and that PIP should, therefore, be allowed to participate with the airlines in the creation of the new service.

NATC supports the petition if conditioned by a requirement that NATC representatives be authorized to participate in the discussions. It argues that the interest of NATC and individual Part 298 carriers as transporters of increasing quantities of cargo, an estimated 80 percent of which is interlined with certificated air carriers, necessitates that they be participants in these discussions. NATC says that relationships between Part 298 air carriers and certificated air carriers can be coordinated and problems resolved most effectively at these discussions, and that its participation will not complicate or otherwise adversely affect or delay the course of the discussions.

REA moves that the petition be rejected as improperly filed in Docket 26238, or in the alternative, that it be consolidated with the Express Service Investigation. It argues that since the new priority service to be discussed is a condition precedent to the termination of air express and since the requested discussions would implement Order 73–12–36, a request for discussion authorization can only properly be considered in the Express Service case. Alternatively, REA moves to consolidate the petition with that case so that the Board can determine whether the plan for priority service developed by the airlines is adequate on the basis of the record in Express Service and is implemented to provide a reasonable transition from air express. REA incorporates by reference its petition for reconsideration of Order 73–12–36, wherein it alleges that the Board does not yet know if the new priority service will provide an adequate replacement for air express service, and says that the airlines should be directed to submit their plans by March 1, 1974. REA also says that shippers should be permitted to participate in or observe the inter-carrier discussions.[1]

REA's motions will be denied. The petition herein results from the decision of the Board in the Express Service Investigation, but there is no reason why it must or should be considered only in the context of that proceeding. The requested discussions will consider the formulation of a new type of service which the Board has found certificated scheduled air carriers under an obligation to provide. The Board can monitor the progress of the discussions sought herein while it considers REA's petition for reconsideration and any other matters in the Express Service Investigation, without placing both in the same docket or consolidating them.

For the reasons stated in the Express Service Investigation order, the requested discussion authorization will be granted, excluding the discussion of rate level, structure and division matters.[2] We are authorizing discussion of types of commodities to the extent that operational questions, such as interline handling of extraordinary items, may be involved. It is our view that an industry-wide priority service should be available for all commodities now carried in air express.

Since the actual airport-to-airport movement of priority freight would be effected by the certificated scheduled carriers, they shall be the "participants" in the discussions. However, we recognize the importance of the roles of air freight forwarders and air taxi operators in the movement of air cargo, and we feel that in addition to being allowed to observe the discussions, they and other interested persons shall be allowed to make oral presentations to the discussants. We leave to the discussants the formulation of rules for such oral comments, e.g. whether ad hoc comments from the floor will be allowed or whether more formal presentations will be preferred. However, we will expect the filing of such ground rules and an agenda of each noncontinuous meeting to be filed in this Docket no later than 7 calendar days prior to the holding of such meeting; and a copy of such filing will be required to be served on the present parties to this proceeding and any other persons who previously have made request for such service to counsel for the instant air carrier petitioners.[3]

Finally, we wish to note the pendency of the Petition of the Humane Society in Docket 26244 pertaining to the establishment of a priority air freight service for live animals. We do not rule on that petition at this time. But we do believe that the relief sought therein is relevant to the instant petition insofar as it pertains to the genre of topics to be discussed. Therefore, in the discussions authorized by this order, we shall allow the carriers to consider the degree of priority, if any, which live animals should be given when shipped in the agreed-upon priority service.

The participants in these discussions will be required to submit any agreement or agreements resulting from these discussions for Board approval and such agreement or agreements shall not become effective unless and until approved by the Board. This will enable all interested persons to submit comments to the Board, in accordance with Subpart P of the Board's rules of practice (14 CFR 302.1601 through 302.1608), in support of or in opposition to Board approval of any proposed agreement.

Accordingly, it is ordered That:

1. The petition herein for authorization of inter-carrier discussions concerning the creation of industry-wide priority air cargo service be and it hereby is granted, subject to the following conditions:

(a) All air carriers and foreign air carriers presently participating in air express service shall be permitted to participate in each of these discussion meetings;

(b) These discussions shall not include the subjects of rate level, structure, or division: *Provided*, That they may consider types of commodities, if such consideration is limited to operational matters, such as the interline handling of extraordinary items: *And provided further*, That the discussions may consider the degree of priority, if any, which live animals should be given when shipped in any new priority service;

(c) These discussions shall take place in Washington, D.C., at a date, time, and place determined by the participants;

(d) Representatives of the Board, any other governmental body, and any other interested person shall be permitted to attend each of these discussion meetings as observers;

(e) Notices, agenda, and ground rules for the oral expression by interested persons of views to the participants pertaining to each noncontinuous meeting authorized herein shall be sent (1) to all carriers eligible to participate in these discussions, (2) to the Board's Docket Section, (3) to all persons who responded to the petition herein; and (4) to all other persons who so request; such items shall be filed with the Board and sent not later than seven calendar days before each meeting;

(f) Complete and detailed minutes of these discussions shall be maintained by the participants, and such minutes shall be filed with the Board's Docket Section and shall also be sent to all other persons who so request, within five business days from the date of each meeting;

(g) Any agreement or agreements reached as a result of the discussions authorized herein shall be filed with the Board, pursuant to the requirements of section 412(a) of the Act (49 U.S.C. 1382) and Part 261 of the Board's economic Regulations (14 CFR 261) and Subpart P of the Board's Rules of Practice (14 CFR 302.1601 through 302.1608), and shall not become effective unless and until approved by the Board pursuant to section 412(b) of the Act;

(h) The authorization granted herein shall expire after July 31, 1974; and

(i) The authorization granted herein may be extended, modified, or revoked at any time by the Board or by the Director of its Bureau of Operating Rights (action by the Director of the Bureau of Operating Rights to be subject to the procedures for review of staff action contained in Subpart C of 14 CFR 385).

2. Except to the extent granted herein, all other motions and requests for relief in this docket be and they hereby are denied.

This order shall be served on all certificated scheduled air carriers and on all parties to the Express Service Investigation, Docket 22388, and on the United States Departments of Commerce, Defense, Transportation and Justice and the United States Postal Service. This order shall also be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] PHYLLIS T. KAYLOR,
Acting Secretary.

[FR Doc.74–6565 Filed 3–19–74;8:45 am]

[1] The petitioners answered REA's motions, arguing that their petition should not be considered as part of the Express Service case and that Order 73–12–36 does not make the establishment by the airlines of a priority cargo service a condition precedent to the effectiveness of that order. Emery Air Freight Corporation has also filed an answer, opposing REA's motions for similar reasons.

[2] The exclusion of rate matters from the discussion authorization is based on the applicants' statements that they do not intend to discuss rates in the initial phases of their meetings, and our conclusion that such discussion would not be necessary at this time. If an expansion of this authorization is deemed necessary at a later time, the airlines can submit an application, and supporting arguments therefor, then.

[3] Expansion of the "participant" status might unduly complicate the discussions, and is not necessary. The interests of those parties who have expressed interest in these discussions will be adequately served by the procedures described herein, including their rights to comment on any agreement resulting from these discussions (see 14 CFR 302.1608), and, of course, their rights to informally express their views to the airlines at any time, which rights are not in any way derogated by this order.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN COTTON TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN MEXICO

Entry or Withdrawal From Warehouse for Consumption

MARCH 14, 1973.

On April 30, 1973, there was published in the FEDERAL REGISTER (38 FR 10666), a letter dated April 25, 1973, from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs, establishing levels of restraint applicable to certain specified categories of cotton textiles and cotton textile products produced or manufactured in Mexico and exported to the United States during the twelve-month period beginning May 1, 1973. That letter was amended on November 15, 1973 (38 FR 32527). As set forth in the letter of April 25, 1973, the levels of restraint are subject to adjustment pursuant to paragraph 8(a) of the Bilateral Cotton Textile Agreement of June 29, 1971, as amended, between the Governments of the United States and Mexico, which provides for the limited carryover of shortfalls in certain categories to the next agreement year.

Accordingly, at the request of the Government of Mexico and pursuant to the provision of the bilateral agreement referred to above, there is published below a letter of March 14, 1974 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs further amending the levels of restraint applicable to cotton textile products in Category 22/23 and Category 26/27 and part of 64 (knit fabrics) for the twelve-month period which began on May 1, 1973.

ALAN POLANSKY,
Acting Chairman, Committee for the Implementation of Textile Agreements, and Acting Deputy Assistant Secretary for Resources and Trade Assistance.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

MARCH 14, 1974.

DEAR MR. COMMISSIONER: On April 25, 1973, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the twelve-month period beginning May 1, 1973, of cotton textiles and cotton textile products in certain specified categories, produced or manufactured in Mexico, in excess of designated levels of restraint. These levels were amended by the directive of November 15, 1973. The Chairman also advised you that the levels of restraint are subject to adjustment.[1]

Pursuant to paragraph 8(a) of the Bilateral Cotton Textile Agreement of June 29, 1971, as amended, between the Governments of the United States and Mexico, and in accordance with the procedures of Executive Order 11651 of March 3, 1972, you are directed further to increase, effective as soon as possible, the levels of restraint, as amended, established in the directive of November 15, 1973 for Category 22/23 by 643,781 square yards and Category 26/27 and part of 64 (knit fabrics) by 899,062 square yards. The level of restraint for Categories 5–27 and part of 64 should also be increased to 1,542,843 square yards.

The actions taken with respect to the Government of Mexico and with respect to imports of cotton textiles and cotton textile products from Mexico have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ALAN POLANSKY,
Acting Chairman, Committee for the Implementation of Textile Agreements, and Acting Deputy Assistant Secretary for Resources and Trade Assistance.

[FR Doc.74–6437 Filed 3–19–74;8:45 am]

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton Textile Agreement of June 29, 1971, as amended, between the Governments of the United States and Mexico which provide, in part, that within the aggregate and applicable group limits, limits on certain categories may be exceeded by not more than five (5) percent; for limited carryover of shortfalls in certain categories to the next agreement year; and for administrative arrangements.

CERTAIN COTTON TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN MEXICO

Entry or Withdrawal From Warehouse for Consumption

MARCH 14, 1973.

On January 2, 1974, there was published in the FEDERAL REGISTER (39 FR 28) a letter dated December 27, 1973, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, authorizing increases in the levels of restraint applicable to certain specified categories from a number of countries pursuant to an ad hoc offer by the United States Government to each of its cotton textile bilateral agreement partners to permit export to the United States of additional quantities of cotton yarn and/or cotton fabric, not to exceed in total amount five (5) percent of the country's current-year aggregate agreement ceiling. Among the categories and yardages indicated was a request for 1,407,763 square yards to be applied to Category 26/27 and part of 64 from Mexico. That notation should have read as follows:

Country	Category	Additional amount
Mexico	26/27 and part of 64 (knit fabrics).	1,407,763 square yards of which not more than 1,000,000 square yards shall be in Category 26 (duck).

Accordingly, there is published below a letter of March 14, 1974, from the Chairman, Committee for the Implementation of Textile Agreements to the Commissioner of Customs further amending the directive of December 27, 1973, to account for this adjustment. This directive was previously amended on January 18, 1974 (39 FR 2795).

ALAN POLANSKY,
Acting Chairman, Committee for the Implementation of Textile Agreements, and Acting Deputy Assistant Secretary for Resources and Trade Assistance.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

MARCH 14, 1974.

DEAR MR. COMMISSIONER: This directive further amends but does not cancel the directive issued to you on December 27, 1973, by the Chairman of the Committee for the Implementation of Textile Agreements pursuant to an offer by the United States Government to all bilateral cotton textile agreement partners to export on a one-time basis additional cotton yarn and/or fabric, not to exceed in total amount five percent of the current-year aggregate agreement ceiling of each country. The directive of December 27, 1973, was previously amended on January 18, 1974.

V 39 55 MAR 20 74 XUM

Paragraph 2 of the directive of December 27, 1973, is hereby amended to change the entry for Category 26/27 and Part of 64 from Mexico to read as follows:

Country	Category	Additional amount
Mexico	26/27 and part of 64 (knit fabrics).	1,407,763 square yards of which not more than 1,000,000 square yards shall be in Category 26 (duck).[1]

The actions taken with respect to the Government of Mexico and with respect to imports of cotton textiles and cotton textile products from Mexico have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation if such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ALAN POLANSKY,
Acting Chairman, Committee for the Implementation of Textile Agreements, and Acting Deputy Assistant Secretary for Resources and Trade Assistance.

COMMITTEE FOR PURCHASE OF PRODUCTS AND SERVICES OF THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1974

Notice of Proposed Additions

Notice is hereby given pursuant to section 2(a)(2) of Pub. L. 92-28; 85 Stat. 79, of the proposed additions of the following services to Procurement List 1974, November 29, 1973 (38 FR 33038).

SERVICES

INDUSTRIAL CLASS 0782

Grounds Maintenance
U.S. Courthouse and Federal Building
Rapid City, South Dakota

Janitorial/Custodial
U.S. Courthouse and Federal Building
Rapid City, South Dakota

INDUSTRIAL CLASS 7349

Comments and views regarding these proposed additions may be filed with the Committee not later on or before April 19, 1974. Communications should be addressed to the Executive Director, Committee for Purchase of Products and Services of the Blind and Other Severely Handicapped, 2009 Fourteenth Street North, Suite 610, Arlington, Virginia 22201.

By the Committee.

CHARLES W. FLETCHER,
Executive Director.

[FR Doc.74-6392 Filed 3-19-74;8:45 am]

PROCUREMENT LIST 1974

Addition to Procurement List

Notice of proposed addition to Procurement List 1974, November 29, 1973 (38 FR 33038), was published in the FEDERAL REGISTER on January 21, 1974 (39 FR 2397).

Pursuant to the above notice the following commodity is added to Procurement List 1974.

COMMODITY

Class 8440:

	Price
Neckties, Men's (IB):	
8440-216-6130 ----------each--	$0.92
8440-316-2519 ----------do----	.92

By the Committee.

CHARLES W. FLETCHER,
Executive Director.

ENVIRONMENTAL PROTECTION AGENCY

[OPP-32000/26]

NOTICE OF RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION; DATA TO BE CONSIDERED IN SUPPORT OF APPLICATIONS

On November 19, 1973, the Environmental Protection Agency published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 979), and its procedures for implementation. This policy provides that EPA will, upon receipt of every application, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by the applicant will be available for examination at the Environmental Protection Agency, Room EB-37, East Tower, 401 M Street, SW., Washington, D.C. 20460.

On or before May 20, 1974, any person who (a) is or has been an applicant, (b) desires to assert a claim for compensation under Section 3(c)(1)(D) against another applicant proposing to use supportive data previously submitted and approved, and (c) wishes to preserve his opportunity for determination of reasonable compensation by the Administrator must notify the Administrator and the applicant named in the FEDERAL REGISTER of his claim by certified mail. Every such claimant must include, at a minimum, the information listed in this interim policy published on November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy in regard to usage of existing supportive data for registration will be processed in accordance with existing procedures. Applications submitted under 2(c) will be held on or before May 20, 1974, before commencing processing. If claims are not received, the application will be processed in normal procedure. However, if claims are received on or before May 20, 1974, the applicants against whom the particular claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after May 20, 1974.

APPLICATIONS RECEIVED

EPA Reg. No. 11556-34. Chemagro Division of Baychem Corporation, Animal Health Department, P.O. Box 2037, Shawnee Mission, Kansas 66201. "Tiguvon Brand of fenthion Animal Insecticide Pour-On. Active Ingredients: fenthion (*O,O*-Dimethyl *O*-[4-(methylthio)-*m*-tolyl] phosphorothioate) 3 percent. Method of Support: Application proceeds under 2(b) of interim policy.

EPA File Symbol 11760-R. Edsan Chemical Co., Inc., 438 East St., New Haven, Connecticut 06511. "Edsan QA Disinfectant-Cleaner - Sanitizer-Fungicide-Deodorant." Active Ingredients: n-Alkyl (50 percent C14, 40 percent C12, 10 percent C16) dimethyl benzyl ammonium chloride 5.0 percent; Tetrasodium salt of ethylene tetraacetic acid 2.3 percent; Sodium carbonate 2.0 percent. Method of Support: Application proceeds under 2(b) of interim policy.

EPA File Symbol 11760-E. Edsan Chemical Co., Inc., 438 East St., New Haven, Connecticut 06511. "Edsan Triple-D Disinfectant-Detergent-Deodorant." Active Ingredients: n-Alkyl (50 percent C14, 40 percent C12, 10 percent C16) dimethyl benzyl ammonium chloride 4.8 percent; Sodium carbonate 3.5 percent. Method of Support: Application proceeds under 2(b) of interim policy.

EPA File Symbol 9411-T. Kenco Chemical Co., Inc., P.O. Box 912, Schenectady, New York 12301. "Kenco SP 56 New Fire Resistant Concentrated Pool Chlorine." Active Ingredients: Sodium dichloro-s-triazinetrione dihydrate 100 percent; available chlorine 56 percent. Method of Support: Application proceeds under 2(b) of interim policy.

EPA File Symbol 5967-RNA. Moyer Chemical Company, P.O. Box 945, San Jose, California 95108. "Moyer Copper Sulfate." Active Ingredients: Copper expressed as elemental 53.00 percent. Method of Support: Application proceeds under 2(c) of interim policy.

EPA File Symbol 5967-RNT. Moyer Chemical Company, P.O. Box 945, San Jose, California 95108. Cuzn Dust No. 20. Active Ingredients: Copper expressed as elemental 3.8 percent. Method of Support: Application proceeds under 2(c) of interim policy.

Dated: March 13, 1974.

JOHN B. RITCH, JR.,
Director, Registration Division.

MONTANA; CONTROL OF DISCHARGES OF POLLUTANTS TO NAVIGABLE WATERS

Public Hearing and Request for Approval of State Program

A public hearing to consider the request of the State of Montana for State Program Approval to participate in the National Pollutant Discharge Elimination System (NPDES) permit program for the control and abatement of discharges into waters of the State in compliance with the 1972 Amendments to the Federal Water Pollution Control Act, 33 U.S.C.A. sections 1251-1376 (Supp. 1973) (hereinafter, the Act) will be held on Saturday, April 20, 1974 at 9:30 a.m. in the Highway Department Auditorium at 6th and Roberts Streets, Helena, Montana.

Section 402(b) of the Act provides that the Governor of a State desiring to administer the NPDES permit program to control discharges into navigable waters within its jurisdiction may submit to the Administrator of the United States Environmental Protection Agency (EPA) a full and complete description of the program the State intends to administer, including a statement from the State Attorney General that the laws of the State provide adequate authority to carry out the described program. The Administrator is required to approve each such submitted program unless the program does not meet the requirements of section 402(b) and EPA's guidelines. Among other authorities, the State must have: (1) Adequate authority to issue permits which comply with all pertinent requirements of the Act, (2) adequate authority, including civil and criminal penalties, to abate violations of permits or the permit program, and (3) authority to insure that the Administrator, the public, or any other affected State, and other affected agencies, are given notice of each application and are given the opportunity for a public hearing before acting on each permit application. Also, the State must have and commit itself to use manpower and resources sufficient to act on all outstanding permit applications in a timely manner and consistent with the periods prescribed by the Act. EPA's guidelines establishing State Program Elements Necessary for Participation in the NPDES were published at 37 FR 28390, December 22, 1972 (40 CFR Part 124).

The State of Montana has submitted a full and complete Request for State Program Approval and proposes that the Department of Health and Environmental Sciences, Cogswell Building, Helena, Montana 59601, operate the NPDES program.

Governor Judge's request and the program description is available for inspection at the following locations:

(1) U.S. Environmental Protection Agency, Enforcement Division, Suite 900, 1860 Lincoln Street, Denver, Colorado 80203.

(2) Montana Department of Health and Environmental Services, Water Quality Bureau, Board of Health Building, Helena, Montana 59601.

(3) Montana Department of Health and Environmental Services, Water Quality Bureau, 3302 Second Avenue North, Billings, Montana 59101.

(4) Montana Department of Health and Environmental Sciences, Water Quality Bureau, M & M Building, 540 Sixth Avenue East, Kalispell, Montana 59901.

(5) Missoula City-County Health Department, Courthouse Annex, Room 301, Missoula, Montana 59801.

(6) City-County Health Department, 1130 Seventeenth Avenue South, Great Falls, Montana 59405.

The public hearing panel will consist of the Administrator or his representative who will serve as the Presiding Officer, the Director of the Montana Department of Health and Environmental Sciences or his representative, and the Regional Administrator, Region VIII, or his representative.

All interested persons wishing to attend, to comment upon, or to object to this State request are invited to attend the public hearing. Written comments may be presented at the hearing or submitted by April 29, 1974, either in person or by mail to the Regional Office of the U.S. Environmental Protection Agency, Enforcement Division, Suite 900, 1860 Lincoln Street, Denver, Colorado 80203, Attention: David Robbins.

Oral statements will be received and considered, but for accuracy of the record, all testimony should be submitted in writing. Statements should summarize extensive written material so that there will be time for all interested persons to be heard. Persons submitting written statements are encouraged to bring additional copies for the use of the hearing panel and other interested persons. The Presiding Officer may, at his discretion, exclude oral testimony if it is overly repetitious of previous testimony heard or if it is not relevant to the decision to approve or require revision to the State program as submitted.

All comments or objections received by April 29, 1974, or presented at the public hearing will be considered by EPA before taking final action on the Montana request for State Program Approval.

Please bring the foregoing to the attention of persons whom you know would be interested.

Dated: March 15, 1974.

ALAN G. KIRK II,
Assistant Administrator for Enforcement and General Counsel.

[FR Doc.74-6376 Filed 3-19-74;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[FCC 74-238]

ANNUAL PERFORMANCE TESTS

Acceptable Testing Procedures

MARCH 8, 1974.

The Commission, in its February, 1972, Cable Television Report & Order, called for annual performance tests directed at determining the extent to which cable systems were complying with its technical standards. The rules that were then adopted also stated methods for testing compliance and afforded flexibility for alternative methods. We adopted a flexible approach to determining system performance and, as the rules indicate; alternative test procedures which could be fully justified would be permitted. However, at the same time, we stated that the procedures for determining compliance with our radiation standards outlined in the rules, should be followed strictly or, if special circumstances necessitate divergence from established procedures, the alternate procedures should be thoroughly justified. The procedure for measuring radiation is that which has been embodied for years in Part 15 of the rules and is now reflected in Part 76 of the rules. The tests are to be performed by March 31, 1974.

Recent work, as yet incomplete, has indicated that alternative testing methods may be available which show sufficient sensitivity to demonstrate compliance with Commission standards. One procedure being investigated would test for radiation by use of a mobile facility with an atenna and standard television receiver for visual detection. Different procedures apparently may be necessary depending on the size and location of the system (e.g., underground or aerial cable, apartment houses, etc.). A more flexible approach on our part allowing these alternative procedures to be developed may better accomplish our objectives.

Accordingly, with reference to the tests to be performed by March 31, 1974, the Commission is of the view that fully justified alternative methods of detection and testing for radiation should be encouraged, the alternative methods to be measured against the prescribed method to determine adequacy. We anticipate that the data engendered by the alternative tests will be of significant assistance to the Cable Technical Advisory Committee (CTAC) in evaluating appropriate test procedures.

Action by the Commission March 7, 1974. Commissioners Burch (Chairman), Lee, Reid and Wiley with Commissioner Hooks concurring.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

V 39 55 MAR 20 74 XUM

[Docket No. 19787; Filed No. BL–13 137]

CHESAPEAKE-PORTSMOUTH BROADCASTING CORP.

Memorandum Opinion and Order Enlarging Issues

In re application of Chesapeake-Portsmouth Broadcasting Corporation, Portsmouth, Virginia, for broadcast license for WPMH(AM).

1. The Commission designated the application of Chesapeake-Portsmouth Broadcasting Corporation (Chesapeake-Portsmouth) for a broadcast license for Station WPMH(AM)[1] Portsmouth, Virginia, for hearing by Order and Notice of Apparent Liability, FCC 73–748, released July 25, 1973, on numerous issues including an adequate supervision and control issue.[2] Presently before the Review Board is the Broadcast Bureau's request for enlargement of issues, filed December 10, 1973, which seeks issues to determine whether Chesapeake-Portsmouth violated rule 73.93 and section 318 of the Communications Act by allowing an unlicensed employee to operate its transmitter and whether it violated rule 73.113 by sanctioning improper logging practices.[3]

2. In support of both requested issues, the Bureau submits the affidavit of Larry V. Bashford, a former WPMH(AM) employee. Bashford, in his affidavit, avers that, in September, 1971, he was asked by Jack Walters, WPMH(AM)'s station manager, to man the station's transmitter and make periodic meter readings. Bashford states that although he informed Walters that he was not a licensed engineer, Walters assured him that he would be under the supervision of the station's engineer, Ralph D. Epperson.[4] Bashford alleges that Epperson gave him "brief instructions" to perform, inter alia, the following tasks: (1) The making of periodic readings and entering them on an "unofficial log"; (2) The making of necessary adjustments on the dials if the signals and other electrical data "drifted from the norm"; and (3) The playing of the station's call letters. Furthermore, Bashford claims, Epperson transferred his figures from the "unofficial" to the official log and signed the log, and Epperson also made changes in his figures "every day as they did not sound right." Also, Bashford states that on some mornings he activated the transmitter but more frequently he deactivated it at the end of the day. Finally, Bashford avers, after the first day, he was left substantially on his own. Based on the above allegations, the Bureau argues that Chesapeake-Portsmouth has violated section 318 of the Act and Commission rules 73.93 and 73.113, which clearly preclude the above enumerated activities by a non-licensed radio operator; therefore, the Bureau urges, the requested issues are warranted. The Bureau further requests the Board to make it "explicit" that the questions raised by the requests are also relevant to the "permittee responsibility issue."[5] Finally, the Bureau submits that it is filing its request as soon as possible following receipt of Bashford's affidavit on November 16, 1973.

3. In opposition,[6] Chesapeake-Portsmouth argues that the Bureau has not presented any persuasive arguments that good cause exists for granting its late filed pleading. The designation Order was released some five months prior to the Bureau's receipt of Bashford's affidavit on November 16, 1973; yet the Bureau does not set forth any reasons why it could not obtain the affidavit during this period, Chesapeake-Portsmouth argues. Furthermore, Chesapeake-Portsmouth alleges, almost one year elapsed between the time the Commission conducted its investigation of the station in August, 1972, and the release of the designation Order, but the Commission did not deem it appropriate to include the matters raised in Bashford's affidavit in the designation Order. Finally, Chesapeake-Portsmouth asserts that "the attempt to add this issue at this time violates the due process safeguards already provided by the Commision in this proceeding." In support of this assertion, Chesapeake-Portsmouth states that the Commission specified a forfeiture provision in this proceeding in order to provide "flexibility" in the sanctions the Commission can impose. If the Bureau's requested issues are added, Chesapeake-Portsmouth alleges, this flexibility is removed because the events alleged by the Bureau took place over two years ago, prior to the running of the one-year statute of limitations for the imposition of forfeitures provided by section 503(b) (3) of the Communications Act of 1934, as amended. Consequently, Chesapeake-Portsmouth concludes, if all issues designated against it were resolved in its favor except for these requested issues, the only remedy open to the Administrative Law Judge would be denial of its application.

4. In reply, the Bureau argues that "good cause" under Rule 1,229(b) does exist for the Board's consideration of its late filed pleading. The allegations the Bureau raises first came to its attention when Bashford, sua sponte, telephoned the Commission's Norfolk District Office on October 29, 1973, the Bureau explains. On October 30, the Bureau states, it contacted Bashford and requested the affidavit attached to the instant request. The Bureau concludes that it acted as quickly as possible after receipt of Bashford's affidavit in filing its request.

5. Initially the Board finds that the Broadcast Bureau has demonstrated good cause to justify the late filing of its request. It is apparent that the Bureau acted as expeditiously as possible in filing its request after first learning from Bashford of the underlying events. Therefore, the Board will accept its petition. The Board cannot accept Chesapeake-Portsmouth's argument that because forfeiture cannot be imposed due to the one-year statute of limitations (section 503(b)(3) of the Communications Act), the Board should not add the requested issues. The presence or absence of a forfeiture provision does not preclude the Board from considering the potentially disqualifying aspects of an applicant's conduct, including alleged rule violations. See The Court House Broadcasting Company, 21 FCC 2d 792, 18 RR 2d 616 (1970), and United Television Company, Inc., 23 FCC 2d 493, 19 RR 2d 86 (1970). In fact in no case would forfeiture be imposed as a lesser penalty in a situation warranting denial; thus, the absence of forfeiture as a sanction could in fact inure to the applicant's benefit since one possible sanction is removed.[7] See Belk Broadcasting Company, 29 FCC 2d 150, 21 RR 2d 1971). Turning to the merits,[8] the Board is of the opinion that the Bureau's allegations raise sufficient questions of fact to warrant addition of the requested issues. Chesapeake-Portsmouth has not presented any arguments or circumstances to rebut the allegations set forth in Bashford's affidavit and the arguments made by the Bureau in its request. Consequently, the Board believes the issues in this proceeding should be enlarged to encompass the requested rules 73.93 and 73.113 issues. See Harvit Broadcasting Corporation, 31 FCC 2d 876, 22 RR 2d 1062 (1971); and Glen West, 31 FCC 2d 803, 19 RR 2d 1131 (1970). Furthermore, we agree with the Bureau that evidence adduced under these issues may have relevance to the adequate supervision and control issue and may accordingly be considered thereunder.

6. *Accordingly, it is ordered,* That the motion for extension of time and acceptance of late filing, filed January 3, 1974, by Chesapeake-Portsmouth Broadcasting Corporation, is granted, and opposition, filed January 3, 1974, by Chesapeake-Portsmouth Broadcasting Corporation is accepted; and

7. *It is further ordered,* That the request for acceptance of additional pleading and applicant's response to Broadcast Bureau's reply, filed January 28, 1974, by Chesapeake-Portsmouth, is denied; and

8. *It is further ordered,* That the Broadcast Bureau's request for enlargement of issues, filed December 10, 1973, is granted, and that the issues in this proceeding are enlarged by the addition of the following issues:

(a) To determine whether maintenance on and adjustment of the transmitter of WPMH(AM) have been undertaken by unauthorized personnel in violation of § 73.93 of the rules;

(b) To determine whether an unlicensed employee made log entries and whether revisions were made in recorded log entries by one who did not make the original entries in violation of § 73.113 of the rules.

9. *It is further ordered,* That the burden of proceeding with the introduction of evidence under the added issues shall be on the Broadcast Bureau, and the burden of proof shall be on Chesapeake-Portsmouth Broadcasting Corporation.

Adopted: March 6, 1974.

Released: March 11, 1974.

[SEAL] FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.74–6401 Filed 3–19–74;8:45 am]

[1] The construction permit under which Chesapeake-Portsmouth filed its present application for license was granted November 18, 1971. The application for license was filed on December 8, 1971. Station WPMH(AM) began operation in January, 1972, under program test authority.

[2] The issue seeks:

(a) To determine whether the applicant has exercised adequate control and supervision over the policies, practices and other operation of Station WPMH consistent with the degree of responsibility expected of a permittee.

[3] Also before the Review Board are the following related pleadings: (a) opposition, filed January 3, 1974, by Chesapeake-Portsmouth; (b) motion for extension of time and acceptance of late filing, filed January 3, 1974, by Chesapeake-Portsmouth; (c) Broadcast Bureau's reply, filed January 15, 1974; and (d) request for acceptance of additional pleading and response, filed Januray 28, 1974, by Chesapeake-Portsmouth.

[4] Epperson is president and 25 percent stockholder of the permittee.

[5] See note 2, *supra.*

[6] Chesapeake-Portsmouth filed, on January 3, 1973, a motion for extension of time and acceptance of its late filed opposition. There is no opposition to the motion; therefore, the Board will grant it and consider the pleading.

[7] Nor do we agree with the applicant's contention that if all the issues, except those requested herein, were resolved in the applicant's favor, the Commission would still be compelled to deny the license. The violations would warrant denials only if all the circumstances established that the applicant does not possess the qualifications necessary to be a Commission licensee.

[8] Chesapeake-Portsmouth's response to the Bureau's reply is an unauthorized pleading under our Rules. Accordingly, it is rejected. See rule 1.45(c).

PANEL 3—CTAC COMMITTEE

Notice of Meeting

MARCH 12, 1974.

Pursuant to Pub. L. 92–463, notice is hereby given of a meeting of the Panel 3 Committee of the Cable Television Technical Advisory Committee on Thursday, April 4, 1974, to be held at the Corporation for Public Broadcasting, 888 16th Street, NW., Washington, D.C., beginning at 10 a.m.

(1) Review of Technical Note Draft Revisions
- a. Direct Pickup
- b. Adjacent Channel Rejection
- c. Oscillator Voltage; Spurious Responses
- d. Economics of Tuners
- e. Deflection and Color Sync

(2) Identification of Missing and Deficient Data Required for the above Technical Notes
(3) Liaison Reports from Other Committees
(4) Task Assignments and Scheduling
(5) Other Business

Any member of the public may attend or may file written statement with the Committee either before or after the meeting. Any member of the public wishing to make an oral statement must consult with the Committee prior to the meeting. Inquiries may be directed to Mr. S. R. Effros, FCC, 1919 M Street, NW., Washington, D.C., 20554. Telephone No. 202–632–6468.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

FEDERAL MARITIME COMMISSION

IBERIAN/U.S. NORTH ATLANTIC WESTBOUND FREIGHT CONFERENCE

Modification of Agreement

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before April 9, 1974. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:
Stanley O. Sher, Esq.
Billig, Sher & Jones, P. C.
Suite 300
1126 Sixteenth Street, N.W.
Washington, D.C. 20036

Agreement No. 9615–10, among the member lines of the above named conference, changes the method of selecting the conference Chairman; establishes the office of Vice Chairman; provides for a Housekeeping Committee, a Spanish Central Committee, a Portuguese Central Committee, a New York Committee, an Inland Committee and Local Port Committees to deal with the aspects of conference business implied by their titles but without authority to make decisions; divides meetings into Owners' and Principals' categories and sets forth rules and voting procedures governing telephone, telex and correspondence polls of members.

By order of the Federal Maritime Commission.

Dated: March 14, 1974.

FRANCIS C. HURNEY,
Secretary.

SEA-LAND SERVICE, INC. AND CHINESE MARITIME TRANSPORT, LTD.

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans. Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before April 9, 1974. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Gerald A. Malia, Esquire
Ragan & Mason
The Farragut Building
900 Seventeenth Street, N.W.
Washington, D.C. 20006

Agreement No. T–2719–1, between Sea-Land Service, Inc. (Sea-Land) and Chinese Maritime Transport, Ltd. (CMT) modifies the parties' basic agreement providing for the joint use of Number 66 Wharf, Kaohsiung, Taiwan, by both parties. The purpose of the modification is to delete all references to CMT's identity as agent for Orient Overseas Line, Inc. and Orient Overseas Line, Ltd. and provisions in the agreement providing for third-party use and assignment of the facility. Filed along with Agreement No. T–2719–1 is a guaranty by Orient Overseas Line, Inc. guaranteeing the performance by CMT of its obligations under the agreement.

By order of the Federal Maritime Commission.

Dated: March 15, 1974.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. G–8817, etc.]

ABANDONMENTS OF SERVICE AND TERMINATIONS OF SALES

Certain Companies

MARCH 12, 1974.

Each Applicant herein has filed pursuant to section 7(b) of the Natural Gas Act an application for permission and approval to abandon service or a petition to amend an order issuing a certificate of public convenience and necessity by deleting therefrom authorization to sell natural gas from certain acreage, all as more fully set forth in the tabulation and in the applications and petitions to amend in this proceeding.

Some applicants have on file with the Commission FPC gas rate schedules and others are making sales under small producer certificates. In cases where Applicants propose to abandon service completely and have rate schedules, the certificates authorizing such sales will be terminated and the related rate schedules.

After due notice by publication in the FEDERAL REGISTER, no petition to intervene, notice of intervention or protest to the granting of the applications or petitions has been filed.

At a hearing held on March 6, 1974, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the applications and petitions and exhibits thereto, submitted in support of the authorizations sought herein, and upon consideration of the record,

The Commission finds:

(1) Each Applicant herein is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission.

(2) The sales of natural gas proposed to be abandoned, as hereinbefore described and as more fully described in the applications and in the tabulation herein, are subject to the requirements of subsection (b) of section 7 of the Natural Gas Act.

(3) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the orders issuing certificates of public convenience and necessity in various dockets involved herein should be amended as hereinafter ordered.

(4) The abandonments proposed by Applicants herein are permitted by the public convenience and necessity and should be approved as hereinafter ordered.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the certificates, other than small producer certificates, heretofore issued to Applicants relating to the complete abandonments hereinafter permitted and approved should be terminated.

(6) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the FPC gas rate schedule supplements related to the authorizations hereinafter granted should be accepted for filing.

The Commission orders:

(A) Permission for and approval of the abandonments of service by Applicants, as hereinbefore described and as more fully described in the applications and tabulation herein, are granted.

(B) The orders issuing certificates of public convenience and necessity in various dockets are amended by deleting therefrom authorization to sell natural gas as more fully described in the petitions to amend and in the tabulation herein. In all other respects said orders shall remain in full force and effect.

(C) The certificates issued in the following dockets which are related to the abandonment authorizations granted herein are terminated and the related rate schedules are cancelled:

Abandonment authorization	*Terminated certificate*
CI70–652	CI70–652.[1]
CI73–463	CI72–49.
CI73–535	G–2585.

CI74–305	CI64–1412.
CI74–308	G–11864.
CI74–315	G–2657.
CI74–335	G–11823.
CI74–338	CI73–288.
CI74–343	G–17401.

[1] Temporary certificate.
[2] Certificate terminated only with respect to sales under Pennzoil Producing Company FPC Gas Rate Schedule No. 149.

(D) Applicant in Docket No. CI74–243 is not relieved of any refund obligations related to the Commission's Opinion No. 682 issued January 11, 1974, in Docket No. RP70–13 as a result of the abandonment permitted and approved herein.

(E) Applicant in Docket No. CI73–636 is not relieved of any refund obligations in Docket No. G–18058 as a result of the abandonment permitted and approved herein.

(F) The rate schedule supplements related to the authorizations granted herein are accepted for filing, all as more fully set forth in the tabulation herein.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[Project No. 1894]

SOUTH CAROLINA ELECTRIC & GAS CO.

Availability of Environmental Impact Statement

Notice is hereby given that on March 20, 1974, as required by Commission Rules and Regulations under Order 415-C, issued December 18, 1972, a final environmental impact statement prepared by the Commission's staff pursuant to Section 102(2) (C) of the National Environmental Policy Act of 1969 (Public Law 91-100) was placed in the public files of the Federal Power Commission. This statement deals with an application filed by South Carolina Electric & Gas Company on July 26, 1972, requesting (1) a new license under Section 15 of the Federal Power Act for the existing Parr Hydroelectric Project (FPC No. 1894) located on the Broad River in Fairfield and Newberry Counties, South Carolina; requesting (2) authorization to construct and include within the new license a pumped-storage project utilizing the existing Parr reservoir enlarged to serve as the lower pool; and requesting (3) authorization to use the upper reservoir of the pumped-storage project as a cooling impoundment for a proposed nuclear electric power plant (A.E.C. Docket No. 50-395).

This statement is available for public inspection in the Commission's Office of Public Information, Room 1000, 825 North Capitol Street NE., Washington, D.C., 20426 and in its Atlanta Regional Office located at 730 Peachtree Street NE., Atlanta, Georgia 30308. Copies may be ordered from the Commission's Office of Public Information, Washington, D.C. 20426.

DALPORT OIL CORP.

Notice of Extension of Time and Postponement of Hearing

MARCH 13, 1974.

On March 12, 1974, Staff Counsel filed a motion to postpone the procedural dates fixed by Order issued February 26, 1974, as amended by an errata notice issued February 28, 1974, in the above-designated matter. Dalport Oil Corporation concurs in the request.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of direct testimony and evidence by Dalport, April 23, 1974.
Service of direct testimony, testimony by Staff and any interveners opposing the application, April 30, 1974.
Service of rebuttal testimony and evidence, May 7, 1974.
Hearing, May 14, 1974 (10 a.m. e.d.t.).

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6421 Filed 3-19-74;8:45 am]

[Docket No. E-8445]

CAMBRIDGE ELECTRIC LIGHT CO.

Order Affirming in Part and Amending Prior Order

MARCH 14, 1974.

On October 12, 1973, Cambridge Electric Light Company (Cambridge) filed in this docket a proposed change of rates to certain jurisdictional customers. The changes include a proposed fuel adjustment clause. By order of December 13, 1973, the Commission suspended the proposed changes for five months (until May 14, 1974), set the matter for hearing, and ordered Cambridge to file, within 30 days, a revised fuel adjustment clause to conform with the Commission's Opinion No. 633.

In purported compliance with the Commission's December 13 order, Cambridge on January 11, 1974, tendered for filing a revised fuel clause and, concurrently, an increase in the energy charges associated therewith. Notice of this filing was issued on January 20, 1974, with comments due on or before February 5, 1974.

On February 5, 1974, the Town of Belmont, Massachusetts (Belmont) filed a response stating that (1) the revised fuel adjustment clause does not meet the intent and purpose of Commission Opinion No. 633, and (2) that Cambridge has failed to show that the revised energy charges and resulting revenues are just and reasonable. Belmont states, however, that it has no objection to permitting the new fuel adjustment clause to become effective, subject to refund, as of May 14, 1974.

On February 7, 1974, the Commission issued a letter Order accepting Cambridge's revised fuel clause for filing, to be effective as of May 14, 1974. An additional review of the revised fuel clause in light of the allegations contained in Belmont's response indicates that Cambridge's revised fuel clause does conform to the directives of Opinion No. 633. The proposed increased energy charges reflect the increased base fuel cost specified in the revised fuel adjustment clause. We therefore reaffirm our Order of February 7, 1974, accepting Cambridge's revised fuel clause as of May 14, 1974, as being consistent with Opinion No. 633. We note, however, that the letter Order of February 7, 1974 erroneously states that the acceptance for filing of the revised fuel clause and energy charge adjustments terminates Docket No. E-8445. We shall herein amend that letter Order to delete such statement.

The action taken herein is without prejudice to Belmont's right to challenge the proposed level of rates and charges sought by Cambridge in this proceeding.

The Commission finds:

(1) Good cause exists to affirm the Commission's letter Order of February 7, 1974, to accept Cambridge's revised fuel clause for filing, effective May 14, 1974.

(2) Good cause exists to amend the Commission's letter Order of February 7, 1974, to delete the reference to termination of Docket No. E-8445.

The Commission orders:

(A) The Commission's letter Order of February 7, 1974, is hereby affirmed to accept Cambridge's revised fuel clause as of May 14, 1974.

(B) The Commission's letter Order of February 7, 1974, is hereby amended to delete the reference to termination of of Docket No. E-8445.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

Notice of Proposed Change in Rates

MARCH 13, 1974.

Take notice that on March 4, 1974 Columbus and Southern Ohio Electric Company (C&S) tendered for filing proposed changes in rate schedules for municipal wholesale services to the Cities of Westerville and Jackson and the Village of Glouster.

C&S asserts that the filing is in accordance with Part 35 of the Commission's Regulations. C&S states that the contracts will supersede contracts presently on file with this Commission which terminate according to their terms on May 1, 1974 with respect to Westerville and June 30, 1974 with respect to Glouster and Jackson. The agreement of the parties served under the proposed contracts had not been secured as of the date of the filing.

C&S requests an effective date for the proposed contracts of May 1, 1974 with respect to Westerville and June 30, 1974 with respect to Glouster and Jackson.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before March 26, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP74-220]

EL PASO NATURAL GAS CO.

Notice of Application

MARCH 13, 1974.

Take notice that on February 27, 1974, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed an application in Docket No. CP74-220 pursuant to sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain meter station facilities and for a certificate of public convenience and necessity authorizing the sale for resale of reapportioned volumes of natural gas, by community, to General Utilities, Inc. (General Utilities), in Graham and Greenlee Counties, Arizona, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The application states that Applicant proposes to abandon, by removal and salvage, the Rural Electrification Administration (REA) Power Plant Meter Station and the sale and delivery of natural gas to General Utilities at such location in Graham County, Arizona. Said facilities consist of one 500 B standard positive displacement type meter station, with appurtenances, located on Applicant's 10¾-inch O.D. Globe-Miami pipeline. Applicant states that natural gas service at such location is no longer required due to the dismantling of the subject power plant; and, therefore, applicant and General Utilities have agreed to abandon said meter station. The application states that the total cost of the removal and salvage of such facilities is estimated to be $200.

The application states further that Ap-Applicant, at the request of General Utilities, proposes to reapportion, by community the quantities of natural gas now authorized to be delivered to general Utilities at certain locations for resale and general distribution to Priority 1 and 2 consumers in Graham and Greenlee Counties, Arizona. Applicant states that the proposed reapportionment will allow General Utilities to utilize the existing contract quantities where service to Priority 1 and 2 customer needs exist, thereby, providing a more reliable and adequate natural gas service without requiring the installation of additional facilities by Applicant or General Utilities.

The application states that no interruption, reduction or termination of natural gas service presently rendered by Applicant to any of its customers, other than that which has been terminated by mutual agreement, will result upon effectuation of the abandonment and the reapportionment of contract quantities proposed herein.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 8, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing herein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecesary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-8648]

DUKE POWER CO.

Notice of Filing Fuel Conservation Rate Schedule

MARCH 13, 1974.

Take notice that Duke Power Company (Duke) on March 1, 1974, tendered for filing a FCE (Fuel Conservation Energy) Rate Schedule. The said Schedule proposes to make available to interconnected public utilities companies energy during off-peak hours in such amounts as Duke determines are available while maintaining adequate supplies for its regular customers. The said Schedule sets forth the formula upon which the rate for such deliveries will be determined. Duke states that it is not necessary to install new facilities or modify existing ones to supply the FCE service.

Duke proposes an effective date of April 1, 1974, for its FCE Rate Schedule.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions should be filed on or before March 21, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

V 39 55 MAR 20 74 XUM

[Docket No. CP74-222]

IOWA-ILLINOIS GAS AND ELECTRIC CO.

Notice of Application

MARCH 13, 1974.

Take notice that on March 1, 1974, Iowa-Illinois Gas and Electric Company (Applicant), 206 East Second Street, P.O. Box 4350, Davenport, Iowa 52808, filed in Docket No. CP74-222 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon certain pipeline segments in the Davenport, Iowa area, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that due to the relocation of the Linwood Station delivery point in 1969 by Natural Gas Pipeline Company of America, as requested by Applicant, to a point approximately two miles north of its original location in the flood plains of the Mississippi River, certain of Applicant's facilities are no longer required for the delivery of natural gas. Applicant, therefore, proposes to abandon approximately 2.63 miles of eight-inch pipeline of which 9,550 feet of pipe located primarily in the rural area of Scott County, Iowa, will be abandoned in place and the remaining 4,350 feet of pipe located within the municipal limits of Buffalo, Iowa, will be converted from high-pressure pipeline service to 100-pound distribution service. Applicant further proposes to abandon approximately 3.13 miles of 10-inch pipeline located primarily within the municipal limits of Davenport of which 3,200 feet of pipe will be abandoned in place and the remaining 13,320 feet of pipe will be converted from high-pressure service to 100-pound distribution service.

Applicant states that no additional gas deliveries or requirements will result from the proposed abandonment and that no distribution service will be impaired as a result of the abandonment.

Any person desiring to be heard or to make any protest with reference with said application should on or before April 8, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-8365]

KANSAS CITY POWER & LIGHT CO.

Further Extension of Time and Postponement of Prehearing Conference and Hearing

MARCH 13, 1974.

On March 5, 1974, Staff Counsel requested a postponement of the procedural dates fixed by notice issued January 29, 1974, in the above-designated matter. The motion states that it was agreed upon at an informal conference that the parties would join the staff's request for a further extension.

Upon consideration, notice is hereby given that the procedural dates in the above matter are further modified as follows:

Staff Service of Testimony, March 22, 1974.
Interveners Service of Testimony, April 5, 1974.
Company Rebuttal Testimony, April 19, 1974.
Prehearing Conference, May 6, 1974 (10 a.m. e.d.t.).
Hearing, May 6, 1974 (10 a.m. e.d.t.).

KENNETH F. PLUMB,
Secretary.

[Docket No. E-7690]

NEPOOL POWER POOL AGREEMENT

Notice of Extension of Time and Postponement of Hearing

MARCH 13, 1974.

On March 6, 1974, the New England Power Pool Executive Committee (NEPOOL) filed a motion for an extension of time for filing its testimony as required by the order issued January 22, 1974 in the above-designated matter. The motion states that the Municipal Petitioners and Staff have no objection to the requested extension. On March 11, 1974, Staff Counsel filed a reply to the above motion stating that Staff does not object provided that the other procedural dates are extended accordingly.

Upon consideration, notice is hereby given that the procedural dates in the above matter are further modified as follows:

Direct testimony and exhibits by NEPOOL, March 26, 1974.
Direct testimony by Staff, April 23, 1974.
Hearing, May 7, 1974 (10 a.m. e.d.t.).

[Docket No. RP73-48]

NORTHERN NATURAL GAS CO.

Notice of Rate Change Pursuant to Purchased Gas Cost Adjustment Provision

MARCH 13, 1974.

Take notice that Northern Natural Gas Company, (Northern), on March 1, 1974 tendered for filing Fourth Revised Sheet No. 3a of its F.P.C. Gas Tariff, Volume No. 4. Northern asserts that the proposed change, to become effective April 1, 1974, would increase annual revenues from jurisdictional sales and service by $25,731. The increase of 2.20¢ per MCF reflects an increase of the wholesale F-2 rate for gas purchased from Colorado Interstate Gas Company. Northern alleges that this rate increase filing is being made pursuant to Paragraph 19 of the General Terms and Conditions contained in Northern's F.P.C. Gas Tariff, Original Volume No. 4.

Northern also included in its filing Substitute Fourth Revised Sheet No. 3a to its F.P.C. Gas Tariff, Volume No. 4. Northern has requested that this alternate Sheet be allowed to become effective should Colorado Interstate obtain approval from the F.P.C. to place into effect on April 1, 1974, an alternate increase of .59¢ per MCF.

Copies of the filing were served upon the Gas Utility Customers and Interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before March 22, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6412 Filed 3-19-74;8:45 am]

[Docket No. E-7777]

PACIFIC GAS AND ELECTRIC CO.

Order Granting Motion for Extraordinary Relief and Instituting Investigation

MARCH 14, 1974.

We have before us a "Motion for Extraordinary Relief" which is an appeal from the presiding administrative law judge's denial of a request to certify to us his ruling granting the Commission staff's motion (Tr. 30) "to dismiss and remove from this proceeding all matters dealing with the issue of anticompetitive activities as they have been set forth by the intervenors." Due to the scope and importance of his ruling, we find that there exist "extraordinary circumstances" within the meaning of § 1.28(a) of our rules of practice and procedure and, accordingly, we shall consider this appeal on the merits.

On September 29, 1972, Pacific Gas and Electric Company (PG&E) tendered for filing revised tariff sheets embodying a 22 percent wholesale rate increase. On November 10, 1972, certain of its jurisdictional customers, namely, the cities of Alameda, Healdsburg, Lodi, Lompoc, Santa Clara and Ukiah, California (Cities) filed a document entitled in part "Motion to Reject, Protest, Request for Hearing and Five Months Suspension, and Petition to Intervene" alleging, among other matters, that PG&E was engaging in anticompetitive behavior. Cities alleged that such behavior included PG&E's proposing a wholesale rate so high that its wholesale customers would be unable to compete with PG&E for large industrial retail loads and, consequently, they would be caught in a competitive "price squeeze". Cities asked that we reject the filing because of PG&E's alleged anticompetitive behavior or, if we accept it, that we condition our acceptance on PG&E's elimination of its alleged anticompetitive behavior. On the same day Northern California Power Agency (NCPA), an agency of the State of California, filed a "Petition for Intervention" on behalf of the Cities of Biggs, Gridley, Palo Alto, Redding, and Roseville, California, and Plumas-Sierra Rural Electric Cooperative, also alleging that PG&E was engaging in anticompetitive behavior.

On November 27, 1972, after considering PG&E's answers denying the allegations, we accepted the filing without the conditions proposed by Cities, permitted the interventions, suspended the rate increase for the maximum statutory period until April 28, 1973, and set the matter for hearing, stating that "the issues raised by the pleadings • • • may require development in evidentiary proceedings". In its "Application for Rehearing" filed December 27, 1972, Cities complained of our failure to say why we had not imposed conditions on our acceptance of PG&E's filing and enlarged its request for relief by asking that we "require interim modification of the new rates so as to avoid unlawful discrimination and price squeeze". On January 26, 1973, we denied Cities' "Application for Rehearing" stating that

> Cities' proposed conditions presuppose anticompetitive behavior on the part of Pacific Gas & Electric Company, a matter which cannot be properly ruled upon without development of the issue in an evidentiary proceeding.

Cities, on March 7, 1973, filed a petition in the United States Court of Appeals for the District or Columbia Circuit (Docket No. 73-1246) to review the orders which we issued on November 27, 1972, and January 26, 1973. On April 16, 1973, we moved to dismiss that petition, arguing that the orders in question were not sufficiently definitive to be reviewable, and even assuming, arguendo, that the orders were not interlocutory, they were nevetheless a nonreviewable exercise of the Commission's discretionary suspension power. We stated in the motion that "• • • until the Commission has had an opportunity to consider at an evidentiary hearing the issue of anti-competitive behavior and to rule upon the justness and reasonableness of PG&E's rates, such issues can hardly be considered definitive or ripe for review". On July 5, 1973, the Court of Appeals summarily granted our motion and dismissed Cities' petition.

At the prehearing conference in this proceeding on September 25, 1973, Staff moved "to dismiss and remove from this proceeding all matters dealing with the issue of anticompetitive activities as they have been set forth by the intervenors." On September 28, 1973, the presiding judge granted the staff's motion, stating that "[a]nticompetitive activities are dismissed from consideration in this case • • •" On October 10, 1973, Cities and NCPA filed a "Request for Certification," proffering forty-seven issues of alleged anticompetitive conduct. They took issue with the presiding judge's refusal to consider anticompetitive matters where full relief could not be granted, claiming that if such matters are raised they must be considered if some appropriate relief can be granted. On October 30, 1973, the presiding judge denied the request on the ground that the necessity for prompt Commission action had not been shown.

Cities' and NCPA's "Motion for Extraordinary Relief" followed on November 7, 1973, asserting that their claim that extraordinary circumstances exist for prompt Commission action is based on the significant limiting effect of the presiding judge's ruling on the scope of the proceeding as previously defined in (1) the orders which we issued on November 27, 1972, and January 26, 1973, and (2) the motion which we filed in the Court of Appeals on April 16, 1973, to dismiss Cities' petition to review those orders.

Staff opposes Cities' and NCPA's "Motion for Extraordinary Relief" relying on the orders which we issued in Southern California Edison Company, on September 21, 1973, and November 2, 1973, and in Arkansas Power and Light Company, Docket No. E-8250, E-8071 and E-8142, on October 29, 1973. PG&E also opposes the motion on the basis that the presiding judge's ruling is consistent with the order which we issued in Southern California, supra. PG&E argues that we did not commit ourselves to accepting all evidence of anticompetitive activities by stating in the orders which we issued in this proceeding on November 27, 1972, and January 26, 1973, that the issues raised by the intervenors may require development, and that Cities' proposed conditions cannot be ruled upon without their development in an evidentiary proceeding. Furthermore, PG&E contends that the presiding judge's ruling is consistent with Gulf States Utilities Co. v. F.P.C., 411 U.S. 747, decided May 14, 1973, in which it was held that we are required to consider, in appropriate circumstances, the anticompetitive effects of regulated aspects of interstate utility operations pursuant to section 205 and 206, among other sections, of the Federal Power Act.

In Southern California and Arkansas Power, supra, the proponents of a "price squeeze" issue asked us to remedy an alleged anticompetitive wholesale rate by fixing the rate based upon the wholesaler's direct large industrial retail rates. A review of excerpts from the record (Attachment B to Cities Motion) indicates that, while Cities and NCPA have not requested the precise relief requested in Southern California and Arkansas, it is clear that Cities and NCPA have attempted to introduce evidence to relieve or compensate for an alleged "price squeeze" by adjusting wholesale rate levels on other than a cost-plus-fair return basis. As we have indicated on numerous occasions, our standard in setting wholesale rates is that any wholesale rate level must be predicated on proof of costs associated with wholesale service plus a fair return. Cities and NCPA have been given an opportunity to present such evidence. We find, therefore, that the presiding Judge's ruling related to "price squeeze" evidence is correct.

We note however, that it appears from Cities' and NCPA's motion for extraordinary relief that anticompetitive issues other than the alleged "price squeeze" have been raised. Cities and NCPA have also alleged, inter alia, that PG&E has entered into various contracts [1]

[1] PG&E contracts with: San Diego Gas & Electric and Southern California Edison Company (FPC Rate Schedule No. 27); United States Bureau of Reclamation (FPC Electric Tariff Original Volume No. 4); Sacramento Municipal Utility District (FPC Rate Schedule No. 45); and Southern California Edison and San Diego Gas and Electric, Seven Party Rate Agreement (FPC Rate Schedule No. 105).

V 39 N 55
MAR 20 74
XUM

which, through their alleged restrictive and anticompetitive nature, have strengthened a purported monopoly over generation and transmission facilities in northern and central California to the detriment of Cities and NCPA. The relief either requested or implied by the various allegations would entail: (1) the adjustment of PG&E's rates to Cities and NCPA to account for the alleged anticompetitive activities; (2) the direction by this Commission to PG&E to wheel power; and (3) the review and possible amendment of the above mentioned contracts to remove anticompetitive provisions.

With regard to (1) supra, as previously stated, this Commission, in designing wholesale rates, utilizes a cost plus-fair reasonable rates and does not have the authority under the Act to make the type of adjustment Cities . . . and NCPA are impliedly urging upon us. To the extent that the costs associated with service to Cities and NCPA are lower than those claimed by PG&E, then a rate adjustment would be appropriate. However, evidence relating to alleged anticompetitive activities does not serve to prove or disprove the propriety of a wholesale rate level. Further, with respect to wheeling, it has been determined that the Commission does not have the authority to order wheeling (Cf. Otter Tail Power Co. v. U.S., 410 U.S. 366 (1973)). However, the Commission may have the authority, in proper circumstances, to amend certain provisions of contracts on file with this Commission (Cf. Carolina Power & Light Company, Docket No. E–7918, order issued March 12, 1973). We note that the contracts specifically complained of here are on file with this Commission and that relief might be granted if the allegations are satisfactorily proved at hearing. Since, however, such relief is unrelated to the determination of just and reasonable rates presently being made in the proceeding, we shall institute, in a second phase of the proceeding, an investigation of the contracts in question pursuant to section 206 of the Federal Power Act. In serving its evidence, Cities and NCPA shall indicate precisely which provisions of the contracts are allegedly improper and the manner in which the provisions are proposed to be amended. All evidence shall, of course, be subject to appropriate motions regarding our jurisdiction over the contract issues so raised as well as the relevancy and materiality of the evidence adduced.[2]

[2] We note that, with respect to the contract with the Sacramento Municipal Utility District (FPC Rate Schedule No. 45), NCPA has previously raised certain issues relating to alleged anticompetitive provisions contained in this contract. In Northern California Power Agency v. F.P.C., D.C. Cir. No. 73–1765, the Commission has taken the position that the contract provisions that NCPA urged the Commission to review in a proceeding before the Commisison relate to service over which the Commission does not exercise jurisdiction and therefore the Commission was without power to grant the relief requested.

We view with deep seriousness and concern the charges made by Cities against PG&E and believe they warrant a full and complete investigation. The section 206 proceeding herein ordered will allow for such investigation and provide the appropriate forum for the presentation and development of a complete evidentiary record concerning the alleged anticompetitive activity and conduct of PG&E. If, for example, after hearing and decision PG&E is found, by virtue of contract provisions subject to FPC jurisdiction, to have restricted the ability of its customers to develop their own generation, or limited customers access to alternate supply sources, this Commission will not hestitate to order contract reform or other measures as are necessary to eliminate such practices.

We view our position as being consistent with the orders which we issued in this proceeding on November 27, 1972, and January 26, 1973, as well as the position which we took in the Court of Appeals, all of which predated the Supreme Court's guidance in Gulf States, supra. We indicated in those orders that we would consider all issues including the anticompetitive issue, but we did not intend to relieve those who would offer evidence to establish violations of antitrust policy from their traditional burden of establishing the relevancy of such evidence to the issues in the proceeding, including their relevancy to the specific relief which we have the power and authority to grant. Nor did we intend to preclude the administrative law judge from performing his traditional and essential function of sifting the evidence as it is offered and inquiring into the prospective relevancy of particular evidence when such relevancy is not readily apparent. Whenever proposed evidence fails to suggest relief which we have the power and authority to grant, it is the duty of the administrative law judge to exclude it from the record of the proceeding.

POLITICAL ACTIVITY ISSUE

Cities asks, as part of its Motion for Extraordinary Relief, that we reverse that portion of the presiding judge's ruling on November 2, 1973, which denied Cities' discovery request that PG&E

Provide documents which indicate any plan or activity by PG&E or its officers or employees since January 1, 1960 related to the obtaining from PG&E's officers or employees of contributions to any candidates for political office (local, state or federal).

PG&E states in its Response (1) that in a recent filing Cities sufficiently narrowed its request to permit PG&E to respond, and (2) that PG&E

Pursues no activities whatever to elicit compulsory political contributions from its officers, employees or any other persons and, therefore, that it has no documents of the sort which Cities have requested.

It appears from PG&E's Response that the issue sought to be raised has become moot and, consequently, we make no other findings and issue no orders in connection with this aspect of Cities' and NCPA's Motion for Extraordinary Relief.

The Commission orders:

(A) The Motion for Extraordinary Relief which was filed by the Cities of Alameda, Healdsburg, Lodi, Lompoc, Santa Clara and Ukiah, California, and the Northern California Power Agency on November 7, 1973, is granted and the ruling which the presiding administrative law judge issued on September 28, 1973, granting the motion which the Commission Staff made at the prehearing conference on September 25, 1973, is reversed only to the extent required to permit an investigation under Section 206 of the Federal Power Act, in a second phase of this proceeding, of the jurisdictional contracts in question cited in Cities' Motion for Extraordinary Relief.

(B) An investigation under section 206 of the Federal Power Act into the justness and reasonableness of the terms and conditions of the contracts identified in Cities' and NCPA's Motion for Extraordinary Relief is hereby instituted as a separate phase of this proceeding. Cities and NCPA shall file testimony and exhibits in support of its allegations concerning the subject contracts on or before April 23, 1974. Staff evidence, if any, shall be served on or before May 7, 1974. Rebuttal evidence shall be served on or before May 21, 1974. Cross examination of the testimony and exhibits filed shall take place on June 4, 1974, before the Presiding Administrative Law Judge presently designated in this docket, as such other Administrative Law Judge as may be assigned in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

(C) The Secretary of the Commission shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.74–6413 Filed 3–19–74;8:45 am]

[Docket No. E–8649]

PACIFIC POWER AND LIGHT CO.

Notice of Application

MARCH 13, 1974.

Take notice that on March 4, 1974, Pacific Power and Light Company (Applicant), a corporation organized under the laws of the State of Maine and qualified to transact business in the States of Oregon, Wyoming, Washington, California, Montana and Idaho, with its principal business office at Portland, Oregon, filed an application with the Federal Power Commission, pursuant to section 204 of the Federal Power Act, seeking an order authorizing borrowings in an aggregate principal amount not exceeding $35,000,000 at any one time outstanding under a Loan Facility with certain banks.

Under such Loan Facility, Applicant would have the right to make borrowings not exceeding $35,000,000 at any one time outstanding through drawings under a revolving standby Loan Facility evidenced by a Letter Agreement to be dated as of March 18, 1974, between Applicant and White, Weld & Co., Limited as Agent for the Banks listed in said Letter Agreement. The duration of the Loan Facility would be for a period of 18 months from the date thereof until October 1, 1975. Under the Loan Facility, Applicant would have the right to make drawings from time to time in the amount of $1,000,000, or multiples thereof, for a period of one, three or six months, at Applicant's option, which borrowings would mature and be repaid on the last day of the chosen period, but in no event later than the termination date of the Loan Facility. Each drawing would be advanced by the Banks in the proportions to their respective commitments as set forth in said Letter Agreement.

Interest would be payable on each drawing at a rate per annum equal to a margin of ⅝ of 1 percent per annum plus the rate equal to the arithmetic mean (which, if not a whole multiple of 1/16 of 1 percent, would be increased to the nearest whole multiple of 1/16 of 1 percent) of the rates at which deposits in United States Dollars are offered by prime banks in the London interbank market for periods of one, three or six months, whichever is appropriate, and would be fixed at 11 a.m. (London time) two business days prior to the date on which the drawing is made. The interest would be payable on each drawing from the date thereof until actual repayment and would be calculated on the basis of the actual number of days elapsed divided by 360. Applicant will be under no requirement or understanding to maintain compensating balances with the Banks.

Applicant would pay a commitment commission in United States Dollars at the rate of ¼ percent per annum from the date of acceptance by Applicant until the termination of the Loan Facility calculated on the basis of the actual number of days elapsed divided by 360 and on the daily unused portion of the Loan Facility payable ninety days in arrears from the date of signing the Letter Agreement for the Loan Facility.

Proceeds from the borrowings to be made under the Loan Facility would be used, in part, to temporarily finance Applicant's construction expenditures for 1974 presently estimated at $259,589,000. The balance of funds required to meet estimated 1974 construction expenditures is expected to come, in part, from short-term borrowings presently authorized by the Commission and as the Commission may further authorize, and from further permanent financing later in 1974 of a type and magnitude not yet finally determined.

Any person desiring to be heard or to make any protest with reference to this application should, on or before April 5, 1974, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP74–225]

PENNSYLVANIA GAS CO.

Notice of Application

MARCH 13, 1974.

Take notice that on March 4, 1974, Pennsylvania Gas Company (Applicant), 213 Second Avenue, Warren, Pennsylvania 16365, filed in Docket No. CP74–225 an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon a total of 21 miles of existing pipelines located in Erie County, Pennsylvania, and for a certificate of public convenience and necessity authorizing Applicant to construct and operate 7.1 miles of replacement pipelines, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to abandon approximately 21 miles of parallel 8-inch 10-inch, 12-inch transmission pipeline extending between Applicant's regulator station on Stuart Road near Wattsburg, Pennsylvania, and the regulator station near Phillipsville, Pennsylvania, and replace said pipeline with two sections totaling 7.1 miles of new 20-inch transmission pipeline. Applicant states that the proposed 20-inch pipeline sections will replace 21 miles of existing bare transmission pipeline up to 88 years old which, pursuant to Department of Transportation safety regulations, would require an investment of $205,000 for cathodic protection. The application states that this proposed construction will obviate the necessity of such an expenditure while increasing Applicant's transmission capacity from its supply areas to its main marketing areas of Erie, Pennsylvania, and Jamestown, New York.

Applicant estimates the cost for construction of the proposed 20-inch transmission pipeline will be $1,000,000, which Applicant intends to finance in part out of available company funds, and in part, from funds to be obtained by issuing to its parent corporation, National Fuel Gas Company, notes or stock, or both, at face or par value.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 8, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. E–8646]

PUBLIC SERVICE COMPANY OF OKLAHOMA

Notice of Filing of Supplement to Rate Schedule

MARCH 13, 1974.

Take notice that Public Service Company of Oklahoma (PSCO) on March 1, 1974 tendered for filing a Supplement to its Rate Schedule FPC No. 186. The said Supplement is an agreement between PSCO and Union Electric Company (Union) for the sale to Union of 100 MV of capacity during the period April 1, 1974 to March 31, 1975. The Supplement calls for a demand charge at the rate of $1.50 per kilowatt of capacity per month regardless of unit availability. In addition, Union is to pay PSCO the preceding monthly average cost of fuel plus 1.32 mills for various operational costs for each kilowatt hour of energy scheduled. The Supplement contains a conservation clause in which Union agrees to redeliver to PSCO energy generated on coal-fired capacity in an amount equal to one-half the amount of energy Union receives from PSCO under the agreement. PSCO purposes an effective date of April 1, 1974 for this Supplement.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the

V 39 55 MAR 20 74 XUM

Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions should be filed on or before March 21, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. E-8645]

PUGET SOUND POWER AND LIGHT CO.

Notice of Filing of Agreement

MARCH 13, 1974.

Take notice that on February 27, 1974 Puget Sound Power and Light Company (PSP) tendered for filing an agreement between PSP and Southern California Edison Company (SCE). The said Agreement is for the sale of energy by PSP to SCE. The rates for and the amounts of such energy will be established by the parties, but in no event, will the rate exceed six mills per kilowatt-hour at the point of delivery, the Oregon-California border.

PSP proposes an effective date of February 28, 1974 for this Agreement.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions should be filed on or before March 21, 1974. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. CP73-225]

TEXAS GAS TRANSMISSION CORP.

Notice of Petition To Amend

MARCH 13, 1974.

Take notice that on March 1, 1974, Texas Gas Transmission Corporation (Petitioner), P.O. Box 1160, Owensboro, Kentucky 42301, filed a petition to amend the order issuing a certificate of public convenience and necessity in Docket No. CP73-225 pursuant to section 7(c) of the Natural Gas Act on July 19, 1973 (50 FPC ----) by authorizing Petitioner to continue to exchange natural gas with Terre Haute Gas Corporation (Terre Haute), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

By the order issued July 19, 1973, Petitioner was authorized to transport and exchange up to 2,000 Mcf of natural gas per day with Terre Haute, pursuant to an exchange agreement between the parties dated December 8, 1973, for a period ending December 15, 1973. Petitioner requests authorization to extend this simultaneous exchange of gas with Terre Haute for a period beginning December 16, 1973, through May 1, 1975, as provided in a letter agreement between the parties dated December 15, 1973.

Petitioner states that such an extension is needed due to operating conditions of Terre Haute's system and in order for Panhandle Eastern Pipe Line Company to test the feasibility of the Calcutta Carbon Storage Field located in Parke and Clay Counties, Indiana, near Brazil, Indiana.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before April 8, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6418 Filed 3-19-74;8:45 am]

[Docket No. CP74-214]

UNITED GAS PIPE LINE CO.

Notice of Application

MARCH 13, 1974.

Take notice that on February 25, 1974, United Gas Pipe Line Company (Applicant), 1500 Southwest Tower, Houston, Texas 77002, filed in Docket No. CP74-214 an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon pipeline sections on Applicant's system in east Texas and North Louisiana and for a certificate of public convenience and necessity authorizing the installation and operation of meter and regulating facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to abandon certain segments of its pipeline system which are no longer needed in Applicant's operations. Applicant states that by such abandonments Applicant will avoid certain expenditures for cathodic protection of the pipe required by the Office of Pipeline Safety of the U.S. Department of Transportation which would otherwise be required.

Applicant proposes to abandon in place, 6,683 feet of the 8-inch Waskom-Tyler line located near Tyler, Smith County, Texas, and 2,270 feet of the 4-inch Kangerga Field transmission line in Rusk County, Texas. Applicant proposes, in addition, to abandon and sell to Louisiana Gas Service Company 494 feet of the Tallulah, Louisiana 4-inch tap line near Tallulah, Madison Parish, Louisiana; 10,433 feet of the 4-inch Richland Field transmission line to the Winnsboro line located in Richland Parish, Louisiana, where Applicant proposes to install meter and regulating facilities estimated to cost $840 to serve this low pressure line from the 4-inch Winnsboro line; and 145,685 feet of the 7-inch line located in Ouachita and Jackson Parishes, Louisiana, where Applicant proposes to install meter and regulating facilities estimated to cost $4,310 to serve this low pressure 7-inch line from the 30-inch South-North line.

Applicant states that installation of the proposed meter and regulating facilities will allow Applicant to provide for continued service to those pipelines being sold. The application states that two domestic farm tap customers on the 8-inch Waskom-Tyler line, and seven such customers on the 4-inch Kangerga Field transmission line whose service will be terminated will be furnished with propane storage tanks by Applicant.

Applicant states further that the remainder of the domestic farm tap customers presently on the section of Waskom-Tyler line being abandoned will continue to be served by connections to the distributor, United Gas, Inc., from another part of Applicant's pipeline system. Domestic farm tap customers on the 4-inch Richland Field transmission line to the Winnsboro line and on the 7-inch Hodge line will continue to be served by Louisiana Gas Service Company through the facilities being sold by Applicant and through the proposed meter and regulating facilities to be installed by Applicant.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 8, 1974, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6420 Filed 3-19-74;8:45 am]

[Docket No. RP74-37-10]

UNITED GAS PIPE LINE CO. (UNITED GAS, INC. ON BEHALF OF B. C. ROGERS AND SONS, INC.)

Notice of Petition for Extraordinary Relief

MARCH 13, 1974.

Take notice that on March 4, 1974 United Gas, Inc. (UGI) filed a petition for extraordinary relief on behalf of B. C. Rogers and Sons, Inc. (Rogers) seeking an additional annual supply of 193,000 Mcf of natural gas from United Gas Pipe Line Company (United).

Rogers is located in Morton, Mississippi and supplied by UGI which in turn is supplied by United. Its base requirement, as established by United, is 83,566 Mcf/per year and Morton's entire base requirement is 271,912 Mcf/per year. The requested additional service would increase Rogers' base requirements to a total exceeding that which the town of Morton is allotted (277,000; 271,912) and UGI states that it cannot supply this increase. The additional supplies would be used for operating a soon to be completed rendering plant at the Rogers' poultry processing complex. The rendering plant will be used to dispose of waste materials and Rogers states that the entire complex will necessarily be closed if it cannot dispose of the waste products through this plant (all as more fully set out in the attachment to UGI's petition which is on file with the Commission and open for public inspection).

Any person desiring to be heard or to make protest with reference to said petition should on or before March 28, 1974, file with the Federal Power Commission, Washington, D.C. 20426 petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The petition is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.74-6419 Filed 3-19-74;8:45 am]

FEDERAL RESERVE SYSTEM

ALABAMA FINANCIAL GROUP, INC.

Order Approving Acquisition of Bank

Alabama Financial Group, Inc., Birmingham, Alabama, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 88.2 percent of the voting shares of The Sand Mountain Bank, Boaz, Alabama ("Bank").

Notice of the application affording opportunity for interested persons to submit comments and views has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and this Federal Reserve Bank has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the fourth largest banking organization in Alabama controls seven banks which have deposits of $683.3 million or 9.7 percent of deposits in all commercial banks of the state. (Banking data are as of June 30, 1973, and reflect acquisitions and formations approved by the Board through February 1, 1974.) Acquisition of Bank having deposits of $23.1 million would increase Applicant's share of Alabama commercial bank deposits by less than one percent and would not change Applicant's rank among other banking organizations in the state in aggregate commercial bank deposits. No undue concentration of banking resources in Alabama would result.

Applicant is seeking to make its initial entry into the Marshall County banking market, which is located in the northeastern part of Alabama. Applicant, in acquiring Bank, the third largest bank in the market, with deposits representing 20.8 percent of commercial bank deposits in the market, will not be gaining a dominant position.

Applicant's closest subsidiary bank is at Anniston, Alabama, 41 miles southeast of Bank. No competition exists between Applicant's banking subsidiaries and Bank, and it is not likely that significant future competition would develop between them because of the distances involved and Alabama's restrictive branching laws. The acquisition would be procompetitive by breaking an existing affiliation with another bank in the market, and would have no adverse competitive effects.

The financial and managerial resources and prospects of Applicant, its subsidiaries and Bank are satisfactory; future prospects appear favorable in that Applicant will make available to Bank its managerial resources. The proposed affiliation with Applicant will allow Bank to initiate a 24-hour automatic teller service and offer corporate services to branches of national concerns located in the market. Considerations relating to convenience and needs of the community to be served lend weight toward approval of the application. It is this Federal Reserve Bank's judgment that consummation of the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transactions shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Federal Reserve Bank of Atlanta acting under delegated authority for the Board of Governors of the Federal Reserve System, effective March 12, 1974.

[SEAL] KYLE K. FOSSUM,
First Vice President.

[FR Doc.74-6358 Filed 3-19-74;8:45 am]

BARNETT BANKS OF FLORIDA, INC.

Order Approving Acquisition of Bank

Barnett Banks of Florida, Inc., Jacksonville, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 90 per cent or more of the voting shares of Barnett Bank of South Orlando, Orlando, Florida, a proposed new bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the second largest bank holding company in Florida, controls 52 banks with aggregate deposits of $1.6 billion, representing 7.8 per cent of total deposits of commercial banks in the State.[1] Since Bank is a proposed new bank, no existing competition will be eliminated nor would Applicant's share of Statewide deposits be increased.

Applicant presently controls five banking subsidiaries in the Orlando banking market (comprising Orange and south Seminole Counties). Applicant does not

[1] All banking data are as of June 30, 1973, and reflect bank holding company formations and acquisitions approved through February 28, 1974.

V 39 55 MAR 20 74 XUM

dominate the market as it controls but 12.3 per cent of market deposits. In contrast, the largest banking institution in the market controls approximately 40 per cent of the area's commercial bank deposits. None of Applicant's banking subsidiaries presently draw any significant amount of business from the proposed service area of Bank. It appears that no significant existing competition would be eliminated nor significant potential competition foreclosed, nor would there be any undue adverse effects on any competing banks. Based on the record before it, the Board concludes that consummation of the proposed acquisition would not adversely effect competition in any relevant area.

The financial and managerial resources and prospects of Applicant, its subsidiary banks, and Bank are regarded as generally satisfactory, particularly in view of Applicant's commitments to inject capital into certain of its subsidiaries. Thus, considerations relating to banking factors are consistent with approval. Considerations relating to the convenience and needs of the community to be served lend some weight toward approval as Bank will offer an alternative source of full banking services to residents of the area. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, and (c) Barnett Bank of South Orlando, Orlando, Florida, shall be opened for business not later than six months after the effective date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors,[2] effective March 13, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6360 Filed 3-19-74;8:45 am]

FIRST AT ORLANDO CORP.

Order Approving Acquisition of Bank

First at Orlando Corporation, Orlando, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 90 percent or more of the voting shares of Citizens National Bank of Naples, Naples, Florida ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act, and the time for comment has expired. The Federal Reserve Bank of Atlanta, acting pursuant to delegated authority for the Board, has considered the application and comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is the third largest banking organization in Florida, and controls thirty-nine subsidiary banks with deposits of $1.5 billion, representing 7.14 percent of total deposits in commercial banks in the state. (Banking data are as of June 30, 1973, adjusted to reflect holding company formations and acquisitions approved by the Board through February 1, 1974.) The proposed acquisition of Bank, having deposits of $28.6 million, would not result in a significant increase in the concentration of banking resources in Florida, and would not change Applicant's rank in amount of deposits held by banking organizations in the state.

The relevant banking market is Collier County, Florida, excluding the town of Immokalee; Naples is the county seat. Bank is the third largest of six banks now in the market, and its deposits represent 13 percent of commercial bank deposits in the market. Applicant in acquiring Bank will not gain a dominant position, and the acquisition will end Bank's affiliation with the second largest bank in the market, which holds 33 percent of market deposits.

Applicant's closest subsidiary bank is located in Miami, 110 miles to the east. Applicant's nonbanking subsidiaries derive no business from the service area of Bank. Because of the distance and Florida's prohibitions against branch banking, it is not likely that future competition would arise between Bank and Applicant's subsidiaries. Accordingly, approval of the application would have no adverse competitive effects.

The financial and managerial resources and future prospects of Applicant, its subsidiary banks, and Bank are regarded as generally satisfactory and consistent with approval, especially in view of Applicant's commitments to furnish additional capital to its other subsidiary banks. Customers of Bank will have access to trust services, investment advisory services, and mortgage financing through Applicant's subsidiaries, and Bank would be enabled to meet the borrowing needs of its largest customers. Considerations related to the convenience and needs of the community to be served thus lend some weight toward approval of the application. In the judgment of this Federal Reserve Bank, the application is in the public interest and should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the date of this Order or (b) later than three months after such date, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Federal Reserve Bank of Atlanta, acting under delegated authority for the Board of Governors of the Federal Reserve System, effective March 8, 1974.

[SEAL] MONROE KIMBREL,
President.

BUSINESS ADMINISTRATIVE NEEDS OF KANSAS, LTD.

Formation of Bank Holding Company

Business Administrative Needs of Kansas, Ltd., Wichita, Kansas, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 65.2 percent or more of the voting shares of The State Bank of Lancaster, Lancaster, Kansas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20051 to be received not later than April 9, 1974.

Board of Governors of the Federal Reserve System, March 12, 1974.

Asssitant Secretary of the Board.

[FR Doc.74-6326 Filed 3-19-74;8:45 am]

FIRST AT ORLANDO CORPORATION ORLANDO, FLORIDA

Order Approving Acquisition of Bank

First at Orlando Corporation, Orlando, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 90 percent or more of the voting shares of The First American Bank of Pensacola, Pensacola, Florida ("Bank").

Notice of the application affording opportunity for interested persons to submit comments and views has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and this Federal Reserve Bank has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the third largest banking organization in Florida, controls 39 banks having deposits of $1.5 billion or 7.1 percent of deposits in all commercial banks of the state. (Banking data are as of June 30, 1973, and reflect acquisitions and formations approved by the Board through February 1, 1974). Acquisition of Bank, having deposits of $12.3 million, would increase Applicant's share of Florida commercial bank deposits by less than one percent, and would not change Applicant's rank among other banking organizations in the state in aggregate commercial bank deposits. No undue concentration of banking resources in Florida would result.

Applicant is seeking to make its initial entry into the Pensacola market which includes Escambia and Santa Rosa Counties in the northwestern part of Florida. Applicant, in acquiring Bank, the sixth largest of 16 banks in the market, with deposits representing 3.8 percent of commercial bank deposits in the market, will not be gaining a dominant position.

Applicant's closest subsidiary bank is at Gainesville, Florida, 347 miles southeast of Bank. No competition exists between Applicant's subsidiaries and Bank, and it is not likely that future competition would develop between them because of the distances involved and Florida's restrictive branching laws. The acquisition would have no adverse competitive effects.

The financial and managerial resources and prospects of Applicant, its subsidiaries and Bank are satisfactory in light of Applicant's commitment to increase capital in its other subsidiary banks; future prospects appear favorable. There is no evidence that the banking needs of the community are not being served; however the proposed affiliation with Applicant will help Bank improve the quality of the services it is currently providing. Also, Bank's customers will have access to mortgage services, trust services, and investment advisory services through Applicant's subsidiaries. Considerations relating to convenience and needs of the community to be served lend weight toward approval of the application. It is this Federal Reserve Bank's judgment that consummation of the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Federal Reserve Bank of Atlanta acting under delegated authority for the Board of Governors of the Federal Reserve System, effective March 12, 1974.

[SEAL] KYLE K. FOSSUM,
First Vice President.

[FR Doc.74-6359 Filed 3-19-74;8:45 am]

FIRST VIRGINIA BANKSHARES CORP.

Order Approving Retention of Arlington Mortgage Company

First Virginia Bankshares Corporation, Falls Church, Virginia, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under section 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to retain all of the voting shares of Arlington Mortgage Company, Falls Church, Virginia ("Company"), a company that engages in the following activities: origination and acquisition of both FHA and VA-insured and conventional real estate loans (including construction loans), and servicing of all types of real estate loans. Such activities have been determined by the Board to be closely related to banking (12 CFR Part 225.4(a)(1) and (3)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (39 Federal Register 1487). The time for filing comments and views has expired, and none has been timely received.

Applicant directly acquired Company in 1968 under authority of § 4(c)(5) of the Act.[1] Applicant seeks permission through this application to operate Company under the broader authority contained in § 4(c)(8) of the Act. In considering a proposal for the retention of shares in a nonbanking company under § 4(c)(8) of the Act, the Board must find that the proposed retention of the nonbanking company could reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects such as an undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices.

Applicant, the sixth largest banking organization in Virginia, controls 23 banks with aggregate deposits of $761 million, representing 6.7 per cent of total deposits in commercial banks in Virginia.[2] Applicant's nonbanking subsidiaries engage in activities including mortgage lending, consumer finance, leasing, advisor to real estate investment trust, the sale of insurance, and holding title to bank premises.

Company (assets of $16 million as of December 31, 1972) is headquartered in Falls Church, Virginia, a suburb of Washington, D.C., and ranked as the 135th largest mortgage company in the United States based on a mortgage servicing volume of $212 million as of June 30, 1973.[3] The principal competitive effects of Applicant's proposal are limited to the Washington, D.C., SMSA. In 1968, Applicant's lead bank, First Virginia Bank, Falls Church, Virginia ("Bank"), originated a total of approximately $4.6 million of 1–4 family residential mortgage loans and $4.7 million of mortgage loans on multi-family and non-residential property in the Washington, D.C., SMSA; during the same period and within the same area, Company originated about $11 million of 1–4 family residential mortgage loans and $15 million of mortgage loans on multi-family and nonresidential property. Comparable figures for 1972 indicate that Bank and Company originated approximately $18 million and $13 million of 1–4 family residential mortgage loans, and approximately $2 million and $71 million of mortgage loans on multi-family and nonresidential property, respectively.[4] In view of the large number of mortgage lenders in the relevant market (over 100), the relatively small share of the residential mortgage market that Applicant and Company hold combined (under 2 per cent), and the fact that the mortgage loan market for multi-family and nonresidential property is national in scope, it appears that no meaningful existing competition was eliminated, nor was substantial competition foreclosed, in the Washington, D.C. area through Applicant's acquisition of Company.

First Virginia Mortgage Company ("Mortgage"), a subsidiary of Bank, offers FHA and VA-insured mortgage loans and 90–95 percent residential financing to customers of Applicant's subsidiary banks operating outside the Washington, D.C., SMSA. However, the amount of such loans originated by Mortgage dur-

---

[2] Voting for this action: Chairman Burns and Governors Mitchell, Brimmer, Sheehan, Bucher, Holland, and Wallich.

[1] Section 4(c)(5) of the Act generally permits a bank holding company to acquire, without Board approval, "shares which are of the kinds and amounts eligible for investment by national banking associations under the provisions of section 5136 of the Revised Statutes".

[2] All banking data are as of June 30, 1973, adjusted to reflect holding company acquisitions and formations approved through February 28, 1974.

[3] Since its acquisition by Applicant, Company has established additional offices *de novo* in each of the following: Virginia Beach, Virginia; Orlando, Florida; and Birmingham, Alabama. However, these offices serve only as loan production offices, soliciting loans and preparing credit, appraisal, and feasibility information for the originations at the Company's principal office in Falls Church. The application herein contemplates converting these three offices to full service mortgage lending offices.

[4] Applicant has two other subsidiary banks in the Washington, D.C., SMSA (combined deposits of $46 million), and in 1972 they had in the aggregate about $6 million of residential mortgage loans in the market area.

V 39 55 MAR 20 74 XUM

ing 1972 amounted to only about $900,000. First Advisors, Inc. ("First Advisors"), a direct subsidiary of Applicant, acts as advisor to Mortgage and a publicly-owned real estate investment trust. First Advisors also originates, as exclusive agent for the trust, commercial real estate and construction loans and, as a result, there is a slight overlap in this type of loan activity between First Advisors and Company; but the amount of direct competition appears to be insignificant, particularly in view of the fact that the market for such loans is national in scope. On the basis of the foregoing and other facts of record, the Board concludes that the proposal would have no significant adverse effects on existing or potential competition in any relevant area.

There is no evidence in the record to indicate that the proposed retention of Company by Applicant would lead to an undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices, or other adverse effects. On the contrary, the affiliation of Company with Applicant has resulted in benefits to the public in the form of expanded services and increased lending capabilities since Applicant has provided Company with substantial capital thereby increasing the volume of Company's loan originations. Moreover, approval herein will enable Company to convert its Virginia Beach, Orlando, and Birmingham loan production offices to full service status, thus resulting in greater convenience to the public and more efficient processing of loan applications. These public benefits lend weight for approval herein.

Based on the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under section 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors,* effective March 13, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6367 Filed 3-19-74;8:45 am]

GREAT LAKES BANCSHARES, INC.

Acquisition of Bank

Great Lakes Bancshares, Inc., Cleveland, Ohio, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares (less directors' qualifying shares) of the Dime Bank, Canton, Ohio. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Cleveland. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than April 8, 1974.

Board of Governors of the Federal Reserve System, March 13, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.74-6361 Filed 3-19-74;8:45 am]

SECURITY BANCORP, INC.

Proposed Acquisition of United Bankers Life Insurance Co.

Security Bancorp, Inc., Southgate, Michigan, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire voting shares of United Bankers Life Insurance Company, Phoenix, Arizona. Notice of the application was published on February 20, 1974, in The Mellus Newspapers, a newspaper circulated in Southgate, Michigan.

Applicant states that the proposed subsidiary would engage in the activity of underwriting, as reinsurer, of credit life and disability insurance in connection with loans made by the credit extending subsidiaries of Security Bancorp, Inc. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweight possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than April 10, 1974.

Board of Governors of the Federal Reserve System, March 13, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

UNITED FIRST FLORIDA BANKS, INC.

Acquisition of Bank

United First Florida Banks, Inc., Tampa, Florida, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 90 percent or more of the voting shares of First National Bank of Merritt Island, Merritt Island, Florida. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than April 10, 1974.

Board of Governors of the Federal Reserve System, March 13, 1974.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

INTERIM COMPLIANCE PANEL (COAL MINE HEALTH AND SAFETY)

B & B COAL CO. ET AL.

Applications for Initial Permits; Electric Face Equipment Standard; Opportunity for Hearing

Applications for Initial Permits for Noncompliance with the Electric Face Equipment Standard have been received for items of equipment in the underground coal mines listed below.

(1) ICP Docket No. 4056-000, B & B COAL COMPANY, Fodder Stack Mountain Mine No. 2, Mine ID No. 40 00422 0, Petros, Tennessee.
(2) ICP Docket No. 4136-000, #10 COAL MINING CORPORATION, Mine No. 11, Mine ID No. 46 02060 0, Bradshaw, West Virginia.
(3) ICP Docket No. 4138-000, #10 COAL MINING CORPORATION, Dry Fork No. 2 Mine, Mine ID No. 46 03786 0, Bradshaw, West Virginia.

In accordance with the provisions of section 305(a)(2) (30 U.S.C. 865(a)(2)) of the Federal Coal Mine Health and Safety Act of 1969 (83 Stat. 742, et seq., Pub. L. 91-173), notice is hereby given that requests for public hearing as to an application for an initial permit may be filed on or before April 4, 1974. Requests for public hearing must be filed in accordance with 30 CFR Part 505 (35 FR 11296, July 15, 1970), as amended, copies of which may be obtained from the Panel upon request.

A copy of each application is available for inspection and requests for public hearing may be filed in the office of the Correspondence Control Officer, Interim Compliance Panel, Room 800, 1730 K Street, NW., Washington, D.C. 20006.

C. DONALD NAGLE,
Vice Chairman, Interim Compliance Panel.

MARINE MAMMAL COMMISSION

ESTABLISHMENT AND FUNCTIONS; SOLICITATION OF PROPOSALS FOR RESEARCH PROJECTS AND STUDIES

The Marine Mammal Protection Act of 1972 (P.L. 92-522; 16 U.S.C. 1361; 86 Stat. 1027) sets forth a national policy to prevent marine mammal species and population stocks from diminishing, as a result of human activities, beyond the point at which they cease to be a significant functioning element in the marine ecosystem. Congress directed that the primary objective of marine mammal management should be to maintain the health and stability of the marine ecosystem and, whenever consistent with this primary objective, to reach and maintain optimum sustainable populations of marine mammals within the optimum carrying capacity of the habitats.

Title II of the Act established the Marine Mammal Commission for the purpose of developing, reviewing, and making recommendations on activities and policy to assure that the objectives of the Act relating to the protection and conservation of marine mammals are achieved.

At present, there are two Commissioners, Dr. Victor B. Scheffer (Chairman) and Dr. A. Starker Leopold. In accordance with the Act, a third will be named.

The Commission has appointed a nine-member Committee of Scientific Advisors on Marine Mammals: Dr. George A. Bartholomew, Mr. John J. Burns, Dr. Douglas G. Chapman (Chairman), Mr. Jack W. Lentfer, Dr. Kenneth S. Norris, Dr. G. Carleton Ray, Mr. William E. Schevill, Dr. Donald B. Siniff, and Dr. Jesse R. White. The Committee, composed of scientists knowledgeable in marine ecology and marine mammal affairs, is consulted on studies, recommendations, research, and applications for permits requested under the Act.

In late January 1974, John R. Twiss, Jr., was named Executive Director and Robert Eisenbud was named General Counsel. The Commission offices are located at 1625 Eye Street, N.W., Washington, D.C. 20006 (202/382-4475).

RESPONSIBILITIES OF THE COMMISSION

The Act charges the Secretary of Commerce with responsibilities for the protection and conservation of whales, porpoises, seals, and sea lions and the Secretary of the Interior with responsibilities for the protection and conservation of sea otters, walruses, polar bears, manatees, and dugongs. These responsibilities have been delegated by the Secretaries to the Director of the National Marine Fisheries Service and the Director of the Bureau of Sport Fisheries and Wildlife, respectively.

The functions of the Commission with respect to these Departments and other responsibilities and activities of the Commission may be summarized as follows:

A. POLICY REVIEW AND RECOMMENDATIONS

1. *Permits for taking and importing marine mammals.* A central feature of the Act is the provision for a moratorium on the taking and importation of marine mammals and marine mammal products except for such taking by certain Indians, Aleuts, and Eskimos for subsistence and/or native handicrafts and clothing purposes. During the moratorium, no permit for taking or importing may be issued by the Secretaries of Commerce or Interior for purposes of scientific research or public display unless it is first reviewed by the Commission and Committee of Scientific Advisors with reference to the purposes of the Act to maintain the optimum sustainable population within the optimum carrying capacity of the habitat. (Section 2(6); section 101(a); Section 104)

2. *Waiver of moratorium.* The Secretaries of Commerce and the Interior are

V 39 155 MAR 20 74 XUM

authorized and directed to waive the moratorium so as to allow the taking or importing of any marine mammal or marine mammal product, if, in consultation with the Commission, it is determined that such a waiver would be consistent with the purposes and policies of the Act. Such a determination, after a hearing, must be based upon considerations of the distribution, abundance, breeding habits and migratory patterns of marine mammals, as well as the optimum carrying capacity of the habitat. (Section 101 (3) (A); section 103(d)).

3. *Incidental taking of marine mammals in commercial fishing operations.* The Act directs the Secretary of Commerce to develop regulations, in consultation with the Commission, so as to reduce to the lowest practicable level the taking of marine mammals incidental to commercial fishing operations. (Section 101(a) (2); section 111(b)) The Secretary is directed to request the Committee of Scientific Advisors to prepare detailed estimates of the number of marine mammals killed or seriously injured under existing commercial fishing technology and under the technology which shall be required after October 21, 1974, so as to pose the least practicable hazard to marine mammals, with a goal of reducing incidental kill and serious injury to insignificant levels approaching zero. The Secretary of Treasury is directed to ban the importation of commercial fish or fish products which have been caught with technology which results in incidental kill or serious injury levels which exceed U.S. standards. (Section 101(a) (2))

4. *Regulations for taking and importing marine mammals.* The Secretaries of Commerce and the Interior are directed to consult with the Commission in prescribing regulations with respect to the taking and importing of animals from each species of marine mammal so as to insure that any such taking and/or importing will not be to the disadvantage of those species and population stocks and will otherwise be consistent with the purpose and policies of the Act. (Section 103) The secretaries are directed to require, in consultation with the Commission, humane treatment of marine mammals taken and/or maintained in captivity pursuant to regulations and permits so as to assure the least possible degree of pain and suffering practicable to the mammal involved. (Section 3(4); section 102(b) (4); section 103(c) (4); section 104 (b) (2) (B) and (c))

5. *Existing laws and international efforts.* The Act directs the Commission to review and study the activities of the United States pursuant to existing laws and international conventions relating to marine mammals and to recommend to the Secretary of State appropriate policies regarding existing international arrangements for the protection and conservation of marine mammals. (Section 108(b) (1) (A); section 202(a) (1), (5))

6. *Endangered species.* The Act directs the Commission to recommend, with regard to marine mammals, to the Secretary of the Interior such revisions of the Endangered Species List as may be appropriate. (Section 202(a) (6))

7. *Protection of Indians, Eskimos and Aleuts.* The Act directs the Commission to recommend such additional measures as it deems necessary or desirable, consistent with the policies of the Act, to protect certain Indians, Eskimos and Aleuts whose livelihood may be adversely affected by actions taken pursuant to the Act. (Section 202(7))

8. *Conditions of stocks, methods of protection, and humane means of taking marine mammals.* The Act directs the Commission to conduct a continuing review of: the conditions of stocks of marine mammals with reference to the goal of maintaining optimum sustainable populations within the optimum carrying capacity of the habitat; methods for their protection and conservation; and humane means of taking marine mammals. (Section 202(a) (2))

9. *Other necessary or desirable studies and actions.* The Act directs the Commission to undertake or cause to be undertaken such other studies as it deems necessary or desirable in connection with its responsibilities under the Act and to recommend to Federal officials such steps as it deems necessary or desirable for the protection and conservation of marine mammals. (Section 202(a) (3), (4))

B. STUDIES AND RESEARCH PROGRAMS

Reliable information concerning species levels and stocks of marine mammals, the ecosystem of which they are a part, and the human activities which influence them is essential to the fulfillment of the purposes and policies of the Act and the Commission's broad mandate to review, study, and recommend actions and policies relating to the protection and conservation of marine mammals.

Congress recognized that there is inadequate knowledge of the biology, ecology, and population dynamics, as well as present population levels, of marine mammals, and of the factors which influence their ability to reproduce and sustain their role in the marine ecosystem. (Section 3) The Act therefore directs that two-thirds of the funds appropriated to the Commission for each fiscal year shall be expended on research and studies relating to the protection and conservation of marine mammals so as to develop and evaluate this urgently needed information. (Section 207) In addition to its responsibilities to undertake studies and research (Section 202 (a) (2), (3)), the Commission is directed to review all applications for permits for scientific research (Section 202(a) (2)), and all research programs conducted or proposed to be conducted under the authority of the Act. (Section 202(a) (2); section 110(b))

The Commission is given access to all studies and data compiled by Federal agencies regarding marine mammals, and is directed to take every feasible step to avoid duplication of research. (Section 205) Recommendations made by the Commission to Federal officials, based upon research, study and access to information, must be responded to within 120 days after receipt thereof; a detailed explanation must be provided to the Commission by those Federal officials if such recommendations are not followed or adopted. (Section 202(d))

SUBMISSION OF PROPOSALS FOR RESEARCH PROJECTS AND STUDIES

The Commission has defined certain areas of study and research which merit concentrated effort because of their critical importance to the evaluation of the present situation and planning of effective marine mammal conservation programs.

A decision by the Commission to award funds for support of research in these and other areas involving work with marine mammals and/or marine mammal products does not satisfy the permit requirements of the Act. A permit to conduct such research, where required by the Act, must be obtained from the National Marine Fisheries Service or Bureau of Sport Fisheries and Wildlife, as appropriate.

In order to be considered favorably, proposals tendered to the Commission should be designed to serve the protection and conservation goals of the Marine Mammal Protection Act and should be directed to one or more of the following areas:

A. STATUS OF MARINE MAMMALS

1. *Census methods.* One of the most challenging goals in planning for the conservation of marine mammals is the acquisition of reliable data on population and trends of each species. New methodology is desperately needed, and proposals for testing innovative census methods will be given high priority.

2. *Delineation of population stocks.* Many marine mammals are geographically localized and many populations of a single species often exist, each occupying a different geographic sector of the marine environment. Clearly, one population may be threatened while the species as a whole is not. Delineation of discrete populations and their relative status is an important consideration for the planning of a conservation program.

3. *Migrations.* Some marine mammals make extensive seasonal migrations which must be detailed if total ecosystem relationships are to be understood.

4. *Checklist of marine mammals.* A systematic list of the species and subspecies of marine mammals is essential to planning for their conservation.

B. ECOLOGY OF MARINE MAMMALS

1. *Ecosystem relations.* Marine mammals are an integral part of the marine environment. They require, among other things, food, as well as places to breed, to escape disturbance, to find shelter from predators, and merely to rest. Research on the habitat requirements of individual species is desirable.

2. *Population dynamics.* Marine mammals, like all other living organisms, maintain their populations by producing young at a rate that offsets mortality. What are the rates of recruitment and mortality in individual populations? To what extent are recruitment and mortality related to the density of these populations?

3. *Optimum sustainable population and optimum carrying capacity.* Both (1) and (2) above, as well as [A] above, are relevant considerations in determining the optimum sustainable populations of marine mammals and the optimum carrying capacity of the habitat. Data and methodology for these purposes are urgently needed. The parameters of this new standard which departs from the traditional concepts of maximum sustainable yield management should be delineated and data gathered.

4. *Physiology.* Each kind of marine mammal is physiologically adapted to the environment in which it lives. What are these adaptations? To what extent are they subject to compensation and modification? For example, how can the northern fur seal, adapted to subarctic waters, survive and reproduce on the California Channel Islands?

5. *Behavior.* Studies of marine mammals have revealed many remarkable facets of adaptive behavior. The schooling of porpoises, the social structure of breeding colonies of seals, and the acoustic echo-location and communication systems of whales are examples. All of this knowledge is of scientific interest and much of it is relevant to conservation programs.

6. *Pathology.* Marine mammals are subject to the attack of many diseases and parasites whose impact is relevant to conservation in the wild and in captivity.

7. *Habitat deterioration.* Oil spills, pesticides, herbicides, and other environmental contaminants, as well as habitat destruction by man, may depress wild populations of marine mammals. Knowledge of the extent and nature of habitat deterioration and its effects is essential for effective conservation planning.

8. *Harassment and disturbance.* There is abundant evidence that many species of marine mammals are highly sensitive to human disturbance. An increasingly important facet of management is the regulation of visitation and other human use of critical areas of marine mammal concentrations. Identification of these critical areas and adverse impacts is needed.

C. MANAGEMENT OF MARINE MAMMALS

1. *Protection.* Some species are obviously in need of complete protection, not only from exploitation, but from harrassment and disturbance. It is important that data bases be promptly developed to identify species and populations in need of protection and preservation.

2. *Consumptive use by man.* Other species may be potentially capable of sustaining regulated taking under rational management. The optimum population level, optimum carrying capacity of the habitat, population status and trend, and potential yield rate are needed for each species where taking is in progress or is contemplated.

3. *Incidental taking of marine mammals in commercial fishing operations and other activities.* Certain species or population stocks of marine mammals are subject to incidental taking in the course of commercial fishing operations and other activities. For example, studies of the level of mortality or injury of porpoises in the course of commercial tuna fishing operations, and methods of reducing or preventing it, will be given high priority. Similar problems involving the taking of marine mammals in fishing operations or other activities, such as the mortality or injury of manatees caused by boat propellers, warrant study.

4. *Socio-economic aspects of exploitation and protection.* The Marine Mammal Protection Act permits the taking of marine mammals by northwest-coastal Indians, Aleuts and Eskimos for certain purposes. The social and economic significance of such taking, the impact of the Act upon such people, and the status of the species or population stock in question, must be assessed.

5. *Domestic and international law.* Existing domestic laws and international treaties and agreements affect management of many species of marine mammals. A review and evaluation of these laws, activities conducted pursuant to these authorities, and the extent to which they are consistent with the Marine Mammal Protection Act are needed.

6. *Maintenance of captive stocks.* There is much to be learned about the feeding, care, sanitation, transport, disease prophylaxis, and husbandry of marine mammals held in captivity. Advances in this field of study can serve to extend the health and longevity of captive animals and thereby reduce the number taken from the wild for display, education, and study.

7. *Humane taking and treatment.* Identification and development of humane means of taking, transporting, and caring for marine mammals so as to assure the least possible degree of pain and suffering practicable to the mammal involved is essential for effective protection and conservation of marine mammals.

Information concerning guidelines and format for submission of proposals can be obtained from the Marine Mammal Commission, Suite 307, 1625 Eye Street, N.W., Washington, D.C. 20006 (202/382-4475).

JOHN R. TWISS, Jr.,
Executive Director,
Marine Mammal Commission.

NATIONAL SCIENCE FOUNDATION

ADVISORY COMMITTEE FOR RESEARCH

Notice of Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Advisory Committee for Research to be held at 9 a.m. on March 28 and 29, 1974, in Room 616 at 5225 Wisconsin Avenue, NW., Washington, D.C. 20550.

The purpose of this Committee is to provide advice and recommendations concerning research activities and potential in the U.S. and to consult on problems in the administration of research support.

The agenda for this meeting shall include:

MARCH 28

9:00 Welcome: Committee Chairman.
9:05 Review of Committee Recommendations and Suggestions from October meeting with Foundation Comment: Committee Chairman.
9:35 Presentation of Report of Task Group No. 1 ("Long Range Planning Equipment"): Task Group Chairman.
11:00 Presentation of Report of Task Group No. 2 ("Impact of NSF Research Support on Advancement of Science"): Task Group Chairman.
12:30 Recess for Lunch.
1:45 Presentation of Report by Task Group No. 3 ("Post Grant Evaluation"): Task Group Chairman.
3:30 Discussion of NSF Plans for Support of Energy Related Research: Assistant Director for Research Applications and Head, Office of Energy-Related General Research, AD/R.
4:15 Presentation of Program Areas for Further Study: Assistant Director for National and International Programs.
4:30 Assignment of Tasks and Committee members to Task Groups and Instructions to Task Groups: Chairman.
5:00 Adjournment.

MARCH 29

9:00 Review of NSF Graduate Education Program (Joint Session with Advisory Committee for Science Education): Assistant Director for Education.
10:45 Discussion of the Quality of Higher Education in the Sciences (Joint Session with Advisory Committee for Science Education): Chairman, Advisory Committee for Science Education.
11:30 Task Groups convene for Initial Discussion of Problem Areas with NSF Staff.
3:30 Presentation to Full Committee on Problem Selection and Plans for Developing Reports: Task Group Chairmen.
3:45 Arrange for date of next meeting and adjournment: Chairman.

This meeting shall be open to the public. Individuals who wish to attend should inform Mr. Leonard F. Gardner, Special Assistant, 202-632-4278 or Room 320, 1800 G Street NW., Washington, D.C. 20550 prior to the meeting. Persons requiring further information concerning this Committee should contact Mr. Leonard F. Gardner at the above address. Summary minutes relative to this meeting may be obtained from the Management Analysis Office, Room K-720, 1800 G Street NW., Washington, D.C. 20550.

T. E. JENKINS,
Assistant Director
for Administration.

ADVISORY COMMITTEE FOR SCIENCE EDUCATION

Notice of Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Advisory Committee for Science Education to be held at 9 a.m. on March 28 and 29, 1974, in Room 651 at 5225 Wisconsin Avenue NW., Washington, D.C. 20550.

The purpose of this Committee is to provide advice and recommendations concerning the impact of all Foundation activities relating to education in the sciences in U.S. schools, colleges and universities.

The agenda for this meeting shall include:

MARCH 28

9:00 Presentation of Status of Directorate: Assistant Director for Education.
9:30 Discussion of Committee Activities: Chairman.
10:00 Science Education of Women and Minorities: Chairman and AD/E Staff.
12:30 Recess for Lunch.
1:30 Problem-Oriented Education in the Sciences: Assistant Director for Education.
2:30 Committee Objectives and Plans, 1974: Chairman.
4:30 Business Session.
5:00 Adjournment.

MARCH 29

9:00 Graduate Education Program Review (Joint Meeting with Advisory Committee for Research): Assistant Director for Education and Staff.
10:45 Discussion of Quality of Higher Education in the Sciences (Joint Meeting with Advisory Committee for Research): Chairman.
11:30 Discussion of Quality of Higher Education in the Sciences: Advisory Committee for Science Education.
12:00 Other Business.
12:30 Adjournment.

This meeting shall be open to the public. Individuals who wish to attend should inform Mrs. Frances O. Watts, Administrative Officer, AD/E, Room 600, 5225 Wisconsin Avenue, NW., Washington, D.C. 20550 prior to the meeting. Persons requiring further information concerning this Committee should contact Mrs. Frances O. Watts at the above address. Summary minutes relative to this meeting may be obtained from the Management Analysis Office, Room K–720, 1800 G Street NW., Washington, D.C. 20550.

T. E. JENKINS,
Assistant Director for Administration.

PRESIDENT'S COMMISSION ON WHITE HOUSE FELLOWS

REGIONAL SELECTION MEETINGS

Pursuant to Public Law 92–463, notice is hereby given that Regional Selection Meetings for the President's Commission on White House Fellows will be held in each of the eleven U.S. Civil Service regions during the week of March 18, 1974. The date and place of each meeting is as follows:

Monday, March 18, 8:45 a.m.
University Club
1683 Sherman
Denver, Colorado

Monday, March 18, 8:30 a.m.
Two Turtle Creek Village, Suite 1605
Corner of Turtle Creek and Blackburn Street
Dallas, Texas

Monday, March 18, 8:30 a.m.
Jewel Companies, Inc.
O'Hare Plaza
5725 East River Road
Chicago, Illinois

Tuesday, March 19, 8:30 a.m.
U.S. Civil Service Commission, Room 1036
Post Office and Courthouse Building
Boston, Massachusetts

Tuesday, March 19, 8:30 a.m.
Alston, Miller & Gaines
National Bank Building
Atlanta, Georgia 30303

Wednesday, March 20, 8:45 a.m.
McKinsey & Co.
245 Park Avenue at 46th Street
New York, New York

Wednesday, March 20, 9:00 a.m.
Union Forge
Broad & Sampson, Lincoln Memorial Room
Philadelphia, Pa.

Wednesday, March 20, 8:30 a.m.
Boeing Aircraft Company
Seattle, Washington

Thursday, March 21, 8:00 a.m.
U.S. Civil Service Commission
Federal Building
450 Golden Gate Avenue
San Francisco, California

Saturday, March 23, 8:30 a.m.
Missouri Athletic Club, Board Room
405 Washington Avenue
St. Louis, Mo.

Saturday, March 23, 8:30 a.m.
Georgetown University
Office of the President
Washington, D.C.

These selection meetings are part of the screening process of the White House Fellows program. In these meetings, selected applicants to the program are interviewed by a panel of five to seven outstanding community leaders in each region. At the conclusion of the interviews, each regional panel recommends to the President's Commission on White House Fellows those candidates who should continue in the competition.

It has been determined that, due to the very nature of the screening process where personnel records and confidential character references must be used, the content of these meetings falls within the provisions of section 552(b)(6) of Title 5 of the United States code and that these meetings will be closed to the public.

CARL GRANT,
Director.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS
List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on March 15, 1974 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

The symbol (x) identifies proposals which appear to raise no significant issues, and are to be approved after brief notice through this release.

Further information about the items on this Daily List may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202–395–4529).

NEW FORMS

TARIFF COMMISSION

[332–70]

BRUSSELS TARIFF NOMENCLATURE

Public Notice of Hearings

The U.S. Tariff Commission hereby gives notice that preliminary drafts of the following chapters of the Tariff Schedules of the United States (TSUS) converted to the format of the Brussels Tariff Nomenclature (BTN):

Chapter 25: Salt; sulfur; earths and stone; plastering materials, lime, and cement.
Chapter 68: Articles of stone, of plaster, of cement, of asbestos, of mica, and of similar materials.
Chapter 69: Ceramic products.
Chapter 70: Glass and glassware.
Chapter 72: Coin.
Chapter 97: Toys, games, and sports requisites, and parts thereof.

are being released today and that public hearings thereon will begin at 10 a.m., e.d.t., on April 15, 1974, in the Hearing Room of the Tariff Commission Building, 8th and E Streets, NW., Washington, D.C. The purpose of this hearing is to obtain the comments and views of interested parties on the preliminary draft conversion.

Requests to appear at the hearings on these chapters must be filed in writing with the Secretary of the Commission not later than April 8, 1974. Parties who have properly entered an appearance by this date will be individually notified of the date on which they are scheduled to appear. Such notice will be sent as soon as possible after April 8, 1974. Any person who fails to receive such notification by April 11, 1974, should immediately communicate with the Office of the Secretary of the Commission.

In its public notice issued March 8, 1974, regarding hearings on other chapters of the draft converted schedules (39 FR 9719 of March 13, 1974) interested parties were notified regarding the rules governing the conduct of the hearings, and the submission of written statements. The Commission's notice of March 8, 1974, applies to the hearings on the chapters being released today to the extent that it is applicable.

As each of the chapters is completed and released, copies thereof are made available for public inspection at the offices of the Commission in Washington, D.C. and New York, N.Y.; at all field offices of the Department of Commerce; and at the offices of Regional and District Directors of Customs. The locations of these offices are listed in the notice of March 8, 1974.

By order of the Commission.

Issued: March 15, 1974.

[SEAL] KENNETH R. MASON,
Secretary.

[FR Doc.74–6380 Filed 3–19–74;8:45 am]

[TEA–F–61]

CAPITOL FOOTWEAR CORP.

Notice of Investigation and Hearing

On the basis of a petition filed under section 301(a)(2) of the Trade Expansion Act of 1962 on behalf of the Capitol Footwear Corp., Worcester, Massachusetts, the United States Tariff Commission, on March 14, 1974, instituted an investigation under section 301(c)(1) of the said Act to determine whether, as a result in major part of concessions granted under trade agreements, articles like or directly competitive with footwear for men (of the types provided for in items 700.35 and 700.55 of the Tariff Schedules of the United States) produced by the aforementioned firm, are being imported into the United States in such increased quantities as to cause, or threaten to cause, serious injury to such firm.

A public hearing in connection with this investigation will be held beginning at 10 a.m., e.d.t., on April 11, 1974, in the Hearing Room, U.S. Tariff Commission Building, 8th and E Streets, NW., Washington, D.C. Requests for appearances at the hearing should be received by the Secretary of the Tariff Commission, in writing, at his office in Washington, D.C. 20436, not later than noon, Friday, April 5, 1974.

The petition filed in this case is available for inspection at the Office of the Secreatry, United States Tariff Commission, 8th and E Streets, NW., Washington, D.C. 20436, and at the New York City office of the Tariff Commission located in Room 437 of the Customhouse.

By order of the Commission.

Issued: March 15, 1974.

[SEAL] KENNETH R. MASON,
Secretary.

[FR Doc.74–6381 Filed 3–19–74;8:45 am]

DEPARTMENT OF LABOR

Office of the Secretary

FRED BRAUN WORKSHOPS, INC.

Investigation of Eligibility of Workers for Adjustment Assistance

The Department of Labor has received a Tariff Commission report containing an affirmative finding under section 301(c)(2) of the Trade Expansion Act of 1962 with respect to its investigation of a petition for determination of eligibility to apply for adjustment assistance filed on behalf of workers of the Fred Braun Workshops, Inc., New York, New York (TEA–W–223). In view of the report and the responsibilities delegated to the Secretary of Labor under section 8 of Executive Order 11075 (28 FR 473), the Director, Office of Foreign Economic Policy, Bureau of International Labor Affairs, has instituted an investigation, as provided in 29 CFR 90.5 and this notice. The investigation relates to the determination of whether any of the group of workers covered by the Tariff Commission report should be certified as eligible to apply for adjustment assistance, provided for under Title III, Chapter 3, of the Trade Expansion Act of 1962, including the determination of related subsidiary subjects and matters, such as the date unemployment or underemployment began or threatened to begin and the subdivision of the firm involved to be specified in any certification to be made, as more specifically provided in Subpart B of 29 CFR Part 90.

Interested persons should submit written data, views, or arguments relating to the subjects of investigation to the Director, Office of Foreign Economic Policy, U.S. Department of Labor, Washington, D.C. 20210 on or before March 29, 1974.

Signed at Washington, D.C. this 11th day of March 1974.

GLORIA G. VERNON,
Director, Office of Foreign Economic Policy.

ENVIRONMENTAL PROTECTION AGENCY

■

GRAIN MILLS POINT SOURCE CATEGORY

Effluent Limitations Guidelines and Standards

V 39 55 MAR 20 74 XUM

Title 40—Protection of the Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER N—EFFLUENT GUIDELINES AND STANDARDS

PART 406—GRAIN MILLS POINT SOURCE CATEGORY

On December 4, 1973, notice was published in the FEDERAL REGISTER (38 FR 33438), that the Environmental Protection Agency (EPA or Agency) was proposing effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources within the corn wet milling, corn dry milling, normal wheat flour milling, bulgur wheat flour milling, normal rice milling, and parboiled rice processing subcategories of the grain mills category of point sources.

The purpose of this notice is to establish final effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources in the grain mills category of point sources by amending 40 CFR Chapter I, Subchapter N, to add a new Part 406. This final rulemaking is promulgated pursuant to sections 301, 304 (b) and (c), 306 (b) and (c) and 307 (c) of the Federal Water Pollution Control Act, as amended, (the Act); 33 U.S.C. 1251, 1311, 1314 (b) and (c), 1316 (b) and (c) and 1317(c); 86 Stat. 816 et seq.; Pub. L. 92–500. Regulations regarding cooling water intake structures for all categories of point sources under section 316(b) of the Act will be promulgated in 40 CFR Part 402.

In addition, the EPA is simultaneously proposing a separate provision which appears in the proposed rules section of the FEDERAL REGISTER, stating the application of the limitations and standards set forth below to users of publicly owned treatment works which are subject to pretreatment standards under section 307(b) of the Act. The basis of that proposed regulation is set forth in the associated notice of proposed rulemaking.

The legal basis, methodology and factual conclusions which support promulgation of this regulation were set forth in substantial detail in the notice of public review procedures published August 6, 1973 (38 FR 21202), and in the notice of proposed rulemaking for the corn wet milling, corn dry milling, normal wheat flour milling, bulgur wheat flour milling, normal rice milling, and parboiled rice processing subcategories. In addition, the regulations as proposed were supported by two other documents: (1) The document entitled "Development Document for Proposed Effluent Limitations Guidelines and New Source Performance Standards for the Grain Processing Segment of the Grain Mills Point Source Category" (December 1973) and (2) the document entitled "Economic Analysis of Proposed Effluent Guidelines, Grain milling industry (August, 1973). Both of these documents were made available to the public and circulated to interested persons at approximately the time of publication of the notice of proposed rulemaking.

Interested persons were invited to participate in the rulemaking by submitting written comments within 30 days from the date of publication. Prior public participation in the form of solicited comments and responses from the States, Federal agencies, and other interested parties were described in the preamble to the proposed regulation. The EPA has considered carefully all of the comments received and a discussion of these comments with the Agency's response thereto follows.

(a) *Summary of comments.* The following responded to the request for comments which was made in the preamble to the proposed regulation: Corn Refiners Association, American Corn Millers Federation, U.S. Department of Commerce, Distilled Spirits Council of the United States, Inc., and U.S. Department of Agriculture.

Each of the comments received was carefully reviewed and analyzed. The following is a summary of the significant comments and EPA's response to those comments.

(1) Some correspondents endorsed the proposal made to the Administrator by the Effluent Standards and Water Quality Information Advisory Committee that a different approach be taken in the development of effluent guidelines.

The committee's proposal is under evaluation as a contribution toward future refinements on guidelines for some industries. The committee has indicated that their proposed methodology could not be developed in sufficient time to be available for the current phase of guideline promulgation, which is proceeding according to a court-ordered schedule. Its present state of development does not provide sufficient evidence to warrant the Agency's delaying issuance of any standard in hopes that an alternative approach might be preferable.

(2) A commenter pointed out a discrepancy in the rationale for the "best practicable" limitations in the corn wet milling subcategory. The Development Document claimed that the recommended technology, if applied to an existing source, would result in a monthly average discharge of 30 to 50 lbs/MSBu for both the BOD5 and TSS parameters. The limitations, however, are 35 lbs/MSBu of TSS and 50 lbs/MSBu of BOD5. It was argued that since EPA is only certain that the 50 lb limit can be attained, the TSS limitation should be changed from 35 to 50 lbs/MSBu.

EPA has carefully reviewed this comment and found it to be justified. Consequently, the best practicable limitation for TSS in the corn wet milling subcategory has been changed from 30 to 50 lbs/MSBu. EPA believes that while the 30 lb limit might be attainable, the technology is not yet available to achieve this effluent level on a routine basis. Currently, many of the existing treatment systems exceed 50 lbs of TSS/MSBu but it is the opinion of EPA, that this is due to inadequate in-plant controls and operation of the treatment systems, and in some cases the discharge of untreated barometric cooling water. With proper operation, and recycling of barometric cooling water where necessary, the limitation of 50 lbs of TSS/MSBu is achievable and represents a substantial improvement over the present levels of treatment.

(3) Industry objected to the method EPA used to calculate an average raw waste load for the corn wet milling subcategory. EPA based its typical raw waste load on the average raw waste loads for one year at 12 corn wet mills. Industry claimed that such an average is unfair to more than half the plants in the industry, and ignores the fact that the raw waste load can vary by as much as three to ten times the average of any particular plant.

EPA believes that the method used to develop the standard raw waste load is fair and reasonable. All 17 plants in the industry were given the opportunity to submit information on the characteristics of their waste. Twelve of these plants transmitted usable information on their raw waste load to EPA. Careful evaluation of the data showed that these plants could not be further subcategorized on the basis of size or age of facility, nor on the basis of product mix. Consequently, a standard raw waste load was calculated using an average of the available data. EPA recognized the complexity of the various processes of corn wet milling and therefore, decided that the standard raw waste load should be based on the broadest data base available, i.e., an average of 12 plants, rather than on one or two of the better operations.

It is true that large fluctuations in raw waste load may occur in corn wet mills. The variations in raw waste load at any plant around an average figure are only important insofar as they affect the treatment system. As described in section VII of the Development Document, these variations can be minimized by proper in-plant control and a properly designed and operated treatment system.

(4) Industry also claimed that none of the three existing treatment plants in the corn wet milling subcategory could meet the 1977 standards contrary to the claims of EPA. It was alleged that one of these plants operating under a Federal demonstration grant has shown that it cannot meet the effluent levels required by the proposed limitations.

EPA evaluated this demonstration project during its initial stages of operation. The treatment plant was found to be overloaded, and subsequent efforts by the manufacturer reduced the raw waste load normally discharged to the treatment system. While pollutant concentrations in this effluent were reduced, large quantities of pollutants in barometric cooling water continued to be discharged untreated. As discussed in the Development Document, plants with barometric cooling water can drastically reduce their pollutant discharge by recycling this water through cooling towers with the blowdown sent to the treatment system. If this were done at the above plant, even assuming no BOD removal in the cooling tower through biological action, the limitations could be achieved. It is the

Agency's opinion that any of the plants in this subcategory with an adequate treatment system can meet the effluent limitations, provided that proper in-plant efforts are made to prevent excess raw waste from being discharged to the plant waste water treatment system.

(5) Industry claimed that the costs of treatment in the corn wet milling subcategory are underestimated and, in particular, the costs of in-plant controls are not included.

In addition to the comments EPA made in the preamble to the proposed regulation, the following factors are important. The economic impact analysis of the cost of meeting the proposed limitations was based on the construction of complete treatment systems using the best practicable technology currently available. This technology is equalization, activated sludge, and, when necessary, recirculating cooling water systems. In the corn wet milling industry, the actual costs of meeting the limitations will be less than estimated. Since all plants discharging to streams have some treatment, the cost of meeting the 1977 limitations will be reduced by an amount equal to the cost of the system they already have in place. The additional treatment may include cooling towers for recycling barometric cooling water, and an expanded treatment system to handle the blowdown from this cooling tower.

As far as in-plant controls are concerned, the typical plant selected for the calculation assumed good in-plant control. Some plants in the industry already have these controls. Others do not and would have an additional cost depending on the specific circumstances of the plant.

(6) A commenter pointed out that in a few dry corn mills additional processing occurs which is not covered in the Development Document. It was argued that a few of the larger mills further process the grits, meal and flour through expanders and/or extruders. Additional waste waters are generated by air pollution control equipment. Since such processing is not an integral part of the basic milling sequence as described in the Development Document, such wastes should be specifically excluded from the final regulations.

EPA agrees with this comment and the final regulations published below exclude waste waters from air pollution control equipment on expanders and/or extruders in the corn dry milling subcategory. Additional limitations to cover these waste waters cannot be made at this time for lack of adequate information.

(b) *Revision of the proposed regulations prior to promulgation.* As a result of public comments, continuing review and evaluation of the proposed regulation by EPA, the following changes have been made in the regulation.

(1) Sections 406.11, 406.21, 406.31, 406.41, 406.51, and 406.61 entitled "Specialized Definitions," now include references to general definitions, abbreviations, and methods of analysis in 40 CFR Part 401 which reduces the need for some specialized definitions in this regulation.

(2) The "best practicable" limitations for the corn wet milling subcategory have been changed. The average monthly limitation for TSS has been raised from 35 to 50 lbs/MSBu. This decision was made recognizing that solids separation is a difficult problem in this industry. While EPA feels that this problem is solvable by the methods suggested in the Development Document, sufficient uncertainty exists to raise the TSS limitation to the same level as the BOD5. This results in an effluent concentration of 125 mg/l for a typical plant. The daily maximum figure is three times the monthly limitation or 150 lbs/MSBu.

(3) Section 304(b)(1)(B) of the Act provides for "guidelines" to implement the uniform national standards of section 301(b)(1)(A). Thus Congress recognized that some flexibility was necessary in order to take into account the complexity of the industrial world with respect to the practicability of pollution control technology. In conformity with the Congressional intent and in recognition of the possible failure of these regulations to account for all factors bearing on the practicability of control technology, it was concluded that some provision was needed to authorize flexibility in the strict application of the limitations contained in the regulation where required by special circumstances applicable to individual dischargers. Accordingly, a provision allowing flexibility in the application of the limitations representing best practicable control technology currently available has been added to each subpart, to account for special circumstances that may not have been adequately accounted for when these regulations were developed.

(4) In the corn dry milling subcategory, waste waters from air pollution control equipment on expanders and extruders have been excluded from the limitations. Insufficient data exists upon which to base limitations. The change is reflected in § 406.20.

(c) *Economic impact.* The changes to the regulations mentioned above will not affect the results of the economic analysis prepared for the proposed regulation. The only subcategory affected by the revisions is the corn wet milling subcategory. Since the revision to the "best practicable" limitations raised the allowable discharge of TSS for 1977, the cost to be incurred by industry will be somewhat less than anticipated in the proposed regulations.

(d) *Cost-benefit analysis.* The detrimental effects of the constituents of waste waters now discharged by point sources within the grain processing segment of the grain mills point source category are discussed in section VI of the report entitled "Development Document for Effluent Limitations Guidelines for the Grain processing Segment of the Grain Mills Point Source Category" (March 1974). It is not feasible to quantify in economic terms, particularly on a national basis, the costs resulting from the discharge of these pollutants to our Nation's waterways. Nevertheless, as indicated in section VI, the pollutants discharged have substantial and damaging impacts on the quality of water and therefore on its capacity to support healthy populations of wildlife, fish and other aquatic wildlife and on its suitability for industrial, recreational and drinking water supply uses.

The total cost of implementing the effluent limitations guidelines includes the direct capital and operating costs of the pollution control technology employed to achieve compliance and the indirect economic and environmental costs identified in section VIII and in the supplementary report entitled "Economic Analysis of Proposed Effluent Guidelines Grain Milling Industry" (August 1973). Implementing the effluent limitations guidelines will substantially reduce the environmental harm which would otherwise be attributable to the continued discharge of polluted waste waters from existing and newly constructed plants in the grain milling industry. The Agency believes that the benefits of thus reducing the pollutants discharged justify the associated costs which, though substantial in absolute terms, represent a relatively small percentage of the total capital investment in the industry.

(e) *Publication of information on processes, procedures, or operating methods which result in the elimination or reduction of the discharge of pollutants.* In conformance with the requirements of section 304(c) of the Act, a manual entitled "Development Document for Effluent Limitations Guidelines and New Source Performance Standards for the Grain Processing Segment of the Grain Mills Point Source Category," has been published and is available for purchase from the Government Printing Office, Washington, D.C. 20401 for a nominal fee.

(f) *Final rulemaking.* In consideration of the foregoing, 40 CFR Chapter I, subchapter N is hereby amended by adding a new Part 406, Grain Mills Point Source Category, to read as set forth below. This final regulation is promulgated as set forth below and shall be effective May 20, 1974.

Dated: March 12, 1974.

JOHN QUARLES,
Acting Administrator.

Subpart A—Corn Wet Milling Subcategory

Sec.

406.10 Applicability; description of the corn wet milling subcategory.
406.11 Specialized definitions.
406.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.
406.13 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
406.14 [Reserved]
406.15 Standards of performance for new sources.
406.16 Pretreatment standards for new sources.

V 39 55 MAR 20 74 XUM

Subpart B—Corn Dry Milling Subcategory

Sec.
406.20 Applicability; description of the corn dry milling subcategory.
406.21 Specialized definitions.
406.22 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.
406.23 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
406.24 [Reserved]
406.25 Standards of performance for new sources.
406.26 Pretreatment standards for new sources.

Subpart C—Normal Wheat Flour Milling Subcategory

406.30 Applicability; description of the normal wheat flour milling subcategory.
406.31 Specialized definitions.
406.32 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.
406.33 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
406.34 [Reserved]
406.35 Standards of performance for new sources.
406.36 Pretreatment standards for new sources.

Subpart D—Bulgur Wheat Flour Milling Subcategory

406.40 Applicability; description of the bulgur wheat flour milling subcategory.
406.41 Specialized definitions.
406.42 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.
406.43 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
406.44 [Reserved]
406.45 Standards of performance for new sources.
406.46 Pretreatment standards for new sources.

Subpart E—Normal Rice Milling Subcategory

406.50 Applicability; description of the normal rice milling subcategory.
406.51 Specialized definitions.
406.52 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.
406.53 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
406.54 [Reserved]
406.55 Standards of performance for new sources.
406.56 Pretreatment standards for new sources.

Subpart F—Parboiled Rice Processing Subcategory

406.60 Applicability; description of the parboiled rice processing subcategory.
406.61 Specialized definitions.
406.62 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.
406.63 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
406.64 [Reserved]
406.65 Standards of performance for new sources.
406.66 Pretreatment standards for new sources.

AUTHORITY: Secs. 301, 304 (b) and (c), 306 (b) and (c), 307(c), Federal Water Pollution Control Act, as amended; 33 U.S.C. 1251, 1311, 1314 (b) and (c), 1316 (b) and (c), 1317(c); 86 Stat. 816 *et seq.*; Pub. L. 92-500.

Subpart A—Corn Wet Milling Subcategory

§ 406.10 Applicability; description of the corn wet milling subcategory.

The provisions of this subpart are applicable to discharges resulting from the process in which shelled corn is steeped in a dilute solution of sulfurous acid and then processed by wet means into such products as animal feed, regular and modified starches, corn oil, corn syrup, and dextrose.

§ 406.11 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in 40 CFR 401 shall apply to this subpart.

(b) The term "corn" shall mean the shelled corn delivered to a plant before processing.

(c) The term "standard bushel" shall mean a bushel of shelled corn weighing 56 pounds.

(d) The abbreviation "MSBu" shall mean 1000 standard bushels.

§ 406.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

(a) In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator (or the State) shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(b) The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of corn)	
BOD5	2.67	0.89
TSS	2.67	.89
pH	Within the range 6.0 to 9.0.	
	English units (pounds per 1,000 stdbu of corn)	
BOD5	150	50
TSS	150	50
pH	Within the range 6.0 to 9.0.	

§ 406.13 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of corn)	
BOD5	1.08	0.36
TSS	.54	.18
pH	Within the range 6.0 to 9.0.	
	English units (pounds per 1,000 stdbu of corn)	
BOD5	60	20
TSS	30	10
pH	Within the range 6.0 to 9.0.	

§ 406.14 [Reserved]

§ 406.15 Standards of performance for new sources.

The following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of corn)	
BOD5	1.08	0.36
TSS	.54	.18
pH	Within the range 6.0 to 9.0.	
	English units (pounds per 1,000 stdbu of corn)	
BOD5	60	20
TSS	30	10
pH	Within the range 6.0 to 9.0.	

§ 406.16 Pretreatment standards for new sources.

The pretreatment standards under section 307(c) of the Act for a source within the corn wet milling subcategory, which is a user of a publicly owned treatment works (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to the navigable waters), shall be the standard set forth in Part 128 of this chapter, except that, for the purpose of this section, § 128.133 of this chapter shall be amended to read as follows:

In addition to the prohibitions set forth in 40 CFR 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works shall be the standard of performance for new sources specified in 40 CFR 406.15: *Provided*, That, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall, except in the case of standards providing for no discharge of pollutants, be correspondingly reduced in stringency for that pollutant.

Subpart B—Corn Dry Milling Subcategory

§ 406.20 Applicability; description of the corn dry milling subcategory.

(a) The provisions of this subpart are applicable to discharges resulting from the process in which shelled corn is washed and subsequently milled by dry processes into such products as corn meal, grits, flour, oil, and animal feed.

(b) The provisions of this subpart do not apply to discharges from subsequent manufacturing operations to produce expanded or extruded feed or feed products.

§ 406.21 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in Part 401 of this chapter shall apply to this subpart.

(b) The term "corn" shall mean the shelled corn delivered to a plant before processing.

(c) The term "standard bushel" shall mean a bushel of shelled corn weighing 56 pounds.

(d) The abbreviation "MSBu" shall mean 1000 standard bushels.

§ 406.22 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

(a) In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator (or the State) shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of corn)	
BOD5	0.21	0.07
TSS	.18	.06
pH	Within the range 6.0 to 9.0.	
	English units (pounds per 1,000 stdbu of corn)	
BOD5	12.0	4.0
TSS	10.5	3.5
pH	Within the range 6.0 to 9.0.	

§ 406.23 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of corn)	
BOD5	0.11	0.036
TSS	.054	.018
pH	Within the range 6.0 to 9.0.	
	English units (pounds per 1,000 stdbu of corn)	
BOD5	6.0	2.0
TSS	3.0	1.0
pH	Within the range 6.0 to 9.0.	

§ 406.24 [Reserved]

§ 406.25 Standards of performance for new sources.

The following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of corn)	
BOD5	0.11	0.036
TSS	.054	.018
pH	Within the range 6.0 to 9.0.	
	English units (pounds per 1,000 stdbu of corn)	
BOD5	6.0	2.0
TSS	3.0	1.0
pH	Within the range 6.0 to 9.0.	

V 39 55 MAR 20 74 XUM

§ 406.26 Pretreatment standards for new sources.

The pretreatment standards under section 307(c) of the Act for a source within the corn dry milling subcategory, which is a user of a publicly owned treatment works (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to the navigable waters), shall be the standard set forth in Part 128 of this chapter, except that, for the purpose of this section, § 128.133 of this chapter shall be amended to read as follows:

In addition to the prohibitions set forth in 40 CFR 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works shall be the standard of performance for new sources specified in 40 CFR 406.25: *Provided*, That, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall, except in the case of standards providing for no discharge of pollutants, be correspondingly reduced in stringency for that pollutant.

Subpart C—Normal Wheat Flour Milling Subcategory

§ 406.30 Applicability; description of the normal wheat flour milling subcategory.

The provisions of this subpart are applicable to discharges resulting from the processes in which wheat and other grains are milled by dry processes into flour and millfeed.

§ 406.31 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in Part 401 of this chapter shall apply to this subpart.

§ 406.32 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

(a) In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, to develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(b) The following limitations establish the quantity or quality of pollutants or pollutant properties which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available: There shall be no discharge of process waste water pollutants to navigable waters.

§ 406.33 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable: there shall be no discharge of process waste water pollutants to navigable waters.

§ 406.34 [Reserved]

§ 406.35 Standards of performance for new sources.

The following standards of performance establish the quantity or quality of pollutants or pollutant properties which may be discharged by a new source subject to the provisions of this subpart: There shall be no discharge of process waste water pollutants to navigable waters.

§ 406.36 Pretreatment standards for new sources.

The pretreatment standards under section 307(c) of the Act for a source within the normal wheat flour milling subcategory, which is a user of a publicly owned treatment works (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to the navigable waters), shall be the standard set forth in Part 128 of this chapter, except that, for the purpose of this section, § 128.133 of this chapter shall be amended to read as follows:

In addition to the prohibitions set forth in 40 CFR 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works shall be the standard of performance for new sources specified in 40 CFR 406.35: *Provided*, That, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall, except in the case of standards providing for no discharge of pollutants, be correspondingly reduced in stringency for that pollutant.

Subpart D—Bulgur Wheat Flour Milling Subcategory

§ 406.40 Applicability; description of the bulgur wheat flour milling subcategory.

The provisions of this subpart are applicable to discharges resulting from the process in which wheat is parboiled, dried, and partially debranned in the production of bulgur.

§ 406.41 Specialized definitions.

For the purpose of this subpart:

(a) Except as proveded below, the general definitions, abbreviations and methods of analysis set forth in Part 401 of this chapter shall apply to this subpart.

(b) The term "wheat" shall mean wheat delivered to a plant before processing.

(c) The term "standard bushel" shall mean a bushel of wheat weighing 60 pounds.

(d) The abbreviation "MSBu" shall mean 1,000 standard bushels.

§ 406.42 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

(a) In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(b) The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of wheat)	
BOD5	0.025	0.0083
TSS	.025	.0083
pH	Within the range 6.0 to 9.0.	
	English units (pounds per 1,000 stdbu of wheat)	
BOD5	1.50	0.50
TSS	1.50	.50
pH	Within the range 6.0 to 9.0.	

§ 406.43 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of wheat)	
BOD5	0.015	0.005
TSS	.0099	.0033
pH	Within the range 6.0 to 9.0	
	English units (pounds per 1,000 stdbu of wheat)	
BOD5	0.90	0.30
TSS	.60	.20
pH	Within the range 6.0 to 9.0.	

§ 406.44 [Reserved]

§ 406.45 Standards of performance for new sources.

The following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of wheat)	
BOD5	0.015	0.005
TSS	.0099	.0033
pH	Within the range 6.0 to 9.0	
	English units (pounds per 1,000 stdbu of wheat)	
BOD5	0.90	0.30
TSS	.60	.20
pH	Within the range 6.0 to 9.0.	

§ 406.46 Pretreatment standards for new sources.

The pretreatment standards under section 307(c) of the Act for a source within the bulgur wheat flour milling subcategory, which is a user of a publicly owned treatment works (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to the navigable waters), shall be the standard set forth in Part 128 of this chapter, except that, for the purpose of this section, § 128.133 of this chapter shall be amended to read as follows:

In addition to the prohibitions set forth in 40 CFR 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works shall be the standard of performance for new sources specified in 40 CFR 406.45: *Provided*, That, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall, except in the case of standards providing for no discharge of pollutants, be correspondingly reduced in stringency for that pollutant.

Subpart E—Normal Rice Milling Subcategory

§ 406.50 Applicability; description of the normal rice milling subcategory.

The provisions of this subpart are applicable to discharges resulting from the process in which rice is cleaned and milled by dry processes.

§ 406.51 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in Part 401 of this chapter shall apply to this subpart.

§ 406.52 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

(a) In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator (or the State) shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(b) The following limitations establish the quantity or quality of pollutants or pollutant properties which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available: There shall be no discharge of process waste water pollutants to navigable waters.

§ 406.53 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable: there shall be no discharge of process waste water pollutants to navigable waters.

§ 406.54 [Reserved]

§ 406.55 Standards of performance for new sources.

The following standards of performance establish the quantity or quality of pollutants or pollutant properties which may be discharged by a new source sub-

V 39 55 MAR 20 74 XUM

ject to the provisions of this subpart: there shall be no discharge of process waste water pollutants to navigable waters.

§ 406.56 Pretreatment standards for new sources.

The pretreatment standards under section 307(c) of the Act for a source within the normal rice milling subcategory, which is a user of a publicly owned treatment works (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to the navigable waters), shall be the standard set forth in Part 128 of this Chapter, except that, for the purpose of this section, § 128.133 of this Chapter shall be amended to read as follows:

In addition to the prohibitions set forth in 40 CFR 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works shall be the standard of performance for new sources specified in 40 CFR 406.55: *Provided*, That, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall, except in the case of standards providing for no discharge of pollutants, be correspondingly reduced in stringency for that pollutant.

Subpart F—Parboiled Rice Processing Subcategory

§ 406.60 Applicability; description of the parboiled rice processing subcategory.

The provisions of this subpart are applicable to discharges resulting from the process in which rice is cleaned, cooked and dried before being milled.

§ 406.61 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in Part 401 of this chapter shall apply to this subpart.

(b) The term "rice" shall mean rice delivered to a plant before processing.

(c) The abbreviation "cwt" shall mean hundred weight.

§ 406.62 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

(a) In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator (or the State) shall establish for the discharged effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(b) The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of rice)	
BOD5	0.42	0.14
TSS	.24	.08
pH	Within the range 6.0 to 9.0.	
	English units (pounds per hundredweight of rice)	
BOD5	0.042	0.014
TSS	.024	.008
pH	Within the range 6.0 to 9.0.	

§ 406.63 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of rice)	
BOD5	0.21	0.07
TSS	.09	.03
pH	Within the range 6.0 to 9.0.	
	English units (pounds per hundredweight of rice)	
BOD5	0.021	0.007
TSS	.009	.003
pH	Within the range 6.0 to 9.0.	

§ 406.64 [Reserved]

§ 406.65 Standards of performance for new sources.

The following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of rice)	
BOD5	0.21	0.07
TSS	.09	.03
pH	Within the range 6.0 to 9.0.	
	English units (pounds per hundredweight of rice)	
BOD5	0.021	0.007
TSS	.009	.003
pH	Within the range 6.0 to 9.0.	

§ 406.66 Pretreatment standards for new sources.

The pretreatment standards under section 307(c) of the Act for a source within the parboiled rice processing subcategory, which is a user of a publicly owned treatment works (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to the navigable waters), shall be the standard set forth in part 128 of this chapter, except that, for the purpose of this section, § 128.133 of this chapter shall be amended to read as follows:

In addition to the prohibitions set forth in 40 CFR 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works shall be the standard of performance for new sources specified in 40 CFR 406.65: *Provided*, That, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall, except in the case of standards providing for no discharge of pollutants, be correspondingly reduced in stringency for that pollutant.

[FR Doc.74-6236 Filed 3-19-74;8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 406]

GRAIN MILLS POINT SOURCE CATEGORY

Application of Effluent Limitations Guidelines for Existing Sources to Pretreatment Standards for Incompatible Pollutants

Notice is hereby given pursuant to sections 301, 304 and 307(b) of the Federal Water Pollution Control Act, as amended (the Act); 33 U.S.C. 1251, 1311, 1314 and 1317(b); 86 Stat. 816 et seq.; Pub. L. 92-500, that the proposed regulation set forth below concerns the application of effluent limitations guidelines for existing sources to pretreatment standards for incompatible pollutants. The proposal will amend 40 CFR Part 406, Grain Mills Point Source Category, establishing for each subcategory therein the extent of application of effluent limitations guidelines to existing sources which discharge to publicly owned treatment works. The regulation is intended to be complementary to the general regulation for pretreatment standards set forth at 40 CFR Part 128. The general regulation was proposed July 19, 1973 (38 FR 19236), and published in final form on November 8, 1973 (38 FR 30982).

The proposed regulation is also intended to supplement a final regulation being simultaneously promulgated by the Environmental Protection Agency (EPA or Agency) which provides effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources within the corn wet milling, corn dry milling, normal wheat flour milling, bulgur wheat flour milling, normal rice milling, parboiled rice processing, subcategories of the grain mills point source category. The latter regulation applies to the portion of a discharge which is directed to the navigable waters. The regulation proposed below applies to users of publicly owned treatment works which fall within the description of the point source category to which the guidelines and standards (40 CFR Part 406) promulgated simultaneously apply. However, the proposed regulation applies to the introduction of incompatible pollutants which are directed into a publicly owned treatment works, rather than to discharges of pollutants to navigable waters.

The general pretreatment standard divides pollutants discharged by users of publicly owned treatment works into two broad categories: "compatible" and "incompatible." Compatible pollutants are generally not subject to pretreatment standards. (See 40 CFR 128.110 (State or local law) and 40 CFR 128.131 (Prohibited wastes) for requirements which may be applicable to compatible pollutants). Incompatible pollutants are subject to pretreatment standards as provided in 40 CFR 128.133, which provides as follows:

In addition to the prohibitions set forth in § 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works by a major contributing industry not subject to section 307(c) of the Act shall be, for sources within the corresponding industrial or commercial category, that established by a promulgated effluent limitations guidelines defining best practicable control technology currently available pursuant to sections 301(b) and 304(b) of the Act; provided that, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall be correspondingly reduced for that pollutant; and provided further that when the effluent limitations guidelines for each industry is promulgated, a separate provision will be proposed concerning the application of such guidelines to pretreatment.

The regulation proposed below is intended to implement that portion of § 128.133, above, requiring that a separate provision be made stating the application to pretreatment standards of effluent limitations guidelines based upon best practicable control technology currently available.

Questions were raised during the public comment period on the proposed general pretreatment standard (40 CFR 128) about the propriety of applying a standard based upon best practicable control technology currently available to all plants subject to pretreatment standards. In general, EPA believes the analysis supporting the effluent limitations guidelines is adequate to make a determination regarding the application of those standards to users of publicly owned treatment works. However, to ensure that those standards are appropriate in all cases, EPA now seeks additional comments focusing upon the application of effluent limitations guidelines to users of publicly owned treatment works.

Sections 406.15, 406.25, 406.35, 406.45, 406.55, and 406.65 of the proposed regulation for point sources within the corn wet milling, corn dry milling, normal wheat flour milling, bulgur wheat flour milling, normal rice milling, parboiled rice processing, subcategories (December 4, 1973; 38 FR 33438), contained the proposed pretreatment standard for new sources. The regulation promulgated simultaneously herewith contains §§ 406.16, 406.26, 406.36, 406.46, 406.56, and 406.66 which state the applicability of standards of performance for purposes of pretreatment standard for new sources.

A preliminary Development Document was made available to the public at approximately the time of publication of the notice of proposed rulemaking and the final Development Document entitled "Development Document for Effluent Limitations Guidelines and New Source Performance Standards for the Grain Processing Segment of the Grain Mills Point Source Category" is now being published. The economic analysis report entitled "Economic Analysis of Proposed Effluent Guidelines, Grain Milling Industry" (August 1973), was made available at the time of proposal. Copies of the final Development Document and economic analysis report will continue to be maintained for inspection and copying during the comment period at the EPA Information Center, Room 227, West Tower, Waterside Mall, 401 M Street SW., Washington, D.C. Copies will also be available for inspection at EPA regional offices and at State water pollution control agency offices. Copies of the Development Document may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Copies of the economic analysis report will be available for purchase through the National Technical Information Service, Springfield, Virginia 22151.

On June 14, 1973, the Agency published procedures designed to insure that, when certain major standards, regulations, and guidelines are proposed, an explanation of their basis, purpose and environmental effects is made available to the public. (38 FR 15653) The procedures are applicable to major standards, regulations and guidelines which are proposed on or after December 31, 1973, and which either prescribe national standards of environmental quality or require national emission, effluent or performance standards or limitations.

The Agency determined to implement these procedures in order to insure that the public was provided with background information to assist it in commenting on the merits of a proposed action. In brief, the procedures call for the Agency to make public the information available to it delineating the major environmental effects of a proposed action, to discuss the pertinent nonenvironmental factors affecting the decision, and to explain the viable options available to it and the reasons for the option selected.

The procedures contemplate publication of this information in the FEDERAL REGISTER, where this is practicable. They provide, however, that where such publication is impracticable because of the length of these materials, the material may be made available in an alternate format.

The Development Document referred to above contains information available to the Agency concerning the major environmental effects of the regulation proposed below. The information includes: (1) The identification of pollutants present in waste waters resulting from the milling of grain, the characteristics of these pollutants, and the degree of pollutant reduction obtainable through implementation of the proposed standards and (2) the anticipated effects on other aspects of the environment (including air, subsurface waters, solid waste disposal and land use, and noise) of the treatment technologies available to meet the standards proposed.

The Development Document and the economic analysis report referred to above also contain information available to the Agency regarding the estimated cost and energy consumption implications of those treatment technologies and

V 39 55 MAR 20 74 XUM

the potential effects of those costs on the price and production of grain products. The two reports exceed, in the aggregate, 100 pages in length and contain a substantial number of charts, diagrams and tables. It is clearly impracticable to publish the material contained in these documents in the FEDERAL REGISTER.

To the extent possible, significant aspects of the material have been presented in summary form in the preamble to the proposed regulation containing effluent limitations guidelines, new source performance standards and pretreatment standards for new sources within the grain mills category (38 FR 33438; December 4, 1973). Additional discussion is contained in the analysis of public comments on the proposed regulation and the Agency's response to those comments. This discussion appears in the preamble to the promulgated regulation (40 CFR Part 406) which currently is being published in the rules and regulations section of the FEDERAL REGISTER.

The options available to the Agency in establishing the level of pollutant reduction obtainable through the best practicable control technology currently available, and the reasons for the particular level of reduction selected are discussed in the documents described above. In applying the effluent limitations guidelines to pretreatment standards for the introduction of incompatible pollutants into municipal systems by existing sources in the corn wet milling, corn dry milling, normal wheat flour milling, bulgur wheat flour milling, normal rice milling, parboiled rice processing subcategories, the Agency has, essentially, three options. The first is to declare that the guidelines do not apply. The second is to apply the guidelines unchanged. The third is to modify the guidelines to reflect: (1) differences between direct dischargers and plants utilizing municipal systems which affect the particability of the latter employing the technology available to achieve the effluent limitations guidelines; or (2) characteristics of the relevant pollutants which require higher levels of reduction (or permit less stringent levels) in order to insure that the pollutants do not interfere with the treatment works or pass through them untreated.

As described in the Development Document, the process waste waters from the grain processing segment of the grain mills point source category do not contain process waste water pollutants in sufficient concentrations to interfere with the operation of publicly owned treatment works, pass through such works untreated or inadequately treated or otherwise be incompatible with such treatment works. Therefore, no condition is deemed to preclude the discharge of process waste water from the corn wet milling, corn dry milling, normal wheat flow milling, bulgur wheat flour milling, normal rice milling, and parboiled rice processing subcategories to publicly owned treatment works.

Interested persons may participate in this rulemaking by submitting written comments in triplicate to the EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460, Attention: Mr. Philip B. Wisman. Comments on all aspects of the proposed regulations are solicited. In the event comments are in the nature of criticisms as to the adequacy of data which is available, or which may be relied upon by the Agency, comments should identify and, if possible, provide any additional data which may be available and should indicate why such data is essential to the development of the regulations. In the event comments address the approach taken by the Agency in establishing pretreatment standards for existing sources, EPA solicits suggestions as to what alternative approach should be taken and why and how this alternative better satisfies the detailed requirements of sections 301, 304, and 307(b) of the Act.

A copy of all public comments will be available for inspection and copying at the EPA Information Center, Room 227, West Tower, Waterside Mall, 401 M Street, S.W., Washington, D.C. 20460. The EPA information regulation, 40 CFR Part 2, provides that a reasonable fee may be charged for copying.

In consideration of the foregoing, it is hereby proposed that 40 CFR 406 be amended to add §§ 406.14, 406.24, 406.34, 406.44, 406.54, and 406.64 as set forth below. All comments received on or before April 19, 1974, will be considered.

Dated: March 12, 1974.

JOHN QUARLES,
Acting Administrator.

40 CFR 406 is proposed to be amended by adding the following sections:

Sec.
406.14 Pretreatment standards for existing sources.
406.24 Pretreatment standards for existing sources.
406.34 Pretreatment standards for existing sources.
406.44 Pretreatment standards for existing sources.
406.54 Pretreatment standards for existing sources.
406.64 Pretreatment standards for existing sources.

§ 406.14 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 406.12 above shall not apply and, subject to the provisions of 40 CFR Part 128 concerning pretreatment, process waste water from this subcategory may be introduced into a publicly owned treatment works.

§ 406.24 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 406.22 above shall not apply and, subject to the provisions of 40 CFR Part 128 concerning pretreatment, process waste water from this subcategory may be introduced into a publicly owned treatment works.

§ 406.34 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 406.32 above shall not apply and, subject to the provisions of 40 CFR Part 128 concerning pretreatment, process waste water from this subcategory may be introduced into a publicly owned treatment works.

§ 406.44 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 406.42 above shall not apply and, subject to the provisions of 40 CFR Part 128 concerning pretreatment process waste water from this subcategory may be introduced into a publicly owned treatment works.

§ 406.54 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 406.52 above shall not apply and, subject to the provisions of 40 CFR Part 128 concerning pretreatment, process waste water from this subcategory may be introduced into a publicly owned treatment works.

§ 406.64 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under 40 CFR 128.133, the effluent limitations guidelines set forth in 40 CFR 406.62 above shall not apply and, subject to the provisions of 40 CFR Part 128 concerning pretreatment, process waste water from this subcategory may be introduced into a publicly owned treatment works.

LIQUID AND CRYSTALLINE CANE SUGAR REFINING SUBCATEGORY

Effluent Limitations Guidelines and Proposed Pretreatment Standards

No. 55—Pt. III——1

V 39 55 MAR 20 74 XUM

Title 40—Protection of the Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER N—EFFLUENT GUIDELINES AND STANDARDS

PART 409—SUGAR PROCESSING POINT SOURCE CATEGORY

Liquid and Crystalline Cane Sugar Refining Subcategory

On December 7, 1973, notice was published in the FEDERAL REGISTER (38 FR 33846) that the Environmental Protection Agency (EPA or Agency) was proposing effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources within the crystalline cane sugar and liquid cane sugar refining subcategories of the sugar processing category of point sources.

The purpose of this notice is to establish final effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources in the sugar processing category of point sources, by amending 40 CFR Chapter I, Subchapter N, Part 409 to add new subparts B and C. This final rulemaking is promulgated pursuant to sections 301, 304 (b) and (c), 306 (b) and (c) and 307(c) of the Federal Water Pollution Control Act, as amended (the Act); 33 U.S.C. 1251, 1311, 1314 (b) and (c), 1316 (b) and (c) and 1317(c); 86 Stat. 816 et seq.; Pub. L. 92–500. Regulations regarding cooling water intake structures for all categories of point sources under section 316(b) of the Act will be promulgated in 40 CFR Part 402.

In addition, the EPA is simultaneously proposing a separate provision which appears in the proposed rules section of the FEDERAL REGISTER, stating the application of the limitations and standards set forth below to users of publicly owned treatment works which are subject to pretreatment standards under section 307(b) of the Act. The basis of that proposed regulation is set forth in the associated notice of proposed rulemaking.

The legal basis, methodology and factual conclusions which support promulgation of this regulation were set forth in substantial detail in the notice of public review procedures published August 6, 1973 (38 FR 21202) and in the notice of proposed rulemaking for the crystalline cane sugar refining subcategory and the liquid cane sugar refining subcategory. In addition, the regulations as proposed were supported by two other documents: (1) The document entitled "Development Document for Proposed Effluent Limitations Guidelines and New Source Performance Standards for the Cane Sugar Refining Segment of the Sugar Processing Point Source Category" (December 1973) and (2) the document entitled "Economic Analysis of Proposed Effluent Guidelines, Cane Sugar Refining Industry" (October 1973). Both of these documents were made available to the public and circulated to interested persons at approximately the time of publication of the notice of proposed rulemaking.

Interested persons were invited to participate in the rulemaking by submitting written comments within 30 days from the date of publication. Prior public participation in the form of solicited comments and responses from the States, Federal agencies, and other interested parties were described in the preamble to the proposed regulation. The EPA has considered carefully all of the comments received and a discussion of these comments with the Agency's response thereto follows.

The regulation as promulgated contains minor but significant departures from the proposed regulation. The following discussion outlines the reasons why these changes were made and why other suggestions were not adopted.

(a) *Summary of comments.* The following responded to the request for written comments contained in the preamble to the proposed regulation: U.S. Department of Commerce, U.S. Water Resources Council, California and Hawaiian Sugar Company, United States Cane Sugar Refiners' Association, Tate and Lyle Technical Services, Ltd., Amstar Sugar Corporation, Imperial Sugar Company, State of Hawaii, and the Effluent Standards and Water Quality Information Advisory Committee.

Each of the comments received was carefully reviewed and analyzed. The following is a summary of the significant comments and the Agency's response to those comments.

(1) Several commenters raised no objection to the guidelines as proposed.

(2) One commenter questioned the subcategorization into liquid and crystalline refining, and the more stringent standards laid down for crystalline cane sugar refineries.

The guidelines are actually more stringent (lower numbers, higher treatment efficiency) for liquid refining. These are two distinct unit operations with correspondingly different raw waste loads and water usage. Data pertaining to water usage and raw waste loadings further substantiate the subcategorization.

(3) Several commenters stated that the practicability of biological treatment of refinery wastes has not yet been demonstrated.

It is true that no member of the cane sugar refining subcategories is presently employing the technology described as BPCTCA. However, the technology itself is widely available and practiced in other industries with similar raw waste characteristics—for example, the grain milling and the citrus and potato industries. There are no characteristics of the refinery waste waters that would render them untreatable by the biological treatment system described.

(4) One commenter questioned the achievability and availability of biological treatment of sugar refining process water in conjunction with blowdown from cooling water recycle systems followed by sand filtration (BATEA), stating that it has not been physically demonstrated.

This is proven technology, currently being practiced within the grain milling, the oil refining, and the soaps and detergents industries. Although the economic situation of the industry precludes the establishment of this technology as BPCTCA, it has been so thoroughly demonstrated that there is little doubt that it can be utilized by 1983 within this industry segment. The technology upon which BATEA is established is proven and has been studied in terms of an economic impact analysis and found to be acceptable.

(5) Several commenters expressed the opinion that the effluent guidelines should be established as net rather than gross limitations.

It was the intention of the proposed effluent limitations guidelines (BPCTCA) that the barometric condenser cooling water stream be handled as net (the addition of pollutants). This is because for BPCTCA, control of entrained BOD5 in condenser water rather than treatment is specified. The regulations have been modified to better reflect their intentions, including a separate set of regulations for those refineries which discharge barometric condenser cooling water only. For BPCTCA for both subcategories, the basis of the effluent limitations guidelines is as follows. The BOD5 limitation is determined by the addition of the net BOD5 attributed to the barometric condenser cooling water together with that amount of BOD5 attributed to the treated process water. The TSS limitation is that amount of TSS attributed to the treated process water. Where the barometric condenser cooling water and process water streams are mixed and impossible to measure separately prior to discharge, the values should be considered net.

The pollutant levels established for: the process water stream for BPCTCA, for BATEA, and for new source performance standards for both the crystalline and liquid subcategories reflect values which should not be exceeded because treatment of the entire waste stream is specified. Treatment produces a relatively constant effluent regardless of influent concentration.

(6) The comment was made that the ratio of maximum daily to average monthly limits is far too liberal.

Further analysis of activated sludge treatment systems handling similar waste streams to cane sugar refining process waters was accomplished. Based on engineering judgment and experience with similar waste treatment systems in other industrial categories the following ratios of daily maximum to monthly average limitations are established. Barometric condenser cooling water will be three (3) times the monthly average for BOD5 for both subcategories. Process water will be two (2) times the monthly average for BOD5 and three (3) times the monthly average for TSS for both subcategories.

(7) It was recommended that effluent limitations be established for settleable solids (SS) rather than for total suspended nonfilterable solids (TSS).

Settleable solids, unlike TSS, does not measure the treatment efficiency of a biological treatment system. There should be no measurable settleable solids in the overflow from a secondary clarifier used in a biological treatment system. It would be meaningless to establish a standard for a parameter which does not measure the degree of treatment achieved by the treatment system.

(8) It was recommended that the BOD5 monthly limitation (BPCTCA) be based on an effluent concentration ranging from 60–113 mg/l from the biological treatment system for both the crystalline and liquid cane sugar refining subcategories.

The effluent levels from treatment of process water by an activated sludge or other biological treatment system (BPCTCA) have been modified so that crystalline cane sugar refineries are required to meet effluent levels of 60 mg/l for both BOD5 and TSS and liquid cane sugar refineries are required to meet effluent levels of 100 mg/l for both BOD5 and TSS. These levels are approximately double those in the proposed regulation. This modification of the guidelines is required because no one currently operates a biological system to treat refinery wastes. EPA continues to believe that a properly designed and operated system of the type described would meet the limitations set forth in the proposed guidelines. The revision of the limitations in the final guidelines is not intended to allow any lesser degree of treatment. The same system should be used, and the system should be designed so as to achieve the proposed guidelines. The revision is intended only to take into account operational problems which might be encountered in adapting the specified technology to this industry.

(9) One commenter questioned the use of cooling towers as a part of BATEA stating that a barometric condenser discharge stream of 24,000,000 gallons per day at 10 mg/l of BOD5 is better than 480,000 gallons per day at 30 mg/l (or that flow rate and corresponding BOD5 concentration resulting from the biological treatment of the cooling tower blowdown stream).

The use of cooling towers and subsequent biological treatment of the blowdown stream results in a reduction by 94% of the BOD5 reaching the receiving water body. EPA policy is that dilution is not a suitable form of treatment. By concentrating this waste stream in a relatively small blowdown stream, it is more easily and cheaply treatable biologically. This is "practicable" technology being utilized in the oil refining, grain milling, and soaps and detergents industries. Some segments of the cane sugar refining industry practice the recycle of barometric condenser cooling water and discharge of the cooling tower blowdown to municipal treatment systems or total impoundage lagoons.

(10) One commenter questioned the effluent levels proposed for BATEA stating that the limitations were not consistent with EPA's definition of "secondary treatment".

The guidelines for BATEA need not be consistent with the "secondary treatment" definition under section 304(d) of the Act. Instead, they must meet the requirements set forth in section 304(b) of the Act.

(11) One commenter felt that while sand filtration is mentioned as the BATEA, this should not preclude the use of other polishing methods to meet the standards. The Agency has not required any treatment method to be employed by industry to achieve the guidelines. Many other polishing methods exist and the guidelines may be achieved by means other than those specified in the development document.

(12) It was recommended that BOD5 under the BATEA be limited to 0.16 lb/ton, or double the proposed limitation, based on a lesser treatment efficiency.

The expected degree of treatment based on the BATEA has been re-evaluated and modified. Based on improved operation of the properly designed biological treatment system, effluent BOD5 levels of 40 mg/l for the model crystalline and 75 mg/l for the model liquid cane sugar refinery are determined to be realistic. No credit for BOD5 removal with the solids removed in the sand polishing operation is assumed. This is because of the uncertainty at present of the ratio of soluble to insoluble BOD5 in the effluent from the biological treatment system.

(13) The comment was made that the raw waste load baseline value with regard to filter cake slurry assumed the universal installation of filter aid recycle systems.

Upon re-analysis of the filter cake slurry stream, it was found that a calculational error appeared in the development document. Because the proposed guidelines are based on the complete retention with no allowable discharge of this stream, no change in the allowable effluent discharge results.

(14) Various commenters stated that the assumed barometric flows are either too low or too high.

The barometric condenser water flows designed for in the development document have the following bases: (1) Average flows were based on an average of all reliable flow information available, and (2) Model flows were based on the average flows of those refineries deemed to be exemplary in terms of BOD5 entrainment control.

In any event, the amount of BOD entrained is not a function of flow rate, but of sucrose carry-over. The model flows are technically sound for the basis of guidelines establishment and the development of cost data.

(15) One commenter objected to the statement that the investment costs associated with hook-up to a municipal treatment system are zero.

This assumption was made and applied only to those facilities which currently have hook-up. Therefore, the incremental investment cost is zero for these refineries.

(16) The comment was made that the capital and operating costs of treatment appear to be understated.

The Agency has reexamined the cost data and finds that these data are accurate and substantiate the reasonableness of the proposed regulations.

(17) The comment was made that the energy required to treat wastes and operate cooling towers will add a burden to our present crisis.

It has been estimated that the additional energy to achieve the BPCTCA limitations ranges from between 0.6 and 0.84 percent of the current industry energy usage. To achieve the BATEA limitations, the estimated additional energy required ranges from between 1.6 and 6.1 percent of the current industry energy usage. These energy requirements were reviewed by the Agency and judged to be not excessive.

(18) The comment was made that cooling towers sometimes cause fogging and noise problems.

For some locations, some of the time, these problems may be encountered. However, through proper design these effects can be minimized.

(19) The State of Hawaii stated that they are opposed to the installation of a cooling tower at a refinery in Aiea, Hawaii. The State would want to review the alternative of reclaiming the refinery's barometric condenser cooling water stream through the irrigation of public parks and recreational facilities in the area.

The EPA's guidelines limit only the quantity and quality of the pollutants which may be discharged. Dischargers may employ any technology, including land disposal or other alternatives, which will result in compliance with such limitations.

(20) The comment was made that settled activated bacterial sludge is very dilute, and its disposal is not simply a matter of landfill.

There are many ways in which settled activated bacterial sludge may be handled—sludge thickening, rotary vacuum filtration, centrifugation, sludge drying—with the resulting solids either landfilled or used as a soil supplement.

(21) The State of Hawaii recommended that the implementation of the proposed effluent limitations guidelines be postponed until the energy requirements are clearly known and fuel allocations for these purposes assured.

These guidelines are not self-executing, but must be implemented through NPDES permits. Under the Act, BPCTCA must be achieved by July 1, 1977. However, in permit issuance, such factors as fuel allocations and availability may be taken into account in specifying specific compliance dates prior to that time. As previously indicated, the energy requirements associated with the required technology are not excessive.

(22) One commenter objected to the assumptions in the economic impact analysis regarding the cost of capital,

V 39 55 MAR 20 74 XUM

land salvage values, and plant salvage values.

The Agency has reviewed these assumptions used in the economic impact analysis and found them to be substantially correct. The cost of capital used in the analysis is based upon the rate of return experienced in this particular industry, rather than the rate of return for the entire food processing industry. Any difference in land and plant salvage values were determined to be insignificant for the economic impact analysis.

(b) *Revision of the proposed regulation prior to promulgation.* As a result of public comments and continuing review and evaluation of the proposed regulation by the EPA, the following changes have been made in the regulation.

(1) The effluent levels from treatment of process waste water by an activated sludge or other biological treatment system (BPCTCA) have been modified so that crystalline cane sugar refineries are required to meet levels of 60 mg/l for both BOD5 and TSS and liquid cane sugar refineries are required to meet effluent levels of 100 mg/1 for both BOD5 and TSS.

These levels are approximately double those in the proposed regulation. The modification of the guidelines is required because no one currently operates a biological system to treat refinery wastes. EPA continues to believe that a properly designed and operated system of the type described would meet the limitations set forth in the proposed guidelines. The revision of the limitations in the final guidelines is not intended to allow any lesser degree of treatment. The same system should be used, and the system should be designed so as to achieve the proposed guidelines. The revision is intended only to take into account operational problems which might be encountered in adapting the specified technology to this industry.

(2) The effluent levels for BOD5 resulting from the application of BATEA have been modified.

Based on improved operation of the properly designed biological treatment system, effluent BOD5 levels of 40 mg/1 for crystalline and 75 mg/1 for liquid cane sugar refineries are determined to be more realistic.

No credit for BOD5 removal with the solids removed in the sand polishing operation is assumed. This is because of the uncertainty at present of the ratio of soluble to insoluble BOD5 in the effluent from the biological treatment system.

(3) Based on an analysis of biological treatment systems operating on wastes similar in nature to cane sugar refining wastes and on engineering judgment, the following ratios of daily maxium to monthly average limitations are established.

Barometric condenser cooling water will be three (3) times the monthly average for BOD5 for both subcategories.

Process water will be two (2) times the monthly average for BOD5 and three (3) times the monthly average for TSS for both subcategories.

(4) Section 304(b)(1)(B)z of the Act provides for "guidelines" to implement the uniform national standards of Section 301(b)(1)(A). Thus Congress recognized that some flexibility was necessary in order to take into account the complexity of the industrial world with respect to the practicability of pollution control technology.

In conformity with the Congressional intent and in recognition of the possible failure of these regulations to account for all factors bearing on the practicability of control technology, it was concluded that some provision was needed to authorize flexibility in the strict application of the limitations contained in the regulation where required by special circumstances applicable to individual dischargers.

Accordingly, a provision allowing flexibility in the application of the limitations representing best practicable control technology currently available has been added to each subpart, to account for special circumstances that may not have been adequately accounted for when these regulations were developed.

(c) *Economic impact.* The above listed changes will not significantly affect the conclusions of the economic study prepared for the proposed regulations. In addition, it has been learned that one cane sugar refinery considered to be impacted, under the assumption that a complete treatment system for treating its process waste water stream was necessary, is no longer impacted. The projected availability of a municipal treatment system at a reasonable initial and operational cost precludes the previously expected economic impact.

(d) *Cost-benefit analysis.* The detrimental effects of the constituents of waste waters now discharged by point sources within the cane sugar refining segment of the sugar processing point source category are discussed in Section VI of the report entitled "Development Document for Effluent Limitations Guidelines for the Cane Sugar Refining Segment of the Sugar Processing Point Source Category" (March 1974). It is not feasible to quantify in economic terms, particularly on a national basis, the costs resulting from the discharge of these pollutants to our Nation's Waterways. Nevertheless, as indicated in Section VI, the pollutants discharged have substantial and damaging impacts on the quality of water and therefore on its capacity to support healthy populations of wildlife, fish and other aquatic wildlife and on its suitability for industrial, recreational and drinking water supply uses.

The total cost of implementing the effluent limitations guidelines includes the direct capital and operating costs of the pollution control technology employed to achieve compliance and the indirect economic and environmental costs identified in Section VIII and in the supplementary report entitled "Economic Analysis of Proposed Effluent Guidelines, Cane Sugar Refining Industry" (October, 1973). Implementing the effluent limitations guidelines will substantially reduce the environmental harm which would otherwise be attributable to the continued discharge of polluted waste waters from existing and newly constructed plants in the cane sugar refining industry.

The Agency believes that the benefit of thus reducing the pollutants discharged justifies the associated costs which, though substantial in absolute terms, represent a relatively small percentage of the total capital investment in the industry.

(e) *Publication of information on processes, procedures, or operating methods which result in the elimination or reduction of the discharge of pollutants.* In conformance with the requirements of Section 304(c) of the Act a manual entitled, "Development Document for Effluent Limitations Guidelines and New Source Performance Standards for the Cane Sugar Refining Segment of the Sugar Processing Point Source Category," has been published and is available for purchase from the Government Printing Office, Washington, D.C., 20401 for a nominal fee.

FINAL RULEMAKING

In consideration of the foregoing, 40 CFR Chapter 1, Subchapter N, Part 409 is amended by adding Subparts B and C to read as set forth below. This final regulation is promulgated as set forth below and shall be effective May 20, 1974.

Dated: March 12, 1974.

RUSSELL E. TRAIN,
Administrator.

Subpart B—Crystalline Cane Sugar Refining Subcategory

Sec.

409.20 Applicability; description of the crystalline cane sugar refining subcategory.
409.21 Specialized definitions.
409.22 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.
409.23 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
409.24 [Reserved]
409.25 Standards of performance for new sources.
409.26 Pretreatment standards for new sources.

Subpart C—Liquid Cane Sugar Refining Subcategory

409.30 Applicability: description of the liquid cane sugar refining subcategory.
409.31 Specialized definitions.
409.32 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.
409.33 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
409.34 [Reserved]
409.35 Standards of performance for new sources.
409.36 Pretreatment standards for new sources.

Subpart B—Crystalline Cane Sugar Refining Subcategory

§ 409.20 Applicability; description of the crystalline cane sugar refining subcategory.

The provisions of this subpart are applicable to discharges resulting from the processing of raw cane sugar into crystalline refined sugar.

§ 409.21 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in Part 401 of this chapter shall apply to this subpart.

(b) Net shall mean the addition of pollutants.

(c) Melt shall mean that amount of raw material (raw sugar) contained within aqueous solution at the beginning of the process for production of refined cane sugar.

§ 409.22 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

(a) In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(b) The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

(1) Any crystalline cane sugar refinery discharging both barometric condenser cooling water and other process waters shall meet the following limitations. The BOD5 limitation is determined by the addition of the net BOD5 attributed to the barometric condenser cooling water to that amount of BOD5 attributed to the treated process water. The TSS limitation is that amount of TSS attributed to the treated process water. Where the barometric condenser cooling water and process water streams are mixed and impossible to measure separately prior to discharge, the values should be considered net.

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of melt)	
BOD5	1.49	0.43
TSS	.27	0.09
pH	Within the range 6.0 to 9.0.	
	English units (pounds per ton of melt)	
BOD5	2.38	0.86
TSS	.54	.18
pH	Within the range 6.0 to 9.0.	

(2) Any crystalline cane sugar refinery discharging barometric condenser cooling water only should be required to achieve the following net limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of melt)	
BOD5	1.02	0.34
	English units (Pounds per ton of melt)	
BOD5	2.04	0.68

§ 409.23 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of melt)	
BOD5	0.18	0.09
TSS	.11	.035
pH	Within the range 6.0 to 9.0.	
	English units (pounds per ton of melt)	
BOD5	0.36	0.18
TSS	.21	.07
pH	Within the range 6.0 to 9.0.	

§ 409.24 [Reserved]

§ 409.25 Standards of performance for new sources.

The following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of melt)	
BOD5	0.18	0.09
TSS	.11	.035
pH	Within the range 6.0 to 9.0.	
	English units (pounds per ton of melt)	
BOD5	0.36	0.18
TSS	.21	.07
pH	Within the range 6.0 to 9.0.	

§ 409.26 Pretreatment standards for new sources.

The pretreatment standards under section 307(c) of the Act for a source within the crystalline cane sugar refining subcategory, which is a user of a publicly owned treatment works (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to the navigable waters), shall be the standard set forth in Part 128 of this chapter, except that, for the purpose of this section, § 128.133 of this chapter shall be amended to read as follows:

In addition to the prohibitions set forth in 40 CFR 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works shall be the standard of performance for new sources specified in 40 CFR 409.25; *Provided*, That, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall, except in the case of standards providing for no discharge of pollutants, be correspondingly reduced in stringency for that pollutant.

V 39 155 MAR 20 74 XUM

Subpart C—Liquid Cane Sugar Refining Subcategory

§ 409.30 Applicability; description of the liquid cane sugar refining subcategory.

The provisions of this subpart are applicable to discharges resulting from the processing of raw cane sugar into liquid refined sugar.

§ 409.31 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in Part 401 of this chapter shall apply to this subpart.

(b) Net shall mean the addition of pollutants.

(c) Melt shall mean that amount of raw material (raw sugar) contained within aqueous solution at the beginning of the process for production of refined cane sugar.

§ 409.32 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

(a) In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of plant, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain plants in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(b) The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

(1) Any liquid cane sugar refinery discharging both barometric condenser cooling water and other process waters shall meet the following limitations. The BOD5 limitation is determined by the addition of the net BOD5 attributed to the barometric condenser cooling water to that amount of BOD5 attributed to the treated process water. The TSS limitation is that amount of TSS attributed to the treated process water. Where the barometric condenser cooling water and process water streams are mixed and impossible to measure separately prior to discharge, the values should be considered net.

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of melt)	
BOD5	0.78	0.32
TSS	.50	.17
pH	Within the range 6.0 to 9.0.	
	English units (pounds per ton of melt)	
BOD5	1.56	0.63
TSS	.99	.33
pH	Within the range 6.0 to 9.0.	

(2) Any liquid cane sugar refinery discharging barometric condenser cooling water only shall meet the following net limitations:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of melt)	
BOD5	0.45	0.15
	English units (pounds per ton of melt)	
BOD5	0.90	0.30

§ 409.33 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of melt)	
BOD5	0.30	0.15
TSS	.09	.03
pH	Within the range 6.0 to 9.0.	
	English units (pounds per ton of melt)	
BOD5	0.60	0.30
TSS	.18	.06
pH	Within the range 6.0 to 9.0.	

§ 409.34 [Reserved]

§ 409.35 Standards of performance for new sources.

The following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

Effluent characteristic	Effluent limitations: Maximum for any 1 day	Effluent limitations: Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 kg of melt)	
BOD5	0.30	0.15
TSS	.09	.03
pH	Within the range 6.0 to 9.0.	
	English units (pounds per ton of melt)	
BOD5	0.60	0.30
TSS	.18	.06
pH	Within the range 6.0 to 9.0.	

§ 409.36 Pretreatment standards for new sources.

The pretreatment standards under section 307(c) of the Act for a source within the liquid cane sugar refining subcategory, which is a user of a publicly owned treatment works (and which would be a new source subject to section 306 of the Act, if it were to discharge pollutants to the navigable waters), shall be the standard set forth in Part 128, of this chapter, except that, for the purpose of this section, § 128.133 of this chapter shall be amended to read as follows:

In addition to the prohibitions set forth in 40 CFR 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works shall be the standard of performance for new sources specified in 40 CFR 409.35; *Provided*, That, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall, except in the case of standards providing for no discharge of pollutants, be correspondingly reduced in stringency for that pollutant.

[FR Doc.74-6234 Filed 3-19-74;8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 409]

SUGAR PROCESSING POINT SOURCE CATEGORY

Pretreatment Standards for Incompatible Pollutants

Notice is hereby given pursuant to sections 301, 304 and 307(b) of the Federal Water Pollution Control Act, as amended (the Act) 33 U.S.C. 1251, 1311, 1314 and 1317(b); 86 Stat. 816 et seq.; Pub. L. 92-500, that the proposed regulation set forth below concerns the application of effluent limitations guidelines for existing sources to pretreatment standards for incompatible pollutants. The proposal will amend 40 CFR Part 409, Sugar Processing Point Source Category, establishing for Subparts B and C therein the extent of application of effluent limitations guidelines to existing sources which discharge to publicly owned treatment works. The regulation is intended to be complementary to the general regulation for pretreatment standards set forth at 40 CFR 128. The general regulation was proposed July 19, 1973 (38 FR 19236), and published in final form on November 8, 1973 (38 FR 30982).

The proposed regulation is also intended to supplement a final regulation being simultaneously promulgated by the Environmental Protection Agency (EPA or Agency) which provides effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources within the crystalline cane sugar refining subcategory and the liquid cane sugar refining subcategory of the sugar processing point source category. The latter regulation applies to the portion of a discharge which is directed to navigable waters. The regulation proposed below applies to users of publicly owned treatment works which fall within the description of the point source category to which the guidelines and standards (40 CFR Part 409) promulgated simultaneously apply. However, the proposed regulation applies to the introduction of incompatible pollutants which are directed into a publicly owned treatment works, rather than to discharges of pollutants to navigable waters.

The general pretreatment standard divides pollutants discharged by users of publicly owned treatment works into two broad categories: "compatible" and "incompatible." Compatible pollutants are generally not subject to pretreatment standards. (See 40 CFR 128.110 (State or local law) and 40 CFR 128.131 (Prohibited wastes) for requirements which may be applicable to compatible pollutants). Incompatible pollutants are subject to pretreatment standards as provided in 40 CFR 128.133, which provides as follows:

In addition to the prohibitions set forth in § 128.131, the pretreatment standard for incompatible pollutants introduced into a publicly owned treatment works by a major contributing industry not subject to section 307(c) of the Act shall be, for sources within the corresponding industrial or commercial category, that established by the promulgated effluent limitation guidelines defining best practicable control technology currently available pursuant to sections 301(b) and 304(b) of the Act; provided that, if the publicly owned treatment works which receives the pollutants is committed, in its NPDES permit, to remove a specified percentage of any incompatible pollutant, the pretreatment standard applicable to users of such treatment works shall be correspondingly reduced for that pollutant: and provided further that when the effluent limitations guidelines for each industry are promulgated, a separate provision will be proposed concerning the application of such guidelines to pretreatment.

The regulation proposed below is intended to implement that portion of section 128.133, above, requiring that a separate provision be made stating the application to pretreatment standards of effluent limitations guidelines based upon best practicable control technology currently available.

Questions were raised during the public comment period on the proposed general pretreatment standard (40 CFR Part 128) about the propriety of applying a standard based upon best practicable control technology currently available to all plants subject to pretreatment standards. In general, EPA believes the analysis supporting the effluent limitations guidelines is appropriate to support the application of those standards to users of publicly owned treatment works. However, to ensure that those standards are appropriate in all cases, EPA now seeks additional comments focusing upon the application of effluent limitations guidelines to users of publicly owned treatment works.

Sections 409.25 and 409.35 of the proposed regulation for point sources within the crystalline cane sugar refining subcategory and the liquid cane sugar refining subcategory (December 7, 1973; 38 FR 33846), contained the proposed pretreatment standard for new sources. The regulation promulgated simultaneously herewith contains §§ 409.26 and 409.36 which states the applicability of standards of performance for purposes of pretreatment standard for new sources.

A preliminary Development Document was made available to the public at approximately the time of publication of the notice of proposed rulemaking and the final Development Document entitled "Development Document for Effluent Limitations Guidelines and New Source Performance Standards for the Cane Sugar Refining Segment of the Sugar Processing Point Source Category" is now being published. The economic analysis report entitled "Economic Analysis of Proposed Effluent Guidelines, Cane Sugar Refining Industry", (October, 1973) was made available at the time of proposal. Copies of the final Development Document and economic analysis report will continue to be maintained for inspection and copying during the comment period at the EPA Information Center, Room 227, West Tower, Waterside Mall, 401 M Street, S.W., Washington, D.C. Copies will also be available for inspection at EPA regional offices and at State water pollution control agency offices. Copies of the Development Document may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D.C., 20402. Copies of the economic analysis report will be available for purchase through the National Technical Information Service, Springfield, Virginia, 22151.

On June 14, 1973, the Agency published procedures designed to insure that, when certain major standards, regulations, and guidelines are proposed, an explanation of their basis, purpose and environmental effects is made available to the public. (38 FR 15653) The procedures are applicable to major standards, regulations and guidelines which are proposed on or after December 31, 1973, and which either prescribe national standards of environmental quality or require national emission, effluent or performance standards or limitations.

The Agency determined to implement these procedures in order to insure that the public was provided with background information to assist it in commenting on the merits of a proposed action. In brief, the procedures call for the Agency to make public the information available to it delineating the major environmental effects of a proposed action, to discuss the pertinent nonenvironmental factors affecting the decision, and to explain the viable options available to it and the reasons for the option selected.

The procedure contemplate publication of this information in the FEDERAL REGISTER, where this is practicable. They provide, however, that where such publication is impracticable because of the length of these materials, the material may be made available in an alternate format.

The Development Document referred to above contains information available to the Agency concerning the major environmental effects of the regulation proposed below. The information includes: (1) The identification of pollutants present in waste waters resulting from the processing of refined cane sugar, the characteristics of these pollutants, and the degree of pollutant reduction attainable through implementation of the proposed standard; and (2) the anticipated effects on other aspects of the environment (including air, subsurface waters, solid waste disposal and land use, and noise) of the treatment technologies available to meet the standard proposed.

The Development Document and the economic analysis report referred to above also contain information available to the Agency regarding the estimated cost and energy consumption implications of those treatment technologies and the potential effects of those costs on the price and production of refined cane sugar. The two reports exceed, in the aggregate, 100 pages in length and contain a substantial number of charts, diagrams and tables. It is clearly impracticable to publish the material contained in these

V 39 55 MAR 20 74 XUM

documents in the FEDERAL REGISTER. To the extent possible, significant aspects of the material have been presented in summary form in the preamble to the proposed regulation containing effluent limitations guidelines, new source performance standards and pretreatment standards for new sources within the sugar processing point source category (38 FR 33846; December 7, 1973). Additional discussion is contained in the analysis of public comments on the proposed regulation and the Agency's response to those comments. This discussion appears in the preamble to the promulgated regulation (40 CFR Part 409) which currently is being published in the rules and regulations section of the FEDERAL REGISTER.

The options available to the Agency in establishing the level of pollutant reduction attainable through the best practicable control technology currently available, and the reasons for the particular level of reduction selected are discussed in the documents described above. In applying the effluent limitations guidelines to pretreatment standards for the introduction of incompatible pollutants into municipal systems by existing sources in the crystalline cane sugar refining subcategory and the liquid cane sugar refining subcategory, the Agency has, essentially, three options. The first is to declare that the guidelines do not apply. The second is to apply the guidelines unchanged. The third is to modify the guidelines to reflect: (1) differences between direct dischargers and plants utilizing municipal systems which affect the practicability of the latter employing the technology available to achieve the effluent limitations guidelines; or (2) characteristics of the relevant pollutants which require higher levels of reduction (or permit less stringent levels) in order to insure that the pollutants do not interfere with the treatment works or pass through them untreated.

For plants in the crystalline cane sugar refining subcategory and the liquid cane sugar refining subcategory, all pollutants controlled by these guidelines have been designated as compatible pollutants (40 CFR 128.121). Accordingly, the first option is appropriate and the guidelines should not apply. However, even though the filter cake slurry waste water stream is considered to be compatible, the extremely high concentrations of BOD5 and TSS therein could, in some cases, interfere with the operation of publicly owned treatment works. These special situations should be controlled by the operators of the treatment works involved. Such control should not pose undue difficulty since the highly concentrated waste can be dry handled and disposed of as a solid waste.

Interested persons may participate in this rulemaking by submitting written comments in triplicate to the EPA Information Center, Environmental Protection Agency, Washington, D.C. 20460, Attention: Mr. Philip B. Wisman. Comments on all aspects of the proposed regulations are solicited. In the event comments are in the nature of criticisms as to the adequacy of data which is available, or which may be relied upon by the Agency, comments should identify and, if possible, provide any additional data which may be available and should indicate why such data is essential to the development of the regulations. In the event comments address the approach taken by the Agency in establishing pretreatment standards for existing sources, EPA solicits suggestions as to what alternative approach should be taken and why and how this alternative better satisfies the detailed requirements of sections 301, 304 and 307(b) of the Act.

A copy of all public comments will be available for inspection and copying at the EPA Information Center, Room 227, West Tower, Waterside Mall, 401 M Street, SW., Washington, D.C. 20460. The EPA information regulation, 40 CFR Part 2, provides that a reasonable fee may be charged for copying.

In consideration of the foregoing, it is hereby proposed that 40 CFR Part 409 be amended to add §§ 409.24 and 409.34 as set forth below. All comments received on or before April 19, 1974, will be considered.

Dated: March 12, 1974.

RUSSELL E. TRAIN,
Administrator.

It is proposed to amend 40 CFR Part 409 by adding the following sections:

* * * * *

Sec.
409.24 Pretreatment standards for existing sources.
409.34 Pretreatment standards for existing sources.

* * * * *

§ 409.24 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under § 128.133 of this chapter, the effluent limitations guidelines set forth in § 409.22 above shall not apply and, subject to the provisions of Part 218 of this chapter concerning pretreatment, process waste water from this subcategory may be introduced into a publicly owned treatment works.

§ 409.34 Pretreatment standards for existing sources.

For the purpose of pretreatment standards for incompatible pollutants established under § 128.133 of this chapter, the effluent limitations guidelines set forth in § 409.32 above shall not apply and, subject to the provisions of Part 128 of this chapter concerning pretreatment, process waste water from this subcategory may be introduced into a publicly owned treatment works.

FEDERAL ENERGY OFFICE

NATIONAL UTILITY RESIDUAL FUEL OIL ALLOCATION

Suppliers Percentage Notice

Pursuant to the provisions of 10 CFR 211.163(b), 211.164 and 211.165(d)(2), the Federal Energy Office (FEO) hereby provides notice of the volumes of residual fuel oil allocated to each utility for April 1974, and the percentages of such volumes required to be supplied by each supplier for delivery in April 1974. This information is set forth in the Appendix to this notice. Adjustments of certain supplier base period percentages have been made at the request of affected utilities, pursuant to the criteria of 10 CFR 205.24 and are reflected in the Appendix.

The utility allocations were determined after review of the impact or reduced fuel supplies between utility and non-utility uses of residual fuel oil. In calculating the allocation level for each utility the FEO considered all of the factors enumerated in 10 CFR 211.163(b) and also the following other factors:

1. The data contained in the revised Federal Power Commission (FPC) form 23 and addendum thereto submitted by utilities for April;

2. Utility residual fuel oil requirements were assumed to be reduced as a result of conservation efforts by utilities designed to achieve at least seven (7) percent load reduction below normal trends;

3. Residual fuel oil needs for utilities were assumed to be reduced as a result of contemplated power purchases from coal and hydro-based utility systems which were considered feasible by the Federal Power Commission;

4. Again recognizing the utilities' need for inventory buildups, an incremental increase has been included in the scheduled delivery levels for April. The individual utility inventory buildup is based upon an amount equal to approximately 10 percent of the utility projected burn rate for the month.

The amounts shown in the Appendix are the quantities of fuel oil to be delivered to the utility listed during the month of April 1974. Some utilities will not receive any allocation for April. This is due to either the fact that these utilities burn other fuels primarily, and use residual fuel oil only for stand-by inventory purposes, or the fact that these utilities use residual fuel oil only in small percentages of the plant's capacity. In some of the latter instances, even the small amount of residual fuel oil involved is eliminated by the conservation guides established for utilities. April delivery levels were limited in some instances so as not to exceed utility storage capacity plus recommended FEO burn level.

The Appendix provides the name of the suppliers obligated to supply each utility and the supplier's percentage and volume of the month's allocation. The first column of the Appendix lists each utility with its suppliers. The second column sets forth the recommended FEO burn for the month of April. The third and fourth columns provide each supplier's respective percentage and volume share of a utility's allocated volume. The fifth column provides the total volume for each utility from all suppliers. Following the name of certain suppliers, an additional supplier is shown in parenthesis. The supplier in parenthesis is presumed, on the basis of the best information available, to be the source of supply for certain resellers supplying utility end-users. This information is provided for the convenience of such suppliers and the FEO requests any additions or corrections in this regard be forwarded to: Residual Fuels Manager for Utilities, P.O. Box 2887, Washington, D.C. 20013.

The Appendix also contains for the month of April the FEO recommended total residual fuel oil burn after conservation adjustments for the utility. Residual fuel oil delivery levels are keyed to the FEO burn. Thus, in April because of the proposed inventory buildup most utility companies are being allocated delivery levels in excess of the FEO recommended burn. The excess amounts are intended as an incremental addition to inventory. Adjustments have been made in the allocation levels of certain utilities to reflect necessary corrections in the delivery levels authorized in February and March.

FEO expects the utilities to consume supplies at or below FEO burn levels which are based on the utilities' proposed burn less adjustments for conservation efforts. Where a utility fails to encourage conservation to observe FEO burn levels, its allocation for following months will be appropriately adjusted downward. FEO will consider special circumstances such as unexpected outages which may cause fuel consumption to exceed FEO burn levels in any month.

The utility residual fuel oil allocation program is based in part on the data derived from utilities' filings of FPC Form 23. Prior to publication of the May allocation list any utility which requires residual fuel must submit a revised Form 23 to the FEO and FPC, to reflect any changes in need resulting from the April allocation or other factors which would assure updated information. As an addendum to the Form 23 revision, each utility must include the following data:

APRIL

ADDENDUM

(1) Actual March 1974 data showing:
(a) Net energy for load;
(b) Net generation from heavy oil;
(c) Heavy oil consumption for generation;
(d) Heavy oil deliveries in the month separately by suppliers and sulphur content;
(e) Heavy oil deliveries scheduled during the 12-day grace period; and
(f) Heavy fuel oil stock at the end of the month including any fuel to be delivered and credited to the March allocation.

(2)(a) Lists of both (a) total and (b) maximum usable heavy oil storage capacity on-site or near-site in utility-owned or leased tanks;
(b) Total capacity of any other off-site utility-owned or leased storage tanks; and
(c) The minimum inventory level desired by the utility to meet forseeable logistic and operational problems.

(3) Lists disclosing the names of suppliers under contract, the contract termination dates and contract delivery levels through October 31, 1974.

A copy of the revised Form 23 with addendum must be mailed to both the FEO and FPC by April 5, 1974. Any Form 23 received after April 10, 1974, may be limited to consideration in connection with the utility allocation program for June. Reports should be addressed to "Data Collection," FEO, Box 2887, Washington, D.C. 20013.

Issued in Washington, D.C., March 18, 1974.

WILLIAM N. WALKER,
General Counsel,
Federal Energy Office.

PART I

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

GAMBLING INCOME—SBA proposal permitting certain percentage of gross income from legal gaming activities; comments by 4–10–74 10607

FUEL SYSTEM INTEGRITY—DoT regulations designed to ameliorate dangers associated with gasoline spillage following accidents (2 documents); effective 4–1–75 10586

SHORT SALES REGULATIONS—SEC proposes to insure operational composite transaction reporting system; comments by 5–1–74 10604

MEAT—USDA proposal relating to quantity requirements in products with maximum fat content limits; comments by 5–24–74 10598

MORTGAGE INSURANCE—HUD publishes guidelines for assisted admission before final endorsement; effective 3–21–74 10559

EDUCATION RESEARCH ASSISTANCE—HEW announces plans for funding competitive awards (2 documents); filing deadline 4–22 and 4–23–74 10639

CLEAN AIR—
EPA approves implementation plans for sulfur dioxide emissions in Arizona and New Mexico; effective 3–21–74 10582

(Continued Inside)

PART II:

Guide to record retention requirements 10771

PART III:

EFFLUENT LIMITATIONS—EPA publishes standards for fruits and vegetables processing point source category; effective 5–20–74 10862

EPA proposes guidelines concerning incompatible pollutants for fruits and vegetables processing point source category; comments by 4–22–74 10869

REMINDERS

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Today

This list includes only rules that were published in the FEDERAL REGISTER after October 1, 1972.

page no. and date

Consumer Product Safety Commission—Product hazard notifications; submission of information by manufacturers, distributors and retailers 6061; 2–19–74

Customs Service—LASH-type barges; coastwise movement 6107; 2–19–74

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

EPA proposal clarifying policy on exclusion and exemption of certain motor vehicles and engines; comments by 5–20–74 10601

NEW ANIMAL DRUGS—FDA announces withdrawal of approval for Breeder Premix Medicated; effective 3–21–74 10639

NONMEMBER BROKER-DEALERS—SEC proposal modifying initial fees and setting annual assessments; comments by 4–12–74 10607

PESTICIDES—EPA proposes tolerances and exemptions for 3,5-Dichloro-*N*-1,1-Dimethyl-2-Propynyl) Benzamide; comments by 4–22–74 10604

EDUCATION PROGRAMS—Air Force revises and expands responsibilities for elementary and secondary schooling of overseas dependents 10560

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1974, and specifies how they are affected.

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Amdt. 1]

PART 966—TOMATOES GROWN IN FLORIDA

Increase in Expenses

This document amends the budget of the Florida Tomato Committee and authorizes the committee to spend not more than $157,000 for its operations during the fiscal period ending July 31, 1974.

The committee was established under Marketing Agreement No. 125 and Order No. 966, both as amended (7 CFR Part 966), regulating the handling of tomatoes grown in designated counties in the State of Florida. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

Notice was published in the March 7 FEDERAL REGISTER (39 FR 8937) regarding the proposal. It afforded interested persons an opportunity to file written comments not later than March 14, 1974. None was filed.

After consideration of all relevant matters, including the proposals set forth in the notice, it is found that the following should be issued:

Expenses, as amended. In § 966.210 (38 FR 29214) paragraph (a) is hereby amended as follows:

§ 966.210 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period ending July 31, 1974, by the Florida Tomato Committee for its maintenance and functioning, and for such purposes as the Secretary determines to be appropriate will amount to $157,000.

* * * * *

It is hereby found that good cause exists for not postponing the effective date of this section until April 22, 1974 (5 U.S.C. 553) since it is urgent that the funds be made available as soon as possible for a market research project prior to the end of the shipping period.

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674))

Dated: March 15, 1974.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 74-6542 Filed 3-20-74;8:45 am]

[Milk Order No. 79]

PART 1079—MILK IN THE DES MOINES, IOWA, MARKETING AREA

Order Suspending Certain Provisions

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Des Moines, Iowa, marketing area.

Notice of proposed rulemaking was published in the FEDERAL REGISTER (39 FR 8165) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views, and arguments thereon.

After consideration of all relevant material, including the proposal set forth in the aforesaid notice, data, views, and arguments filed thereon, and other available information, it is hereby found and determined that for the month of March 1974 the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1079.14, the word "distributing", which appears twice in the preamble, three times in paragraph (a) and twice in paragraph (b); and in paragraphs (a) and (b), the words "50 percent in September through March and 100 percent in April through August of".

STATEMENT OF CONSIDERATION

This suspension action relaxes the limits on diversion of producer milk by the operator of a pool plant and by a cooperative association with respect to the milk of producers diverted for their respective accounts during the month of March 1974.

At present milk diverted by a cooperative association during the months of September through March may not exceed 50 percent of the larger of: (1) The total quantity of its member milk received at all pool distributing plants during the current month, or (2) the average daily quantity of its member milk received at all pool distributing plants during the previous month multiplied by the number of days in the current month. Similarly, the operator of a pool distributing plant may not divert more than 50 percent of the larger of: (1) The total quantity of producer milk received at such plant during the current month from producers who are not members of a cooperative association which has diverted milk during the month, or (2) the average daily quantity of producer milk received at such plant during the previous month multiplied by the number of days in the current month from producers who are not members of a cooperative association which has diverted milk in the current month. Diversion of producer milk is presently restricted to pool distributing plant operators and cooperative associations diverting milk for their account.

Suspension action on diversion limits that apply to milk handled by a cooperative was requested by Mid-America Dairymen, Inc., a cooperative association representing the majority of producers on the Des Moines market.

Reserve milk supplies on the market have increased markedly in recent months. For example, producer milk pooled on the market during December 1973 was almost 30 percent greater than during December 1972, while producer milk utilized in Class I decreased by 2.7 percent during this same period. Consequently, the proportion of the milk associated with the Des Moines order that needs to be moved to nonpool manufacturing plants during March is greater than can be accommodated under the diversion limits provided in the order.

Relaxation of diversion privileges was considered, among other issues, at a hearing held in May of 1973, at which evidence was adduced to the effect that greater diversion allowances during all months of the year, applicable to proprietary handlers as well as to cooperative associations, is necessary. Therefore, in the notice of proposed suspension issued February 24, 1974 (39 FR 8165), data, views, and arguments were invited on the propriety of suspending the diversion limitations applicable to both cooperative associations and proprietary handlers as contained in § 1079.14 of the order.

A proprietary handler who filed data, views, and arguments requested that the diversion limit also be relaxed with respect to all pool plant operators. It is concluded that the diversion limits should be relaxed by suspension action during March, pending completion of such amendatory proceedings.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that it would facilitate handling of the market's reserve supply of milk during March 1974;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

V 39 156 MAR 21 74 XUM

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension.

Therefore, good cause exists for making this order effective for the month of March 1974.

It is therefore ordered, That the aforesaid provisions of the order are hereby suspended for the month of March 1974.

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674))

Effective date: March 21, 1974.

Signed at Washington, D.C., on March 18, 1974.

CLAYTON YEUTTER,
Assistant Secretary.

[FR Doc.74–6543 Filed 3–20–74;8:45 am]

CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK), DEPARTMENT OF AGRICULTURE

[Milk Order No. 129]

PART 1129—MILK IN THE AUSTIN-WACO, TEXAS, MARKETING AREA

Order Suspending Certain Provisions

This order suspending certain provisions is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Austin-Waco marketing area.

It is hereby found and determined that for the months of April through July 1974 the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1129.20, which defines a "fluid milk product", the language "cultured sour cream."

STATEMENT OF CONSIDERATION

This action will continue through July 1974 the current suspension which results in milk used in cultured sour cream being classified under the order as Class II milk rather than Class I milk. The current suspension, which became effective October 1, 1973, expires March 31, 1974.

Continuation of the suspension was requested by a pool plant operator regulated under the Austin-Waco order. This handler sells sour cream in the Austin-Waco market in competition with handlers regulated under the North Texas and San Antonio Federal orders. Such orders classify milk used in sour cream in Class II. By continuing the present Class II classification of sour cream under the Austin-Waco order, the class price for milk in such use will remain closely aligned with the price of milk so used under such other orders.

In the Department's final decision issued February 19, 1974, (39 FR 8452, 8712, 9012), it was concluded that a uniform plan for classifying milk should be adopted in 32 markets, including the Austin-Waco and other Texas markets. Under this plan, sour cream would be included in the same class under all 32 orders. Final action on the 32-market proceeding is still pending. In this circumstance, the suspension of sour cream from the fluid milk product definition should be continued until the classification differences are resolved through the amendment procedure.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) This suspension continues a suspension now in effect. Moreover, it carries out the intent of a final decision issued by the Department on February 19, 1974, in which it was concluded that a uniform plan for classifying milk, including the same classification of sour cream, should be adopted for Austin-Waco and other Texas markets.

Therefore, good cause exists for making this order effective April 1, 1974.

It is therefore ordered, That the aforesaid provisions of the order are hereby suspended for the months of April through July 1974.

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674))

Effective date: April 1, 1974

Signed at Washington, D.C., on March 18, 1974.

CLAYTON YEUTTER,
Assistant Secretary.

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER F—SECURITY SERVICING AND LIQUIDATION

[FHA Instructions 471.2 and 471.3; AL–597(471)]

PART 1874—ASSIGNMENT OF INSURED MORTGAGES

Deletion of Part

"Assignment of Insured Mortgages," (31 FR 14239), is deleted from Chapter XVIII of Title 7 of the Code of Federal Regulations. The regulations contained in Part 1874 are obsolete as the Farmers Home Administration no longer assigns the mortgage with the sale of insured notes.

Inasmuch as this deletion does not have a direct effect on the public, and is a deletion of regulations no longer in use, it has been determined that the publication of the deletion of this part is unnecessary.

((7 U.S.C. 1989; 42 U.S.C. 1480; 40 U.S.C. 442); Delegation of Authority by the Secretary of Agriculture, 38 FR 14944, 14948, 7 CFR 2.23; Delegation of Authority by the Assistant Secretary for Rural Development, 38 FR 14944, 14952, 7 CFR 2.70)

Effective Date. This deletion shall be effective on March 21, 1974.

Dated: March 8, 1974.

Title 10—Energy

CHAPTER I—ATOMIC ENERGY COMMISSION

PART 50—LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

PART 115—PROCEDURES FOR REVIEW OF CERTAIN NUCLEAR REACTORS EXEMPTED FROM LICENSING REQUIREMENTS

Amendments and Change Procedures for Facility Licenses and Authorizations

On August 24, 1973, the Atomic Energy Commission published in the FEDERAL REGISTER (38 FR 22796) proposed amendments to its regulations in 10 CFR Part 50, Licensing of Production and Utilization Facilities, and 10 CFR Part 115, Procedures for Review of Certain Nuclear Reactors Exempted from Licensing Requirements, which would simplify the procedural process for AEC authorization of changes in production and utilization facilities and technical specifications relating to such facilities. The proposed amendments to Part 50 would continue to permit facility licensees, pursuant to § 50.59 of Part 50, to make changes in the facility and perform tests and experiments not described in the safety analysis report without prior Commission approval unless the change, test or experiment involves an unreviewed safety question or a change in the technical specifications. For proposed changes, tests or experiments which involve an unreviewed safety question or a change in technical specifications, an amendment to the operating license would be required, pursuant to § 50.90. With respect to an application for amendment of a license which involves a significant hazards consideration, the Commission would act upon the application for amendment after giving notice of its proposed action, as required by section 189 of the Atomic Energy Act of 1954, as amended and § 2.105 of 10 CFR Part 2. Notice of issuance of an amendment which did not involve a significant hazards consideration would be published in the FEDERAL REGISTER pursuant to § 2.106 of 10 CFR Part 2.

After consideration of the comments received and other factors involved, the Commission has adopted the amendments as published for comment.

Pursuant to the Atomic Energy Act of 1954, as amended, and sections 552 and 553 of Title 5 of the United States Code, the following amendments to 10 CFR Parts 50 and 115 are published as a document subject to codification.

1. Paragraph (a) of § 50.58 is revised to read as follows:

§ 50.58 Hearings and report of the Advisory Committee on Reactor Safeguards.

(a) Each application for a construction permit or an operating license for a facility which is of a type described in § 50.21(b) or § 50.22, or for a testing facility, shall be referred to the Advisory Committee on Reactor Safeguards for a review and report. An application for an amendment to such a construction permit or operating license may be referred to the Advisory Committee on Reactor Safeguards for review and report. Any report shall be made part of the record of the application and available to the public, except to the extent that security classification prevents disclosure.

• • • • • •

2. Section 50.59 is revised to read as follows:

§ 50.59 Changes, tests and experiments.

(a) (1) The holder of a license authorizing operation of a production or utilization facility may (i) make changes in the facility as described in the safety analysis report, (ii) make changes in the procedures as described in the safety analysis report, and (iii) conduct tests or experiments not described in the safety analysis report, without prior Commission approval, unless the proposed change, test or experiment involves a change in the technical specifications incorporated in the license or an unreviewed safety question.

(2) A proposed change, test, or experiment shall be deemed to involve an unreviewed safety question (i) if the probability of occurrence or the consequences of an accident of malfunction of equipment important to safety previously evaluated in the safety analysis report may be increased; or (ii) if a possibility for an accident or malfunction of a different type than any evaluated previously in the safety analysis report may be created; or (iii) if the margin of safety as defined in the basis for any technical specification is reduced.

(b) The licensee shall maintain records of changes in the facility and of changes in procedures made pursuant to this section, to the extent that such changes constitute changes in the facility as described in the safety analysis report or constitute changes in procedures as described in the safety analysis report. The licensee shall also maintain records of tests and experiments carried out pursuant to paragraph (a) of this section. These records shall include a written safety evaluation which provides the bases for the determination that the change, test or experiment does not involve an unreviewed safety question. The licensee shall furnish to the Commisison, annually or at such shorter intervals as may be specified in the license, a report containing a brief description of such changes, tests and experiments, including a summary of the safety evaluation of each. Any report submitted by a licensee pursuant to this paragraph will be made a part of the public record of the licensing proceeding. In addition to a signed original, 39 copies of each report of changes in a facility of the type described in § 50.21(b) or § 50.22 or a testing facility, and 12 copies of each report of changes in any other facility, shall be filed.

(c) The holder of a license authorizing operation of a production or utilization facility who desires (1) a change in technical specifications or (2) to make a change in the facility or the procedures described in the safety analysis report or to conduct tests or experiments not described in the safety analysis report, which involve an unreviewed safety question or a change in technical specifications, shall submit an application for amendment of his license pursuant to § 50.90.

3. A sentence is added to the end of § 50.91 to read as follows:

§ 50.91 Issuance of amendment.

• • • In determining whether an amendment to a license or construction permit will be issued to the applicant the Commission will be guided by the considerations which govern the issuance of initial licenses or construction permits, to the extent applicable and appropriate. If the application involves the material alteration of a licensed facility, a construction permit will be issued prior to the issuance of the amendment to the license. If the amendment involves a significant hazards consideration, the Commission will give notice of its proposed action pursuant to § 2.105 of this chapter before acting thereon. The notice will be issued as soon as practicable after the application has been docketed.

4. Paragraph (a) of § 115.46 is amended to read as follows:

§ 115.46 Hearing and report of the Advisory Committee on Reactor Safeguards.

(a) Each application for an authorization to construct or operate a nuclear reactor subject to this part shall be referred to the Advisory Committee on Reactor Safeguards for a review and report. An application for an amendment to such a construction authorization or operating authorization may be referred to the Advisory Committee on Reactor Safeguards for review and report. Any report shall be made part of the record of the application and available to the public, except to the extent that security classification prevents disclosure.

• • • • • •

5. Section 115.47 is revised to read as follows:

§ 115.47 Changes, tests and experiments.

(a) (1) The holder of an operating authorization may (i) make changes in the facility as described in the safety analysis report, (ii) make changes in the procedures as described in the safety analysis report, and (iii) conduct tests and experiments not described in the safety analysis report, unless the proposed change, test or experiment involves a change in the technical specifications incorporated in the license or an unreviewed safety question.

(2) A proposed change, test, or experiment shall be deemed to involve an unreviewed safety question (i) if the probability of occurrence or the consequences of an accident or malfunction of equipment important to safety previously evaluated in the safety analysis report may be increased; or (ii) if a possibility for an accident of malfunction of a different type than any evaluated previously in the safety analysis report may be created; or (iii) if the margin of safety as defined in the basis for any technical specification of a nuclear reactor is reduced.

(b) The holder of the authorization shall maintain records of changes in the facility and of changes in procedures made pursuant to paragraph (a) of this section, to the extent that such changes constitute changes in the facility as described in the safety analysis report of constitute changes in procedures described in the safety analysis report. The holder of the authorization shall also maintain records of tests and experiments carried out pursuant to paragraph (a) of this section. These records shall include a written safety evaluation which provides the bases for the determination that the change, test or experiment does not involve an unreviewed safety question. The holder of the authorization shall furnish the Commission, annually or at such shorter intervals as may be specified in the authorization, a report containing a brief description of such changes, tests and experiments, including a summary of the safety evaluation of each. Any report submitted by a holder of an authorization pursuant to this paragraph will be made a part of the public record of the authorization proceeding. In addition to a signed original 39 copies of each report shall be filed.

(c) The holder of an authorization who desires a change in technical specifications or who desires to make a change in the facility or the procedures described in the safety analysis report, or conduct tests or experiments not described in the safety analysis report, which involve an unreviewed safety question or a change in technical specifications, shall submit an application for amendment of his authorization pursuant to § 115.60.

6. Section 115.61 is revised to read as follows:

§ 115.61 Issuance of amendment.

In determining whether an amendment to an authorization will be issued to the applicant, the Commission will be guided by the considerations which govern the issuance of authorizations, to the extent applicable and appropriate. If the application involves the material alteration of a nuclear reactor, a construction authorization will be issued prior to issuance of the amendment to the authorization. If the amendment involves a significant hazards considera-

V 39 156 MAR 21 74 XUM

tion the Commission will give notice of its proposed action pursuant to § 2.105 of this chapter before acting thereon. The notice will be issued as soon as practicable after the application has been docketed.

Effective date. The foregoing amendments shall become effective on April 22, 1974.

(Secs. 161, 182, 189; 68 Stat. 948, 953, 955; 71 Stat. 576; 76 Stat. 409; Pub. L. 83-703, 85 256, 87-615 (42 U.S.C. 2201, 2232, 2239)).

Dated at Germantown, Md. this 18th day of March 1974.

For the Atomic Energy Commission.

PAUL C. BENDER,
Secretary of the Commission.

[FR Doc.74-6550 Filed 3-20-74:8:45 am]

Title 15—Commerce and Foreign Trade

CHAPTER III—DOMESTIC AND INTERNATIONAL BUSINESS ADMINISTRATION, DEPARTMENT OF COMMERCE

SUBCHAPTER B—EXPORT REGULATIONS

FERROUS SCRAP

I. *Extension of deadline for submission of first quarter 1974 ferrous scrap license applications by historic exporters.* The FEDERAL REGISTER of January 16, 1974, required that exporters submit applications for validated licenses against their quota shares for the first quarter 1974 no later than March 10, 1974. To assure that exporters and their foreign customers have ample time to make satisfactory arrangements, this deadline is hereby extended to 5:00 p.m., e.d.t. March 29, 1974. Any quota shares for which license applications have not been physically received in the Office of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230, by this new deadline will be withdrawn, and the appropriate country quotas will be reduced accordingly.

II. *Restriction on extension of licenses issued in 1973 to export ferrous scrap.* The FEDERAL REGISTER of January 16, 1974 announced the method of licensing exports of ferrous scrap for the first quarter 1974. Included in that Bulletin was a statement of policy to the effect that in appropriate cases, upon a showing of delay due to difficulties in arranging shipment or other sufficient cause, licenses issued for export of ferrous scrap during 1973 might be extended through February 28, 1974, upon application by the exporter. The extremely strong domestic demand for scrap, coupled with what appears to be an abnormal seasonal decline in scrap collections and a reduction in prompt industrial scrap from the automobile industry, caused the Office of Export Administration to reconsider this policy. Accordingly, since mid-January, the Office of Export Administration has severely restricted extensions of ferrous scrap licenses issued in 1973.

III. *Revision of requirements for submission of past histories of ferrous scrap exports.* The FEDERAL REGISTER of December 6, 1973 announced that exporters who had exported shipments of ferrous scrap during the period July 1, 1970 to June 30, 1973, would be considered for shares of the first quarter 1974 quotas if they submitted reports of such shipments by December 17, 1973. Those exporters who submitted their reports in a timely manner will automatically be considered for eligibility to receive second quarter 1974 ferrous scrap quota shares on the basis of their previous report.

The regulations are revised to permit those exporters with a history of shipments during the base period who did not submit statements by the December 17 deadline to submit reports of such exports for consideration in the allocation of quota shares for subsequent quarters. Such reports must be submitted in accordance with § 377.4A(a), as herein revised, no later than March 22, 1974, for consideration with respect to the second quarter 1974, or, for subsequent quarters, by the 17th day of the month prior to the start of any such quarter for which the exporter wishes to be considered.

IV. *Elaboration of rules for ex-quota licensing of ferrous scrap derived from ship-breaking activity.* The FEDERAL REGISTER of January 16, 1974, announced a system whereby an exporter engaged within the United States in ship-breaking activity may apply for validated licenses to export ferrous scrap in excess of his quota shares. Upon submission of production documentation, such licenses may be granted pursuant to the rules of § 377.4A(d), as herein revised, for up to 50 percent of an exporter's increase in domestic production of scrap from ship-breaking in 1974 over his 1973 level. This issuance revises § 377.4A(d) of the Export Administration Regulations to clarify the nature of the documentation required, the manner of submission, and the system for issuing export licenses.[1]

V. *Ships sold by the maritime administration for scrapping abroad.* No person may, after March 13, 1974, export a ship purchased from the U.S. Maritime Administration for scrapping abroad without a validated license for export with respect to the ferrous scrap content of such ship. With respect to ship sales made during the first quarter 1974, export licenses will be issued against the quota for that quarter upon application by the exporter, identifying the purchaser of the ship and the approximate ferrous scrap content of such ship in short tons, and indicating the terms and date of sale. A quota set-aside of 50,000 short tons for the second quarter 1974 shall be reserved for, and shall limit with respect to ferrous scrap content, the export of ships purchased during such quarter from the U.S. Maritime Administration for scrapping abroad. Application for licenses against the quotas shall be in accordance with § 377.4A(c). Such applications shall indicate the terms and date of sale, the identity of the purchaser, and the approximate ferrous scrap content of the ship. The information set forth on applications will be verified by the U.S. Maritime Administration before issuance of any license. All licenses will have a validity period of 90 days from the date of issuance.

The Commodity Control List is hereby revised as set forth below, effective 12:01 a.m., e.d.t., March 14, 1974, to require a validated license for export of such vessels for scrapping.

VI. *Exclusion of commodities under short supply controls from the technical data written assurance requirement of general license GTDR.* Under current rules with respect to General License *GTDR*, before exporting technical data relating to those commodities identified by the symbol "W" in the column of the Commodity Control List titled "Validated License Required for Country Groups Shown Below," an exporter must obtain from the importer a written assurance that neither the technical data nor the direct product thereof is intended to be exported, directly or indirectly, to Country Group Z or reexported, directly or indirectly, to Country Group Q, W, Y, or Z.

This requirement for a written assurance is revised to exclude technical data relating to those commodities listed in Supplement No. 1 to Part 377 as being under short supply controls. As a result, such technical data may be shipped under the provisions of General License GTDR notwithstanding the imposition of short supply controls.

VII. *Additional quota allocations for shipments of ferrous scrap to certain destinations in the first quarter 1974.* The FEDERAL REGISTER of December 6, 1973 announced that a quota set-aside of 100,000 short tons of ferrous scrap had been earmarked for use during the first quarter 1974 for contingencies and hardships. In recognition of the legitimate needs of certain developing countries, additional quota allocations of ferrous scrap have been authorized for export licensing to the following destinations under the rules of § 377.4A: Thailand—20,000 short tons, Bangladesh—6,170 short tons, Pakistan—12,000 short tons, Philippines—12,000 short tons, Venezuela—15,000 short tons, and the People's Republic of China—40,000 short tons (the additional 5,170 short tons were added to contingency from duplication in individual quota shares discovered as a result of audits). Further, at the request of the European Community, the total quota for the Community has now been allocated to Italy, following advice from the Community that the United Kingdom will not be importing scrap from the United States during the first quarter 1974. Exporters who are eligible to participate in these revised quota allocations based upon their past participation export history have been advised of their revised quota shares for shipments to these destinations.

VIII. *Export control of shipments from Foreign-Trade Zones.* Section 370.6 of the Export Administration Regulations provides that commodities of foreign origin that enter a U.S. foreign-trade zone with no customs entry being made, may be exported from the foreign-trade zone without a validated export license, unless a validated license is required by paragraph (a), (b), (c), or (d) of such section. Section 370.6 is hereby revised to provide that commodities listed in Supplement No. 1 to Part 377 require a validated license for export from foreign-trade zones, unless such commodities could be exported from the customs territory of the United States under a general license. In addition, the definition of "United States" is refined and an explanatory note is added to clarify that goods of U.S. origin, and certain goods produced in foreign-trade zones, are subject to the same export controls as if they were located within U.S. customs territory.

IX. *Exclusion of commodities under short supply control from shipment under certain general license provisions.* In order to restrict effectively the export of those commodities listed in Supplement No. 1 to Part 377 as being under short supply control, the Export Administration Regulations are revised to prohibit the export of such commodities to any destination under a general license, except as authorized under the provisions of general licenses "GLV, GUS, GTF-US, GLR, GMS, SHIP STORES or PLANE STORES." Therefore, a validated license is now required for all export shipments of short supply commodities not otherwise authorized under the provisions of the above-mentioned general licenses.

X. *Revision of shipping tolerance allowance for partial shipments.* Section 386.7(c) of the Export Administration Regulations requires that when partial shipments are made against a license, the shipping tolerance may be applied against the unshipped balance only, except that for iron and steel products and tin plate, the tolerance is allowed on the full amount licensed. This exception is hereby deleted, as it is inapplicable to ferrous scrap under short supply control, and is not of significant value to exporters of the few other such products under validated license control for strategic reasons.

Accordingly, the Export Administration Regulations (15 CFR Parts 370, 371, 377, 379, 386, and 399) are amended as follows:

PART 370—EXPORT LICENSING POLICY AND RELATED INFORMATION

1. Paragraph (a)(4) of § 370.2 is revised to read as follows:

§ 370.2 Definitions of terms.

(a) The following are definitions of terms as used in the Export Administration Regulations: • • •

(4) *United States.* Unless otherwise stated, the 50 states, the District of Columbia, the Canal Zone, Puerto Rico, and all territories, dependencies, and possessions of the United States, including U.S. foreign-trade zones established pursuant to 19 U.S.C. 81A–81U.

• • • • • •

2. Paragraph (f)(2) and (3)(i) of § 370.10 is revised to read as follows:

§ 370.10 Exports controlled by U.S. Government Agencies other than the Office of Export Administration.

• • • • • •

(f) *Watercraft.* Regulations administered by the U.S. Maritime Administration, Washington, D.C. 20235, and other agencies as listed below govern the export of watercraft: • • •

(2) *Export Authorization by U.S. Maritime Administration and Office of Export Administration.* Watercraft (including vessels of war) exported for the purpose of scrapping, dismantling, dismembering, or destroying the hulls or hulks thereof, require export authorization from both the Office of Export Administration and the U.S. Maritime Administration if (i) the vessel will be exported to Country Group W, Y, or Z (see Supplement No. 1 to Part 370 for country group designations) or (ii) the vessel has been sold by the U.S. Maritime Administration for scrapping abroad.

(3) *Export authorization by U.S. Maritime Administration only.* (i) Watercraft described in subparagraph (2) of this paragraph, except those sold by the U.S. Maritime Administration for scrapping abroad, when exported to destinations other than those in Country Group W, Y, or Z, require export authorization from the U.S. Maritime Administration only.

• • • • • •

3. Section 370.6 is amended by revising the material preceding paragraph (a) and by adding a new paragraph (e) to such section. This revised and added material reads as follows:

§ 370.6 Shipments entering Foreign-Trade Zones.

Shipments of commodities or technical data of foreign origin for which no customs entry has been made and that enter a U.S. foreign-trade zone may be exported from the foreign-trade zone without a validated export license except as described below.

NOTE: Commodities originating in the U.S. and located in a foreign-trade zone are subject to U.S. export control requirements. Those commodities otherwise considered to be of foreign origin that, as a result of processing, manufacturing, or assembly while in a U.S. foreign-trade zone, have been so altered that they have either been substantially enhanced in value or have lost their original identity with respect to form, are no longer deemed to be of foreign origin. They are, therefore, subject to U.S. export licensing requirements when exported from the foreign-trade zone.

• • • • • •

(e) *Commodities under short supply control.* A shipment of any commodity listed in Supplement No. 1 to Part 377 of this chapter as under short supply control requires a validated license if the shipment could not be made from the customs territory of the United States to the intended destination under the provisions of a general license.

PART 371—GENERAL LICENSES

4. Paragraph (c) of § 371.2 is amended by adding a new subparagraph (9) thereto to read as follows:

§ 371.2 General provisions.

• • • • • •

(c) *Prohibited shipments.* No general license may be used to effect an export to any destination if: • • •

(9) The commodity is listed in Supplement No. 1 to Part 377 of this Chapter as being under short supply control, unless the export is authorized under the provisions of general licenses *GLV, GUS, GTF-US, GLR, GMS, SHIP STORES* or *PLANE STORES.*

• • • • • •

PART 377—SHORT SUPPLY CONTROLS

5. Paragraph (b) of § 377.1 is revised to read as follows:

§ 377.1 General provisions.

• • • • • •

(b) *Commodities subject to short supply quota controls.* Commodities currently under short supply quota controls are listed in Supplement No. 1 to this Part 377. Generally, an exporter's share of any quantitative quota that may be established shall be allocated in accordance with the Past Participation in Exports Licensing Method described in § 377.2. The Office of Export Administration may authorize commodities subject to quantitative restriction to be licensed without regard thereto, if they were manufactured or processed in, and are being shipped from, a U.S. foreign trade zone, or if they are ineligible for shipment under General License solely because of the limitations of § 371.2(c)(9) of this chapter.

• • • • • •

6. Section 377.4A is amended:

a. By striking the words "FIRST QUARTER" from the title,

b. By striking "a letter of quota participation for the first quarter of 1974" in the last sentence of the portion of paragraph (b) of such section that precedes subparagraph (1) of such paragraph, and inserting in lieu thereof "a letter of quota participation for the applicable quarter,"

c. By striking "the first quarter 1974 ferrous scrap quota for the Community is to be allocated, notwithstanding past trade patterns, only to Italy and the United Kingdom in a ratio of approximately 7 to 1" in the third sentence of paragraph (b)(1) of such section, and inserting in lieu thereof "ferrous scrap quotas for the Community are allocated, notwithstanding past trade patterns, to member countries in the proportions determined by the Community,"; and by striking "for those two countries" in the fourth sentence of such paragraph (b)(1), and inserting in lieu thereof "as so determined",

d. By striking "of 100,000 short tons has been earmarked for use during the first quarter" in paragraph (e) of such

[1] These requirements have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

V 39 156 MAR 21 1974 XUM

section, and inserting in lieu thereof "as specified in Supplement No. 1 shall be earmarked for use during each calendar quarter",

e. By striking "no later than March 31, 1974" in paragraph (f) of such section, and

f. By revising paragraphs (a) and (d) of such section to read as follows:

§ 377.4A Ferrous scrap export licensing system for 1974.

(a) *Statement of past participation.* Shares of quarterly quotas for the ferrous scrap commodities listed in Supplement No. 1 as subject to quota restriction are, pursuant to the rules of this section, assigned to exporters who have submitted statements of past participation, Form DIB–664P, covering their exports of such commodities during the base period July 1, 1970 to June 30, 1973. To be considered for shares in any particular calendar quarter and, automatically, in all subsequent quarters, exporters must timely file a properly executed statement in accordance with the provisions of this paragraph and § 377.2. Such statements must be actually received by the Office of Export Administration, PO Box 7138, Ben Franklin Station, Washington, D.C. 20044, by the 17th day of the month prior to the start of a calendar quarter in order to be considered timely filed with respect to the allocation of quota for such quarter and all succeeding quarters, except that statements with respect to the second quarter 1974 will be accepted until March 22, 1974. Forms not received by the dates specified herein will be held over until the succeeding quarter in the event quotas are established therefor. The statement on Form DIB–664P shall indicate (separately for each foreign country of destination, including Canada and countries that are members of the European Community) the quantities (in short tons) of each category of ferrous scrap (other than stainless steel scrap), by Schedule B number, that the exporter exported to each such country during each calendar month during the period July 1, 1970 to June 30, 1973. The statement must be signed by an authorized representative of the exporter. The statement will be treated as confidential information under section 7(c) of the Export Administration Act of 1969, as amended. A separate Form DIB–664P shall be submitted for each of the Schedule B classifications listed in Supplement No. 1 for which the exporter is seeking quota share. For purposes of the statement, a party normally shall be considered to have been the exporter with respect to those shipments during the base period for which such party was named as the exporter on the Shipper's Export Declaration (Commerce Form 7525–V) filed in accordance with Part 386 of this Chapter.

* * * * * *

(d) *Special rules with respect to ships.*—(1) *Domestic ship-breaking.* In order to encourage increased production of ferrous scrap, a special rule is established to allow any person engaged within the United States in ship-breaking activity (the conversion of ships to scrap metal) to apply for validated licenses to export ferrous scrap in excess of his quota shares. Such licenses may be issued to the extent of 50 percent of the increase in such person's domestic production of ferrous scrap from ship-breaking during the first calendar quarter of 1974 over his production from such activity during the first calendar quarter of 1973. For succeeding quarters any increase in production over the corresponding quarter in 1973 will be adjusted to reflect decreases in 1974 production during preceding quarters. Licenses may then be issued to the extent of 50 percent of such increase, as adjusted. In order to receive a license under this rule, such person shall file an application in accordance with paragraph (c) of this section, accompanied by: (i) With the first application under this provision, a sworn affidavit by the applicant showing his domestic ship-breaking tonnage in 1973, which indicates by calendar quarter the quantity of scrap dismantled and removed from vessels; and (ii) with the first application following the end of a calendar quarter, a sworn affidavit by the applicant showing his domestic ship-breaking tonnage in each of the completed calendar quarters of 1974. Any submission under this provision shall be treated as confidential information under section 7(c) of the Export Administration Act of 1969, as amended. Although the Office of Export Administration reserves the right to limit such licenses by destination and type of scrap if in its opinion such action is warranted, it is anticipated that generally licenses will be issued for the type and destination specified in the application. The ship-breaking tonnage of all members of an affiliated group of companies shall be attributed to such group as a whole, which shall for this purpose be treated as a single entity. Only the controlling member of such group may submit an application under this provision in behalf of the group. The controlling member may, however, designate any member to receive a license for a specific portion of the tonnage for which the group is eligible.

(2) *Ships sold by the Maritime Administration for scrapping abroad.* No person may, after March 13, 1974, export a ship purchased from the U.S. Maritime Administration for scrapping abroad without a validated license for export with respect to the ferrous scrap content of such ship. With respect to ship sales made during the first quarter 1974, export licenses will be issued against the quota for that quarter upon application by the exporter. With respect to the second quarter 1974 and for any subsequent quarters for which quota restrictions on the export of ferrous scrap may be imposed, a quota set-aside as specified in Supplement No. 1 shall be reserved for, and shall limit, with respect to ferrous scrap content, the export of ships purchased during such quarter from the U.S. Maritime Administration for scrapping abroad. Upon the award of a ship for scrapping abroad, the U.S. exporter shall file an application in accordance with paragraph (c) of this section, which shall indicate the terms and date of sale, the identity of the purchaser, and the approximate ferrous scrap content of the ship. Licenses shall be issued by the Office of Export Administration upon verification by the U.S. Maritime Administration of the information on the application.

* * * * * *

7. The list of submission dates and the table of quotas in the portion of Supplement No. 1 to Part 377 that relates to "Ferrous Scrap" are amended to read as follows:

SUBMISSION DATES

Orders for first quarter 1974 shipment, not prior to January 1, 1974, and not later than:

Historical Exporters---------- Mar. 29, 1974

Title 20—Employees' Benefits

CHAPTER VI—EMPLOYMENT STANDARDS ADMINISTRATION, DEPARTMENT OF LABOR

SUBCHAPTER A—LONGSHOREMEN'S AND HARBOR WORKERS' COMPENSATION ACT AND RELATED STATUTES

PART 702—ADMINISTRATION AND PROCEDURES

Changes in Compensation Districts

Section 702.101 of Part 702, Title 20 of the Code of Federal Regulations, establishing compensation districts pursuant to section 39(b) of the Longshoremen's and Harbor Workers' Compensation Act for the purpose of administration of said Act and its extensions, is hereby amended in the manner indicated below.

The boundaries of District Nos. 6 and 7 are revised. In District No. 8, the headquarters city is changed. These changes are deemed appropriate for improved administration.

The provisions of 5 U.S.C. 553 for notice, public procedure, and delayed effective date are not applicable to rules of agency organization and personnel matters. Accordingly, the amendment shall become effective immediately.

1. Section 702.101 of Part 702, 20 CFR, is amended to read as follows:

§ 702.101 Establishment of compensation districts.

* * * * * *

District No. 6. Comprises the States of North Carolina, Kentucky, Tennessee, South Carolina, Georgia, Florida, Alabama, and Mississippi; with headquarters at Jacksonville, Florida.

District No. 7. Comprises the States of Arkansas and Louisiana; with headquarters at New Orleans, Louisiana.

District No. 8. Comprises the States of Texas, Oklahoma, and New Mexico; with headquarters at Houston, Texas.

Title 24—Housing and Urban Development

CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING PRODUCTION AND MORTGAGE CREDIT-FEDERAL HOUSING COMMISSIONER (FEDERAL HOUSING ADMINISTRATION), DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—MORTGAGE AND LOAN INSURANCE PROGRAMS UNDER NATIONAL HOUSING ACT

[Docket No. R–74–261]

PART 236—MORTGAGE INSURANCE AND INTEREST REDUCTION PAYMENTS FOR RENTAL PROJECTS

Subpart A—Eligibility Requirements for Mortgage Insurance

GUIDELINES FOR ASSISTED ADMISSION

The Department is amending Part 236 to add guidelines for assisted admission with respect to projects before final endorsement for mortgage insurance which correspond to the guidelines for assisted admission after final endorsement which are contained in § 425.22 of Part 425 of Title 24 published in the FEDERAL REGISTER at page 3675 on January 29, 1974. The amendments to Part 236 are the same as the amendments to Part 425 published on January 29, 1974 in the FEDERAL REGISTER. The latter amendments were published for comment, and such comments were considered before the amendments were made effective. Therefore, it is unnecessary to provide for comment and public procedure, and good cause exists for making these amendments to Part 236 effective upon publication.

Part 236 is amended as follows:

1. The list of sections of Subpart A of Part 236 is amended by adding a new section to read as follows:

Sec.
236.72 Guidelines for assisted admission.

2. Section 236.2 is amended by adding a new paragraph (h) to read as follows:

§ 236.2 Definitions used in this subpart.

* * * * * *

(h) "Assisted admission" means admission at a rent that is less than the fair market monthly rental charge.

3. Section 236.72 is added to read as follows:

§ 236.72 Guidelines for assisted admission.

(a) *Maximum Income.* The adjusted income of an applicant shall not exceed the maximum income limits established by the Secretary for the project locality.

(b) *Ability to pay rent.* The project owner or his managing agent may, at his discretion, admit an applicant for assisted admission whose adjusted income meets the requirement in paragraph (a) of this section if, in his judgment, the applicant has an adequate income to pay the basic monthly rental charge. If the applicant's income appears inadequate, the factors listed below, in addition to the applicant's income, shall be taken into consideration in making a determination of whether he will be able to pay the basic monthly rental charge. The project owner or his managing agent shall maintain supporting written documentation for the decision to admit or reject an applicant for assisted admission based upon these factors.

(1) A local welfare or other agency has agreed to pay all or a portion of the basic monthly rental charge.

(2) The applicant is 62 years of age or older.

(3) The applicant is a qualified tenant on whose behalf the project owner will receive rent supplement payments under Part 215 of this title.

(4) The applicant has established a history of rent-paying ability at levels equal to or greater than basic rent.

(5) The applicant has sufficient income, when considered together with other assets, to pay the basic monthly rental charge for a reasonable period.

(6) The applicant receives food stamps, surplus commodities or similar

V 39156 MAR 21 74 XUM

benefits that favorably affect the applicant's ability to pay rent.

(7) Such other factors as, in the judgment of the project owner or his managing agent, bear favorably upon the applicant's ability to pay rent.

(c) *Preference for applicants within lowest practicable income limits.* The project owner or his managing agent shall accord a preference to applicants for assisted admission whose incomes are within the lowest practicable income limits and who meet the requirements of paragraphs (a) and (b) of this section.

(Sec. 211, 52 Stat. 23; (12 U.S.C. 1715b); sec. 236, 82 Stat. 498, as amended; (12 U.S.C. 1715z–1))

Effective date. These amendments shall become effective on March 21, 1974.

SHELDON B. LUBAR,
Assistant Secretary for Housing Production and Mortgage Credit-Federal Housing Commissioner.

Title 32—National Defense

CHAPTER VII—DEPARTMENT OF THE AIR FORCE

SUBCHAPTER A—ADMINISTRATION

PART 809c—ELEMENTARY AND SECONDARY EDUCATION OF DEPENDENTS IN OVERSEA AREAS

This revision expands the definitions; revises and expands the responsibilities of the Department of the Air Force; updates eligibility for enrollment criteria; adds School Lunch and Adult Education Programs; revises other Education Programs; and updates the implementation of pertinent Department of Defense directives.

Part 809c, Subchapter A, of Chapter VII of Title 32 of the Code of Federal Regulations is revised to read as follows:

Subpart A—General Information

Sec.
809c.1 Purpose.
809c.2 Definitions.

Subpart B—Responsibilities for Dependent Education

809c.3 Department of Defense (DOD) responsibilities.
809c.4 Department of the Air Force responsibilities.
809c.5 Headquarters United States Air Force responsibilities.
809c.6 Commander-in-Chief Pacific Area Force responsibilities.
809c.7 Pacific Area Director responsibilities.
809c.8 Major command responsibilities, worldwide.
809c.9 Oversea installation commander responsibilities, worldwide.

Subpart C—Mission and Concept of Operation

809c.10 Mission.
809c.11 Concept of operation.
809c.12 Advisory councils.
809c.13 Establishing Air Force-operated schools.
809c.14 Discontinuing Air Force-operated schools.
809c.15 Eligibility for enrollment.
809c.16 Educational program.
809c.17 Manpower and personnel administration.
809c.18 Employing school professional personnel.
809c.19 Obtaining school facilities.
809c.20 School fire prevention and safety programs.
809c.21 Procuring supplies and equipment.
809c.22 School transportation.
809c.23 Summer school.
809c.24 Maintaining records.

Subpart D—Tuition-Fee Schools and Correspondence Courses

809c.25 Tuition-fee schools.
809c.26 Correspondence courses.

Subpart E—Budgeting and Funding

809c.27 Appropriated fund support.
809c.28 Nonappropriated and other funds.
809c.29 Charges to parents.
809c.30 Reimbursements to parents.

AUTHORITY: 10 U.S.C. 8012.

Subpart A—General Information

§ 809c.1 Purpose.

This part states policies and explains how elementary and secondary education for Department of Defense dependents is provided in Air Force-operated schools in the Pacific School Area. It also states policies for commands to provide logistic support for dependents schools on Air Force installations in the European and Atlantic School Areas. It implements Part 69 of this title.

§ 809c.2 Definitions.

For the purposes of this part, the following terms apply:

(a) *Air Force-operated schools.* Service-operated schools located in the Pacific School Area, regardless of installation affiliation, including all countries and locations in the Pacific and Far East to 90° E Longitude which are funded from Air Force appropriated funds and manned from Air Force manpower resources.

(b) *Army-operated schools.* Service-operated schools located in the European School Area, regardless of installation affiliation, including all countries and locations in Europe, Africa, and Asia to 90° E Longitude which are funded from Army appropriated funds and manned from Army manpower resources.

(c) *Navy-operated schools.* Service operated schools located in the Atlantic School Area, regardless of installation affiliation, including all oversea countries and locations in the Atlantic and in North, Central, and South America which are funded from Navy appropriated funds and manned from Navy manpower resources.

(d) *Tuition-fee or tuition contract school.* A private or public school that provides elementary or secondary education to eligible dependents and to which tuition and associated costs are paid from appropriated funds under an Air Force contract agreement with the school.

(e) *Pacific School Area.* See paragraph (a) of this section.

(f) *European School Area.* See paragraph (b) of this section.

(g) *Atlantic School Area.* See paragraph (c) of this section.

(h) *Oversea areas.* Areas outside the continental limits of the United States except Alaska, Hawaii, Puerto Rico, Guam, the Virgin Islands, and Wake Island.

(i) *Elementary and secondary education.* Education at Government expense for grades kindergarten through 12 which may be offered in service-operated schools, tuition-fee schools, or through correspondence courses appropriate for the grade level.

(j) *School professional personnel.* Civilian personnel employed in service-operated schools, and paid from appropriated funds, on either a school or calendar year basis. Their duties involve classroom or other instructional functions; administration, supervision, or direction of school programs; or other school positions which require academic credits in educational theory and practice.

(k) *Logistic support.* Include the provision, acquisition, or construction of suitable and adequate school facilities; dormitories (when required); area and district offices; all equipment normally attached to the building; services, such as maintenance and repair of facilities, custodial, transportation of students, utilities, school lunch programs (where required); housing for school personnel; external school supply support and other logistics services necessary to enable the Area Director to accomplish his mission.

(l) *Geographic manager.* Secretaries of military departments or their designees.

(m) *Identification of schools.* For identifying and manning purposes, the following school organizational patterns will apply. Regardless of level, all grades under the supervision of the same administrative head will be considered a separate school entity. All schools in the Pacific Area will be known as Air Force-operated schools.

(1) *Elementary school.* A school comprised of any span of grades not above grade 8.

(2) *Middle schools.* Separately organized middle schools (grades 5–8) are authorized, but are considered elementary schools for manning purposes. All staffing criteria applicable to elementary schools will be utilized, including specialists.

(3) *Junior high school.* A school intermediate between the elementary and high schools, usually grades 7, 8, and 9.

(4) *High school.* A school comprised of any span of grades beginning with the next grade following the elementary, middle, or junior high school at that location and ending with or below grade 12. Such high schools may be organized as junior-senior high schools or as senior high schools.

(n) *Correspondence courses.* Elementary or secondary education provided through home study courses and procured from appropriated funds with the approval of the Area Director.

(o) *Space required.* Pupil spaces which must be provided in a dependents school and for which personnel, materials, and facilities must be programmed.

(p) *Space available.* Pupil spaces available in a dependents school which may be occupied without programming additional personnel, equipment, materials, or facilities, and without degrading the learning opportunities of the space required pupils.

(q) *Dependent.* One who:

(1) Will reach his (her) fifth birthday, but not his (her) twenty-first birthday, by December 31 of the current year, or is handicapped (regardless of age) and enrolled in a special education program for the handicapped, and

(2) Is the child, step-child, legally adopted child, wife, husband, or legal ward of a sponsor or is resident in the household of a sponsor who stands in loco parentis, and

(3) Is dependent on the sponsor for more than one-half of his (her) support.

(r) *DOD dependent.* One who is the dependent, as defined in paragraph (q) of this section, of a member of the Armed Forces who is on active duty and stationed overseas or a DOD civilian employee who is a U.S. citizen or immigrant alien stationed overseas and paid from appropriated funds.

(s) *Handicapped child.* A dependent child having mental, emotional, or physical disability, and whose special learning needs cannot be met adequately through the regular instructional program. This category includes educable and trainable children. An educable child is one who can benefit from an academic program modified to suit his needs. A trainable pupil is one who cannot benefit from an academic program, regardless of extent of modification, and probably cannot achieve literacy, but who can be trained. The Area Director will establish the lower levels of educability and trainability, based on the experience of the school system.

(t) *Basic testing program.* The administration of mandatory tests for students attending DOD oversea dependents schools.

(u) *Optional testing program.* The administration of prognostic and readiness, multifactor, special purpose aptitude tests, and criterion referenced tests, to individual students, or select student groups attending DOD oversea dependents schools, as determined by teachers, guidance counselors, and administrators.

Subpart B—Responsibilities for Dependent Education

§ 809c.3 Department of Defense (DOD) responsibilities.

Under the direction of the Secretary of Defense:

(a) The Assistant Secretary of Defense (Manpower and Reserve Affairs) (ASD/M&RA) is responsible for establishing policies for the organization, operation, and administration of the Pacific Area Overseas Dependents Schools System of the Department of Defense.

(b) The Assistant Secretary of Defense (Installations and Logistics) (ASD/I&L) is responsible for establishing policies for the logistical support of the Overseas Dependents Schools System of the Department of Defense.

§ 809c.4 Department of the Air Force responsibilities.

Under the direction of the Secretary of the Air Force:

(a) The Assistant Secretary of the Air Force (Manpower and Reserve Affairs) is responsible for the operation and administration of all dependents schools and for providing tuition-fee schooling and correspondence courses in the Pacific Area, including all countries in the Far East to 90° E Longitude, Australia, and New Zealand.

(b) The Assistant Secretary of the Air Force (Financial Management) is responsible for programming, budgeting, and funding all the appropriated costs of the Pacific Area Dependents Schools except for military construction and military personnel requirements of Army, Navy, or Marine Corps and any other costs incurred in support of the program.

§ 809c.5 Headquarters United States Air Force responsibilities.

The Dependents School Function (DPPEB), is designated the Air Staff Office of Primary Responsibility (OPR) for the Pacific Area Dependents Education System. General supervision, policy, and program guidance for operating the dependents education program in the Pacific School area in accordance with ASD/M&RA standards and logistic support for which the Air Force is responsible will be provided by the appropriate Air Staff office.

§ 809c.6 Commander-in-Chief Pacific Air Forces responsibilities.

The Commander-in-Chief, Pacific Air Forces is delegated responsibility for the operation and administration of all dependents schools and for providing tuition-fee schooling and correspondence courses for all Department of Defense dependents in the Pacific area, including all countries in the Far East to 90° E Longitude, Australia, and New Zealand.

§ 809c.7 Pacific Area Director responsibilities.

The Pacific Area Director is responsible to CINCPACAF for the total educational program for eligible DOD dependents in the Pacific Area. Under the direction of CINCPACAF and with the appropriate Pacific Air Force staff assistance, the Area Director organizes, administers, and supervises the total education program of all dependents schools in the Pacific Area, regardless of location and service affiliation of the host installation. In this regard, he is responsible for the overall personnel management direction of the dependents schools system, Pacific Area, in accordance with civilian personnel regulations and the functional organization of area and district staffs.

§ 809c.8 Major command responsibilities, worldwide.

(a) Program, budget, and fund all nonreimbursable logistics support. Furnish, on a reimbursable basis, other logistic support for schools established on their respective installations as agreed on with the geographic manager.

(b) Program, budget, and fund the construction of school facilities costing in excess of $50,000 on their respective bases. A suitable school facility contains all equipment authorized to be included as installed equipment. All investment items, other than those in the military construction account are budgeted and funded by the Department having geographic responsibility.

(c) Insure that base and station commanders appoint dependents schools officers and furnish adequate staff support to schools in their areas of responsibility. Personnel are assigned external school support duties on a part-time basis (less than 50 percent of their duty time).

NOTE: The above responsibilities are equivalent to the responsibilities of Army and Navy commands in the Pacific Area.

§ 809c.9 Oversea installation commanders responsibilities, worldwide.

The Commander of each post, station, or base is responsible for the welfare and safety of all assigned, attached, and tenant personnel of his command and their dependents. Each military department, through the appointed area director/superintendent, is responsible for the dependents education program offered through the schools located on any service's facility in the geographic area assigned to that department. The local commander is responsible for providing all necessary resources, including military construction, facilities, funds (reimbursable) and necessary staff support and guidance. Local commanders provide support of the local school principals as needed to assure student discipline, sponsor support, and an effective educational program.

Subpart C—Mission and Concept of Operation

§ 809c.10 Mission.

The mission of the DOD Overseas Dependents School System is to maintain oversea schools which provide educational opportunities (kindergarten through grade 12) of high quality and to maintain such schools in sufficient numbers and types, properly staffed and equipped to provide quality education for eligible dependent children of U.S. military and civilian personnel of the DOD stationed in overseas areas in accordance with DOD-wide standards.

§ 809c.11 Concept of operation.

The Overseas Dependents Schools System is divided into three geographical areas—European, Atlantic, and Pacific—with operational and administrative responsibility for each being assigned to the Departments of the Army, Navy, and Air Force respectively. The Secretaries of the respective military departments or their designees are termed the geographic managers of these areas.

§ 809c.12 Advisory councils.

These councils may be established as required in accordance with Air Force regulation (AFR) 25–7 (Air Force Com-

V 39 156
MAR 21 74
XUM

mittee Management Program). Councils may consist of any desired number and composition of individuals. However, representation of all services should be included, and, because of the nature of local command involvement, members representing key functions, such as supply, engineering, personnel, and comptroller should be included.

§ 809c.13 Establishing Air Force-operated schools.

(a) A dependents school may be established if:

(1) No local English-speaking school is available which would provide a free and adequate education; and

(2) The number of eligible minor dependents requiring schooling is at least:

(i) Twenty for an elementary school;

(ii) Forty for a secondary school; or

(3) In the opinion of the Area Director with concurrence of HQ USAF/DPPEB, establishing a school would serve the best interest of the pupils regardless of the numbers indicated above.

(b) Other factors to be considered in establishing a school:

(1) Availability of facilities.

(2) Concentration or dispersal of pupils.

(3) Support expected from the local command.

(c) Establishment of service-operated student dormitories providing free room and board for eligible dependent students may be made when the Area Director determines that establishing a dormitory would serve the best interest of the pupils. Local commanders make necessary financial and logistic support arrangements for dormitories located on their installations. DOD Dependents Schools funds are used to finance the service-operated student dormitories except for transportation to and from the domicile of sponsor to the dormitory school.

§ 809c.14 Discontinuing Air Force-operated schools.

(a) A school is disestablished when the average enrollment of eligible dependents drops for an entire school year below the minimum enrollment criteria established in § 809c.13(a) of this section. HQ USAF must concur in all discontinuance actions.

(b) Other factors to be considered in disestablishing a school:

(1) Availability and appropriations of alternative education arrangements.

(2) Economy.

(3) Degree of concurrence or nonconcurrence of the local command being served.

§ 809c.15 Eligibility for enrollment.

Dependents who will be at least 5, but not yet 21 years of age by December 31 of the current year (or handicapped dependents, regardless of age, who are to be enrolled in a preschool, regular school, or postschool program) may be enrolled in dependents schools under the conditions prescribed and the priorities indicated in this section. These provisions do not preclude admission of a first grade or kindergarten pupil who transfers within the school year from a school with different age enrollment criteria. Not all categories of personnel can clearly be assigned to the following priorities.

(a) *Priority I—Space required, tuition-free.*

(1) The following may attend a DOD Overseas Dependents School on a space-required, tuition-free basis, except when the presence of the dependents in the oversea area is prohibited by command policies.

(i) Eligible dependents of the U.S. military personnel who are on active duty and stationed overseas when authorized transportation at Government expense to or from an overseas area. Dependents of members of the Coast Guard stationed overseas are authorized tuition-free schooling, when that service is operating as a service in the Navy, and also dependents of members of Coast and Geodetic Survey stationed overseas when that service is serving with one of the Armed Forces.

(ii) Eligible dependents of U.S. citizens or immigrant aliens, as defined in 8 U.S.C. 1101(a)(15), who are employees of the DOD stationed overseas and who are paid from appropriated funds when authorized transportation at Government expense to or from an overseas area.

(2) Eligible dependents in categories listed in paragraph (a)(1)(i) and (ii) of this section who are in an oversea area to which they were not authorized Government transportation, but who acquire entitlement to transportation at Government expense from the overseas area, are authorized space-required, tuition-free education commencing with the date the official determination of entitlement was made.

(3) If DOD dependents are authorized to accompany sponsors to the area of sponsor's assignment, such dependents ordinarily will not be entitled to space-required, tuition-free education in another foreign area. Any exception to this policy must be approved by the Assistant Secretary of Defense (Manpower and Reserve Affairs). Similarly, such dependents are not eligible for receipt of education at tuition-fee schools at Government expense.

(4) Eligible dependents in categories listed in subparagraph (1)(i), (1)(ii) and (2) of this paragraph also are eligible for education in a tuition-fee school at Government expense in that same oversea area.

(5) Dependents who are authorized attendance in a DOD Overseas Dependents School or in a tuition-fee school may complete the current school year if, during the year, the sponsor is transferred while on active duty.

(6) Dependents of a sponsor who is detained by a foreign power or who is declared missing-in-action may remain in a DOD overseas dependents school or in a tuition-fee school at Government expense for as long as the detention or missing status continues to exist. In the above situations, proper authorization for the dependent to remain must be obtained from the local dependents school officials and the local military commander.

(7) Dependents of civilian or military personnel of the DOD who died while entitled to compensation or active duty pay may attend a DOD overseas dependents school, on a space-required, tuition-free basis, including dormitory schools, without time limitation on the number of years of attendance, as follows:

(i) If the civilian or military personnel died on or before January 11, 1971, while entitled to compensation or active duty pay, the surviving spouse, who was residing in the oversea area at the time of the DOD member's death, or is now or was a citizen of a foreign country and returns to the country of origin, may enroll the dependents of the deceased person at any time.

(ii) If the civilian or military personnel died after January 11, 1971, while entitled to compensation or active duty pay, the surviving spouse, who was residing in the oversea area at the time of the member's death or is now or was a citizen of foreign country and returns to the country of origin, must enroll the dependents of the deceased personnel within 1 year after the date of death.

(iii) Documentary evidence indicating dependency status and date of death of the civilian or military personnel must be presented to the appropriate DOD oversea dependents school official at the time of enrollment.

(b) *Priority II—Space-required, tuition paying.* The following may attend a DOD Overseas Dependents School on a space-required, tuition-paying basis:

(1) Dependents of employees of other United States governmental agencies stationed overseas who are eligible to receive an educational allowance for their dependents under the State Department Standardized Regulations (Government Civilians, Foreign Areas).

(2) Dependents of United States citizen or immigrant-alien sponsors who are employed under contracts or other agreements with the DOD which authorize dependent education on a tuition basis in DOD Overseas Dependents Schools, such as the following.

(i) American Red Cross personnel.

(ii) Contract technical services and contract maintenance personnel.

(iii) Employees of nonappropriated fund activities.

(iv) United Seamen's Service.

(v) Employees of credit unions authorized to operate on-military installations overseas.

(3) DOD dependents who do not qualify as Priority I and cannot be accommodated as Priority IV.

(4) Dependents of third-state national military and civilian personnel accompanying or serving with the United States Armed Forces overseas when approved by the major oversea commander and by the appropriate DOD Dependents Schools geographical area manager.

(c) *Priority III—Space available, tuition paying.* At the discretion of the local dependents school authorities and when consistent with the local military commander's policy concerning access

to the installation and agreements with the host government concerned, the following may be enrolled, in the priority given, on payment of the established tuition:

(1) Dependents of United States citizens residing in the overseas area including dependents of retired United States military personnel.

(2) Dependents of United States citizen or immigrant-alien sponsors who are employed under contracts or other agreements with the DOD, but whose contracts do not authorize dependent education on a tuition-fee space-required basis in a DOD Overseas Dependents School.

(3) Dependents of foreign nationals, when there is no objection from the host country, and when such inclusion does not displace or prevent inclusion of United States citizen-sponsored dependents seeking admission on the same basis at the same time.

(d) *Priority IV—Space-available, tuition-free.* Military or civilian personnel who are stationed in an oversea area to which their dependents are not authorized transportation at Government expense, and who have elected to transport their dependents at their own expense to an oversea area, or who acquired such dependents locally, are authorized space-available, tuition-free education in service-operated schools for their dependents if their presence is not prohibited by command policy. Enrollment is subject to the approval of the local dependents school officials.

§ 809c.16 Educational program.

(a) *General information.* (1) Pattern the educational program after the best programs currently provided in the United States. Special classes not normally available without charge to all children in public schools in the United States will not be provided from appropriated funds. (Exception: The Host Nation Program.)

(2) Maintain sufficiently high standards in Pacific Area dependents schools to assure that the policies and standards of the North Central Association of Colleges and Secondary Schools are fully met for continued accreditation of the schools.

(3) Standards are established by the Area Director for elementary and middle schools in the Pacific Area. The schools are evaluated to assure adherence to those standards. A concerted effort will be made to assure that support of schools below high school level will not be eroded in deference to the necessity for meeting standards for the accreditation of high schools. Failure to meet the standards established for elementary and middle schools will be viewed with the same degree of concern as when high school accreditation standards are not met.

(4) In planning educational experiences, maximum use will be made of community resources which are unique to each dependents school because of its oversea location. Also provisions will be made in the curriculum to acquaint the pupils with the language, culture, and customs of the host nation. The Area Director continually evaluates the effectiveness of the curriculum.

(b) *The kindergarten program.* (1) The regular school term for kindergarten teachers is the same as for other classroom teachers; however, kindergarten classes may begin 1 week later in the fall and close 1 week earlier in the spring so that teachers can perform the professional duties required to open and close kindergarten.

(2) Kindergarten classes meet either during the morning or afternoon. Normally, class sessions are 2½ hours daily, including rest periods.

(3) Kindergarten is not required for enrollment in the first grade in oversea dependents schools.

(4) A nominal charge may be made to parents for snacks and drinks.

(c) *The school health program* (1) A comprehensive school health program must be an integral part of each oversea dependents school within the Pacific Area, and will include:

(i) Health education for all students.

(ii) School nurses who serve as health specialists on local school faculties.

(2) Administration and supervision of the program.

(i) Administrative supervision of the health program in each school is the responsibility of the school principal.

(ii) Technical direction and supervision pertaining to medical matters is the responsibility of the senior medical officer of the installation.

(iii) Appropriate and qualified above-school-level administrative personnel are selected and designated by the Area Director. These personnel are responsible for the implementation and evaluation of the School Health Program throughout the Pacific Area under the administrative supervision of the Area Director, and maintain communication and cooperation with all levels of school and medical administration.

(iv) School nurses. School nurses are assigned to Pacific Area dependents schools according to staffing guidance contained in AFM 26-3 (Air Force Manpower Standards). The school nurse gives leadership and guidance, under the administration of the school principal, in the development and maintenance of the local school health program in accordance with applicable regulations and guidelines.

(v) Cooperating professionals. In the absence of above-school-level administrative personnel specifically assigned to this program at area or district level, administrative direction is provided by the pupil personnel services function. The District Superintendent designates a professional in the district office to assume the duties of liaison for the School Health Program. At all administrative levels there will be maximum cooperation among professionals who have responsibilities for any phase of the School Health Program or activities related to it. Such professionals include school counsellors, social workers, psychologists, teachers, curriculum coordinators, principals, assistant principals and medical officers.

(3) Included in the health program.

(i) Activities which:

(A) Appraise the health status of students;

(B) Counsel students, parents, and others concerning appraisal findings;

(C) Encourage the correction of remediable defects;

(D) Assist in identifying exceptional children;

(E) Help prevent and control disease; and

(F) Provide emergency care in cases of injury or sudden illness.

(ii) Service such as: (A) Preventive medicine;

(B) Vision and audiometric screening;

(C) Tuberculin testing;

(D) Physical fitness testing;

(E) Dental checks;

(F) Examination and identification of candidates for special education classes and for participation in school athletics; and

(G) Adequate health records on all students.

(d) *Testing program.* (1) *Basic testing program.* Administer tests to a representative sample of students in grades 2, 4, 6, 8, 9, and 11 of the DOD oversea dependents schools during May of each year.

(2) *Optional testing program.* Program other tests for special uses according to the needs of local, district, and area levels.

(3) *Report on oversea dependents school basic and optional testing program.* Furnish HQ USAF an annual report on the nature, extent, and pertinent results of the optional testing program at June 15 of each year.

(e) *Work-study program.* Establish work-study programs in oversea dependents high schools consistent with the following goals:

(1) Provision of an on-going, educational program for high school students to help them experience and understand the world of work.

(2) Development of a cooperative school-trainer relationship in the community.

(3) Establishment of competent industrial and governmental agency supervision of work-study participants in coordination with the school.

(4) Establishment of work-study opportunities for students at all levels of ability and achievement.

NOTE: The work-study program may be conducted beyond the calendar limits of the prescribed school year.

(f) *School lunch program.* School lunch programs are established by the Area Director where he has determined that the need, facilities, and local support for such programs exist. In establishing school lunch programs, he coordinates with the agency which has been designated to provide the lunches and with the installation commander. By agreement between the U.S. Department of Agriculture (USDA) and the Air

V 39 156 MAR 21 74 XUM

Force, USDA food commodities are made available for use in school lunch programs. Title to donated commodities passes from USDA to the Air Force on acceptance at the time and place of delivery. These commodities are not sold, exchanged, or dispensed of in any manner other than being sold as food in the dependents schools lunch program, unless with the prior approval of USDA. Periodic reports of receipt are submitted to USDA in accordance with USDA instructions.

(g) *Predischarge education program (PREP).*—(1) *General.* At each location where sufficient potential exists for such a program, PREP for servicemen, adult dependents and other U.S. Government employees will be implemented under the aegis of DOD dependents high schools. The objectives of the program are to satisfy academic requirements for acquisition of a high school diploma or to provide refresher or make-up courses needed to enter technical, vocational, or college-level educational program. All North Central Association requirements for accreditation of high school diploma offerings must be followed. Adult students will not utilize facilities of a dependents school for PREP courses while minor dependents are attending classes.

(2) *Conduct of program.* Adult students may not be graduated from a dependents high school until a minimum of two units have been earned in residence. Schedule classes in accordance with policies established by the Area Director.

(3) *Tuition-fees.* The Veteran's Administration (VA) remunerates the military students directly, covering the established tuition fees, on submission by the student to the VA of the required VA documents. The tuition fee charged may include the compensation paid to teachers, administrators, and clerical assistants, costs of books and instructional materials peculiar to the course and operational costs. The funds which military students received from the VA to defray tuition costs, as well as tuition payments made by adult dependents and U.S. Government employees participating in the PREP program shall be deposited in an appropriated fund account of the dependents schools which is administered by the school principal or the appropriate district superintendent in accordance with policies and procedures established by the Area Director.

(4) *Procurement of teachers, administrators, and clerical assistants.* Teachers to conduct PREP courses are procured from regular faculty members of the dependents school and other qualified, locally available teachers: The Area Director selects qualified personnel for PREP administrative positions. First consideration is given to qualified, interested applicants locally available. Administrators are appointed on a full-time (12 month) basis in accordance with Air Force Civilian Personnel and Civil Service regulations. U.S. civilians and foreign national personnel to fill clerical and other support positions are employed locally in accordance with local civilian personnel procedures and policies established by the Area Director.

§ 809c.17 Manpower and personnel administration.

(a) Civilian personnel. (1) Subject to the annual funding limitation and staffing criteria directed by ASD/M&RA dependents schools are manned according to AFM 26-3 (Air Force Manpower Standards).

(2) Air Force Supplement to Basic Federal Personnel Manual, chapter 302, subchapter 6 and appropriate Air Force regulations lists the criteria for civilian personnel administration. Agreements in accordance with pertinent AF and DOD regulations and directives are made between services concerned for host installation personnel offices to service school personnel.

(b) Military personnel. (1) Consistent with Air Force necessity, and subject to the annual funding limitation, Air Force military personnel may be authorized and assigned on a full-time basis to logistics and other duties required for the internal operation of dependents schools, or in the District or Area offices, in the Pacific Area when positions are authorized by AFM 26-3.

(2) Under similar conditions and restrictions as outlined in subparagraph (1) of this paragraph, commanders of host installations located in the European or Atlantic School Areas may assign military personnel to duties in support of dependents schools, external to the school operation, on a part-time basis (less than 50 percent of their time) as an additional duty.

(3) Support rendered by Air Force installations in the European or Atlantic Areas will be in the areas for which support generally is provided for other operational activities by the installation staff and service organizations.

(c) The following policy applies in administering the dependents school program in the Pacific School Area. School-level spaces are not programmed for use above school level except as part of a plan to provide training of teachers or other professional personnel selected for above-school-level administration.

§ 809c.18 Employing school professional personnel.

(a) *School level personnel.*—(1) *Pub. L. 86-91 personnel.* Based on requisitions submitted by the Area Director, Oversea Recruitment Center, Department of the Army, recruits and selects school-level professional personnel (with the exception of school administrators—principals and assistant principals) and arranges for inter-area transfers. The Director, Dependents Education, Office of the Secretary of Defense (Education) annually issues criteria and procedures for inter-area transfers.

(2) *Administrators.* The Area Director considers and selects fully qualified personnel within the Pacific Area School system for these positions in accordance with Air Force Civilian Personnel and Civil Service regulations. If recruitment outside the Pacific Area school system is necessary, the Oversea Recruitment Center makes available a list of qualified applicants.

(3) *Support personnel.* U.S. civilian and foreign national personnel to fill clerical supply, and other such functions are employed locally in accordance with local Air Force and command policy.

(b) *District and area staffs.* The Director, through civilian personnel and other recruiting channels available to him, recruits, selects and assigns above-school-level professional personnel.

(c) *Area Director and Deputy Area Director HQ PACAF recruit for these positions.* Resumes of individuals under active consideration are forwarded to HQ USAF for review and concurrence. HQ PACAF makes the final selection with the concurrence of HQ USAF.

(d) *Support personnel.* Support personnel for district and area staffs are recruited and selected in accordance with Air Force and local command civilian personnel regulations.

§ 809c.19 Obtaining school facilities.

(a) *Military construction program (MCP).* Requests are submitted for MCP funds to construct school facilities according to instructions on the MCP for the budget fiscal year. AFM 86-2 (Standard Facility Requirements) establishes criteria for dependents school facilities.

(b) *Relocatable classrooms (or suitable substitutes).* These classrooms may be procured when recommended by the major commander and approved by HQ USAF.

§ 809c.20 School fire prevention and safety programs.

(a) The responsibility for assuring that adequate precautions are taken to eliminate existing and potential fire and ground and safety hazards in the school plant reposes jointly with the local base and school operating officials. General policies and procedures covering fire protection are contained in AFM 92-1 (Fire Protection Program Operational Procedures). Policies and procedures pertaining to safety and accident prevention are found in AFM 127-101 (Industrial Safety Accident Prevention Handbook).

(b) In conjunction with responsibilities outlined in applicable service directives, area directors/superintendent establish internal policies to:

(1) Assure that all combustible draperies and other window coverings are flameproofed.

(2) Develop and implement a fire and accident prevention and environmental safety program under the guidance and with the coordination of the appropriate Fire Protection, Safety and Bioenvironmental staff agencies.

(3) Designate a member of each district office to serve as School Fire Protection and Accident Prevention Officers.

(4) Arrange for an integrated semi-annual inspection of each school by personnel from the host installation Civil Engineers, Ground Safety and Bioenvironmental agencies.

(5) Principals, in conjunction with local fire prevention officers inspect school buildings before the beginning of each school term, and monthly thereafter.

(6) Conduct fire drills, to include proper evacuation procedures and simulation of actual conditions weekly during the first month of the school term, and monthly thereafter.

(7) Conduct a program of safety, fire, and accident prevention education for all students.

§ 809c.21 Procuring supplies and equipment.

School-unique and standard items of equipment are requisitioned, controlled, and managed in accordance with the procedures outlined in AFM 67-1 (USAF Supply Manual).

§ 809c.22 School transportation.

Transportation of eligible pupils to and from school on a daily commuting basis is provided by the host installation. The cost of this transportation is chargeable to the dependents education program, and is reimbursable by the geographic manager. Commercial contracts may be entered into by the installation commander, or directly by the geographic manager.

§ 809c.23 Summer school.

(a) *Remedial and makeup.* (1) Summer school is authorized, tuition-free, for remedial and makeup work by dependent children described in § 809c.15(a), who are recommended by the teacher and approved by the principal.

(2) Summer school meets for no more than 30 days; the school, or a given class may be of shorter duration if needs of the pupils can be met by the shorter term. A command-wide average of at least 10 pupils per class must be maintained.

(3) Qualified teachers and adequate supervision must be available. Secondary classes for credit must conform to North Central Association requirements.

(4) The categories of dependent children described in § 809c.15(b) and (c) are charged tuition at a proportional cost of the tuition charges during the regular school year.

(b) *Enrichment and acceleration.* Summer school is authorized on a tuition basis for all dependent children described in § 809c.15. Tuition is charged at the same rate charged for non-DOD students referred to in pargaraph (a)(4) of this section.

§ 809c.24 Maintaining records.

Air Force-operated schools maintain essential background and academic records on each student.

Subpart D—Tuition-Fee Schools and Correspondence Courses

§ 809c.25 Tuition-fee schools.

(a) *Criteria for use.* In areas where there are no service-operated schools, contracts may be negotiated with local tuition-fee schools for the education (including daily authorized transportation to and from the school) of eligible dependents. In areas where Air Force-operated schools, including high schools with dormitory facilities, are available, maximum use will be made of such facilities. Contracting with tuition-fee schools in areas where service-operated schools exist is authorized only when:

(1) Air Force-operated schools are operating at maximum capacity.

(2) Adequate educational services are not offered at the Air Force-operated school for handicapped children, or

(3) Air Force-operated schools are not considered available. Nonavailability may be determined when either of the following conditions exist:

(i) The Area Director determines that daily commuting time to an Air Force-operated school is unreasonable.

(ii) In the case of dormitory schools, when space is available, but it is determined that because of the youthfulness or immaturity of the child, or unfeasible transportation arrangements (cost, extreme distance, unavailability, scheduling, or inappropriate routing), attendance at the Air Force-operated school would not be in the best interest of the child or the sponsor.

(b) *Criteria for approval.* (1) Elementary schools should conform to reasonable American sandards.

(2) Secondary schools should meet the standards for accreditation prescribed by the North Central Association of Colleges and Secondary Schools.

(3) The curriculum should include instruction to American history, civics, government, and other subjects designed to provide an American-type education.

(4) Schools should be reasonably accessible to pupils' homes to minimize undue hazards and expense of transportation.

(5) General instruction should be in English.

(6) Physical facilities should meet reasonable standards of safety, health, and educational requirements.

§ 809c.26 Correspondence courses.

If neither service-operated dependents schools nor adequate tuition-fee schools are available, the area superintendent procures correspondence courses offered by educational institutions that are accredited by a state department of education or a regional accrediting association. Such correspondence courses also may be procured to supplement the curricula of tuition-fee schools or small service-operated schools where course offerings are limited in particular subject areas which normally are part of the required curriculum in the United States.

Subpart E—Budgeting and Funding

§ 809c.27 Appropriated fund support.

PACAF budgets and funds for Air Force-operated schools, tuition-fee schools, and correspondence courses in the Pacific School Area are explained in § 809c.2. Adequate school facilities include fixed installed equipment, and do not include movable or portable supplies and equipment used in operating the school.

§ 809c.28 Nonappropriated and other funds.

Use will not be made of nonappropriated military welfare funds or funds derived from payments related to PREP to defray dependents schools costs that are chargeable to Air Force appropriated funds. Nonappropriated welfare funds and contributions and donations from individuals and private organizations (for example, PTAs and clubs) may be used to fund those school activities and special projects that normally are not provided by comparable tax-supported schools in the United States. Property donated to dependents schools is accepted and accounted for in accordance with provision of AFM 11-26 (Gifts to the Department of the Air Force), (See Part 825a of this chapter), AFM 67-1 (USAF Supply Manual) and AFM 93-1 (Air Force Real Property Accountable Reports).

§ 809c.29 Charges to parents.

Parents of children who meet the criteria in § 809c.15(a) will not be responsible for any costs that are chargeable to the annual funding limitation. Parents of children who do not meet those criteria are charged a tuition fee for each child attending an Air Force-operated school. The tuition fee for dependents of employees of Federal Government agencies other than DOD provide, for recovery of a proportionate (per pupil) share of all operating and administrative costs for education space-required pupils in service-operated schools. This per pupil cost is determined by dividing the estimated O&M costs which are charged against space-required dependents education (minus tuition and transportation costs charged against contract education and costs of correspondence courses) by the number of space-required pupils. For dependents of personnel who are not employed by the Federal Government, the tuition rate is the above-determined rate plus an additional amount which provides for the recovery of a proportionate (per pupil) share of capital investment costs. The additive tuition charge for recoupment of capital investment is established by OSD based on formulas developed by the military departments, and applies uniformly to all DOD dependents schools world-wide. The tuition rate for Federally related dependents is developed annually by the Director, Pacific Area. Tuition fees for kindergarten are one-half of the amount charged pupils in grades 1-12. District superintendents are authorized to disenroll non-DOD tuition paying students when tuition payments are not made in accordance with the established tuition payment schedule.

§ 809c.30 Reimbursements to parents.

Parents are not reimbursed from appropriated funds for costs that are chargeable to appropriated funds and the annual funding limitation.

By order of the Secretary of the Air Force.

STANLEY L. ROBERTS,
Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.

Filing Insured (Including C.O.D.) Mail Claims

Correction

In FR Doc. 74-6109 appearing at page 10132 in the issue of Monday, March 18, 1974, in the third line of § 164.2(f), the word "matter" should read "mailer".

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 103—RESEARCH AND TRAINING, EXEMPLARY AND CURRICULUM DEVELOPMENT PROGRAMS IN VOCATIONAL EDUCATION

Appendix A—Exemplary Projects in Vocational Education Additional Criteria

On November 7, 1973 there was published in the FEDERAL REGISTER at 38 FR 30747, a notice of proposed rulemaking which set forth additional criteria (and closing date) for applications for grants under Part D of the Vocational Education Act of 1963, as amended, 20 U.S.C. 1302 (c). The additional criteria were set forth in a proposed Appendix A to Part 103 of the regulations, 45 CFR Part 103.

Interested persons were given until November 27, 1973 to submit comments, suggestions, or objections to the proposed criteria. No comments were received.

The criteria therefore, are issued as originally published without change, as set forth below.

Effective date. Since the criteria are to be issued as originally published in the FEDERAL REGISTER under notice of proposed rulemaking without change, the criteria shall be effective March 21, 1974.

(Catalog of Federal Domestic Assistance No. 13.502; Vocational Exemplary Projects)

Dated: January 28, 1974.

JOHN OTTINA,
U.S. Commissioner of Education.

Approved: March 15, 1974.

FRANK CARLUCCI,
Acting Secretary of Health, Education, and Welfare.

APPENDIX A—EXEMPLARY PROJECTS IN VOCATIONAL EDUCATION ADDITIONAL CRITERIA

In the making of awards from funds available for the program (in addition to consideration of the criteria in 45 CFR 103.25 and 100.a26(b)) priority will be given to projects which include a strong guidance and counseling emphasis and which involve in one operational setting a coordinated set of activities designed to carry out of all of the following purposes.

a. To increase the self awareness of each student, to develop in each student favorable attitudes about the personal, social, and economic significance of work, and to assist each student in developing and practicing appropriate career decisionmaking skills.

b. To increase the career awareness of students at the elementary school level in terms of the broad range of options open to them in the world of work.

c. To provide, at the junior high or middle school level, career orientation and meaningful exploratory experiences for students.

d. To provide, at grade levels 10 through 14, job preparation in a wide variety of occupational areas, with special emphasis on innovative approaches to the provisions of work experience and/or cooperative education opportunities for all students.

e. To insure the placement of all existing students in either: (1) A job, (2) a postsecondary occupational program, or (3) a baccalaureate program.

(20 U.S.C. 1301, 1303(a).)

Each project may be designed for a duration of up to three years, with the understanding that only the first 12 months of activity will be supported with fiscal year 1974 funds. Support for the proposed second and third years of each project will be dependent upon availability of appropriations and satisfactory progress in the implementation of the earlier stages of the project. Since comprehensive exemplary projects will require substantial financial resources, consideration should be given in the project design to the possible coordination with relevant programs supported from other sources.

(20 U.S.C. 1301.)

[FR Doc.74-6591 Filed 3-20-74;8:45 am]

PART 174—EDUCATION PROFESSIONS DEVELOPMENT

Notice of proposed rulemaking was published in the FEDERAL REGISTER on July 2, 1973 (38 FR 17502–17508) setting forth regulations governing the awarding of funds, except for the Teacher Corps Program, under the Education Professions Development Act (Title V of the Higher Education Act of 1965, as amended, 20 U.S.C. 1091–1092, 1108 et seq.). Interested persons were invited to submit written comment to the Office of Education regarding the proposed regulations.

A. *Summary of comments—Office of Education response.* The following comments were received by the Office of Education regarding the proposed regulations. After the summary of each comment, a response is set forth stating changes which have been made in the regulations or the reasons why no change is deemed necessary.

1. Section 174.60 *Scope Comment.* A commenter suggested that the first sentence of § 174.60(a), which provides that the Commissioner will award fellowships "for graduate study leading to an advanced degree," is too restrictive. He suggests that fellowships be awarded "for graduate study in an approved program."

Response. The language used is required by statute. Section 522 of Title V of the Higher Education Act of 1965 (20 U.S.C. 1112), provides that "The Commissioner is authorized to award fellowships in accordance with the provisions of this part for graduate study leading to an advanced degree * * *."

Comment. A commenter viewed the definition of "career in elementary and secondary education or in postsecondary vocational education" in § 174.60(b)(2) as perhaps excluding certified and employed teachers thereby causing such persons to be ineligible for fellowships in education administration.

Response. It is clear that a certified and employed teacher has a "career in elementary and secondary education or in postsecondary vocational education" and is therefore not ineligible, on that account, to receive a fellowship.

Comment. A commenter suggested that "coordinating work experience programs" be added to the list of pertinent career fields.

Response. Section 174.60(b)(2) will be amended to add "coordinating work-experience programs" to the list of career fields.

2. Section 174.61 *Approved programs. Comment.* A commenter suggested that the criteria defining an "approvable program" in § 174.61(b) be expanded to include the following: "the proposed program must be acceptable for the purposes of teaching certification in the State in which the institution is located."

Response. It is felt that the addition of the proposed criteria would be inappropriate since the program is open to teachers who are already certified and to persons who plan to enter careers in elementary and secondary education and postsecondary vocational education other than teaching.

3. Section 174.64 *Payments of stipends to fellows. Comment.* A commenter notes that § 174.64(a) provides that the payment of stipends after the first year is conditional upon the availability of appropriations. He suggests that if the situation arises where funds are not available to fully fund stipends the work restriction of § 174.64(e) be lifted.

Response. The provisions of § 176.64 (e) limiting outside or more than part-time work is required by § 527 of Title V of the Higher Education Act (20 U.S.C. 1117).

4. Section 174.243 *Scope. Comment.* A commenter asks whether a leadership development award must be made for three years and whether that three year period must be consecutive. In addition, it is suggested that a combination of work and training be permitted.

Response. Section 174.243 provides that leadership development awards may be granted for periods of up to three years; a lesser period is certainly allowed. Furthermore, if part of the advanced training program of an institution of higher education includes work experience that work experience would be permitted.

B. The General Provisions for Office of Education Programs, published in the FEDERAL REGISTER of November 6, 1973, (38 FR 30654 et seq.), have caused the following changes:

1. Section 174.2, is changed by deleting paragraphs (b), (c), (e), (l), and (m).

2. Section 174.4, is changed by deleting paragraphs (a), (b), (c), (d), except (d)(1) and (3), (e), (f), (g), (h), and (i).

3. Section 174.66 is changed by revising the first sentence to read "Institutions attended by fellowship recipients shall, in addition to those changes specified in Part 100a of this chapter, promptly report any changes in the continued eligibility of a fellowship holder:"

4. Section 174.67, is changed by deleting paragraph (b).

5. Section 174.83, is changed by inserting after the word "evaluated" the words "in addition to the criteria set forth in § 100a.26(b) of this chapter." in the introductory sentence.

B. The General Provisions for Office of Education Programs, published in the FEDERAL REGISTER of November 6, 1973, have caused the following changes:

1. Section 174.2, is changed by deleting paragraphs (b), (c), (e), (l), and (m).

2. Section 174.4, is changed by deleting paragraphs (a), (b), (c), (d), except (d)(1) and (3), (e), (f), (g), (h), and (i).

3. Section 174.66 is changed by revising the first sentence to read "Institutions attended by fellowship recipients shall, in addition to those changes specified in Part 100a of this chapter, promptly report any changes in the continued eligibility of a fellowship holder:"

4. Section 174.67, is changed by deleting paragraph (b).

5. Section 174.83, is changed by inserting after the word "evaluated" the words "in addition to the criteria set forth in § 100a.26(b) of this chapter." in the introductory sentence.

After consideration of all comments, Title 45 of the Code of Federal Regulations is amended as set forth below.

These regulations will become effective March 21, 1974.

(Catalog of Federal Domestic Assistance Program Nos. 13.416, Education Personnel Development (categorical); 13.546, Teachers for Indian Children; 13.506, Bilingual Education; 13.503, Leadership Development for Vocational-Education; 13.504, State Systems Personnel Development for Vocational Education; 13.417, Exceptional Children; 13.545, New Careers in Education)

Dated: February 21, 1974.

JOHN OTTINA,
U.S. Commissioner of Education.

Approved: March 15, 1974.

FRANK CARLUCCI,
Acting Secretary of Health, Education, and Welfare.

Title 45 of the Code of Federal Regulations is amended by adding Part 174 which reads as follows:

Grants or contracts made pursuant to the regulations set forth below are subject to the regulation in 45 CFR Part 80, issued by the Secretary of Health, Education, and Welfare, and approved by the President, to effectuate the provisions of section 601 of the Civil Rights Act of 1964 (P.L. 88–352).

Subpart A–1—General Provisions

Sec.
174.1 General purpose.
174.2 General definitions.
174.3 Limitations on payments.

Subpart A–1—General Provisions

§ 174.1 General purpose.

Regulations in this part govern programs carried out under the Education Professions Development Act (title V of the Higher Education Act of 1965), except Teacher Corps programs. The general purpose of these programs is to improve the quality of education and to help meet critical shortages of adequately trained educational personnel by (a) developing information on the actual needs for educational personnel, both present and long-range; (b) providing a broad range of high quality training and retraining opportunities responsive to changing manpower needs; (c) attracting a greater number of qualified persons into the education professions; (d) attracting persons who can stimulate creativity in the arts and other skills to undertake short-term or long-term assignments in education; and (e) helping to make educational personnel training programs more responsive to the needs of schools and colleges.

(20 U.S.C. 1091)

§ 174.2 General definitions.

As used in this Part:

(a) "Act" means title V of the Higher Education Act of 1965 as amended (20 U.S.C. 1091 et seq.).

(b) "Dependent," for purposes of payment of a dependency allowance, means any of the following persons over half of whose support, for the calendar year in which the school year begins, was received from the fellow or participant:

(1) A spouse,

(2) A child, or descendant of such child, or stepchild,

(3) A brother or sister,

(4) A brother or sister by the half blood,

(5) A stepbrother or stepsister,

(6) A parent, or ancestor of such parent,

(7) A stepfather or stepmother,

(8) A son or daughter of fellow's or participant's brother or sister,

(9) A brother or sister of fellow's or participant's father or mother,

(10) A son-in-law, or daughter-in-law, or father-in-law, or mother-in-law, or brother-in-law, or sister-in-law,

(11) A person (other than the fellow's or participant's spouse) who, during the fellow's or participant's entire calendar year, lives in the fellow's or participant's home and is a member of the fellow's or participant's household (but not if the relationship between the person and the fellow or participant is in violation of local law), or

(12) A cousin (descendant of a brother or sister of the fellow's or participant's father or mother) who during the fellow's or participant's calendar year, is receiving institutional care on account of a physical or mental disability, and before receiving such care was a member of the same household as the fellow or participant.

(13) A legally adopted child or a child placed in the fellow's or participant's home for adoption by an authorized agency is considered to be a child by blood.

(14) A citizen of a foreign country may not be claimed as a dependent, unless he is a resident of the United States, Canada or Mexico, or Panama or the Canal Zone, at some time during the calendar year in which the school year of the fellow or participant begins, or is a resident of the Philippines, born to or adopted by, a fellow or participant while he was a member of the Armed Forces, before January 1, 1956, or is an alien child legally adopted by and living with a fellow or participant as a member of his household for the entire calendar year.

(c) "Fellowship" means an award under this Part to a student to enable him to carry out a full-time program of graduate study.

V 39 156
MAR 21 74
XUM

(d) "Fellowship year" is a study period approximately equal to 12 consecutive months beginning either in the summer or fall.

(e) "Institution of higher education" or "institution" means an educational institution in any State which meets the requirements set forth in § 1201(a) of the Higher Education Act of 1965 as amended.

(20 U.S.C. 1141(a))

(f) "Institutional allowance" means a monetary amount provided to an institution in conjunction with a pre-doctoral fellowship awarded to an individual to study at the institution. It is made in lieu of tuition and all other fees required of all students of similar standing.

(g) "Local educational agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary or secondary schools. The term also includes any other public institution or agency having administrative control and direction of a public elementary or secondary school.

(20 U.S.C. 1141(g))

(h) National Advisory Council on Education Professions Development is the Presidentially appointed advisory body established by the Act to review Federal programs for training educational personnel, to evaluate the effectiveness of such programs in meeting needs and achieving improved quality, and to advise the Secretary and the Commissioner on related policy matters.

(20 U.S.C. 1091(a))

(i) "State" includes in addition to the several States of the Union, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, and the Virgin Islands.

(20 U.S.C. 1141(b))

(j) "State educational agency" means the State Board of education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools; or, if there is no such agency or officer, an agency or officer designated by the Governor or by State Law.

(20 U.S.C. 1141(h))

(k) "Stipend" means the allowance paid to a participant or fellow for subsistance and other expenses for such participants and their dependents as the Commissioner may determine to be consistent with prevailing practices under comparable Federally supported programs.

(l) "Teacher aide" means a person who assists a teacher in the performance of his professional teaching or administrative duties or in any other activity which assists a teacher in the teaching-learning process. For the purposes of this subsection, the term "teacher" includes other educational personnel such as librarians, counselors, school social workers, child psychologists, educational media specialists, and school nurses, as well as classroom teachers. The term "teacher aide" does not include persons in positions such as clerk to a principal, food-handlers in a cafeteria, or other jobs not related to the teaching-learning process.

(20 U.S.C. 1091 et seq. except where otherwise noted)

§ 174.3 Limitations on payments.

(a) No payment may be made under this part for religious worship or instruction or training for a religious vocation or to teach theological subjects. No fellowship shall be awarded for study at a school or department of divinity. For the purposes of this section, the term "school or department of divinity" means an institution or department or branch of an institution whose program is specifically for the education of students to prepare them to become ministers of religion or enter upon some other religious vocation or to prepare them to teach theological subjects.

(20 U.S.C. 1092, 1116)

(b) Except for veterans and war orphans who are receiving educational assistance benefits provided by the Veterans Administration under Chapters 34 and 35 of Title 38 of the United States Code, participants or fellows who are receiving any other direct Federal educational benefits may not, concurrently, receive stipends under this part. "Direct Federal educational benefits," as used in this paragraph do not include loans made or insured under Federally assisted programs.

(20 U.S.C. 1091 et seq.)

§ 174.4 General Provisions.

(a) *General provisions regulations.* Assistance under this part is subject to applicable provisions of Subchapter A of this chapter (relating to fiscal, administrative, property management, and other matters).

(b) *Allowable costs for programs other than fellowship programs or leadership development awards.* (1) Funds paid under this part for support of institutes, short-term training programs, or special projects shall be used only for the purposes set forth in the final plan of operation as approved by the Commissioner.

(2) Participants in training programs supported under this part may not be charged tuition. If the payment of tuition by all students at an institution is required as a matter of State law, tuition may be paid for the participant and the amount thereof may be included as an allowable cost in lieu of an equal amount of otherwise allowable costs.

(20 U.S.C. 1091 et seq.)

§ 174.5–174.10 [Reserved]

Subpart A–2—Attracting Qualified Persons to the Field of Education

§ 174.11 Applicability and program purpose.

The purpose of the programs conducted under this subpart is to improve the quality of education and to help meet critical shortages of adequately trained educational personnel by attracting a greater number of qualified persons into the education professions and by attracting persons who can stimulate creativity in the arts and other skills to undertake short-term or long-term asignments in education.

(20 U.S.C. 1091)

§ 174.12 Types of recruitment projects.

The Commissioner may support programs or projects that will make an especially significant contribution to recruitment for the education professions by (a) identifying capable youth in secondary schools who may be interested in careers in education and encouraging them to pursue postsecondary education in preparation for such careers; (b) publicizing available opportunities for careers in the field of education; (c) encouraging qualified persons to enter or reenter the field of education; or (d) encouraging artists, craftsmen, artisans, scientists, persons from other professions and vocations, and homemakers to undertake teaching or related assignments on a part-time basis or for temporary periods.

(20 U.S.C. 1091c)

§ 174.13 Eligible entities.

The Commissioner may award grants to, or enter into contracts with, State or local educational agencies, institutions of higher education, or other public or nonprofit private agencies, organizations, or institutions, and is authorized to enter into contracts with private agencies, institutions, or organizations organized for profit (after consultation with the National Advisory Council on Education Professions Development, see § 174.2(k)) when he determines that such contract will make an especially significant contribution to attaining the objectives of this subpart.

(20 U.S.C. 1091c)

§ 174.14–174.19 [Reserved]

Subpart B—Attracting and Qualifying Teachers To Meet Critical Teacher Shortages

§ 174.20–174.59 [Reserved]

Subpart C—Graduate Fellowships and Grants for Strengthening Graduate Programs in Education

§ 174.60 Scope.

(a) The Commissioner will award fellowships under this subpart for graduate study leading to an advanced degree for persons who are pursuing or plan to pursue a career in elementary and secondary education or post-secondary vocational education. The Commissioner will allocate fellowships to institutions of higher education having graduate programs approved under § 174.61 for the use of individuals accepted into such programs. Not less than 5 percent of the amounts available for the purposes of this subpart shall be used for the training of teachers for service in programs for children with limited English speaking ability.

(20 U.S.C. 1091(b) (7, 1122))

(b) For purposes of this subpart

(1) "Elementary and secondary education" includes preschool and adult and vocational education and

(2) "Career in elementary and secondary education or in postsecondary vocational education" means a career of teaching in elementary or secondary schools (including teaching in preschool and adult and vocational education programs, and including teaching children of limited English-speaking ability) or in postsecondary vocational schools, a career of teaching, guiding, or supervising such teachers or persons who plan to become such teachers, a career in the administration of such schools, a career in fields which are directly related to teaching in such schools, such as library science, school nursing, school social work, guidance and counseling, educational media (including educational and instructional television and radio), child development, and special education for handicapped children and for gifted and talented children, or a career in coordinating work-experience programs.

(20 U.S.C. 1111)

§ 174.61 Approved programs.

(a) An institution of higher education that wishes to have its graduate program approved for the purposes of receiving fellowships under this subpart shall submit an application to the Commissioner in such form and containing such information as the Commissioner shall prescribe.

(b) The Commissioner will approve an application submitted in paragraph (a) of this section only upon a finding that the graduate program described in the application—

(1) Will substantially further the objective of improving the quality of education of persons who are pursuing or intend to pursue a career in elementary and secondary education or postsecondary vocational education;

(2) Gives emphasis to high-quality substantive courses;

(3) Is of high quality and either is in effect or readily attainable; and

(4) Will accept for study only those persons who demonstrate a serious intent to pursue or to continue a career in elementary and secondary education or postsecondary vocational education.

(c) Program approval is subject to termination or suspension if the program is not developed or operated substantially in accordance with the information submitted in paragraph (a) of this section or in compliance with the requirements of paragraph (b) of this section.

(20 U.S.C. 1114)

§ 174.62 Allocation of fellowships.

The Commissioner will allocate fellowships to institutions of higher education having approved graduate programs in such a manner as will:

(1) Best provide an equitable distribution of such fellowships throughout the States taking into account such factors as the number of children in each State aged three to seventeen and the undergraduate student enrollment in institutions of higher education in each State; except that to the extent that the National Advisory Council on Education Professions Development (see § 174.2(k)) determines that an urgent need for a certain category of educational personnel is unlikely to be met without preference in favor of such a category over other categories of educational personnel, the Commissioner may give preference to programs designed to meet that need, but in no case shall such preferred programs constitute more than 50 per centum of the total number of fellowships awarded in any fiscal year.

(20 U.S.C. 1113)

(2) Encourage experienced teachers in elementary or secondary schools or postsecondary vocational schools and other experienced personnel in elementary or secondary education or postsecondary vocational education to enter graduate programs, attract recent college graduates to pursue a career in elementary and secondary education or postsecondary vocational education, and afford opportunities for college graduates engaged in other occupations or activities to pursue or return to a career in elementary and secondary education or postsecondary vocational education.

(20 U.S.C. 1113)

§ 174.63 Award of fellowships to individuals.

(a) *Applications and Selection.* Applications for fellowships should be submitted directly to participating institutions which will select the fellows.

(b) *Eligibility.* In order to be eligible for a fellowship, at the time the applicant is to commence study he or she must be:

(1) Accepted at the nominating institution for full-time graduate study in an approved program leading to an advanced degree,

(2) Pursuing or intending to pursue a career in elementary or secondary education, as defined in § 174.60(b)(2)) in a State, and

(3) Either a citizen or national of the United States or be in the United States for other than a temporary purpose and have the intention of becoming a permanent resident thereof, or be a permanent resident of the Trust Territories of the Pacific Islands.

(c) *Reinstatement of a fellowship following interruption of study.* (1) *Military service.* When feasible and subject to the availability of funds, a fellow whose fellowship tenure is interrupted by voluntary or involuntary military service will, upon his release from military duty, be reinstated to complete the remainder of his tenure.

(2) *Qualifying non-military service.* Fellows who satisfy their military obligation as commissioned officers in the Public Health Service or Environmental Science Services Administration or by performing alternate service as duly classified conscientious objectors will be eligible for reinstatement on the same basis as if their tenure had been interrupted by voluntary or involuntary military service.

(3) *Other interruptions.* Upon request the Commissioner may approve the reinstatement of fellows whose tenure is interrupted for reasons other than those given in paragraph (c)(1) and (2) of this section, provided good cause exists for such interruption.

(20 U.S.C. 1113, 1117)

§ 174.64 Payments of stipends and allowances to fellows.

(a) Payments of stipends and allowances after the first year of the fellowship are conditioned upon the availability of Federal appropriations.

(b) Each fellow will receive a stipend and where applicable an allowance for dependents consistent with that provided under comparable Federally supported programs, as determined by the Commissioner. However, a fellow may not receive a stipend or such allowances, during the period of full-time paid internship.

(c) Institutions shall make payments only to fellows who are enrolled and in good standing in the approved programs. A fellow shall not be entitled to payment with respect to any period during which he has failed to meet the conditions of paragraphs (d) and (e) of this section. Adjustments in the amount of an allowance payable to a fellow because of an increase or decrease in the number of his dependents shall be made effective as of the date when the change occurs, and the amount of the adjustment shall be reflected in the next regularly scheduled payment, if any.

(d) *Conditions for continued eligibility.* In order to remain eligible for payments, a fellow:

(1) Must maintain satisfactory progress in his approved graduate program; and

(2) Must continue to pursue a full-time course of study without gainful employment except as provided in paragraph (e) of this section.

(e) *Outside or part-time work.* A fellow may not engage in gainful employment during the period of his fellowship, except such part-time teaching, research, or similar activities which are related to his approved program, which have been approved by the Commissioner and which do not unnecessarily prolong his period of training. Limitations with respect to gainful employment do not apply to periods not covered by the fellowship stipend.

(20 U.S.C. 1115, 1117)

V 39 56 MAR 21 74 XUM

§ 174.65 Institutional allowance.

The Commissioner will pay an allowance to the institution each fellow is attending in such amount as he determines to be consistent with prevailing practices under comparable Federally supported programs. The institutional allowance is made in lieu of tuition and all fees that would otherwise be required of a fellow. Payment of the allowance will be made in such installments and at such times as the Commissioner, may, from time to time, authorize.

(20 U.S.C. 1115(b))

§ 174.66 Reports of institutions sponsoring fellowships.

Institutions attended by fellowship recipients shall in addition to those changes specified in Part 100 of this chapter, promptly report any changes in continued eligibility of a fellowship holder.

(20 U.S.C. 1117)

§ 174.67 Strengthening graduate programs.

For the purpose of obtaining an appropriate geographical distribution of high-quality programs for the training of personnel for elementary or secondary education, the Commissioner may make grants to and contracts with institutions of higher education to pay part of the cost of developing or strengthening graduate programs which meet or, as a result of the assistance received under this subsection will be enabled to meet, the requirements of § 174.61.

(20 U.S.C. 1114(b))

§ 174.68–174.79 [Reserved]

Subpart D—Improving Training Opportunities for Personnel Serving in Programs of Education Other Than Higher Education

§ 174.80 Scope.

(a) The Commissioner may make grants to, or contracts with, institutions of higher education and State educational agencies, and local educational agencies (and with respect to programs covered by § 174.85 other public or private nonprofit agencies and organizations) for carrying out programs or projects to improve the qualifications of persons who are serving or preparing to serve in educational programs in elementary and secondary schools (including preschool and adult and vocational education programs) or postsecondary vocational schools or to supervise and train persons so serving.

(b) Grants and contracts with local educational agencies may be awarded only if the Commissioner has consulted the State educational agency and that agency is satisfied that the programs and projects of the local educational agency will be coordinated with programs or projects carried out under the Teacher Corps program (20 U.S.C. 1101 et seq.) and under part B–2 of the Act if there are such programs funded in the State.

(20 U.S.C. 1119)

§ 174.81 Eligible participants in training programs.

(a) Funds provided under this subpart may be used to support programs to train persons who are serving or preparing to serve in educational programs in elementary and secondary schools (including preschool and adult and vocational education programs) or postsecondary vocational schools, or to provide training for the trainers of teachers.

(b) Persons who are serving or preparing to serve in educational programs in both public and private elementary and secondary schools (including preschool and adult and vocational education programs) or postsecondary vocational schools are eligible to be enrolled in programs supported under this subpart.

(20 U.S.C. 1119)

§ 174.82 Advanced training and retraining programs.

(a) Programs or projects authorized under this subpart may include, among others—

(1) Programs or projects to train or retrain teachers, or supervisors or trainers of teachers, in any subject generally taught in the schools;

(2) Programs or projects to train or retrain other educational personnel in such fields as guidance and counseling (including occupational counseling), school social work, child psychology, remedial speech and reading, child development, and educational media (including educational or instructional television or radio);

(3) Programs or projects to train teacher aides and other non-professional educational personnel;

(4) Programs or projects to provide training and preparation for persons participating in educational programs for children of preschool age;

(5) Programs or projects to prepare teachers and other educational personnel to meet the special needs of the socially, culturally, and economically disadvantaged;

(6) Programs or projects to prepare teachers and other educational personnel to meet the special needs of exceptionally gifted students;

(7) Programs or projects to train and retrain persons engaging in programs of special education for the handicapped;

(8) Programs or projects to train or retrain persons engaging in special educational programs for children of limited English-speaking ability;

(9) Programs or projects to provide inservice and other training and preparation for school administrators;

(10) Programs or projects to prepare artists, craftsmen, scientists, artisans, or persons from other professions or vocations, or home-makers to teach or otherwise assist in programs or projects of education on a long-term, short-term, or part-time basis;

(11) Programs or projects (including cooperative arrangements or consortia between institutions of higher education, junior and community colleges, or between such institutions and State or local educational agencies and nonprofit education associations) for the improvement of undergraduate programs for preparing educational personnel, including design, development and evaluation of exemplary undergraduate training programs, introduction of high quality and more effective curricula and curricular materials, and the provision of increased opportunities for practical teaching experience for prospective teachers in elementary and secondary schools; and

(12) Programs and projects designed to meet the need for the training of teachers for participation in education programs for migratory children of migratory agricultural workers, including teacher exchange programs.

(20 U.S.C. 1119)

(b) Funds provided pursuant to a grant or a contract under this section may be used only to pay the cost of—

(1) Short-term or regular session (including part-time) institutes;

(2) Other preservice and inservice training programs or projects designed to improve the qualifications of persons entering and re-entering the field of elementary and secondary education or postsecondary vocational education, except that funds may not be used for seminars, symposia, workshops or conferences unless they are part of a continuing program of inservice or preservice training;

(3) Projects or programs to improve undergraduate or other programs for training educational personnel; or

(4) Such activities as may be necessary to carry out programs and projects designed to meet the need for the training of teachers for participation in education programs for migratory children of migratory agricultural workers, including teacher exchange programs to the extent such activities are not inconsistent with the other provisions of this Act.

(c) *Stipends.* Grants or contracts under this subpart may include provisions for the payment to participants of such stipends as the Commissioner may determine to be consistent with prevailing practices under comparable Federally supported programs.

(20 U.S.C. 1119)

§ 174.83 Criteria for approval of training programs.

The criteria upon which applications will be evaluated in addition to the criteria set forth in § 100a.26(b) of this chapter, will include the following:

(1) The extent to which there is evidence of cooperative planning and of the maximum use and coordination of resource and competencies of educational agencies and institutions involved;

(2) The extent to which there is expertise or has been previous experience in conducting the type of program for which application is made and the extent of planning for operation of the program; however, this criterion will not preclude awards to developing or evolving institutions where there is a reasonable probability that such institutions will be able successfully to conduct the program;

(3) The extent to which the program incorporates innovative concepts and techniques designed to meet current problems experienced in the Nation's schools;

(4) The extent to which the proposed program could meet current or prospective national, regional, local or State needs for educational personnel with the training which such a program would provide;

(5) The extent to which there is demonstrated institutional commitment to increasing support of the proposed program; and

(20 U.S.C. 1119)

§ 174.84 Distribution of grants and contracts.

In making grants and contracts for programs and projects under this subpart, the Commissioner will seek to achieve an equitable geographical distribution of training opportunities throughout the Nation, taking into account the number of children in each State who are aged three to seventeen.

(20 U.S.C. 1119(a–1))

§ 174.85 Programs for teachers of children living on Indian reservations.

Not less than 5 per centum of the funds available for the purposes of this subpart shall be used for grants to, and contracts with institutions of higher education and other public and private non-profit agencies and organizations for the purpose of preparing persons to serve as teachers of children living on reservations serviced by elementary and secondary schools for Indian children operated or supported by the Department of the Interior, including public and private schools operated by Indian tribes and by nonprofit institutions and organizations of Indian tribes. In carrying out the provisions of this section, preference shall be given to the training of Indians.

(20 U.S.C. 1119a)

§ 174.86 Programs for teachers of children with limited English speaking ability.

Not less than 5 per centum of the funds available for the purposes of this subpart shall be allocated for the training of teachers for service in programs for children with limited English speaking ability.

(20 U.S.C. 1091(b)(7))

§ 174.87–174.199 [Reserved]

Subpart F—Training and Development Programs for Vocational Education Personnel

§ 174.241 Applicability and program purpose.

The purpose of the programs covered by this subpart is to provide opportunities for experienced vocational educators to spend full-time in advanced study of vocational education for a period not to exceed three years in length; to provide opportunities to up-date the occupational competencies of vocational education teachers through exchanges of personnel between vocational education programs and commercial, industrial, or other public or private employment related to the subject matter of vocational education; and to provide programs of inservice teacher education and short-term institutes for vocational education personnel.

(20 U.S.C. 1119c)

§ 174.242 Special definition.

"State board" means the State board designated or created by State law as the sole State agency responsible for the administration of vocational education, or for supervision of the administration thereof by local educational agencies in the State.

(20 U.S.C. 1119c–2)

§ 174.243 Leadership Development Awards.

In order to meet the needs in all States for qualified vocational education personnel (including administrators, supervisors, teacher educators, researchers and instructors in vocational education) the Commissioner will make leadership development awards to enable experienced vocational educators to spend up to three years in advanced study at an institution of higher education.

(20 U.S.C. 1119c–1119c–1)

§ 174.244 Selection.

Applications for Leadership Development awards shall be submitted to the State Board of Vocational Education for the state in which the applicant is employed or is assured of employment. The State Board shall evaluate the applications and make recommendations to the Commissioner as to which applicants it believes should be awarded grants. The Commissioner will make awards within the apportionment made under § 174.245 and only with respect to persons who meet the conditions of § 174.246.

(20 U.S.C. 1119c–1)

§ 174.245 Allocation of awards.

In order to meet the needs for qualified vocational education personnel such as teachers, administrators, supervisors, teacher educators, researchers, and instructors in vocational education programs in all the States, the Commissioner in carrying out this subpart will apportion leadership development awards equitably among the States, taking into account such factors as the State's vocational education enrollments and the incidence of youth unemployment and school dropouts in each State.

(20 U.S.C. 1119c–1)

§ 174.246 Eligibility of individuals.

(a) The Commissioner will make available leadership development awards in accordance with the provisions of this subpart only upon his determination that the persons selected for such awards

(1) Have had not less than two years of experience in vocational education or in industrial training, or military technical training; or, in the case of researchers, experience in social science research which is applicable to vocational education; or

(2) Are currently employed or are reasonably assured of employment in vocational education and have successfully completed, as a minimum, a baccalaureate degree program; or

(3) Are recommended by their employer, or others, as having leadership potential in the field of vocational education and are eligible for admission as graduate students to a program of higher education approved by the Commissioner pursuant to § 174.247.

(b) In order to receive a leadership development award the person selected shall enroll in an approved vocational educational leadership development program, subject to the provisions of § 174.250 of this subpart.

(20 U.S.C. 1119c–1)

§ 174.247 Stipends to individuals.

The Commissioner will pay to persons selected for leadership development awards a stipend of $3,500 for each academic year of study, plus an allowance of $400 for each dependent. An additional stipend of $700 plus $100 for each dependent may be awarded for the summer.

(20 U.S.C. 1119c–1)

§ 174.248 Conditions for continued eligibility.

Leadership development awards to participate may be available for a period not to exceed three full years. Beyond the first year the award will be subject to the continued availability of Federal funds and satisfactory participation. The Commissioner will determine that a participant is maintaining satisfactory participation only during such periods as he finds that:

(a) The participant is maintaining satisfactory proficiency in, and devoting essentially full time to, study or research in the field of vocational education in an institution of higher education, and

(b) The participant is not engaging in gainful employment, other than part-time employment by such institution in teaching, research, or similar activities approved by the Commissioner.

(20 U.S.C. 1119c–1)

§ 174.249 Institutional allowance.

The Commissioner will (in addition to the stipend paid to a person under § 174.247) pay to the institution at which such person is pursuing his course of study an institutional allowance. The institutional allowance is made in lieu of tuition and all fees that would otherwise be required of the student. Payments will be made in such amounts and at such times as the Commissioner may, from time to time, determine to be consistent with prevailing practices under comparable Federally supported programs; however, one institutional allowance will not exceed $3,500 per academic year.

(20 U.S.C. 1119c–1)

V 39 156
MAR 21 74
XUM

§ 174.250 Institutional eligibility and approval.

The Commissioner will approve the vocational education leadership development programs of an institution of higher education only upon finding that:

(a) The institution offers a comprehensive program in vocational education with adequate supporting services and disciplines such as education administration, guidance and counseling, research, and curriculum development;

(b) Such program is designed to further substantially the objective of improving vocational education through providing opportunities for graduate training of vocational education teachers, supervisors, and administrators, and of university level vocational education teacher educators and researchers;

(c) Such program is conducted by a school of graduate study in the institution of higher education; and,

(d) Such program is approved also by the State board in the State where the institution is located.

(20 U.S.C. 1119c–1)

§ 174.251 Cooperative Development Awards, Exchange Programs, Institutes, and Inservice Education for Vocational Education Teachers, Supervisors, Coordinators and Administrators.

(a) The Commissioner may award grants to State boards to pay the cost of carrying out cooperative arrangements for the training or retraining of experienced vocational education personnel such as teachers, teacher educators, administrators, supervisors, coordinators, and other personnel, in order to strengthen education programs supported under this subpart and the administration of schools offering vocational education. Such cooperative arrangements may be between schools offering vocational education and private business or industry, commercial enterprises, or with other educational institutions (including those for the handicapped and delinquent).

(b) Each cooperating agency or enterprise shall attest to the accuracy of so much of a proposed cooperative arrangement as is related to its undertaking by signature of an authorized official on the application of the sponsoring State board.

(20 U.S.C. 1119c–2)

§ 174.252 Types of training programs.

Grants under this section may be used for projects and activities such as:

(1) Exchange of vocational education teachers and other staff members with skilled technicians or supervisors in industry (including mutual arrangements for preserving employment and retirement status, and other employment benefits during the period of exchange), and the development and operation of cooperative programs involving periods of teaching in schools providing vocational education and of experience in commercial, industrial or other public or private employment related to the subject matter taught in such school;

(2) Inservice training programs for vocational education teachers and other staff members to improve the quality of instruction, supervision, and administration of vocational education programs; and

(3) Short-term or regular-session institutes, or other preservice and inservice training programs or projects designed to improve the qualifications of persons entering and reentering the field of vocational education.

(20 U.S.C. 1119c–2)

§ 174.253 Requirements for grant applications.

(a) Sets forth a program for carrying out one or more projects or activities which meet the requirements of § 174.252 and provides for such methods of administration as are necessary for the development of effective vocational education leadership personnel.

(b) Sets forth policies and procedures which assure that Federal funds made available under this subpart for any fiscal year will be so used as to supplement or add to the level of funds that would, in the absence of such Federal funds, be made available for purposes which meet the requirements of § 174.252 and in no case supplant such funds;

(c) Provides for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid to the applicant under this subpart; and

(d) Provides for making such reports, in such form and containing such information as the Commissioner may require to carry out his functions under this subpart, and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

(20 U.S.C. 1119c–2)

Title 46—Shipping

CHAPTER II—MARITIME ADMINISTRATION, DEPARTMENT OF COMMERCE

SUBCHAPTER B—REGULATIONS AFFECTING MARITIME CARRIERS AND RELATED ACTIVITIES

[General Orders 58 and 59, Rev. 2 and 5, Amdts. 1 and 3]

PART 221—DOCUMENTATION, TRANSFER OR CHARTER OF VESSELS

Approval of Certain Transactions

Part 221 of Title 46 of the Code of Federal Regulations which prescribes regulations governing the foreign transfer of certain vessels is hereby amended.

Section 37 of the Shipping Act, 1916, as amended (the Act) (46 U.S.C. 835) requires the Assistant Secretary for Maritime Affairs to approve the sale, mortgage, charter or delivery of a vessel owned by a United States citizen or documented under the laws of the United States to a person not a citizen of the United States, or the transfer to foreign registry of any such vessel, or any subsequent transfer of a vessel for which such approval was granted.

The purpose of this amendment is to withdraw the approval granted by 46 CFR 221.4 as required by section 37 of the Act with respect to vessels which are or will be engaged in the fishing industry, and to conform the Appendix to 46 CFR 221.7 to a prior amendment made to 46 CFR 221.4 (37 FR 2851, December 29, 1972). Henceforth, approval of the transfer of such vessels will be handled on a vessel-by-vessel basis.

The United States is a co-founder and member of the InterAmerican Tropical Tuna Commission and has substantial interest in enforcing the rules of the Commission regulating the commercial fishing of tuna. Previously, fishing vessels built in the United States for delivery to persons other than United States citizens, and existing vessels transferred from the United States to foreign registry and ownership, have been used in violation of the Commission's rules. In order not to encourage a rush of such transfers engendered by a notice period, which would be contrary to the public interest, this amendment is effective immediately without notice of proposed rule making (5 U.S.C. 553(b)(3)).

Part 221 of Title 46 is amended as follows:

1. Paragraphs (a), (b), (c), and (d) of § 221.4 are revised to read as follows:

§ 221.4 Approval of certain transactions covered by section 37, Shipping Act, 1916, as amended.

The Department of Commerce, Maritime Administration, hereby grants approval under section 37 of the Shipping Act, 1916, as amended (40 Stat. 901, 46 U.S.C. 835) to the following transactions:

(a) The sale, mortgage, lease, charter, delivery, or transfer, or agreement for the sale, mortgage, lease, charter, delivery, or transfer, to any person not a citizen of the United States of a vessel having an overall length of 65 feet or less other than a vessel that is or will be engaged in the fishing industry, or any interest therein, owned in whole or in part by any person a citizen of the United States, or of any state, territory, district or possession thereof, and which is not documented under the laws of the United States, or the last documentation of which was not under the laws of the United States; and the transfer to or placing under foreign registry or flag of any such vessel;

(b) The making of an agreement or the effecting of an understanding whereby there is vested in or for the benefit of any person not a citizen of the United States, the controlling interest in or the majority of the voting power in a corporation which is organized under the laws of the United States or any state, territory, district or possession thereof, and which owns a vessel described in paragraph (a) of this section;

(c) The entrance into any contract, agreement or understanding to construct within the United States a vessel of any size other than a vessel that will be engaged in the fishing industry for, or to be delivered to, a person not a citizen of the United States; and the transfer to or placing under foreign registry or flag of any such vessel;

(d) The departure from any port of the United States of any vessel other than a vessel that is or will be engaged in the fishing industry which was constructed in whole or in part within the United States, has not been documented under the laws of the United States, and has never been cleared for any foreign port.

* * * * *

2. The first sentence of paragraph A of section II of the Appendix to § 221.7 is amended to read as follows:

A. Transfer of existing vessels of 3,000 gross tons or over to either foreign ownership or registry or both.

* * * * *

Effective date. This amendment shall become effective March 21, 1974.

(Authority: Sec. 43, Shipping Act, 1916, as amended (75 Stat. 766, 46 U.S.C. 841(a)), Reorganization Plan No. 21 of 1950 (64 Stat. 1273), Reorganization Plan No. 7 of 1961 (75 Stat. 842) as amended by Pub. L. 91–469 (84 Stat. 1036), Department of Commerce Order 10–8 (38 FR 19707, July 23, 1973).

Dated: March 15, 1974.

By Order of the Assistant Secretary of Commerce for Maritime Affairs.

JAMES S. DAWSON, JR.,
Secretary.

[FR Doc.74–6602 Filed 3–20–74;8:45 am]

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[FCC 74–261]

RADIO AND TELEVISION BROADCASTING

Miscellaneous Amendments

In the matter of re-regulation of radio and television broadcasting.

1. As a result of the continuing study by its Task Force on the re-regulation of broadcaseting, the Commission has under consideration the matter of amending certain provisions in Parts 0, 1, 73 and 74 of its rules and regulations.

2. These amendments up-date certain rules, and delete parts of others which are no longer applicable.

3. The following rule changes will be made for the reasons stated:

(a) In § 0.314 *Authority delegated to the Engineers in Charge*, paragraph (b) refers to the delegated authority of EIC's to act on requests for temporary permission to operate standard and FM broadcast stations with licensed operators of lesser grade than required by the rules, or for waivers of other technical requirements of operators at such stations. The rule, as it is stated, inadvertently omits reference to operators at noncommercial educational FM stations.

(1) This omission of a reference to noncommercial educational FM stations could incorrectly be interpreted to mean that this type station is excluded from making such requests or asking for such waivers. This is not the case. Changes are made naming this service in the rules along with standard and FM.

(b) In § 1.547 *Application for permission to use lesser grade operators*, paragraph (a) refers to applications for temporary permission to operate standard and FM broadcast stations with licensed operators of lesser grade than normally required by the Commission's rules. The rule, as it is stated, inadvertently omits reference to noncommercial educational FM stations.

(1) The omission could be incorrectly interpreted to mean that this type station is excluded from making such applications. This is not the case. Changes are made in the rule to specify this service along with standard and FM stations.

(c) When a licensee applies for permission to use a lesser grade operator than normally required by the rules, he must submit, in writing, a request including specific information (§ 1.547(c)(4)). The licensee must show "that at least one first class operator will be employed full time at the station * * *". All AM, FM, and noncommercial educational FM stations are not required to employ a first class operator full time. Section 1.547(c)(4) is amended to conform with existing rules concerning operator requirements.

Amendment is also made which allows for appointment of a substitute operator, on a pro-tem, non-fulltime basis in the event the station's regularly employed operator is incapacitated. The substitute adequately fulfills the station operator requirement for the purposes of the showing.

(1) The operator showing now conforms to the operator's rules in the AM, FM and noncommercial educational FM services. The amendment, allowing a substitute operator for the incapacitated regular operator, clarifies the requirements for substituting temporarily for a station operator who is off duty due to illness or injury.

(d) The requirement that the chief operator at a station to which temporary permission has been granted to operate with licensed operators of a lesser grade than normally required by Commission rules, must mail written certification to the Engineer in Charge of the district regarding the lesser grade operator is deleted. (§ 1.547(d).) This certification sets forth the operator's name and license number, and states he has the ability to perform the normal operation of the station.

(1) Such certification are not needed and elimination of the requirement relieves the Commission and the licensee of an unnecessary paper work burden.

(e) Sections 73.52(a); 73.267(c); 73.567(c) and 73.689(b)(3) state that, in emergencies, AM, FM, noncommercial educational FM and TV stations may be operated at reduced power for a period of up to 10 days without further authority from the Commission. If authorized power cannot be restored within 10 days, written request to the Commission in Washington, D.C. must be made by the licensee for formal authorization to continue lower power operation until the problem is remedied. A change in the rules is made here which permits the permittee or licensee to operate at lower power for 30 days without further authority from the Commission, provided he notifies the Commission not later than the 10th day of lower power operation. In the event that normal power is restored prior to the expiration of the 30 day period, the permittee or licensee will so notify the Commission of this date.

(1) This change relieves the FCC of the administrative detail of formally authorizing, in writing, continued operation on lower power upon receipt of 10 day notifications. The staff will save many work hours via this relief.

(f) Sections 73.71(b); 73.261(b) and 73.651(a)(3) state that AM, FM and TV stations may, in the event it is impossible to adhere to their operating schedules due to situations beyond their control, limit or discontinue operation for 10 days without further authority from the Commission. The rules further state that if the licensee finds it impossible to return to his normal schedule within 10 days, request for authority must be made from the Commission in Washington, D.C. for such additional time as may be deemed necessary to remedy the cause of the problem. A modification in the rules is made here which permits licensees to limit or discontinue their operating schedules for a period of not more than 30 days without further authority from the Commission, provided notification is sent to the Commission no later than the 10th day of the limited or discontinued schedule. During such period the licensee must strictly adhere to the requirements of the station license pertaining to the lighting of antenna structures. Further, the licensee must notify the Commission, in writing, of the date of return to his authorized operating schedule if such occurs prior to the expiration of the 30 day period.

(1) This change relieves the Commission of the administrative detail of formally authorizing, in writing, limited operation or discontinued operation upon receipt of 10 day notifications. The staff will save many work hours via this relief.

(g) Under the existing rules, a station's chief operator must review each day's operating log within prescribed time periods (24 or 72 hours) and sign and date it after completion of such review. (§§ 73.93(h)(4)(iv); 73.265(d)(5)(iv) and 73.565(d)(5)(iv).) The rules are amended to include the time of the chief operator's review, as well as the date and his signature.

(1) The Field Operations Bureau has been unable to determine if the review of the station's operating log by the chief operator has been within the period prescribed. The addition of the time of the log review will enable field inspectors to accurately ascertain if this time provision of the rule is being carried out.

(h) Sections 73.113(e); 73.283(e) and 73.583(e) are amended to include the

V 39 56
MAR 21 74
XUM

time of the chief operator's review of the operating log as well as the date and his signature thereon.

(l) There is a cross reference in these three Operating Log sections to rules regarding Operator Requirements in §§ 73.93(h)(4)(iv); 73.265(d)(5)(iv); 73.565(d)(5)(iv)—(as amended in (g) above). The notation of the time of the chief operator's review of the logs, added to his signature and the date of the review, conforms to the requirements in these revised sections.

(i) Sections 73.114(b) and 73.284(b) are amended to correct a reference to §§ 73.93(e) and 73.265(e) respectively, concerning the weekly inspections of transmitting systems and monitoring equipment.

(l) The references should be to §§ 73.93(j) and 73.265(h) respectively.

(j) Section 73.310(a) is amended to delete the paragraph heading *FFM broadcast station* and the definition therein. In its place is inserted the corrected heading *FM broadcast channel*, followed by a revised definition.

(l) The definition *FFM broadcast station* is a misprint and is removed from the rules. The heading of the section is corrected to read *FM broadcast channel*. The old definition is deleted and a more exact definition is inserted in its place.

(k) In Subpart E—Aural Broadcast STL and Intercity Relay Stations, § 74.533(b)(4) provides that whenever an unattended aural broadcast STL or intercity relay station is in operation appropriate observations shall be made at the receiving end of the circuit, at intervals not exceeding one hour, by the operator. This is changed to require the appropriate observations at intervals not exceeding three hours.

(l) With the performance and reliability of equipment in general use today, we find no need for more frequent observations than once every three hours. Also, this modification conforms with the change from every 30 minute meter readings to three hour meter readings in the operating logging rules in the AM, FM, non-commercial educational FM and TV services.

(l) Section 73.603(a) is amended to correct the frequency band for television channel 69 from 800–809 MHz to 800–806 MHz.

(l) The designation, as shown in the present rule, is incorrect.

(m) In Subpart F—Television Auxiliary Broadcast Stations, Section 74.635(a)(4) states that one of the conditions pertaining to unattended operation of TV intercity relay stations and TV STL stations, is the requirement that appropriate observations shall be made at the receiving end of the circuit, at intervals not exceeding one hour, by the operator. This is changed to require the appropriate observations at intervals of not more than three hours.

(l) There is no need for more frequent observations than once every three hours in view of the performance and reliability of equipment in use today. This modification conforms with the change from 30 minute meter readings to three hour meter readings in the operating log rules in the AM, FM, noncommercial educational FM and TV services.

4. Amendments hereby adopted are editorial revisions, and deletions and relaxations of existing rule provisions which we consider no longer necessary. We believe they will inure to the benefit of many and to the detriment of none, and that they will better serve the public interest. Therefore, prior notice of rulemaking and public procedure thereon, are unnecessary, pursuant to the Administrative Procedure and Judicial Review provisions of 5 U.S.C. 553(b)(3)(B).

5. Therefore, *It is ordered*, That, pursuant to sections 4(i) and 303(j) and (r) of the Communications Act of 1934, as amended, Parts 0, 73, and 74 of the Commission's Rules and Regulations are amended as set forth in the attached Appendix, effective April 29, 1974.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082 (47 U.S.C. 154, 303))

Adopted: March 13, 1974.

Released: March 15, 1974.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Secretary.

PART 0—COMMISSION ORGANIZATION

1. Section 0.314(b) is amended to read as follows:

§ 0.314 Authority delegated to the engineers in charge.

• • • • • •

(b) For temporary permission to operate standard, FM and noncommercial educational FM broadcast stations with licensed operators of lesser grade than normally required by the Commission's rules or for waiver of other technical requirements of operators at such stations.

• • • • •

PART 1—PRACTICE AND PROCEDURE

2. Section 1.547(d) is deleted and (a) and (c)(4) are amended to read as follows:

§ 1.547 Application for permission to use lesser grade operators.

(a) Application for temporary permission to operate standard, FM and noncommercial educational FM broadcast stations with licensed operators of a lesser grade than normally required by the Commission's rules shall be submitted to the Engineer in Charge of the radio district in which the station is located. Such permission will be granted for periods not to exceed 60 days if a proper showing is made, as set forth in this section, and may be renewed upon request only upon the making of an adequate similar showing. A request for extension of the permission previously granted may be granted upon a showing setting forth what continuing efforts have been made to obtain licensed operators of a grade normally required. The Engineer in Charge may terminate this permission in the absence of a satisfactory showing in the written report that adequate efforts have been made to obtain such operators, or for other good reason in the judgment of the Engineer in Charge.

• • • • • •

(c) • • •

(4) A showing that at least one operator of the class required pursuant to §§ 73.93(b), 73.265(b) or 73.556(b)(1), **(2), (3) will be employed full time,** or on a contract basis for those stations using contract operators pursuant to §§ 73.93(c), 73.265(c) or 73.565(c), and that such operator will be available on call at all times in the event of equipment failure. If this operator is incapacitated temporarily, appointment of a qualified operator on a pro-tem non-full-time basis is allowed. He must be available on call at all times in the event of equipment failure.

• • • • • •

PART 73—RADIO BROADCAST SERVICES

3. Section 73.52(a) is amended to read as follows:

§ 73.52 Antenna input power; maintenance of.

(a) The actual antenna input power of each station shall be maintained as near as is practicable to the authorized antenna input power and shall not be less than 90 percent nor greater than 105 percent of the authorized power; except that if, in an emergency, it becomes technically impossible to operate with the authorized power, the station may be operated with reduced power for a period of not more than 30 days without further authority from the Commission, *Provided*, That notification is sent to the Commission in Washington, D.C. not less than the 10th day of the lower power operation. In the event normal power is restored prior to the expiration of the 30 day period, the permittee or licensee will so notify the Commission in Washington, D.C. of this date. If causes beyond the control of the permittee or licensee prevent restoration of authorized power within the allowed period, informal written request shall be made to the Commission in Washington, D.C. no later than the 30th day for such additional time as may be deemed necessary.

• • • • • •

4. Section 73.71(b) is amended to read as follows:

§ 73.71 Minimum operation schedule.

• • • • • •

(b) In the event that causes beyond the control of a permittee or licensee make it impossible to adhere to the operating schedule in paragraph (a) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 30 days without further authority from the Commission, provided that notification is sent to the Commission in Washington, D.C. no later than the 10th day of limited or discontinued operation. During such

period, the permittee or licensee shall continue to adhere to the requirements of the station license pertaining to the lighting of antenna structures. In the event normal operation is restored prior to the expiration of the 30 day period, the permittee or licensee will so notify the Commission in Washington, D.C. of this date. If causes beyond the control of the permittee or licensee make it impossible to comply within the allowed period, informal written request shall be made to the Commission in Washington, D.C., no later than the 30th day for such additional time as may be deemed necessary.

5. Section 73.93(h)(4)(iv) is amended to read as follows.

§ 73.93 Operator requirements.

• • • • • •

(h) • • •

(4) • • •

(iv) A review of completed operating logs to determine whether technical operation of the station has been in accordance with the rules and terms of the station authorization. After review, the chief operator shall sign the log and indicate the date and time of such review. If the review of the operating logs indicates technical operation of the station is in violation of the rules or terms of the station authorization, he shall promptly initiate corrective action. The review of each day's operating log shall be made within 24 hours, except that, if the chief operator is not on duty during a given 24 hour period, the logs must be reviewed within 2 hours after his next appearance for duty. In any case, the time before review shall not exceed 72 hours.

• • • • • •

6. Section 73.113(e) is amended to read as follows:

§ 73.113 Operating log.

• • • • • •

(e) If required by § 73.93(h)(4)(iv), each completed operating log shall bear a signed notation by the station's chief operator of the results of the review of that log, and show the date and time of such review.

7. Section 73.114(b) is amended to read as follows:

§ 73.114 Maintenance log.

• • • • • •

(b) Upon completion of the inspection required by § 73.93(j), the inspecting operator shall enter a signed statement that the required inspection has been made noting in detail the tests, adjustments, and repairs which were accomplished in order to insure operation in accordance with the provisions of this subpart and in the current instrument of authorization of the station. The statement shall also specify the amount of time, exclusive of travel time to and from the transmitter, which was devoted to such inspection duties. If complete repair could not be effected, the statement shall set forth in detail the items of equipment concerned, the manner and degree in which they are defective, and the reason for failure to make satisfactory repairs.

• • • • • •

8. Section 73.261(b) is amended to read as follows:

§ 73.261 Time of operation.

• • • • • •

(b) In the event that causes beyond the control of a permittee or licensee make it impossible to adhere to the operating schedule in paragraph (a) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 30 days without further authority from the Commission, *Provided*, That notification is sent to the Commission in Washington, D.C. no later than the 10th day of limited or discontinued operation. During such period, the permittee or licensee shall continue to adhere to the requirements of the station license pertaining to the lighting of antenna structures. In the event normal operation is restored prior to the expiration of the 30 day period, the permittee or licensee will so notify the Commission in Washington, D.C. of this date. If the causes beyond the control of the permittee or licensee make it impossible to comply within the allowed period, informal written request shall be made to the Commission in Washington, D.C., no later than the 30th day for such additional time as may be deemed necessary.

9. Section 73.265(d)(5)(iv) is amended to read as follows:

§ 73.265 Operator requirements.

• • • • • •

(d) • • •

(iv) A review of completed operating logs to determine whether technical operation of the station has been in accordance with the rules and terms of the station authorization. After review, the chief operator shall sign the log and indicate the date and time of such review. If the review of the operating logs indicates technical operation of the station is in violation of the rules or terms of the station authorization, he shall promptly initiate corrective action. The review of each day's operating logs shall be made within 24 hours, except that, if the chief operator is not on duty during a given 24 hour period, the logs must be reviewed within 2 hours after his next appearance for duty. In any case, the time before review cannot exceed 72 hours.

• • • • • •

10. Section 73.267(c) is amended to read as follows:

§ 73.267 Operating power, determination and maintenance of;

• • • • • •

(c) *Reduced power.* In the event it becomes technically impossible to operate with authorized power, the station may be operated with reduced power for a period of not more than 30 days without further authority from the Commission, *Provided*, That notification is sent to the Commission in Washington, D.C. not later than the 10th day of the lower power operation. In the event normal power is restored prior to the expiration of the 30 day period, the permittee or licensee will so notify the Commission in Washington, D.C. of this date. If causes beyond the control of the permittee or licensee prevent restoration of authorized power within the allowed period, informal written request shall be made to the Commission in Washington, D.C. no later than the 30th day for such additional time as may be deemed necessary.

11. Section 73.283(e) is amended to read as follows:

§ 73.283 Operating log.

• • • • • •

(e) If required by § 73.265(d)(5)(iv), each completed operating log shall bear a signed notation by the station's chief operator of the results of the review of that log, and show the date and time of such review.

12. Section 73.284(b) is amended to read as follows:

§ 73.284 Maintenance log.

• • • • • •

(b) Upon completion of the inspection required by § 73.265(h), the inspecting operator shall enter a signed statement that the required inspection has been made, noting in detail the tests, adjustments, and repairs which were accomplished in order to insure operation in accordance with the provisions of this subpart and the current instrument of authorization of the station. The statement shall also specify the amount of time, exclusive of travel time to and from the transmitter, which was devoted to such inspection duties. If complete repair could not be effected, the statement shall set forth in detail the items of equipment concerned, the manner and degree in which they are defective, and the reasons for failure to make satisfactory repairs.

• • • • • •

13. In § 73.310 the definition *FM broadcast station* is deleted and a new definition is inserted in lieu thereof as follows:

§ 73.310 Definitions.

(a) *Frequency modulation.*

• • • • • •

FM broadcast channel. A band of frequencies 200 kHz wide and designated by its center frequency. Channels for FM broadcast stations begin at 88.1 MHz and continue in successive steps of 200 kHz's to and including 107.9 MHz.

• • • • • •

14. Section 73.565(d)(5)(iv) is amended to read as follows:

§ 73.565 Operator requirements.

• • • • • •

(d) • • •

(5) • • •

(iv) A review of completed operating logs to determine whether technical operation of the station has been in accordance with the rules and terms of the station authorization. After review, the chief operator shall sign the log and indicate the date and time of such review. If

V 39 56
MAR 21 74

the review of operating logs indicates technical operation of the station is in violation of the rules or terms of the station authorization, he shall promptly initiate corrective action. The review of each day's operating logs shall be made within 24 hours, except that, if the chief operator is not on duty during a given 24 hours period, the logs must be reviewed within 2 hours after his next appearance for duty. In any case, the time before review cannot exceed 72 hours.

• • • • •

15. Section 73.567(c) is amended to read as follows:

§ 73.567 Operating power: determination and maintenance of.

• • • • •

(c) *Reduced power.* If a station licensed for transmitter power output greater than 10 watts finds it technically impossible to operate with authorized power, the station may be operated with reduced power for a period of not more than 30 days without further authority from the Commission, *Provided,* That notification is sent to the Commission in Washington, D.C. not later than the 10th day of the lower power operation. In the event normal power is restored prior to the expiration of the 30 day period, the permittee or licensee will so notify the Commission in Washington, D.C. of this date. If causes beyond the control of the permittee or licensee prevent restoration of authorized power within the allowed period, informal written request shall be made to the Commission in Washington, D.C. no later than the 30th day for such additional time as may be deemed necessary.

16. Section 73.583(e) is amended to read as follows:

§ 73.583 Operating log.

• • • • •

(e) If required by § 73.565(d)(5)(iv), each completed operating log shall bear a signed notation by the station's chief operator of the results of the review of that log, and show the date and time of such review.

17. Section 73.603(a) is amended to read as follows:

§ 73.603 Numerical designation of television channels.

(a):

Channel No.	*Frequency band (MHz)*
•	•
69	800–806
•	•

18. Section 73.651(a)(3) is amended to read as follows:

§ 73.651 Time of operation.

(a) • • •

(3) In the event that causes beyond the control of a permittee or licensee make it impossible to adhere to the operating schedule in paragraph (a) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 30 days without further authority from the Commission, *Provided,* That notification is sent to the Commission in Washington, D.C. no later than the 10th day of limited or discontinued operation. During such period, the permittee or licensee shall continue to adhere to the requirements of the station license pertaining to the lighting of antenna structures. In the event normal operation is restored prior to the expiration of the 30 day period, the permittee or licensee will so notify the Commission in Washington, D.C. of this date. If the causes beyond the control of the permittee or licensee make it impossible to comply within the allowed period, informal written request shall be made to the Commission in Washington, D.C., no later than the 30th day for such additional time as may be deemed necessary.

• • • • •

19. Section 73.689(b)(3) is amended to read as follows:

§ 73.689 Operating power.

• • • • •

(b) • • •

(3) *Reduced power.* In the event it becomes technically impossible to operate with authorized power, the station may be operated with reduced power for a period of not more than 30 days without further authority from the Commission, *Provided,* That notification is sent to the Commission in Washington, D.C. not later than the 10th day of the lower power operation. In the event the normal power is restored prior to the expiration of the 30 day period, the permittee or licensee will so notify the Commission in Washington, D.C. of this date. If causes beyond the control of the permittee or licensee prevent restoration of authorized power within the allowed period, informal written request shall be made to the Commission in Washington, D.C. no later than the 30th day for such additional time as may be deemed necessary.

• • • • •

PART 74—EXPERIMENTAL, AUXILIARY, AND SPECIAL BROADCAST, AND OTHER PROGRAM DISTRIBUTIONAL SERVICES

20. Section 74.533(b)(4) is amended to read as follows:

§ 74.533 Remote control and unattended operation.

• • • • •

(b) • • •

(4) Whenever an unattended aural broadcast STL or intercity relay station is in operation, appropriate observations shall be made at the receiving end of the circuit at intervals not exceeding 3 hours by a person designated by and under the control of the licensee and need not be a licensed operator under Part 13 (Commercial Radio Operators) of our rules.

• • • • •

21. Section 74.635(a)(4) is amended to read as follows:

§ 74.635 Unattended operation.

(a) • • •

(4) In the case of television intercity relay stations and television STL stations, appropriate observations shall be made at intervals not exceeding 3 hours during the period of their operation, at the receiving end of the circuit, by a person holding a valid first or second class radiotelephone operator license who shall immediately institute measures sufficient to assure prompt correction of any condition of improper operation that is observed; and

[Docket No. 19663; FCC 74-270]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations; Assignment

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Craig, Fort Collins, Greeley, Pueblo, Steamboat Springs, Vail and Windsor, Colorado, and Laramie and Torrington, Wyoming), RM-1895, RM-1896.

1. The Commission has before it the notice of proposed rulemaking and Memorandum Opinion and Order adopted in this proceeding on December 20, 1972 (38 FR 805) and the comments and reply comments filed in response by Harry P. Brewer, Colorado RG, Inc., and Charles R. Tuma.

2. At issue in this proceeding is the making of additional Class C FM assignments in northern Colorado. When adopting the earlier document the Commission concluded that the making of three new Class C assignments in this area was not warranted but that two such assignments might well be. Thus, comments were invited on such an approach and on the choice to be made among the three communities vying for assignments: Greeley, Fort Collins and Windsor, Colorado. To accomplish the proposed assignments, other changes in the FM Table would be required effecting a substitute assignment in Craig, Colorado, and others in Laramie and Torrington, Wyoming. Specifically, the Notice proposed assigning Channel 241 to Greeley, Colorado, and Channel 256 to Fort Collins or Windsor, Colorado. No counterproposals have been advanced urging that the assignments be made to other communities, so the choice before us is whether to make the two assignments and if so, where to make them. All of the parties have confirmed their intention to proceed should these channels be assigned.

3. These three communities are in the same general area so that the use of each channel would bring excellent reception service to all of them. They extend on a line running northwest to southeast, with Windsor in the center and the others 11 miles away from it, Fort Collins to the northwest and Greeley to the southeast. The information submitted in response to the Notice confirms the view earlier expressed tentatively, namely, that two additional assignments are needed in this fast growing area. Since the assignments could be made without serious preclusionary consequences and each channel could be used consistent with applicable spacing and other engineering requirements, we shall proceed to assign Channels 241 and 256.

4. Both Fort Collins and Greeley are substantial communities that have existing full-time radio service. Windsor, on the other hand, is a small community that has only a daytime AM station. Each of the parties urges an approach that responds to its needs while in effect providing the other two with the "leftovers". For the most part, the significant facts are not in dispute, so we need not specifically set forth all of the separate arguments of the parties. Instead, we shall make our own evaluation of the respective needs of the communities.

5. Fort Collins, the largest of the three communities, had a 1970 population of 43,337. It has two occupied FM channels and two AM stations—one full-time and one daytime-only. Ordinarily, a community of less than 50,000 population is assigned no more than two channels, but Fort Collins' fast growth pattern indicates that it may have reached 50,000 already. Even if it has not, it soon would be expected to, and we need to take such facts into consideration when making assignments. We are also mindful of the importance of Fort Collins in the surrounding area and its position as seat of Larimer County. Communities of 50,000 to 100,000 are normally assigned 2 to 4 channels, and we are of the view that Fort Collins should not be precluded from obtaining a third FM assignment because its 1970 population was below the dividing line.[1]

6. Greeley is not quite as large as Fort Collins, having a population of 38,902, but unlike Fort Collins, it has only one FM assignment. It also has two full-time AM stations. A second FM assignment would be in keeping with its size and position as county seat. Windsor, on the other hand, has a population of only 1,564. In its favor is the lack of an FM assignment and the lack of a local full-time radio facility. However, it is indeed small and particularly where a Class C channel is involved[2], a question arises about the appropriateness of such an assignment. The parties have cited cases on behalf of or in opposition to making a Class C assignment to a community of this size. Charles R. Tuma (Fort Collins proponent) referred to our general policy to assign Class C channels to larger communities which began with the further notice of proposed rulemaking in the FM allocations proceeding (FCC 62-867) and to the Third Report and Memorandum Opinion and Order in that proceeding, 23 R.R. 1859 (1963). It was Tuma's view that Windsor was neither large enough in itself, nor was it in the category of a small community needing to reach a large surrounding rural area in order to survive. He also pointed to the denial of a requested assignment at Hartselle, Alabama, 22 R.R. 2d 1653, 1660, because, inter alia, it was in the same county as and received service from another larger community. Harry P. Brewer, on behalf of Windsor's needs, cited the Commission policy to give major priority to a first FM service as for example in Crystal River, Florida, FCC 73-158. While acknowledging the usual practice of assigning Class C channels to larger communities, he pointed out that the Commission has assigned Class C channels to smaller communities where circumstances warrant, as for example in Harrisonville, Missouri, 6 F.C.C. 2d 239, 8 R.R. 2d 1724 (1967). Because of the wide disparity in factual situations, there are instances in which varying approaches have been followed. Each of the views now before us has some support in the cases, and it is true that we could evaluate matters so as to finally adjudicate the position of Windsor without a hearing on applications. However, this is a question which in this instance is best resolved in a hearing on competing applications. If we assigned the channels to Greeley and Fort Collins, the Windsor applicant could file for either and have its arguments about Windsor's needs heard. While there are some restrictions on where the transmitter sites for the two channels would have to be located, appropriate sites appear to be available from which required city coverage could be provided to either Fort Collins and Windsor on the one hand or to Greeley and Windsor on the other. Mr. Brewer mentions the McKenzie, Tennessee FM proceeding, 5 R.R. 2d 1530 (1965), as indicating that the Commission is not required to leave matters for resolution based on the applications which are filed. The point is valid enough but inapplicable here. Where a choice can better be made in a rulemaking proceeding, we are not precluded from so acting, but the reverse is also true. If it is better to defer matters, that possibility is also open to us. Unlike the McKenzie case where the larger community had no FM assignment and the smaller one already did, the choice is not so easily made on the showings now before us. There are arguments on both sides that need further airing and this is only efficiently possible in a hearing on competing applications.

7. If Windsor were given either assignment, it would work an absolute preclusion for one of the other communities. This is the case because the rules do not permit the removal of a channel for use in a listed community. Windsor is not listed in the FM Table, so it is not so precluded. There is one final point in connection with the use of the channel at Windsor which needs to be mentioned. The charge has been made considering the site a Windsor station would use and the smallness of Windsor in comparison to other populations which would be served by a Class C station, a question would exist about whether the proposal in fact would realistically be for another larger community instead. See Berwick Broadcasting Corp., 17 R.R. 2d 884 (1969). Charles R. Tuma asserted that the site would have to be about 11 miles northeast of Windsor and that Fort Collins is 11 miles northeast of Windsor. The fact is that Fort Collins is 11 miles northwest of Windsor, not northeast. Even so, the site would permit a station to provide a city-grade signal to Windsor and Fort Collins. This is a question best answered in a hearing, and in any event, is not one we need to consider now in view of our decision on how to proceed. As to the viability of Windsor, both Tuma and Brewer cite the Baytown, Texas TV assignment case, 11 F.C.C. 941, 12 R.R. 2d 1581 (1968). Tuma reads the case as indicating that the Commission will not assign a channel to a small community where the facts tend to indicate that the station would realistically serve a larger community. Brewer contends that where the Commission has doubts on this score, it will require a showing, and since we did not, that the question did not arise. For a number of reasons television precedents, including this one, are not always determinative in FM allocations. Even if it were directly pertinent, this matter is incorporated under consideration of a possible Berwick issue as described above and does not require separate or different treatment here.

8. We shall assign Channel 241 to Greeley, Colorado, and Channel 256 to Fort Collins, Colorado. This will necessitate a change in Channel 236 at Craig, Colorado, for which Channel 273 will be substituted and a change in Channel 257A at Torrington, Wyoming, for which Channel 252A will be substituted. These channels are vacant as is Channel 241 at Laramie, Wyoming for which Channel 236 will be substituted.[3] Channel 255 at Laramie is not vacant, but the permittee accepted its construction permit subject to the substitution of Channel 275, as is being done. Therefore, a show cause order need not be issued. Instead, we shall order the change in channel and shall issue a modified permit specifying Channel 275.

9. Accordingly, *it is ordered,* Pursuant to authority contained in Sections 4(i), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, that the FM Table of Assignments § 73.202(b) of the Commission's Rules is amended effective April 29, 1974, insofar as the cities listed are concerned to read as follows:

[1] In his petition in support of an additional assignment for Fort Collins, Charles R. Tuma added the student body at Colorado State University to the listed population to get a total of over 60,000 residents. This is incorrect, for as in previous censuses, students are included in the population figures for the city where the college is located. However, as described above, we do not need to rely on such an increment in Fort Collins' population figure.

[2] A Class C channel is involved because the only Class A assignment which could be made would require a site 11 miles from Windsor. From this site, a Class A station would be unable to provide the requisite signal level to Windsor.

[3] The applicant now seeking use of Channel 241 at Laramie will need to amend its application to specify the new channel.

V 39 I 56 MAR 21 74 XUM

City	Channel No.
Craig, Colo.	229, 273
Fort Collins, Colo.	227, 256, 300
Greeley, Colo.	222, 241

Title 17—Commodity and Securities Exchange

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. IC-8267, S7-435]

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

Requirements that Registered Investment Companies Maintain Fidelity Bonds for Certain Officers and Employees

On September 7, 1973, the Securities and Exchange Commission published notice (Investment Company Act of 1940 Release No. 7980 [38 FR 26133]) that it had under consideration the adoption of a revised amendment to Rule 17g–1 [CFR 270.17g–1] under the Investment Company Act of 1940 ("Act") [1] and invited all interested persons to submit their views and comments on the proposal. The Commission has considered all of the comments and suggestions received and has determined to adopt the amendment of Rule 17g–1 in the form set forth below. The amendment to Rule 17g–1 is adopted pursuant to the authority granted to the Commission by Sections 6(c), 17(d), 17(g) and 38(a) of the Act. [15 U.S.C. 80a–6(c), 80a–17(d), 80a–17(g), 80a–37(a)].

Section 17(g) of the Act authorizes the Commission to require by rules and regulations, for the protection of investors, that any officer and any employee of a registered management investment company be bonded by a reputable fidelity insurance company against larceny and embezzlement if such officer or employee has access, singly or jointly with others, to securities or funds of any registered investment company, either directly or through authority to draw upon such funds, or to direct generally the disposition of such securities.

[1] Investment Company Act of 1940 Release No. 7980 gave notice of revisions of a proposed amendment to Rule 17g–1 published for comment in Investment Company Act of 1940 Release No. 7170 (April 5, 1972) [37 FR 7993].

Rule 17g–1, as formerly in effect, required a registered management investment company to provide and maintain a fidelity bond in such reasonable amount as a majority of its board of directors who were not covered persons would determine, subject to modification by the Commission as to the amount, type, form and coverage of such bond. It also required, among other things, that a copy of the bond be filed with the Commission, and that an investment company notify the Commission immediately upon cancellation or termination of its bond.

COVERAGE AND SCOPE

The amendment to the Rule primarily sets forth minimum required amounts of coverage (paragraph (d)) and permits a registered management investment company to be named as an insured in a single or joint insured bond (paragraph (b)). A single insured bond names the registered management investment company as the only insured. A joint insured bond, pursuant to the amended Rule, could name as insureds the registered management investment company and one or more other parties, provided that such parties shall be limited to (i) persons engaged in the management or distribution of the shares of the registered management investment company, (ii) other registered management investment companies which are managed and/or whose shares are distributed by the same persons (or affiliates of such persons), (iii) persons who are engaged in the management and/or distribution of shares of companies included in (ii) above, (iv) affiliated persons of any registered management investment company named in the bond or of any person included in (i) or (iii) above who are engaged in the administration of any registered management investment company named as insured in the bond, and (v) any trust, pension, profit-sharing or other benefit plan for officers, directors or employees of persons named in the bond.[2] Persons engaged in the "administration" of registered management investment companies may include any persons who perform services for the investment company or are involved in the distribution of its shares, including, for example, in-house service agents, depositors, sponsors and others. The use of joint insured bonds by investment companies is permissive rather than mandatory.[3]

[2] For purposes of subparagraph (b)(3)(v), "employees of persons named in the bond" includes sales representatives of any person included in (b)(3)(i) through (b)(3)(v).

[3] There may be situations in which it is necessary or appropriate in the interest of investors and consistent with the policies and provisions of the Act for persons not included in paragraph (b) of the Rule to be named as joint insureds under the bond. In such instances the Commission will consider an application for exemptive relief to allow such persons to be included.

In this regard, the Commission has also added paragraph (j) to Rule 17g–1 in order to remove any question as to the status of joint insured bonds and the participants therein under Section 17(d) of the Act and Rule 17d–1 thereunder. Section 17(d) and Rule 17d–1(a) [17 CFR 17d–1(a)] in pertinent part, prohibit any affiliated person of or principal underwriter for a registered investment company, or any affiliated person of such person, from participating in any joint transaction, enterprise or other arrangement in which such registered investment company, is also a participant unless an application regarding such joint transaction, enterprise or other arrangement has been filed with, and approved by, the Commission. In view of the possibility that joint insured bonds may constitute joint arrangements as contemplated by section 17(d) and Rule 17d–1(a), paragraph (j) has been added to the Rule to exempt from the provisions of Section 17(d) and the rules thereunder any joint insured bonding arrangement which complies with the provisions of Rule 17d–1, as amended.

The amended Rule also sets forth certain minimum factors to be considered by the directors of investment companies who are not "interested" persons in approving the amount and form of coverage of the bond (paragraph (d)) and the portion of the premium to be paid by investment companies covered under joint insured bonds (paragraph (e)). In approving the form and amount of the bond, the non-interested directors of investment companies should consider, not less than once every twelve months, all relevant factors including, but not limited to, the value of the company's assets to which any covered person may have access, the custody arrangements for such assets, and the nature of the Company's portfolio securities. With respect to approving the portion of the premium to be paid by an investment company covered under a joint insured bond, some of the factors which presumably would be considered include the number of other joint insureds, the business of these insureds, the amount of the bond and premium, and the economies, if any, to be derived from joint, rather than single, bonding coverage.

Pursuant to the amendment, each party named as an insured in a joint bond is required to enter into an agreement with all of the other named insureds providing that in the event of recovery under the bond as a result of a loss sustained by the investment company and one or more other insureds, the investment company shall receive an equitable and proportionate share of the recovery, but at least equal to the amount which it would have received had it maintained a single insured bond with minimum coverage (paragraph (f)).

NOTIFICATION AND FILING

The amendment to Rule 17g–1 also extends the period for notification of cancellations, terminations and modifications of individual and single insured bonds to not less than sixty days prior

to the effective date of cancellation, termination or modification (paragraph (c)). In order to to provide the protections for jointly insured investment companies which presently exist for solely insured investment companies, paragraph (c) further requires that a joint insured bond shall provide that the fidelity insurance company shall furnish to each named investment company under the bond and to the Commission notice of cancellation, termination or modification of the bond not less than sixty days prior to the effective date of cancellation, termination or modification. This paragraph also requires that joint bonds provide that the fidelity insurance company furnish each insured investment company with a copy of the bond and any amendment thereto, a copy of each formal filing of a claim under the bond by any other named insured, and notification of the terms of the settlement of each such claim prior to the execution of such settlement.[4]

Paragraph (g) of the amended Rule sets forth certain filing and reporting requirements for investment companies covered under either single or joint insured bonds similar to those requirements imposed by the former Rule. With respect to the filing requirements of this paragraph, investment companies should attempt to obtain copies of their bonds, and amendments thereto, promptly after execution, and should file the required documents within 10 days after receipt of the executed bond or any executed amendment to such bond.

Registered management investment companies are also required to conform their fidelity bonding arrangements to the provisions of Rule 17g–1, as amended, at the next anniversary date of their existing fidelity bonds, but not later than one year from the effective date of this amendment.

COMMISSION ACTION

The Securities and Exchange Commission pursuant to the authority granted to it by sections 6(c), 17(d), 17(g) and 38(a) of the Investment Company Act of 1940 hereby amends Part 270 of Chapter II of Title 17 of the Code of Federal Regulations by amending § 270.17g–1. The text of § 270.17g–1, as amended, is as follows:

§ 270.17g–1 Bonding of officers and employees of registered management investment companies.

(a) Each registered management investment company shall provide and maintain a bond which shall be issued by a reputable fidelity insurance company, authorized to do business in the place where the bond is issued, against larceny and embezzlement, covering each officer and employee of the investment company, who may singly, or jointly with others, have access to securities or funds of the investment company, either directly or through authority to draw upon such funds or to direct generally the disposition of such securities, unless the officer or employee has such access solely through his position as an officer or employee of a bank (hereinafter referred to as "covered persons").

(b) The bond may be in the form of (1) an individual bond for each covered person or a schedule or blanket bond covering such persons, (2) a blanket bond which names the registered management investment company as the only insured (hereinafter referred to as "single insured bond") or (3) a bond which names the registered management investment company and one or more other parties as insureds (hereinafter referred to as a "joint insured bond"), such other insured parties being limited to (i) persons engaged in the management or distribution of the shares of the registered investment company, (ii) other registered investment companies which are managed and/or whose shares are distributed by the same persons (or affiliates of such persons), (iii) persons who are engaged in the management and/or distribution of shares of companies included in paragraph (b)(3)(ii) of this section, (iv) affiliated persons of any registered management investment company named in the bond or of any person included in paragraph (b)(3)(i) or (b)(3)(iii) of this section hereinabove who are engaged in the administration of any registered management investment company named as insured in the bond, and (v) any trust, pension, profit-sharing or other benefit plan for officers, directors or employees of persons named in the bond.

(c) A bond of the type described in paragraphs (b)(1) or (b)(2) of this section shall provide that it shall not be cancelled, terminated or modified except after written notice shall have been given by the acting party to the affected party and to the Commission not less than sixty days prior to the effective date of cancellation, termination or modification. A joint insured bond described in paragraph (b)(3) of this section shall *Provide,* That (1) it shall not be cancelled terminated or modified except after written notice shall have been given by the acting party to the affected party, and by the fidelity insurance company to all registered investment companies named as insureds and to the Commission, not less than sixty days prior to the effective date of cancellation, termination, or modification and (2) the fidelity insurance company shall furnish each registered management investment company named as an insured with (i) a copy of the bond and any amendment thereto promptly after the execution thereof, (ii) a copy of each formal filing of a claim under the bond by any other named insured promptly after the receipt thereof, and (iii) notification of the terms of the settlement of each such claim prior to the execution of the settlement.

(d) The bond shall be in such reasonable form and amount as a majority of the board of directors of the registered management investment company who are not "interested persons" of such investment company as defined by section 2(a)(19) of the Act shall approve as often as their fiduciary duties require, but not less than once every twelve months, with due consideration to all relevant factors including, but not limited to, the value of the aggregate assets of the registered management investment company to which any covered person may have access, the type and terms of the arrangements made for the custody and safekeeping of such assets, and the nature of the securities in the company's portfolio; provided, however, that (1) the amount of a single insured bond shall be at least equal to an amount computed in accordance with the following schedule:

Amount of Registered Management Investment Company Gross Assets—at the end of the most recent fiscal quarter prior to date of determination (In Dollars)	*Minimum Amount of Bond (In Dollars)*
Up to 500,000	50,000.
500,000 to 1,000,000	75,000.
1,000,000 to 2,500,000	100,000.
2,500,000 to 5,000,000	125,000.
5,000,000 to 7,500,000	150,000.
7,500,000 to 10,000,000	175,000.
10,000,000 to 15,000,000	200,000.
15,000,000 to 20,000,000	225,000.
20,000,000 to 25,000,000	250,000.
25,000,000 to 35,000,000	300,000.
35,000,000 to 50,000,000	350,000.
50,000,000 to 75,000,000	400,000.
75,000,000, to 100,000,000	450,000.
100,000,000 to 150,000,000	525,000.
150,000,000 to 250,000,000	600,000.
250,000,000 to 500,000,000	750,000.
500,000,000 to 750,000,000	900,000.
750,000,000 to 1,000,000,000	1,000,000.
1,000,000,000 to 1,500,000,000	1,250,000.
1,500,000,000 to 2,000,000,000	1,500,000.
Over 2,000,000,000	1,500,000 plus 200,000 for each 500,000,000 of gross assets up to a maximum bond of 2,500,000.

[4] Any provision of any single or joint insured bond which provide for the waiver of any of the notification requirements imposed by this Rule shall be void pursuant to Section 47(a) [15 USC 80a–46(a)] of the Act. Section 47(a) of the Act provides that—

Any condition, stipulation, or provision binding any person to waive compliance with any provision of this title or with any rule, regulation or order thereunder shall be void.

V 39 I 56 MAR 21 74 XUM

(2) A joint insured bond shall be in an amount at least equal to the sum of (i) the total amount of coverage which each registered management investment company named as an insured would have been required to provide and maintain individually pursuant to the schedule hereinabove had each such registered management investment company not been named under a joint insured bond, plus (ii) the amount of each bond which each named insured other than a registered management investment company would have been required to provide and maintain pursuant to federal statutes or regulations had it not been named as an insured under a joint insured bond.

(e) No premium may be paid for any joint insured bond or any amendment thereto unless a majority of the board of directors of each registered management investment company named as an insured therein who are not "interested persons" of such company shall approve the portion of the premium to be paid by such company, taking all relevant factors into consideration including, but not limited to, the number of the other parties named as insured, the nature of the business activities of such other parties, the amount of the joint insured bond, and the amount of the premium for such bond, the ratable allocation of the premium among all parties named as insureds, and the extent to which the share of the premium allocated to the investment company is less than the premium such company would have had to pay if it had provided and maintained a single insured bond.

(f) Each registered management investment company named as an insured in a joint insured bond shall enter into an agreement with all of the other named insureds providing that in the event recovery is received under the bond as a result of a loss sustained by the registered management investment company and one or more other named insureds, the registered management investment company shall receive an equitable and proportionate share of the recovery, but at least equal to the amount which it would have received had it provided and maintained a single insured bond with the minimum coverage required by paragraph (d)(1) of this section.

(g) Each registered management investment company shall:

(1) File with the Commission (i) within 10 days after receipt of an executed bond of the type described in paragraphs (b)(1) or (b)(2) of this section or any amendment thereof, (*a*) a copy of the bond, (*b*) a copy of the resolution of a majority of the board of directors who are not "interested persons" of the registered management investment company approving the form and amount of the bond, and (c) a statement as to the period for which premiums have been paid; (ii) within 10 days after receipt of an executed joint insured bond, or any amendment thereof, (*a*) a copy of the bond, (*b*) a copy of the resolution of a majority of the board of directors who are not "interested persons" of the registered management investment company approving the amount, type, form and coverage of the bond and the portion of the premium to be paid by such company, (c) a statement showing the amount of the single insured bond which the investment company would have provided and maintained had it not been named as an insured under a joint insured bond, (*d*) a statement as to the period for which premiums have been paid, and (e) a copy of each agreement between the investment company and all of the other named insureds entered into pursuant to paragraph (f) of this section; and (iii) a copy of any amendment to the agreement entered into pursuant to paragraph (f) of this section within 10 days after the execution of such amendment,

(2) File with the Commission, in writing, within five days after the making of any claim under the bond by the investment company, a statement of the nature and amount of the claim,

(3) File with the Commission, within five days of the receipt thereof, a copy of the terms of the settlement of any claim made under the bond by the investment company, and

(4) Notify by registered mail each member of the board of directors of the investment company at his last known residence address of (i) any cancellation, termination or modification of the bond, not less than forty-five days prior to the effective date of the cancellation or termination or modification, (ii) the filing and of the settlement of any claim under the bond by the investment company, at the time the filings required by paragraph (g) (2) and (3) of this section are made with the Commission, and (iii) the filing and of the proposed terms of settlement of any claim under the bond by any other named insured, within five days of the receipt of a notice from the fidelity insurance company.

(h) Each registered management investment company shall designate an officer thereof who shall make the filings and give the notices required by paragraph (g) of this section.

(i) Where the registered management investment company is an unincorporated company managed by a depositor, trustee or investment adviser, the terms "officer" and "employee" shall include, for the purposes of this rule, the officers and employees of the depositor, trustee, or investment adviser.

(j) Any joint insured bond provided and maintained by a registered management investment company and one or more other parties shall be a transaction exempt from the provisions of section 17(d) of the Act and the rules thereunder, provided that the terms and provisions of such bond comply with the provisions of this rule, and further provided that the terms and provisions of any agreement required by paragraph (f) of this section comply with the provisions of that paragraph.

(k) At the next anniversary date of an existing fidelity bond, but not later than one year from the effective date of this rule, arrangements between registered management investment companies and fidelity insurance companies and arrangements between registered management investment companies and other parties named as insureds under joint insured bonds which would not permit compliance with the provisions of this rule shall be modified by the parties so as to effect such compliance.

(Secs. 6(c), 17(d), 17(g), 38(a); 54 Stat. 800, 815, 84 Stat. 1421, 54 Stat. 841; (15 U.S.C. 80a-6(c), 80a-17(d), 80a-17(g), 80(a)-37(a)))

This amendment shall become effective on April 21, 1974.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

MARCH 14, 1974.

Title 21—Food and Drugs

CHAPTER II—DRUG ENFORCEMENT ADMINISTRATION, DEPARTMENT OF JUSTICE

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

Exempt Chemical Preparations

The Administrator of the Drug Enforcement Administration has received applications pursuant to § 1308.23 of Title 21 of the Code of Federal Regulations requesting that several chemical preparations containing controlled substances be granted the exemptions provided for in § 1308.24 of Title 21 of the Code of Federal Regulations.

The Administrator hereby finds that each of the following chemical preparations and mixtures is intended for laboratory, industrial, educational, or special research purposes, is not intended for general administration to a human being or other animal, and either (a) contains no narcotic controlled substance and is packaged in such a form or concentration that the package quantity does not present any significant potential abuse, or (b) contains either a narcotic or nonnarcotic controlled substance and one or more adulterating or denaturing agents in such a manner, combination, quantity, proportion or concentration, that the preparation or mixture does not present any potential for abuse. If the preparation or mixture is formulated in such a manner that it incorporates methods of denaturing or other means so that the preparation or mixture is not liable to be abused, and so that the narcotic substance cannot in practice be removed. The Administrator further finds that exemption of the following chemical preparations and mixtures is consistent with the public health and safety as well as the needs of researchers, chemical analysts, and suppliers of these products.

Therefore, under the authority vested in the Attorney General by sections 301 and 501(b) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 821 and 871(b)) and delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations (see 38 FR 18380, July 2, 1973) the Administrator hereby orders that Part 1308 of Title 21 of the Code of Federal Regulations be amended as follows:

By amending § 1308.24(i) by adding the following chemical preparations:

§ 1308.24 Exempt chemical preparations.

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

Subchapter G—Engineering and Traffic Operations

PART 652—BIKEWAYS AND WALKWAYS IN CONJUNCTION WITH FEDERAL AND FEDERAL-AID HIGHWAYS

By virtue of authority contained in 23 U.S.C. 106, 217 and 315, the Federal Highway Administration hereby issues this regulation. In that this material is a matter relating to a grant program, the relevant provisions of the Administrative Procedure Act (5 U.S.C. 553), requiring notice of proposed rulemaking opportunity for public participation and delay in effective date are inapplicable. Further, delay in promulgation of this regulation would hinder the use of funds appropriated for use in fiscal year 1974 for bikeways and walkways

However, because of public interest in this matter, interested persons may submit comments on this regulation to the Associate Administrator for Engineering and Traffic Operations, Federal Highway Administration, Washington, D.C. 20590, Attention: Bikeways, FHWA Docket No. 74-1, by April 5, 1974. Material thus submitted will be considered and evaluated in determining any changes to this regulation. Until such time as further changes are made, the regulation as here set forth shall remain in effect.

Sec.
652.1. Purpose.
652.2. Definition.
652.3. Policy.

V 39 56 MAR 21 74 XUM

Sec.
652.4. Federal Participation.
652.5. Planning.
652.6. Programming.

AUTHORITY: (23 U.S.C.) 106, 217 and 315.

§ 652.1 Purpose.

The purpose of this subsection is to provide policies and procedures relating to bicycle and pedestrian facilities on Federal-aid system highways and Federal participation in the cost of these facilities.

§ 652.2 Definitions.

(a) "Bicycle" means a two-wheeled vehicle propelled solely by human power.

(b) "Bikeway" means a continuous way designated for use of bicycles and other vehicles propelled by human power.

(c) "Bicycle trail" means a bikeway separated from the through lanes for motor vehicles by space or barrier.

(d) "Shared roadway" means a roadway which may be shared by motor vehicles and bicycles, or a portion of which is reserved for use by bicycles and other nonmotorized vehicles.

(e) "Pedestrian walkway" or "walkway" means a continuous way designated for pedestrians and separated from the through lanes for motor vehicles by space or barrier.

(f) "Highway construction project" means a project financed in whole or in part with Federal-aid or Federal funds for the construction, reconstruction or improvement of a highway or a portion thereof, including bridges and tunnels.

(g) "Independent bikeway or walkway construction project" means a highway construction project to provide bicycle or pedestrian facilities, in contrast with a project whose primary purpose is to serve motorized vehicles.

(h) "Snowmobile" means a motorized vehicle solely designed to operate on ice.

§ 652.3 Policy.

The provision of bicycle and pedestrian facilities on Federal-aid highway projects is encouraged. The construction of bicycle facilities and walkways may be approved as either incidental features of highway construction projects primarily for motor vehicular traffic or as independent bikeway or walkway construction projects where all of the following conditions are satisfied:

(a) The facility will not impair the safety of the motorist, bicyclist or pedestrian.

(b) The facility will be accessible to users or will form a segment located and designed pursuant to an overall plan.

(c) A public agency has formally agreed to:

(1) Operate and maintain the facility.

(2) Ban all motorized vehicles other than maintenance vehicles and, when snow conditions and State or local regulations permit, snowmobiles.

(d) It is reasonably expected that the facility will have sufficient use in relation to cost to justify its construction and maintenance.

§ 652.4 Federal participation.

(a) Bicycle and pedestrian facilities may be constructed as incidental features of highway construction projects where the bikeway or walkway is to be constructed concurrently with the improvement for motor vehicular traffic and the bikeway or walkway will be within the normal right-of-way of the highway, including land acquired under 23 U.S.C. 135 and 319 (Traffic Improvements and Scenic Enhancement Programs). Projects constructed as incidental features or larger highway construction projects may be financed with the same types of Federal-aid funds as the basic highway project, including Interstate projects, and are not subject to the funding limitations for independent bikeway or walkway projects.

(b) Independent bikeway or walkway construction projects may be financed with all types of Federal-aid funds except Interstate, provided the total amount obligated for all such projects in any one State in any one fiscal year does not exceed $2 million for Federal-aid funds or a lesser amount apportioned by the Federal Highway Administrator to avoid exceeding the annual $40 million cost limitation on these projects for all States in a fiscal year. Independent bikeway or walkway projects may be constructed on completed sections of Federal-aid highways. Projects may include the acquisition of land outside the right-of-way, provided the facility will accommodate traffic which would have normally used a Federal-aid highway route, disregarding any legal prohibitions on the use of the route by cyclists or pedestrians.

(c) The Federal share payable for bicycle or pedestrian facilities on a Federal-aid system shall be as provided in 23 U.S.C. 120 for such systems, except that independent bikeway or walkway construction projects on the Interstate System shall be financed as projects on the primary system or urban extensions thereof.

(d) Federal participation in eligible bicycle and pedestrian facilities may include:

(1) The costs of grading, drainage, paving, barriers, landscaping, and structures necessary to accommodate the number and type of users of the facility.

(2) The costs of supplementary facilities such as shelters, parking facilities, bicycle storage facilities and comfort stations.

(3) The costs of traffic control devices including signs, signals and pavement markings.

(4) The costs of fixed source lighting where its use is appropriate.

(5) The costs of curb-cut ramps on new and existing facilities, including those for the physically handicapped.

(6) The costs of right-of-way (land acquisition and relocation assistance) on independent bikeway construction projects.

(7) The costs of walks, barriers and additional widths and lengths on bridges necessary for bikeways and pedestrian walkways for route continuity.

(8) The costs of bikeway and walkway grade separations where:

(i) Vehicular speeds and crossing volumes constitute a hazard of such magnitude as to justify the cost of the structure and the bikeway or walkway cannot be rerouted to another structure, or;

(ii) The separation is necessary because the highway has complete control of access.

§ 652.5 Planning.

Bikeways should be planned as parts of bicycle transportation systems. Where planning is conducted under 23 U.S.C. 134(a), consideration should be given to including bicycle transportation. Funds provided by 23 U.S.C. 307(c) may be used to plan bikeways. Consultation with organized groups of bicyclists is certain to prove valuable in the planning and design of bikeway projects, and such counsel should be actively sought.

§ 652.6 Programming.

(a) Obligation of 1974 fiscal year funds may commence immediately on a first come, first served basis subject to the funding limitations set forth in § 652.4b.

(b) For FY 1975 and 1976, each State shall submit a program covering all independent bikeway or walkway construction projects not later than May 1, 1974, in the case of FY 1975 funds, and May 1, 1975, in the case of FY 1976 funds, identifying proposed projects and the source or sources of funds from which such projects are to be financed. Its proposed obligations shall not exceed $2 million in Federal-aid funds for each fiscal year. In the event the aggregate sum of all Federal and Federal-aid funds proposed to be obligated by all States and Federal agencies exceeds $40 million for either fiscal year 1975 or 1976, funds for obligation will be allocated to the States by the Federal Highway Administrator in relation to the apportionment received by the applicant States under 23 U.S.C., section 104(b) (1), (2), (3) and (6).

Issued on: March 13, 1974.

NORBERT T. TIEMANN,
Federal Highway Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Sulfur Dioxide Emissions in Arizona and New Mexico

On May 31, 1972 (37 FR 10842), pursuant to section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator of the Environmental Protection Agency approved with specific exceptions, plans for implementation of the national ambient air quality standards submitted by Arizona and New Mexico.

Shortly thereafter, on July 27, 1972 (37 FR 15094), the Administrator proposed regulations to correct deficiencies in the regulatory provisions of the plans for these States. On March 23, 1973 (38 FR 7554), the Administrator set forth regulations requiring at least 70 percent control of sulfur dioxide emissions from the Navajo power plant located in the Arizona portion of the Four Corners Interstate Region and the Four Corners and San Juan power plants located in the New Mexico portion of the Four Corners Interstate Region. The Administrator had determined that an extension of the attainment date terminating no later than 36 months from the date of promulgation of the regulation was justified and therefore, granted such an extension to March 15, 1976.

Subsequent to the March 23, 1973, promulgation, Arizona Public Service Company (APS), operator of the Four Corners power plant, and Salt River Project Agriculture Improvement and Power District (SRP), operator of the Navajo power plant, filed petitions for review of EPA's regulation, pursuant to section 307 of the Act, with the Courts of Appeal for both the Ninth and Tenth Circuit. At the same time, representatives of both companies requested that they be given an opportunity to present newly developed data bearing on the March 23 regulations. Therefore, a meeting was convened in San Francisco on August 20, 1973, to receive this new information. In attendance at the meeting were representatives from APS and SRP, several other companies who were litigants in the proceedings before the Ninth and Tenth circuits, representatives of several environmental groups who were also involved in the circuit court cases, representatives from the National Oceanographic and Atmospheric Administration (NOAA), and EPA representatives. The information presented at the meeting by the power companies dealt with the following three main topics:

1. The validity of the assumptions employed in the diffusion model used to calculate the degree of control of sulfur dioxide emissions necessary to attain and maintain the national standards.

2. The final date by which each of the affected power plants must be in total compliance with the promulgated regulation.

3. The format of the equation in the promulgated regulation used to calculate the allowable sulfur oxides emissions.

As a result of EPA's re-evaluation of its March 23, 1973, regulations, the Courts of Appeal have agreed to stay further proceedings on the petitions for review pending the outcome of the Agency's actions on the newly developed data.

After careful consideration, the Administrator concluded that the March 23d regulations ought to be amended as a result of the evidence submitted by the power companies with respect to the final date and the format of the emission limiting equation. Therefore, the Administrator proposed modifications to the March 23 regulations on December 18, 1973 (38 FR 34743), and at the same time proposed approval of the compliance schedules which the power companies had submitted. The principal changes promised on December 18 were: (1) An extension of the final compliance date from March 15, 1976, to July 31, 1977, and (2) Provisions to allow compliance with the 70 percent control requirement on a total plant basis rather than a unit-by-unit basis. The preamble to the December 18 proposal discusses in detail the basis for these changes and elaborates on several other minor changes to the original March 23 regulations.

The preamble to the December 18 proposal also indicates that the data submitted by the companies on the question of 70 percent control was not sufficient to warrant a revision of the position taken by the Agency on this issue in its March 23rd promulgation. Accordingly, the matter of 70 percent control was left unchanged by the December 18th proposal with the explicit understanding that the Agency would review new data on this question as it was received. The power companies have recently submitted results of a plume tracking and monitoring study at the Four Corners plant and a fluorescent-particle tracer study at the Navajo plant in support of their contention that 70 percent control is not necessary to attain the national standards for sulfur dioxide. However, the Administrator has not completed the review of the results of these tests and therefore, no action regarding the degree of control is being taken at this time. As indicated in the preamble to the December 18th regulations, the Administrator will revise the 70 percent control requirement if warranted by the recently submitted information.

The Agency's March 23, 1973, regulations also apply to the San Juan power plant, owned by the Public Service Company of New Mexico (PSCNM). Although they have not filed a petition for review and were not involved in the presentation of additional data to the Agency, PSCNM has submitted a compliance schedule which embodies several of the suggestions made by APS and SRP. Specifically, the compliance schedule does not show compliance until July 31, 1977, largely as a result of provisions for a front-end module testing program. Therefore the December 18 proposal was also applicable to the San Juan plant.

Public hearings on the regulation changes and compliance schedule approvals proposed on December 18 were held on February 5 and 6, 1974, in Phoenix, Arizona and Santa Fe, New Mexico, respectively. Much of the testimony focused on the individual compliance schedules submitted by the power companies; therefore, only minor modifications were made to the December 18 proposals as a result of these hearings. The changes to the December 18 proposal are discussed below:

1. The March 23 regulations included a provision which permitted the power companies to discontinue use of sulfur oxides control equipment when very low sulfur fuel, such as natural or synthetic gas, was being used. The March 23 wording indicated that when emissions were less than a specified lower limit, the 70 percent control requirement did not apply. This provision has been clarified so that the lower limit must be attained by use of low sulfur fuel alone in order to exempt the source from the 70 percent control requirement. Rather than requiring a stack test, the sulfur content of the fuel may be used to determine if the lower limit is met.

2. The December 18 proposal required the power companies to specify by October 1975 the degree of control to be obtained on a unit-by-unit basis such that the overall control on a total plant basis would be 70 percent. The regulations promulgated below specify a 70 percent efficiency for each unit until the power companies submit an alternate proposal. If approved by the Administrator, the regulation will be modified to include the unit efficiencies submitted by the power companies.

The compliance schedules proposed on December 18 have all been modified by the power companies and most of the changes were discussed at the February 5 and 6 public hearings. The compliance schedule for the Navajo plant was revised as a result of a fire which damaged one of the scrubber test modules. This revised schedule, dated February 4, 1974, has been determined to meet the requirements of 40 CFR 51.15 and is approved below. It should be noted that the dates for completion of all interim progress steps in this compliance schedule are enforceable by the Administrator.

The revised compliance schedules submitted for the Four Corners and San Juan plants have not been completely reviewed and thus no action is being taken on these schedules at this time. A separate FEDERAL REGISTER notice involving these schedules will be published shortly.

The regulations promulgated herein are effective on March 21, 1974. The Administrator finds good cause for making the regulations immediately effective, since they impose no immediate requirements, and persons wishing to seek judicial review of these actions may do so without delay.

(42 U.S.C. 1857c-5)

Dated: March 15, 1974.

JOHN QUARLES,
Acting Administrator.

Subpart D—Arizona

Section 52.122 is amended by adding paragraph (e) as follows:

§ 52.122 Extensions.

* * * * *

(e) The Administrator hereby extends to July 31, 1977, the attainment date for the national primary standards for sulfur oxides in the Arizona portion of the Four Corners Interstate Region.

In § 52.125, paragraph (c) is revised to read as follows:

V 39 56 MAR 21 74 XUM

§ 52.125 Control strategy and regulations: Sulfur oxides.

• • • • •

(c) *Replacemet regulation for Regulation 7–I–4(c) (Fossil fuel-fired steam generators in the Four Corners Interstate Region.)* (1) This paragraph is applicable to the fossil fuel-fired steam generating equipment designated as Units 1, 2, and 3 at the Navajo Power Plant in the Arizona portion of the Four Corners Interstate Region (§ 81.121 of this chapter).

(2) No owner or operator of the fossil fuel-fired steam generating equipment to which this paragraph is applicable shall discharge of cause the discharge of sulfur oxides into the atmosphere in excess of the amount prescribed by the following equations:

$$E=12{,}245\ S \text{ or } e=1{,}540\ S$$

Where:

E=Allowable sulfur oxides emissions (lb./hr.) from all affected units.
e=Allowable sulfur oxides emissions (gm./sec.) from all affected units.
S=Sulfur content, in percent by weight, prior to any pretreatment of the fuel being burned.

(3) For the purposes of this paragraph:

(i) E shall not exceed 21,270 lb./hr. (2,680 gm./sec.).

(ii) If the sum of sulfur oxides emissions from Units 1, 2, and 3 would be less than 3,780 lb./hr. (475 gm./sec.) without the use of emission control equipment, the requirements of subparagraphs (2), (4) (i) and (5) of this paragraph shall not apply for the period of time that the emissions remain below this level.

(iii) The applicability of subdivision (ii) of this subparagraph may be determined through a sulfur balance utilizing the analyzed sulfur content of the fuel being burned and the total rate of fuel consumption in all affected units.

(4) (i) No owner or operator of the fossil fuel-fired steam generating equipment subject to this paragraph shall discharge or cause the discharge of sulfur oxides into the atmosphere from any affected unit in excess of the amount prescribed by the following equations, except as provided in subparagraph (3) (ii) of this paragraph.

$$E_i=0.333\ E \text{ or } e_i=0.333\ e$$

Where:

E=Allowable sulfur oxides emissions (lb./hr.) from all affected units as determined pursuant to subparagraph (2) of this paragraph.
e=Allowable sulfur oxides emissions (gm./sec.) from all affected units as determined pursuant to subparagraph (2) of this paragraph.
E_i=Allowable sulfur oxides emissions (lb./hr.) from each affected unit.
e_i=Allowable sulfur oxides emissions (gm./sec.) from each affected unit.

(ii) The owner or operator of the fossil fuel-fired steam generating equipment to which this paragraph is applicable may submit a request to redesignate the allowable emissions specified in subdivision (i) of this subparagraph. Such a request shall be sumitted no later than December 2, 1974, and shall demonstrate that sulfur oxides emissions on a total plant basis will not exceed those specified in subparagraphs (2) and (3) (i) of this paragraph. Upon receipt and evaluation of such request, the Administrator shall consider such and if appropriate, redesignate the allowable emissions specified in subdivision (i) of this subparagraph.

(5) All sulfur oxides control equipment at the fossil fuel-fired steam generating equipment to which this paragraph is applicable shall be operated at the maximum practicable efficiency at all times, without regard to the allowable sulfur oxides emissions, determined according to subparagraph (2) or (3) of this paragraph, except as provided in subparagraph (3) (ii) of this paragraph.

(6) Compliance with this paragraph shall be in accordance with the provisions of § 52.134(a).

(7) The test methods and procedures used to determine compliance with this paragraph shall be those prescribed in § 60.46(c) (2) and (c) (4) of this chapter. The test methods for determining the sulfur content of fuel shall be those specified in § 60.45(c) and (d) of this chapter.

Source	Location	Regulation involved	Effective date	Final compliance date
Salt River Project Agriculture Improvement and Power District.	Coconino County....	40 CFR 81.125(c) [1]....	Immediately [2]..	July 31, 1977

[1] Federally promulgated regulation.
[2] Compliance schedule dated February 4, 1974 and transmitted to EPA on February 5, 1974.

§ 52.131 [Amended]

In § 52.131, the attainment date table is amended by replacing the date "March 15, 1976" for attainment of the primary and secondary standards for sulfur oxides in the Four Corners Interstate Region, with the date "July 31, 1977."

§ 52.134 [Amended]

1. In § 52.134, paragraph (a) (2) is amended by replacing the date "March 15, 1976" for compliance with § 52.125(c) with the date "July 31, 1977."

2. Section 52.134 is amended by adding a new paragraph (b) as follows:

• • • • •

(b) Compliance schedules for the sources identified below are approved as meeting the requirements of paragraph (a) of this section. All regulations cited are air pollution control regulations of the State, unless otherwise noted. Approval of a compliance schedule includes approval of all dates for achievement of increments of progress and final compliance as specified therein, and failure to achieve an increment of progress or final compliance by the specified date will be considered a violation of the compliance schedule.

Subpart GG—New Mexico

In § 52.1624, paragraph (c) is revised to read as follows:

§ 52.1624 Control strategy and regulations: Sulfur oxides.

• • • • •

(c) *Replacement regulation for Regulation 602.B (Fossil fuel-fired steam generators in the Four Corners Interstate Region).* (1) No owner or operator of the fossil fuel-fired steam generating equipment designated as Units 1, 2, 3, 4, and 5 at the Four Corners power plant in the New Mexico portion of the Four Corners Interstate Region (§ 82.121 of this chapter) shall discharge or cause the discharge of sulfur oxides into the atmosphere in excess of the amount prescribed by the following equations:

$$E=13{,}850\ S \text{ or } e=1{,}745\ S$$

Where:

E=Allowable sulfur oxides emissions (lb./hr.) from all affected units.
e=Allowable sulfur oxides emissions (gm./sec.) from all affected units.
S=Sulfur content, in percent by weight, prior to any pretreatment of the fuel being burned.

(2) No owner or operator of the fossil fuel-fired steam generating equipment designated as Unit 2 at the San Juan power plant in the New Mexico portion of the Four Corners Interstate Region (§ 82.121 of this chapter) shall discharge or cause the discharge of sulfur oxides into the atmosphere in excess of the amount prescribed by the following equations:

$$E=1{,}930\ S \text{ or } e=240\ S$$

Where:

E=Allowable sulfur oxides emissions (lb./hr.)
e=Allowable sulfur oxides emissions (gm./sec.)
S=Sulfur content, in percent by weight, prior to any pretreatment of the fuel being burned.

(3) For the purposes of subparagraph (1) of this paragraph: (i) E shall not exceed 19,680 lbs./hr. (2,480 gm./sec.). (ii) If the sum of sulfur oxides emissions from Units 1, 2, 3, 4, and 5 would be less than 3,500 lbs./hr. (440 gm./sec.) without the use of emission control equipment, the requirements of subparagraphs (1), (5) (i) and (6) of this paragraph shall not apply for the period of time that the emissions remain below this level. (iii) The applicability of subdivision (ii) of this subparagraph may be determined through a sulfur balance utilizing the analyzed sulfur content of the fuel being burned and the total rate of fuel consumption in all affected units.

(4) For the purposes of subparagraph (2) of this paragraph: (i) E shall not exceed 3,040 lbs./hr. (385 gm./sec.). (ii) If the sulfur oxides emissions from Unit 2 would be less than 540 lbs./hr. (68 gm./sec.) without the use of emission control equipment, the requirements of subparagraphs (2) and (6) of this paragraph shall not apply for the period of time that the emissions remain below this level. (iii) The applicability of subdivision (ii) of this subparagraph may be determined through the use of the analyzed sulfur content of the fuel being burned and the total rate of fuel consumption in the affected unit.

(5) (i) No owner or operator of the fossil fuel-fired steam generating equipment subject to subparagraphs (1) and (3) of this paragraph shall discharge or cause the discharge of sulfur oxides into the atmosphere from any affected unit in excess of the amount prescribed for that unit by the following equations, except as provided in subparagraph (3) (ii) of this paragraph.

For Unit 1; $E_1=0.084E$ or $e_1=0.084\ e$
For Unit 2; $E_2=0.084E$ or $e_2=0.084\ e$
For Unit 3; $E_3=0.108E$ or $e_3=0.108\ e$
For Unit 4; $E_4=0.362E$ or $e_4=0.362\ e$
For Unit 5; $E_5=0.362E$ or $e_5=0.362\ e$

Where:

E=Allowable sulfur oxides emissions (lb./hr.) from all affected units as determined pursuant to subparagraph (1) of this paragraph.
e=Allowable sulfur oxides emissions (gm./sec.) from all affected units as determined pursuant to subparagraph (1) of this paragraph.
E_{1-5}=Allowable sulfur oxides emissions (lb./hr.) from the affected unit. hr.) from
e_{1-5}=Allowable sulfur oxides emissions (gm./sec.) from the affected units.

(ii) The owner or operator of the fossil fuel-fired steam generating equipment subject to subparagraphs (1) and (3) of this paragraph may submit a request to redesignate the allowable emission specified in subdivision (i) of this subparagraph. Such a request shall be submitted no later than October 1, 1975, and shall demonstrate that sulfur oxides emissions on a total plant basis will not exceed those specified in subparagraphs (1) and (3) (i) of this paragraph. Upon receipt and evaluation of such request, the Administrator shall consider such and if appropriate, redesignate the allowable emissions specified in subdivision (i) of this subparagraph.

(6) All sulfur oxides control equipment at the fossil fuel-fired steam generating equipment to which this paragraph is applicable shall be operated at the maximum practicable efficiency at all times, without regard to the allowable sulfur oxides emissions determined according to subparagraph (1), (2), (3), or (4) of this paragraph, except as provided in subparagraphs (3) (ii) and (4) (ii) of this paragraph.

(7) Compliance with this paragraph shall be in accordance with the provisions of § 52.1626(c).

(8) The test methods and procedures used to determine compliance with this paragraph shall be those prescribed in § 60.46(c) (2) and (c) (4) of this chapter. The test methods for determining the sulfur content of fuel shall be those specified in § 60.45 (c) and (d) of this chapter.

§ 52.1626 [Amended]

In § 52.1626, paragraph (c) (3) is amended by replacing the date "March 15, 1976" for compliance with § 52.1624(c) of this chapter with the date "July 31, 1977."

§ 52.1630 [Amended]

In § 52.1630, the attainment date table is amended by replacing the date "March 1976" for attainment of the primary and secondary standards for sulfur oxides in the Four Corners Interstate Region, with the date "July 31, 1977."

In § 52.1631, paragraph (a) is revised to read as follows:

§ 52.1631 Extensions.

(a) The Administrator hereby extends to July 31, 1977, the attainment date for the primary standards for sulfur oxides in New Mexico's portion of the Four Corners Interstate Region.

Title 49—Transportation

SUBTITLE A—OFFICE OF THE SECRETARY OF TRANSPORTATION

[OST Docket No. 1; Amdt. 1–89]

PART 1—ORGANIZATION AND DELEGATION OF POWERS AND DUTIES

Delegation of Functions Under the International Voyage Load Line Act of 1973

The purpose of this amendment is to delegate to the Commandant of the Coast Guard functions vested in the Secretary by the International Voyage Load Line Act of 1973 (October 1, 1973, Pub. L. 93–115, 87 Stat. 418).

Since this amendment relates to Departmental management, procedures, and practices, notice and public comment thereon are unnecessary and it may be made effective in fewer than 30 days after publication in the FEDERAL REGISTER.

In consideration of the foregoing, paragraph (o) of § 1.46 of Part 1 of Title 49, Code of Federal Regulations, is amended by adding a new subparagraph (6), to read as follows:

§ 1.46 Delegations to Commandant of the Coast Guard.

• • • • • •

(o) • • •

(6) International Voyage Load Line Act of 1973 (Pub. L. 93–115).

Effective date: This amendment is effective March 21, 1974.

(Sec. 9(e), Department of Transportation Act (49 U.S.C. 1657(e)))

Issued in Washington, D.C., on March 19, 1974.

CLAUDE S. BRINEGAR,
Secretary of Transportation.

[FR Doc.74–6730 Filed 3–20–74;9:18 am]

[OST Docket No. 1; Amdt. 1–90]

PART 1—ORGANIZATION AND DELEGATION OF POWERS AND DUTIES

Delegation of Functions with Respect to the International Bridge Act of 1972

The purpose of this amendment is to delegate to the Commandant of the Coast Guard, the Federal Highway Administrator, the Federal Railroad Administrator, the Administrator of the St. Lawrence Seaway Development Corporation, and the Assistant Secretary for Environment, Safety, and Consumer Affairs functions vested in the Secretary by the International Bridge Act of 1972 (Pub. L. 92–434, 86 Stat. 731).

Since this amendment relates to Departmental management, procedures, and practices, notice and public procedure thereon are unnecessary and it may be made effective in fewer than 30 days after publication in the FEDERAL REGISTER.

In consideration of the foregoing, Part 1 of Title 49, Code of Federal Regulation, is amended, effective March 21, 1974, as follows:

1. Section 1.46 is amended by adding a new paragraph (r) to read as follows:

§ 1.46 Delegations to Commandant of the Coast Guard.

• • • • • •

(r) Carry out the functions vested in the Secretary by section 5 of the International Bridge Act of 1972 (Pub. L. 92–434) as it relates to navigable waterways other than the St. Lawrence River.

2. Section 1.48 is amended by adding a new paragraph (q) to read as follows:

§ 1.48 Delegations to Federal Highway Administrator.

• • • • • •

(q) Carry out the functions vested in the Secretary by section 5 (as it relates to bridges, other than railroad bridges, not over navigable waterways), and sections 6 and 8(a) (as they relate to all bridges other than railroad bridges) of the International Bridge Act of 1972 (Pub. L. 92–434).

3. Section 1.49 is amended by adding a new paragraph (r) to read as follows:

§ 1.49 Delegations to Federal Railroad Administrator.

• • • • • •

(r) Carry out the functions vested in the Secretary by section 5 of the International Bridge Act of 1972 (Pub. L. 92–434) as it relates to railroad bridges not over navigable waterways.

4. Section 1.50a is revised to read as follows:

§ 1.50a Delegations to Administrator of the St. Lawrence Seaway Development Corporation.

The Administrator of the St. Lawrence Seaway Development Corporation is delegated authority to—

(a) Carry out the functions vested in the Secretary by sections 101, 102, 104, 106, and 107 of the Ports and Waterways Safety Act of 1972 (Pub. L. 92–340) as they relate to the operation of the St. Lawrence Seaway.

(b) Carry out the functions vested in the Secretary by section 5 of the International Bridge Act of 1972 (Pub. L. 92–434) as it relates to the St. Lawrence River.

5. Section 1.58 is amended by amending the catchline and adding a new paragraph (g) to read as follows:

§ 1.58 Delegations to Assistant Secretary for Environment, Safety, and Consumer Affairs.

• • • • • •

(g) Carry out the functions vested in the Secretary by section 5 of the Inter-

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket 70-20; Notice 3]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Fuel System Integrity

This notice responds to petitions for reconsideration of the amendment of Motor Vehicle Safety Standard No. 301 (9-1-73), and amends certain portions of the standard effective September 1, 1975.

Federal Motor Vehicle Safety Standard No. 301 (9-1-75), 49 CFR 571.301, effective September 1, 1975, was published on August 20, 1973 (38 FR 22397). Thereafter, pursuant to 49 CFR 553.35 petitions for reconsideration of the rule were received from twelve petitioners. The following discussion considers the issues raised by the commenters and the disposition accorded each by the NHTSA.

Application. The Recreational Vehicle Institute (RVI) challenged the application of the standard to motor homes and other recreational vehicles, alleging a relatively minimal risk of fire due to lack of fuel system integrity, and a great expense in conducting the specified tests. The NHTSA does not share RVI's position on these issues in view of the purpose of the standard. The NHTSA intends that Standard No. 301 achieve a degree of fuel system integrity sufficient to protect the occupants of a motor vehicle from injury resulting from fuel-induced fires. Although the testing necessary to accomplish this end may entail additional costs for the recreational vehicle manufacturer, the expense is considered justified in order to ensure the safety of passengers customarily carried in a recreational vehicle. Despite RVI's assertion that the frequency of fuel system fires is not as high in recreational vehicles as in passenger cars, a recreational vehicle is still susceptible to the fuel spillage occasioned by collision and thus is properly under the coverage of the standard.

Effective date. Jeep, American Motors, Nissan, and RVI objected to the standard's September 1, 1975, effective date, asserting a need for more time to design a fuel system, develop the necessary test equipment, and assure the availability of adequate test facilities. RVI requested that the effective date for recreational vehicles be delayed until 1977 to allow more time for gaining experience with complete and incomplete vehicles used in motor home manufacturing. These requests have all been denied.

The NHTSA has determined that the time period provided for developing conforming vehicles and satisfactory testing equipment is reasonable and sufficient. The need for vehicles equipped with complying fuel systems is great, and in the interest of safety, delays for the reasons asserted have not been found to be justified.

Fuel spillage. Six petitioners commented that the form of measurement of fuel spillage was ambiguous, and requested a clarification. The NHTSA is in accord with the petitioners' requests and is amending the standard to specify that any fuel spilled be measured by weight as opposed to volume.

Comments were received from a number of petitioners requesting that the requirements for fuel spillage be interpreted to indicate that the fuel loss is to be averaged over the designated period of time in order to determine compliance with the 1-ounce-per-minute specification. The supporting arguments for these requests tended to focus on the impracticality of requiring that the rate of allowable fuel spillage be less than 1 ounce per minute when measured on a minute-to-minute basis, due to the possibility that fluid might escape from the vehicle at various locations which were not anticipated and prevent an accurate rate of discharge measurement.

The NHTSA has granted the petitions in part. Practical limits of the testing procedure are considered to preclude a precise measurement of leakage rate for the first 5 minutes following a fixed barrier or rollover test. Therefore, for the first 5 minutes following the frontal impact test and the first 5 minutes of testing at each 90° increment during the rollover test, a total leakage of not more than 5 ounces of fuel by weight will constitute compliance with the standard. Five minutes is found to be sufficient time for leaks to be discovered and for an accurate rate of flow measurement to be initiated. For the specified observation time subsequent to the first 5 minutes of designated crash and rollover testing, the maximum spillage requirement remains 1 ounce in any single minute.

Japan Automobile Manufacturers Association (JAMA) asked whether the standard would allow them to drain off the engine coolant and lubricating oil prior to the rollover test, since some leakage of these fluids would most probably have occurred as a result of the barrier impact. Nissan also pointed out the difficulty possibly caused by the mixing of various discharged fluids during the static rollover test. The NHTSA finds no justification for a change in this requirement. One of the test conditions designated in this standard is that the vehicle be equipped with maximum capacity of all fluids (other than fuel, for which a fill range is specified) necessary for operation. If the various fluids become mixed they may be separated by means of a laboratory procedure which allows accurate measurement of the amount of fuel spilled. A manufacturer need not, however, utilize a standard's specified testing procedure during his own vehicle testing as long as he uses some reliable means of assuring that his vehicle meets the performance requirements of the standard. The NHTSA does not certify as acceptable various procedures suggested by manufacturers. The standard does, however, indicate the manner in which this agency will test a vehicle, and it is the vehicle's performance under these conditions which will determine its satisfactory compliance with the standard.

Chrysler objected to the stringent fuel spillage requirement applicable during the rollover test. It asked that the fuel which generally escapes from the carburetor bowl during a rollover not be included in the amount of fuel discharged from the vehicle. Its request was based partly on the alleged difficulty of developing a means capable of containing the carburetor fuel during a rollover, and partly on the assertion that the rapid motion of a vehicle involved in an actual rollover crash would so widely disperse the small amounts of carburetor fuel as to negate the possibility of combustion.

The NHTSA finds Chrysler's petition unacceptable, having determined that the escape of carburetor fuel can constitute a safety hazard. The thrust of the standard is to ensure that manufacturers develop systems which will prevent this leakage. Accordingly, the amount of fuel released by the carburetor during testing must be included with the fuel escaping from any other part of the system in determining whether a vehicle conforms to the standard.

In an addendum to their petition for reconsideration, Mercedes-Benz requested that diesel-powered vehicles be excluded from the standard, because diesel fuel's flash point is higher than that of gasoline. While diesel fuel is somewhat safer than gasoline, it is not impossible to ignite it by means of hot sparks, especially battery sparks thrown off during a crash. The fact that diesel fuel may not ignite quite as readily does not remove the potential for fuel-related fires which the standard seeks to reduce. The Mercedes request is therefore denied.

Test requirements. Nissan requested that it be allowed to conduct the barrier crash test and the rollover test with two different vehicles, because it felt that accidents involving a frontal crash and rollover in sequence were so infrequent as to render the present testing unrealistic and impracticable.

The NHTSA finds this argument without merit. Allowing the use of different vehicles for the frontal impact and rollover tests would undermine the intent of the standard. The purpose of the rule is to ensure that the fuel systems of motor vehicles are capable of withstanding the impacts prescribed without creating a hazardous situation for the occupants, and sequential impact testing with a single vehicle is, in NHTSA's opinion, necessary to demonstrate fuel system integrity.

Ford Motor Company assailed the appropriateness of the amended standard on the basis of a cost-benefit analysis which it had prepared on the rollover test and fuel spillage requirements. Ford asserted that compliance with the rollover requirement alone would create a "Retail Price Equivalent" (the sticker price with no provision for Ford profit) of $11.20 per passenger car and $12.15 per light truck, and would constitute a benefit/cost ratio of ⅓. It also contended that the NHTSA estimate of 2000 to 3500 annual deaths attributable to crash-caused fires was incorrect and that a National Safety Council estimate of 600 to 700 annual fire deaths was more realistic.

The NHTSA does not accept Ford's argument. Ford postulated a cost/benefit analysis based upon the purported effect of only one aspect of the standard. This agency is in disagreement not only with Ford's narrow analysis, but with the figures it relied upon in reaching their conclusions. In determining the cost/benefit ratio of the standard, the NHTSA took into account the impact of the standard as a whole and considered the cost of model changes and new tooling as well as the number of lives currently lost due to fuel system fires and the number of lives expected to be saved through implementation of the standard. Although the NHTSA uses cost-benefit analysis as a decision-making tool, it is not a perfect one, depending necessarily on extremely imprecise assumptions concerning benefits to be achieved. Granting that reasonable persons may differ on their cost-benefit projections, this agency does not consider that to be a conclusive argument against a safety requirement. On the basis of its own analysis the NHTSA is convinced that the measures provided in the standard are appropriate, reasonable, and necessary.

Vehicle loading. Most petitioners objected to the standard's vehicle weight and weight distribution test conditions, claiming that they are unrealistic and preclude the combining of tests for compliance with more than one standard. The most frequent suggestion was that the weight and distribution conditions contained in Standard No. 208 and in the proposed amendment to Standard No. 301 (Docket No. 73-20; Notice 1), published August 20, 1973 (38 FR 22417), be adopted. The majority of commenters to the Docket No. 73-20, Notice 1 proposal were likewise supportive of adoption of the loading requirements as proposed. The conditions favored specify, in the case of a passenger car, unloaded vehicle weight plus rated cargo and luggage capacity weight, secured in the luggage area, plus the weight of a 50th percentile test dummy as specified in 49 CFR Part 572 at each front outboard seating position and at any other position whose protection system is required to be tested by a dummy under the provisions of Standard No. 208. Each dummy shall be restrained only by means that are installed in the vehicle for protection at its seating position and that require no action by the vehicle occupant. In the case of a multipurpose passenger vehicle, truck, or bus the condition would be unloaded vehicle weight plus 300 pounds or its rated cargo and luggage capacity weight, whichever is less, secured in the load carrying area and distributed as nearly as possible in proportion to its gross axle weight ratings, plus the weight of the same dummies as designated for passenger car testing.

The loading conditions are being amended substantially as proposed. The advantages of adoption of the proposed loading conditions over the curb weight conditions suggested by several petitioners and commenters are twofold. First, the loading conditions here adopted may allow simultaneous testing for compliance under more than one standard. Second, the proposed provisions would present loading conditions that, although somewhat more stringent, are frequently encountered as vehicles are used.

Several petitioners and commenters objected to the requirement that the load be "secured" during testing. The NHTSA recognizes that a fixing of the load so as to prevent a significant absorption of energy during crash testing is not as representative of real-life conditions as a sliding load. However, such fixing has been found necessary in order to assure objectivity and repeatability in testing, since test results with a sliding load will vary from test to test.

It was suggested by two commenters that the manufacturer be given an option as to the manner in which he tests his vehicles if he chooses to conduct separate compliance tests for individual standards. The safety standards issued by this agency are not directives to the manufacturer, and in that sense he always has "options" as to how he tests. The standards are simply performance levels the vehicle must meet when tested by this agency. The establishment of similar loading conditions for different standards is intended primarily to reduce the cost of testing, and a manufacturer is free not to combine his tests as he wishes. Further, a manufacturer may do such things as substitute his own devices for those specified in a standard gauged for combined testing if he can reliably determine that the test results provide an accurate assessment of the vehicle's performance capabilities when tested according to the standard.

The inapplicability of the occupant crash protection requirements of Standard No. 208 to multipurpose passenger vehicles and trucks prior to 1977 was noted by some commenters who requested that these vehicles also remain exempt from application of the proposed loading requirements for Standard No. 301 until 1977. The NHTSA cannot grant this request. The proposed loading conditions of Standard No. 301 have been stipulated with a view toward ensuring under a wide range of conditions the fuel system integrity of a vehicle during a crash. Standard 301 meets an important safety need apart from Standard 208, and this agency intends to proceed with it on its own merits.

Many petitioners requested that the fuel loading requirement be revised to specify that the fuel tank be filled during testing to 90 percent of capacity, arguing that the present requirement represents a condition which is unrealistic and difficult to comply with during testing. The NHTSA is aware of the problems of thermal expansion and its ability to cause artificial failures during testing for compliance with Standard No. 301. If the fuel system is filled to 100 percent capacity before the test and then is subjected to thermal expansion, there could be leakage in the fuel system unrelated to its crashworthiness, indistinguishable from fuel leakage caused by the various specified crash tests. Therefore, the standard is amended to specify that the fuel tank is to be filled to any level from 90 to 95 percent capacity. The NHTSA finds that this requirement does not significantly reduce the stringency of the standard and realistically maintains its intended effect.

Engine temperature. General Motors (GM) and the Motor Vehicle Manufacturers Association (MVMA) suggested in their petitions that specifications be included in the standard which would designate permissible testing temperatures for the test fuel and the vehicle components. They asserted that changes in fluid volume could occur in the fuel system which would affect the fuel system pressure if the test fuel or vehicle components were not at ambient temperature. GM further proposed that the temperature during the testing procedure be between 60° and 80° F and not be allowed to vary more than 5° F throughout the testing sequence.

The NHTSA has determined that petitioners' requests should be denied. It is intended that the full spectrum of temperatures encountered on the road be reflected in the test procedure. Thus, even if it were shown that the fuel system integrity might be affected by changes in fluid volume, such result is certainly consistent with the real situations the standard is intended to ameliorate.

Fuel System. American Motors, MVMA, and GM raised questions concerning the type of fuel to be used during testing. The NHTSA has decided that the present requirement allowing optional use of Stoddard solvent or the fuel normally used to operate the vehicle should be changed to specify Stoddard solvent alone. Docket No. 73-20, Notice 1 proposed a change in the fuel designation by specifying the fuel recommended by the manufacturer during compliance testing. Many commenters objected to the proposed use of operating fuel due to the danger of fire damaging their test equipment. Although testing with actual fuel and an idling engine is theoretically the most realistic means of ascertaining compliance, the protective measures necessary to prevent damage to expensive equipment in the vehicle during testing would probably eliminate the advantage in realism as well as adding to testing costs. Stoddard solvent is considered to be much safer

V 39 56 MAR 21 74 XUM

in that its tendency to ignite is much less than that of gasoline. The properties of Stoddard solvent with respect to viscosity and permeation make it a viable substitute for actual fuel during testing.

Further confusion was manifested by several petitioners concerning the types of fuel systems subject to the standard's regulation. Due to the evaporative qualities of propane and gaseous fuel and the problems inherent in measuring the spillage of these fuels by the means specified in the standard, the NHTSA has determined that the standard should be amended to except from coverage vehicles which use fuel with a boiling point below 32° F. Regulation of vehicles using propane or gaseous fuel has not, however, been totally rejected. Comments are requested concerning the practicability and feasibility of imposing this standard's fuel system requirements on such vehicles. The infrequent use at present of propane or gaseous fuel by vehicles with a GVWR below 10,000 pounds is an important factor in the NHTSA's decision to except these fuels from the standard's application. Therefore, information regarding anticipated production of vehicles under the standard's coverage whose systems are designed for gaseous fuels should be provided.

Static rollover test conditions. MVMA, American Motors, and GM requested a clarification of the static rollover test procedure. The NHTSA has amended the standard to specifically require that the vehicle be rotated to three successive 90° increments in addition to the position in which it came to rest immediately following impact.

JAMA asked that the designed rate of rotation for the static rollover test be revised to permit any rotation rate which does not exceed 3 minutes. The basis of the request was the fact that the presently prescribed rate of rotation (not less than 1 minute and not more than 3 minutes) would necessitate an alteration of the gears of the Japanese manufacturers' vehicle rolling equipment since the equipment currently operates at a rate of 60 seconds for a 90° rotation.

JAMA's request reflects a misunderstanding which should be cleared up. By changing the rate of rotation to conform to JAMA's request, the NHTSA would be increasing the burden of compliance rather than lessening it. The intent of the standard is to require the vehicle to comply when rotated at any speed between the specified limits, and the manufacturer should ensure compliance across the range. The static rollover test condition is therefore amended by specify that the rotation to each 90° increment will occur in any interval from 1 to 3 minutes. The insertion of the word "any", as explained at 49 CFR 571.4, signifies that the NHTSA may test at any point within that 1 to 3 minute range and the vehicle must conform.

In response to a request for clarification by several petitioners, S7.7 is amended to specify that the vehicle is rotated about its longitudinal axis, with the axis kept horizontal.

In consideration of the foregoing, 49 CFR 571.301, Motor Vehicle Safety Standard No. 301, is amended to read as set forth below.

Effective date: September 1, 1975.

(Secs. 103, 119, Pub. L. 89–563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegation of authority at 49 CFR 1.51)

Issued on March 18, 1974.

JAMES B. GREGORY,
Administrator.

§ 571.301 Standard No. 301; fuel system integrity.

S1. *Scope.* This standard specifies requirements for the integrity of motor vehicle fuel systems.

S2. *Purpose.* The purpose of this standard is to reduce deaths and injuries occurring from fires that result from fuel spillage during and after motor vehicle crashes.

S3. *Application.* This standard applies to passenger cars, and to multipurpose passenger vehicles, trucks, and buses that have a GVWR of 10,000 pounds or less and use fuel with a boiling point above 32° F.

S4. *Definition.* "Fuel spillage" means the fall, flow, or run of fuel from the vehicle but does not include wetness resulting from capillary action.

S5. *General requirements.*

S5.1 *Passenger cars.* Each passenger car manufactured on or after September 1, 1975, shall meet all the requirements of this standard.

S5.2 *Vehicles with GVWR of 6,000 pounds or less.* Each multipurpose passenger vehicle, truck, and bus with a GVWR of 6,000 pounds or less manufactured on or after September 1, 1976, shall meet all the requirements of this standard.

S5.3 *Vehicles with GVWR of more than 6,000 pounds but not more than 10,000 pounds.* Each multipurpose passenger vehicle, truck, and bus with a GVWR more than 6,000 pounds and not more than 10,000 pounds manufactured on or after September 1, 1976, shall meet the requirements of S6.1.

S5.4 *Fuel spillage: barrier crash.* Fuel spillage in any barrier crash test shall not exceed 1 ounce by weight from impact until motion of the vehicle has ceased, and shall not exceed a total of 5 ounces by weight in the 5-minute period following cessation of motion. For the subsequent 10-minute period fuel spillage during any 1-minute interval shall not exceed 1 ounce by weight.

S5.5 *Fuel spillage: rollover.* Fuel spillage in any rollover test shall not exceed a total of 5 ounces by weight for the first 5 minutes of testing at each successive 90° increment. For the remaining testing period, at each increment of 90° fuel spillage during any 1-minute interval shall not exceed 1 ounce by weight.

S6 *Test requirements.* Each vehicle shall meet the requirements in sequence without alteration of the vehicle or its contents.

S6.1 *Frontal barrier crash.* When the vehicle traveling longitudinally forward at any speed up to and including 30 mph impacts a fixed collision barrier that is perpendicular to the line of travel of the vehicle, under the applicable conditions of S7, with a 50th percentile test dummy as specified in Part 572 of this chapter at each front outboard seating position and at any other position whose protection system is required to be tested by a dummy under the provisions of Standard No. 208, fuel spillage shall not exceed the limits specified in S5.4.

S6.2 *Rollover.* When the vehicle is rotated on its longitudinal axis at each successive increment of 90°, fuel spillage shall not exceed the limits specified in S5.5.

S7. *Conditions.*

S7.1. *General test conditions.* The following conditions apply to all tests.

S7.1.1 Except as specified in S7.1.3, a passenger car is loaded to its unloaded vehicle weight plus its rated cargo and luggage capacity weight, secured in the luggage area, plus the weight of the necessary test dummies. Each dummy shall be restrained only by means that are installed in the vehicle for protection at its seating position and that require no action by the vehicle occupant.

S7.1.2 Except as specified in S7.1.3, a multipurpose passenger vehicle, truck, or bus is loaded to its unloaded vehicle weight plus 300 pounds or its rated cargo and luggage capacity weight, whichever is less, secured in the load carrying area and distributed as nearly as possible in proporation to its gross axle weight ratings, plus the weight of the necessary test dummies. Each dummy shall be restrained only by means that are installed in the vehicle for protection at its seating position and that require no action by the vehicle occupant.

S7.1.3 The fuel tank is filled to any level from 90 to 95 percent of capacity, and the remainder of the fuel system is filled to its normal operating levels, with Stoddard solvent, having the physical and chemical properties of Type 1 solvent, Table 1 ASTM Standard D484–71, "Standard Specifications for Hydrocarbon Dry Cleaning Solvents."

S7.1.4 *Parking Brake and transmission.* The parking brake is disengaged and the transmission is in neutral.

S7.1.5 *Tires.* Tires are inflated to manufacturer's specifications.

S7.2 *Static rollover test condition.* The vehicle is rotated about its longitudinal axis, with the axis kept horizontal, to each successive increment of 90°, 180°, and 270° at a uniform rate, with 90° of rotation taking place in any time interval from 1 to 3 minutes. After reaching each 90° increment the vehicle is held in that position for 5 minutes.

[Docket No. 73–20; Notice 2]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Fuel System Integrity

The purpose of this notice is to amend Federal Motor Vehicle Safety Standard

No. 301, *Fuel System Integrity*, to upgrade substantially the requirements of the standard by specifying a rear moving barrier crash, a lateral moving barrier crash, and a frontal barrier crash including impacts at any angle up to 30° in either direction from the perpendicular.

A notice of proposed rulemaking published August 20, 1973 (38 FR 22417) proposed the imposition of additional testing requirements designed to ameliorate the dangers associated with fuel spillage following motor vehicle accidents. In an amendment to Standard No. 301, published on the same day as the proposal, a frontal barrier crash and a static rollover test were specified. In order to ensure the safety of fuel systems in any possible collision situation, the NHTSA finds it essential to incorporate additional proposed test requirements into the present standard and to make these requirements applicable to all vehicle types with a GVWR of 10,000 pounds or less.

Comments in response to the proposal were received from 29 commenters. Any suggestions for changes of the proposal not specifically mentioned herein are denied, on the the basis of all the information presently available to this agency. A number of the issues raised in the comments have been dealt with by the agency in its response to the petitions for reconsideration of the final rule issued on August 20, 1973. In its notice responding to the petitions, the NHTSA considered objections to the use of actual fuel during testing, the specified fuel fill level, the application of the standard to vehicles using diesel fuel, the fuel spillage measuring requirement, and the allegedly more stringent loading requirements applicable to passenger cars. The type of fuel subject to the standard was also clarified.

Objections were registered by 13 commenters to the proposed inclusion of a dynamic rollover test in the fuel system integrity standard. As proposed, the requirement calls for a measurement of the fuel loss while the vehicle is in motion. Commenters pointed out the exceptional difficulty in measuring or even ascertaining a leakage when the vehicle is rolling over at 30 mph. The NHTSA has decided that the objections have merit, and has deleted the dynamic rollover test. The results of the dynamic rollover do not provide sufficiently unique data with regard to the fuel system's integrity to justify the cost of developing techniques for accurately measuring spillage during such a test, and of conducting the test itself. The NHTSA has concluded that the severity of the other required tests, when conducted in the specified sequence, is sufficient to assure the level of fuel system integrity intended by the agency.

Triumph Motors objected to the use of a 4,000-pound barrier during the moving barrier impacts, asserting that such large barriers discriminate against small vehicles. Triumph requested that the weight of the barrier be the curb weight of the vehicle being tested in order to alleviate the burden on small vehicles. The NHTSA has concluded that no justification exists for this change. The moving barrier is intended to represent another vehicle with which the test vehicle must collide. The use of a 4,000-pound moving barrier is entirely reasonable since vehicles in use are often over 4,000 pounds in weight and a small vehicle is as likely to collide with a vehicle of that size as one smaller. The NHTSA considers it important that vehicle fuel systems be designed in such a way as to withstand impacts from vehicles they are exposed to on the road, regardless of the differences in their sizes.

Jeep and American Motors objected to the effective dates of the proposed requirements and asked that they be extended. Jeep favors an effective date not earlier than September 1, 1979, and American Motors favors a September 1, 1978 effective date. The NHTSA denies these requests. It has found that the time period provided for development of conforming fuel systems is reasonable and should be strictly adhered to considering the urgent need for strong and resilient fuel systems.

Several commenters expressed concern over the impact of the prescribed testing procedures on manufacturers of low-volume specialty vehicles. The NHTSA appreciates the expense of conducting crash tests on low-production vehicles, realizing that the burden on the manufacturer is related to the number of vehicles he manufactures. However, there are means by which the small-volume manufacturer can minimize the costs of testing. He can concentrate test efforts on the vehicle(s) in his line that he finds most difficult to produce in conformity with the standard. These manufacturers should also be aware that an exemption from application of the standard is available where fewer than 10,000 vehicles per year are produced and compliance would subject him to substantial financial hardship.

In responding to the petitions for reconsideration of the amendment to Standard No. 301, published August 20, 1973, the NHTSA revised the fuel system loading requirement to specify Stoddard solvent as the fuel to be used during testing. In accordance with that amendment, the proposed requirement that the engine be idling during the testing sequence is deleted. However, electrically driven fuel pumps that normally run when the electrical system in the vehicle is activated shall be operating during the barrier crash tests.

In order to fulfill the intention expressed in the preamble to the proposal, that simultaneous testing under Standards Nos. 208 and 301 be possible, language has been added to subparagraph S7.1.5 of Standard No. 301 specifying the same method of restraint as that required in Standard No. 208. In its response to petitions for reconsideration of Standard No. 301 (39 FR_____) the NHTSA amended the standard by requiring that each dummy be restrained during testing only by means that are installed in the vehicle for protection at its seating position and that require no action by the vehicle occupant.

Suggestions by several commenters that the application of certain crash tests should be limited to passenger cars in order to maintain complete conformance to the requirements of Standard No. 208 are found to be without merit. Enabling simultaneous testing under several standards, although desirable, is not the most important objective of the safety standards. The NHTSA is aware of the burden of testing costs, and therefore has sought to ease that burden where possible by structuring certain of its standards to allow concurrent testing for compliance. It must be emphasized, however, that the testing requirements specified in a standard are geared toward a particular safety need. Application of the tests proposed for Standard No. 301 to all vehicle types with a GVWR of 10,000 pounds or less is vital to the accomplishment of the degree of fuel system integrity necessary to protect the occupants of vehicles involved in accidents.

No major objections were raised concerning the proposed angular frontal barrier crash, lateral barrier crash, or rear moving barrier crash. On the basis of all information available to this agency, it has been determined that these proposed crash tests should be adopted as proposed.

In consideration of the foregoing, 49 CFR 571.301, Motor Vehicle Safety Standard No. 301, is amended to read as set forth below.

Effective date: September 1, 1975, with additional requirements effective September 1, 1976 and September 1, 1977 as indicated.

(Secs. 103, 119, Pub. L. 89–563, 80 Stat. 718, 15 U.S.C. 1392, 1407; delegation of authority at 49 CFR 1.51)

Issued on March 18, 1974.

JAMES B. GREGORY,
Administrator.

§ 571.301–75 Standard No. 301; Fuel system integrity.

S.1 *Scope.* This standard specifies requirements for the integrity of motor vehicle fuel systems.

S.2 *Purpose.* The purpose of this standard is to reduce deaths and injuries occurring from fires that result from fuel spillage during and after motor vehicle crashes.

S.3 *Application.* This standard applies to passenger cars, and to multipurpose passenger vehicles, trucks, and buses with a GVWR of 10,000 pounds or less.

S4. *Definition.* "Fuel spillage" means the fall, flow, or run of fuel from the vehicle but does not include wetness resulting from capillary action.

S5. *General requirements.*

S5.1 *Passenger cars.* Each passenger car manufactured from September 1, 1975, to August 31, 1976, shall meet the requirements of S6.1 in a perpendicular impact only, and S6.4. Each passenger car manufactured on or after September 1, 1976, shall meet all the requirements of S6.

V 39 56 MAR 21 74 XUM

S5.2 *Vehicles with GVWR of 6,000 pounds or less.* Each multipurpose passenger vehicle, truck, and bus with a GVWR of 6,000 pounds or less manufactured from September 1, 1976, to August 31, 1977, shall meet all the requirements of S6.1 in a perpendicular impact only, S6.2, and S6.4. Each of these types of vehicles manufactured on or after September 1, 1977, shall meet all the requirements of S6.

S5.3 *Vehicles with GVWR of more than 6,000 pounds but not more than 10,000 pounds.* Each multipurpose passenger vehicle, truck, and bus with a GVWR of more than 6,000 pounds but not more than 10,000 pounds manufactured from September 1, 1976, to August 31, 1977, shall meet the requirements of S6.1 in a perpendicular impact only. Each vehicle manufactured on or after September 1, 1977, shall meet all the requirements of S6.

S5.4 *Fuel spillage: barrier crash.* Fuel spillage in any barrier crash test shall not exceed 1 ounce by weight from impact until motion of the vehicle has ceased, and shall not exceed a total of 5 ounces by weight in the 5-minute period following cessation of motion. For the subsequent 10-minute period fuel spillage during any 1-minute interval shall not exceed 1 ounce by weight.

S5.5 *Fuel spillage: rollover.* Fuel spillage in any rollover test, from the onset of rotational motion, shall not exceed a total of 5 ounces by weight for the first 5 minutes of testing at each successive 90° increment. For the remaining testing period, at each increment of 90° fuel spillage during any 1-minute interval shall not exceed 1 ounce by weight.

S6. *Test requirements.*

S6.1 *Frontal barrier crash.* When the vehicle traveling longitudinally forward at any speed up to and including 30 mph impacts a fixed collision barrier that is perpendicular to the line of travel of the vehicle, or at any angle up to 30° in either direction from the perpendicular to the line of travel of the vehicle, under the applicable conditions of S7, with test dummies as specified in Part 572 of this chapter at each front outboard designated seating position, fuel spillage shall not exceed the limits of S5.4.

S6.2 *Rear moving barrier crash.* When the vehicle is impacted from the rear by a barrier moving at 30 mph, with test dummies as specified in Part 572 of this chapter at each front outboard designated seating position, under the applicable conditions of S7, fuel spillage shall not exceed the limits of S5.4.

S6.3 *Lateral moving barrier crash.* When the vehicle is impacted laterally on either side by a barrier moving at 20 mph with test dummies as specified in Part 572 of this chapter at the outboard designated seating positions adjacent to the impacted side, under the applicable conditions of S7, fuel spillage shall not exceed the limits of S5.4.

S6.4 *Static rollover.* When the vehicle is rotated on its longitudinal axis to each successive increment of 90°, following each impact crash of S6.1, S6.2, and S6.3, fuel spillage shall not exceed the limits of S5.5.

S7. *Test conditions.* The requirements of S5 and S6 shall be met under the following conditions. Where a range of conditions is specified, the vehicle must be capable of meeting the requirements at all points within the range.

S7.1 *General test conditions.* The following conditions apply to all tests.

S7.1.1 The fuel tank is filled to any level from 90 to 95 percent of capacity with Stoddard solvent, having the physical and chemical properties of type 1 solvent, Table I ASTM Standard D484–71, "Standard Specifications for Hydrocarbon Dry Cleaning Solvents."

S7.1.2 The fuel system other than the fuel tank is filled with Stoddard solvent to its normal operating level.

S7.1.3 If the vehicle has an electrically driven fuel pump that normally runs when the vehicle's electrical system is activated, it is operating at the time of a barrier crash.

S7.1.4 The parking brake is disengaged and the transmission is in neutral, except that in meeting the requirements of S6.2 the parking brake is set.

S7.1.5 The vehicle, including test devices and instrumentation, is loaded as follows:

(a) Except as specified in S7.1.1, a passenger car is loaded to its unloaded vehicle weight plus its rated cargo and luggage capacity weight, secured in the luggage area, plus the weight of the necessary test dummies. Each dummy shall be restrained only by means that are installed in the vehicle for protection at its seating position and that require no action by the vehicle occupant.

(b) Except as specified in S7.1.1, a multipurpose passenger vehicle, truck, or bus is loaded to its unloaded vehicle weight plus 300 pounds or its rated cargo and luggage capacity weight, whichever is less, secured in the load carrying area and distributed as nearly as possible in proportion to its gross axle weight ratings, plus the weight of the necessary test dummies. Each dummy shall be restrained only by means that are installed in the vehicle for protection at its seating position and that require no action by the vehicle occupant.

S6.1.6 Tires are inflated to manufacturer's specifications.

S7.2 *Lateral moving barrier crash test conditions.* The lateral moving barrier crash test conditions are those specified in S8.2 of Standard No. 208, 49 CFR 571.208.

S7.3 *Rear moving barrier test conditions.* The rear moving barrier test conditions are those specified in S8.2 of Standard No. 208, 49 CFR 571.208, except for the positioning of the barrier and the vehicle. The barrier and test vehicle are positioned so that at impact—

(a) The vehicle is at rest in its normal attitude;

(b) The barrier is traveling at 30 mph with its face perpendicular to the longitudinal centerline of the vehicle; and

(c) A vertical plane through the geometric center of the barrier impact surface and perpendicular to that surface coincides with the longitudinal centerline of the vehicle.

S7.4 *Static rollover test conditions.* The vehicle is rotated about its longitudinal axis, with the axis kept horizontal, to each successive increment of 90°, 180°, and 270° at a uniform rate, with 90° of rotation taking place in any time interval from 1 to 3 minutes. After reaching each 90° increment the vehicle is held in that position for 5 minutes.

[FR Doc.74–6651 Filed 3–19–74;12:32 pm]

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[SO NO. 1178]

PART 1033—CAR SERVICE

Distribution of Covered Hopper Cars

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 15th day of March 1974.

It appearing that an acute shortage of covered hopper cars for transporting shipments of fertilizer exists in the State of Florida; that the railroads serving the fertilizer producing areas of that State are unable to furnish additional system cars for the movement of this traffic; that entire areas of the country are unable to receive adequate supplies of this fertilizer because of these shortages of freight cars; that the United States Department of Agriculture has certified that there is an immediate need for increased shipments of fertilizer into these areas in order to maximize the production of feed grains and other agricultural crops; that a substantial portion of this fertilizer will be routed via, or terminate on the lines named herein; that existing regulations and practices with respect to the use, supply, control and distribution of freight cars are insufficient to secure an adequate supply of covered hopper cars for shipments of fertilizer from Florida origins; that it is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1178 Service Order No. 1178.

(a) *Distribution of covered hopper cars.* Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service.

(b) *Assignment of cars to fertilizer traffic.* The carriers named herein shall each withdraw from grain service and forward to the Seaboard Coast Line Railroad Company (SCL) prior to April 1, 1974, one hundred (100) covered hopper cars listed in the Official Railway Equipment Register RER No. 390, issued by W. J. Trezise, as bearing reporting marks assigned to it, having mechanical designation "LO", and having cubic capacity not greater than 4,000 cubic feet and weight carrying capacity not less than 140,000 pounds.

Burlington Northern System, comprising cars of:

Burlington Northern Inc.
The Colorado and Southern Railway Company
Fort Worth and Denver Railway Company

Chessie System, comprising cars of:

The Baltimore and Ohio Railroad Company
The Chesapeake and Ohio Railroad Company
Chicago, Milwaukee, St. Paul and Pacific Railroad Company
Chicago and North Western Transportation Company
Chicago, Rock Island and Pacific Railroad Company
Illinois Central Gulf Railroad Company
Louisville and Nashville Railroad Company

Missouri Pacific System, comprising cars of:

Chicago & Eastern Illinois Railroad Company
Missouri-Illinois Railroad Company
Missouri Pacific Railroad Company
The Texas and Pacific Railway Company
Norfolk and Western Railway Company
Penn Central Transportation Company, George P. Baker, Richard C. Bond, and Jervis Langdon, Jr., Trustees
St. Louis-San Francisco Railway Company

Such cars may be used by the SCL only for transporting shipments of fertilizer originating in Florida and routed via the lines of the car owner.

(c) *Delivery of empty cars.* Empty covered hoppers described in paragraph (a) of this section may be sent by the car owner to the SCL at any junction. Cars owned by railroads which do not have a direct connection with the SCL shall be sent to the SCL via the Louisville and Nashville Railroad Company without charge to either the car owner or the SCL. Cars owned by the Penn Central Transportation Company (PC) which are located east of Pittsburgh, Pennsylvania, may be forwarded to the SCL via the Richmond, Fredericksburg and Potomac Railroad Company without charge to either the PC or the SCL or may be delivered to the SCL direct at Norfolk, Virginia.

(d) *Reports required.* Each car owner named in paragraph (a) of this section, shall report to R. D. Pfahler, Director, Bureau of Operations, Interstate Commerce Commission, Washington, D.C. 20423 the initial and number of each covered hopper furnished to the SCL for fertilizer service, and the date forwarded to the SCL. The SCL shall report to Director Pfahler the initial, number and date received of each covered hopper received by it under the requirements of this order. No additional reports are required for cars previously reported and returned to the SCL for additional empty movements.

(e) *Retention of cars in service.* Empty covered hoppers sent by the owner to the SCL as required herein shall be returned empty to the SCL via reverse of loaded route for subsequent shipments of fertilizer originating at origins in Florida, until their removal is authorized by this Commission or until this order expires or is vacated. Cars which must be removed from active service because of mechanical defects must be replaced by the car owner in the manner provided in paragraph (c) of this section for delivery of cars to the SCL. The car owner must notify both this Commission and the transportation officer of the SCL the initial and number of the car removed because of mechanical defects and the initial and number of the replacement car, together with the dates of removal and replacement.

(f) *Rules and regulations suspended.* The operation of all tariff provisions and of all other rules and regulations, insofar as they conflict with the provisions of this order, is hereby suspended.

(g) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(h) *Effective date.* This order shall become effective at 11:59 p.m., March 18, 1974.

(i) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., May 31, 1974, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; (49 U.S.C. 1, 12, 15, and 17(2)). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; (49 U.S.C. 1(10–17)), 15(4), and 17(2).)

It is further ordered, That a copy of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[REVISED S.O. NO. 1108; Amdt. No. 4]

PART 1033—CAR SERVICE

Reading Co. et al.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 15th day of March 1974.

Upon further consideration of Revised Service Order No. 1108 (37 FR 28634; 38 FR 5876, 23792; and 39 FR 1851), and good cause appearing therefor:

It is ordered, That:

§ 1033.1108 Service Order No. 1108. (Reading Company, Richardson Dilworth and Andrew L. Lewis, Jr., Trustees, Authorized to Operate over tracks of Lehigh Valley Railroad Company, John F. Nash and Robert C. Haldeman, Trustees).

Revised Service Order No. 1108 be, and it is hereby, amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., June 15, 1974, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m. March 15, 1974.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended (49 U.S.C. 1, 12, 15, and 17(2)). Interprets or applies secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911 (49 U.S.C. 1(10–17), 15(4), and 17(2))

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD, *Secretary.*

Title 50—Wildlife and Fisheries

CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 33—SPORT FISHING

Piedmont National Wildlife Refuge

The following special regulation is issued and is effective on March 22, 1974.

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

GEORGIA

PIEDMONT NATIONAL WILDLIFE REFUGE

Sport fishing on the Piedmont National Wildlife Refuge, Round Oak, Georgia, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising approximately 60 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

V 39 56 MAR 21 74 XUM

Open Season. March 22, 1974, through September 22, 1974—Allison Lake, the Falling Creek Bridge Area on Round Oak-Juliette Road, and the Little Falling Creek Area at County-Line Bridge.

June 1–September 22, 1974—Lake 2A.

Hours. Daylight hours only (camping prohibited).

Species, Limits, & Equipment. Same as State regulations with the following exceptions:

Boats and boats with electric motors permitted only in Allison Lake and Lake 2A, and boats may not be left in fishing areas overnight. Fishing areas open for bank fishing within posted areas only.

Permits. No special refuge permit is required, but a State license is required and it must be carried on the person and exhibited to Federal or State officers upon request.

General. Weapons and dogs are prohibited. Littering and alcoholic beverages are prohibited. All boats and fishermen must remain at least 30 feet away from wood duck nesting boxes. The destruction, disturbance, or removal of nesting facilities, plants, animals, or any public property is prohibited.

Vehicles. Use only roads and trails that are designated as being open for public travel. Maximum speed on gravel roads open for travel is 15 MPH. No parking on dams. Park vehicles off roads and trails in designated parking areas, so that they don't impede traffic or cause a safety hazard.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through September 22, 1974.

PHILIP S. MORGAN,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

MARCH 12, 1974.

Chapter II—National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce

PART 240—REGULATED COMMERCIAL FISHERIES

Catch Quota

On January 25, 1974, final regulations were published in the FEDERAL REGISTER (39 FR 3272), implementing conservation measures adopted by the International Commission for the Northwest Atlantic Fisheries (ICNAF), which, among others, included a prohibition on possessing haddock caught in Subarea 4 or 5 in amounts exceeding 5,000 pounds or 10 percent by weight of all fish on board, whichever is greater, and a restriction on using fishing gear capable of catching demersal species in Division 4X of Subarea 4, during March through May 1974.

On February 14, 1974, these final regulations were changed by an amendment published in the FEDERAL REGISTER (39 FR 5635), which deleted reference to Subarea 4, because of a reservation made by the Canadian Government concerning the prohibitions in Subarea 4, regarding haddock fishing.

The Department of State has advised that the Canadian Government's reservation was withdrawn as of 0001 hours local time, in the regulation area, March 19, 1974, therefore, it is our intent to amend § 240.11(a) and 240.13 as follows:

1. Section 240.11(a) is amended by adding a reference to Subarea 4 as follows:

§ 240.11 Catch quota.

(a) It shall be unlawful for any person or fishing vessel under the jurisdiction of the United States to possess on board haddock caught in Subareas 4 or 5, in amounts exceeding 5,000 pounds or 10 percent by weight of all fish on board caught in Subareas 4 or 5, whichever is greater.

* * * * *

2. Paragraph (c) of § 240.13 is amended by adding a subparagraph (1) as follows:

§ 240.13 Closed seasons and areas.

* * * * *

(c) * * *

(1) It shall be unlawful for any person under the jurisdiction of the United States permitted to fish in the area described in paragraph (c) to attach any protective device to pelagic fishing gear or employ any means that would, in effect, make it possible to fish for demersal species.

This amendment is in accord with the International Convention for the Northwest Atlantic Fisheries, and is effective on March 20, 1974.

Issued at Washington, D.C., and dated March 19, 1974.

JACK W. GEHRINGER,
Acting Director, National Marine Fisheries Service.

[FR Doc.74-6691 Filed 3-20-74; 8:45 am]

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

[8 CFR Part 103]

BREACH OF PUBLIC CHARGE BOND

Notice of Proposed Rule Making

Pursuant to section 553 of Title 5 of the United States Code (80 Stat. 383), notice is hereby given of the proposed amendment of § 103.6(e) of Title 8 of the Code of Federal Regulations, pertaining to the breach of public charge bonds.

The proposed amendment to 8 CFR 103.6(e) provides a definition of the term "public charge" as it pertains to sections 212(a)(15) and 213 of the Immigration and Nationality Act, for the purpose of determining whether a breach of a public charge bond has occurred. The proposed amendment also provides that if an alien on whose behalf a bond has been furnished pursuant to section 213 of the Act becomes a public charge, the public charge bond shall be declared breached regardless of whether there is a requirement for reimbursement to the public authority against whom the charge was incurred and regardless of whether demand for reimbursement is made by such public authority.

In accordance with section 553 of Title 5 of the United States Code (30 Stat. 383), interested persons may submit to the Commissioner of Immigration and Naturalization, Room 7100C, 425 Eye Street, NW., Washington, D.C. 20536, written data, views, or arguments, in duplicate, with respect to the proposed rule. Such representations may not be presented orally in any manner. All relevant material received by April 19, 1974, will be considered.

PART 103—POWERS AND DUTIES OF SERVICE OFFICERS; AVAILABILITY OF SERVICE RECORDS

In § 103.6, paragraph (e) is amended in the following respects:

1. The existing material is redesignated subparagraph (1) and a new caption "General" is added immediately following the subparagraph (1) designation.

2. A new subparagraph (2) is added to read as follows:

§ 103.6 Surety bonds.

* * * * *

(e) *Breach of bond—(1) General.* * * *

(2) *Public charge bond.* The term "public charge" in sections 212(a)(15) and 213 of the Act concerns the probability that the alien applying for admission to the United States, or for status as a permanent resident pursuant to Part 245 of this chapter, will have to be supported by public funds because he will become needy. For the purpose of determining whether there has been a breach of a condition of a bond furnished pursuant to section 213 of the Act that an alien shall not become a public charge, the alien shall be deemed to have become a public charge whenever he has been supported under a publicly funded program intended for the support of persons unable to provide for themselves. In that event, the bond shall be declared breached even if the public authority supporting the alien is not authorized to accept reimbursement or, if so authorized, fails to make a demand therefor. In the event that the public authority supporting the alien declines to accept money collected through the breach of the bond, the amount collected shall be deposited in the Treasury of the United States.

(Sec. 103, 66 Stat. 173; (8 U.S.C. 1103)

Dated: March 15, 1974.

L. F. CHAPMAN, JR.,
Commissioner of Immigration and Naturalization.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 1098]

[Docket No. AO-184-A34]

MILK IN NASHVILLE, TENNESSEE, MARKETING AREA

Decision on Proposed Amendments to Marketing Agreement and to Order

A public hearing was held upon proposed amendments to the marketing agreement and the order regulating the handling of milk in the Nashville, Tennessee, marketing area. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice (7 CFR Part 900), at Nashville, Tennessee, on November 19, 1973, pursuant to notice thereof issued on November 7, 1973 (38 FR 31179).

Upon the basis of the evidence introduced at the hearing and the record thereof the Deputy Administrator, Regulatory Programs, on February 15, 1974 (39 FR 6614), filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues, findings and conclusions, rulings, and general findings of the recommended decision are hereby approved and adopted and are set forth in full herein, subject to the following modification: Under "3. *Conforming changes*", a paragraph is added at the end thereof.

The material issues on the record relate to:

1. Pool plant qualifications.
2. Point of pricing diverted milk.
3. Conforming changes.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Pool plant qualifications*—(a) *Balancing plant.* A balancing plant operated by a cooperative association and approved by a duly constituted regulatory authority to handle milk for fluid consumption in the marketing area, at the cooperative association's request, should be accorded pool plant status in any month in which not less than two-thirds of the total volume of milk received at such plant (including diversion to other plants) and of the producer milk of the cooperative's other producer members received at other plants, in combination, is physically received at pool distributing plants directly from the producers' farms or by transfer from such pool balancing plant of the cooperative association.

Provision whereby its balancing plant could qualify as a pool plant was proposed by the principal cooperative in the market. There was no opposition to the proposal at the hearing. An essentially identical pooling provision, included in the order continuously from November 1960 through August 1971, was suspended September 1, 1971.

A suspension order was issued on May 28, 1971 (to be effective on June 15) and applicable to the Nashville and several other orders, to deter the possible dilution of pool proceeds by milk normally associated with other markets (pool riding). With respect to the Nashville order, the suspension (1) removed the provision whereby a cooperative could designate pool status for a plant operated by such cooperative, and (2) implemented the pricing of diverted milk at the plant to which diverted (instead of at the plant from which diverted).

Subsequently (June 11), that part of the suspension action which removed the provision for pooling the cooperative's plant was deferred until September 1. In explanation, the Department noted that the suspension action that changed the point of pricing "* * * should be sufficient to remove the monetary incentive

V 39156
MAR 21 74
XUM

which has existed heretofore in these markets for the introduction into their pools, directly or indirectly, of substantial quantities of unneeded distant milk". Nevertheless, in consummating the action it was noted further that the provisions of the order by which a cooperative may obtain pool status for its plant should be further reviewed at a later date.

Prior to September 1, 1971, a plant in Nashville now operated by proponent cooperative as a nonpool plant was a pool plant under the suspended pooling provision. The plant now could qualify for pooling only by receiving milk directly from producers' farms and shipping a required percentage of such receipts to pool distributing plants.

It is obviously more economical to move milk directly from the farm to handlers' bottling plants than to receive it at the cooperative's plant for reload and delivery to such bottling plants. Since the cooperative's plant is located in Nashville, where a major portion of the milk for the market is processed and bottled, there is but limited need to move milk through such plant to fill the requirements of Nashville handlers. Thus, its basic function is as an assembly point for producer milk not needed by handlers and, to a limited degree as a storage facility.

The cooperative's plant in its present capacity as a nonpool plant continues to assist the market in the balancing of receipts to bottling needs. However, the cooperative does not now have the needed flexibility to maximize operating efficiency since milk cannot move from the cooperative plant to pool handlers, as pool milk, as it formerly did to supply unanticipated emergency requests for additional milk.

Prior to September 1971, when the cooperative's plant retained pool plant status, pool distributing plants were in a position to supplement their direct producer deliveries, as needed, through transfers from the cooperative's (pool) plant. In the 12 months prior to the September 1, 1971 suspension action, 3.65 million pounds of milk were transferred from the cooperative's plant to pool distributing plants. In this period, the largest monthly transfer (in January) was 542 thousand pounds; the lowest (in August) was 42 thousand pounds.

As might be expected, the quantities of milk pooled by the cooperative's plant were highest during those months of the year when production for the market was highest relative to Class I sales. Conversely, the quantities of milk pooled by the plant were lowest in the months when the Class I needs of the market were highest relative to producer deliveries. During the same 12-month period referred to above (September 1970 through August 1971), 118 million pounds of producer milk were pooled at the cooperative's plant as either a direct delivery from producers to the plant or as diverted milk from that plant to nonpool plants. The largest monthly quantity thus pooled, in August, was 18.3 million pounds; and the lowest, in November, was 5.9 million pounds.

The cooperative's plant has continued to receive the market's surplus milk for disposition to available outside outlets. The milk of member producers that is received there and which the cooperative wishes to continue to pool is received as diverted milk from pool plants. However, much of the milk received there is not reported as a receipt of diverted milk. When the milk is not pooled and is shipped to outside unregulated markets (primarily for Class I use), the Nashville pool does not share in such Class I sales. In the 12 months ending September 1973, an average of 7.5 million pounds of milk monthly were thus received at the cooperative's Nashville plant and a monthly average of 6.6 million pounds, or 86 percent of that quantity, were sold for Class I use. Reinstating pool plant status for the cooperative plant does not provide assurance that all such outside sales will now be pooled. However, it is likely that the pooling of the plant will return at least some of the outside Class I sales to the pool.

Elsewhere in this decision, provision is made for basing the pool distributing plant route disposition requirements and supply plant pool shipping requirements on the percentage of a plant's receipts, including milk diverted from the plant. Since diverted milk is not now so used in determining plant qualifications, unlimited quantities of milk could now be associated with a plant and pooled as diverted milk, by either the plant operator or the cooperative association, without affecting a plant's pool status. Without appropriate modification of the order in this regard, the adoption of a provision providing pool status for a plant operated by a cooperative could only accentuate the problem.

The changes provided in this decision, however, will limit the quantity of milk that may be diverted since the volume of diverted milk will be included as a plant receipt for purposes of determining each plant's pooling status.

Requiring that at least two-thirds (66⅔ percent) of a cooperative's producer milk and of any nonmember milk that may be associated with the cooperative's balancing plant be delivered to pool distributing plants during the month, either by direct delivery from producers' farms or as a shipment from the cooperative's balancing plant, is a reasonable basis for qualifying such plant for pooling. All milk diverted by the cooperative plus the producer milk received at its plant(s) and that delivered by its members to other pool plants should be considered in determination of whether the requirement that at least two-thirds of such milk was delivered to pool distributing plants was met. In effect, the maximum quantity of milk that could be diverted by the cooperative and/or moved from its plant to nonpool plants during any month would be limited to one-third of the milk pooled by the cooperative.

The proponent cooperative stated that the pool distributing plants that it supplies are basically Class I operations. As a consequence, the 66⅔ percent requirement approximates the actual Class I utilization of the milk of its producer members. That percentage, which was proposed by the cooperative and was used from November 1960 through August 1971 as a basis for pooling a cooperative plant, also approximates the annual Class I utilization for the total market.

Enabling a cooperative's balancing plant to obtain pool plant status under the conditions here adopted will contribute to the orderly marketing of producer milk under the order. When the milk of dairy farmers regularly supplying the market is not needed at the bottling plant to which it is usually assigned, it can be pooled by delivery to the balancing plant. The plant thus represents an assured outlet for reserve milk without the necessity of involved arrangements under which the producers' milk would have to be diverted from bottling plants in order to maintain pool status.

Proponent proposed that a cooperative be allowed to move a balancing plant from pool to nonpool status and back on a month-to-month basis. As proposed, a cooperative could withdraw a plant from pool status for any month when it could advantageously dispose of milk for Class I use to outside markets, and pool the milk at such plant in only those months when its only use would be for manufacturing purposes. Such a provision would afford the opportunity for "pool-riding," which the 1971 suspension action was taken to deter, and would not be conducive to orderly marketing or in the best interest of all producers supplying the Nashville market.

It is necessary, however, that an appropriate means be provided under the order to enable a cooperative, under certain conditions, to remove a balancing plant from the order pool. Unless such plant during the same month qualified for pooling on the basis of its performance as a distributing plant or a supply plant, a cooperative should be permitted at any time to elect nonpool plant status for a plant that would otherwise qualify as a pool balancing plant. However, if the cooperative elects nonpool status for a balancing plant, such plant should not be reinstated for pooling as a balancing plant in the next 12 months. If a balancing plant were allowed to shift back and forth from pool to nonpool status in shorter periods, it would not be a plant on which the market could depend to perform the function of a balancing plant.

(b) *Distributing plant and supply plant standards.* The pooling percentage qualification for a distributing plant should be based on its total receipts of fluid milk products plus milk diverted from such plant under the diversion limits. Similarly, the quantities of milk on which the pooling percentage qualification of a supply plant is based, should include milk diverted from the plant in

addition to its receipts of producer milk. Qualifying percentages (unchanged by this decision) are now based on "total receipts of Grade A milk" for a distributing plant and "receipts of milk from approved dairy farmers" for a supply plant.

The changes here adopted, which were proposed by the principal cooperative in the market, were unopposed at the hearing.

The present basis for determining the pooling percentage qualifications are inappropriate under current conditions. They provide a means for pooling plants that may have no substantial association with the market and on which the market cannot depend for its fluid needs. The changes proposed, it was suggested by the cooperative, are necessary to avoid possible dilution of returns to producers that would result from attaching milk supplies to the Nashville pool largely predestined for manufacturing.

Whether the milk of producers regularly supplying a pool plant is diverted therefrom by the plant operator or by the cooperative through which the producers' milk is marketed, such milk is essentially an integral part of the plant's supply. It is appropriate, therefore, in determining a plant's pool status, to consider as its total supply all milk diverted from the plant together with the approved fluid milk products physically received at the plant.

Diverted milk may now be pooled without limit and is not included as a part of the supply of the plant from which diverted in determination of such plant's qualifications for pooling. Thus, a distributing plant diverting 50 percent of its total producer milk supply in reality must meet only 50 percent of the route disposition requirement of a distributing plant having an identical volume of producer milk supply but diverting no milk.

Similarly, if 50 percent of producer milk associated with a pool supply plant were pooled by diversion to nonpool manufacturing plants, the supply plant, by shipping half the milk physically received at such plant to pool distributing plants, would remain pooled. In this circumstance, the plant could qualify as a pool plant by shipping as little as 25 percent of its total producer milk supplies to pool distributing plants. On the other hand, a supply plant that diverted no milk would have shipped 50 percent of its actual producer receipts to qualify for pooling.

The requirements herein adopted for both types of plants will provide a more equitable basis for pooling.

In determination of plant pooling status, only those plants and that milk approved for fluid consumption by a "duly constituted regulatory agency" are considered. The term "duly constituted health authority" is now used in the order in referring to such approved milk. The cooperative spokesman suggested that a term such as "duly constituted regulatory agency" would better express the intent of the reference. The agency responsible for approving milk for fluid consumption is not always specifically designated as a health authority. In the State of Tennessee, for example, this function is the responsibility of the State Department of Agriculture.

As proposed by the cooperative, the "approved plant" definition should be replaced with definitions for "distributing plant" and "supply plant." Although commonly referred to in the order, distributing plant and supply plant are not defined. The approved plant definition, in a general manner, encompasses both distributing plants and supply plants, but it otherwise serves no purpose.

"Distributing plant" should be defined to mean a plant in which fluid milk products approved by a duly constituted regulatory agency for fluid consumption, or filled milk, are processed or packaged and from which there is route disposition in the marketing area during the month.

"Supply plant" should be defined to mean a plant from which a fluid milk product acceptable to a duly constituted regulatory agency for fluid consumption, or filled milk, is shipped during the month to a pool plant.

The definitions here adopted for distributing plants and supply plants conform with the definitions generally provided in other orders. The specificity provided in these definitions will facilitate the references to such plants throughout the order. Also, their adoption in the Nashville order will facilitate the reference to them in transactions involving other orders.

In conjunction with the revised pool plant definition adopted in this decision, "route disposition" should be defined to mean any delivery (including delivery by a vendor or a sale from a plant store) of any fluid milk product classified as Class I milk other than a delivery to a milk or filled milk processing plant. This is essentially the same language now used in the order to define "route".

The cooperative proposed replacing "route" with "route disposition". A route disposition definition, which is now contained or is in the process of being adopted in most Federal milk orders, is more meaningful than the term "route" in the various contexts in which it is used throughout the order.

2. *Point of pricing diverted milk.* The order should be amended to price producer milk diverted from a pool plant at the location of the nonpool plant to which it is delivered. This is now achieved by means of a suspension action that has been effective since September 1, 1971.

Prior to the suspension, the order priced diverted milk at the location of the pool plant from which diverted. The suspension action was taken to remove the incentive manufacturing plants might have to associate with the order for the purpose of receiving the f.o.b. Nashville price for milk received and utilized at distant locations from the Nashville market.

When producer milk is received as diverted milk at a nonpool plant, its location value is the same as milk delivered by producers to a pool plant at the same location. Pricing milk at the location of the pool plant from which diverted tends to subsidize, at the expense of producers generally, the more distant producers whose milk is diverted to distant manufacturing plants rather than delivered to the market. This is because the distant producers in that circumstance, receive the f.o.b. market uniform price on milk that is not moved to the market and on which the full cost for the farm to market hauling has not been incurred.

The order's location adjustments recognize the greater value of producer milk f.o.b. plants in or near the principal population center (Nashville) in the marketing area as compared to its value at other locations. In view of this, it would be inconsistent to price milk at the location of the pool plant from which diverted when actually delivered to a nonpool plant where a different price is appropriate, based on the location adjustment that would be applicable to a pool plant at the same location.

A cooperative proposed that milk diverted to a plant within 175 miles of Nashville be priced at the location of the plant from which diverted and that milk diverted to a plant more than 175 miles from Nashville be priced at the plant of actual receipt.

The order provides for no location adjustment at plants located in the State of Tennessee. At plants outside Tennessee and more than 50 miles from Nashville, the location adjustment (which reduces Class I and uniform prices) is 10 cents plus 1.5 cents for each 10 miles or fraction thereof that a plant is more than 70 miles from Nashville. Thus, the location adjustment at a Bowling Green, Kentucky, plant, 61 miles from Nashville is 10 cents; but no location adjustment is applicable at a Greenville, Tennessee, plant, 245 miles from Nashville.

If the cooperative's proposal were adopted, location adjustments at nonpool plants would apply only to those outside Tennessee and at least 175 miles from Nashville when location adjustments apply at pool plants outside Tennessee that are at least 50 miles from Nashville. To adopt such a provision would have different location adjustments apply at pool plants and nonpool plants at the same location. The record evidence, however, provides no basis for pricing any milk pooled under the order at other than the location of the plant where actually received.

The cooperative's proposal suggests that the order's location adjustment provisions may now be inappropriate. However, the issue of whether the location adjustment provisions should be changed was not among the proposals contained in the hearing notice or otherwise open for consideration at the hearing. Accordingly, consideration may not be given on this record to revising the location adjustment provisions.

3. *Conforming changes.* The changes in definitions provided in this decision necessitate some changes in other sections of the order wherein such definitions are involved. For the convenience of parties, a number of the affected pro-

V 39 156 MAR 21 74 XUM

visions have been redrafted to include the new terms. However, except as heretofore noted, these changes do not affect the application or impact of the order.

The attached order language includes several changes from the recommended decision, none of which are substantive. They are made to coordinate the order language in this decision with that contained in the decision issued February 19, 1974 (39 FR 8452, et al.) on the classification and pricing provisions in 32 orders, including the Nashville order. A complete rewrite of the Nashville order is included in that decision, which resulted from a hearing completed in November 1971. It is contemplated that the order changes contained in this decision, when approved by producers, will not be superseded by but will be incorporated in, the amended Nashville order resulting from the February 19 decision.

RULINGS ON PROPOSED FINDINGS AND CONCLUSIONS

A brief and proposed findings and conclusions was filed on behalf of an interested party. The brief, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested party are inconsistent with the findings and conclusions set forth herein, the request to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

GENERAL FINDINGS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

RULINGS ON EXCEPTIONS

In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

MARKETING AGREEMENT AND ORDER

Annexed hereto and made a part hereof are two documents, a Marketing Agreement[1] regulating the handling of milk, and an Order amending the order regulating the handling of milk in the Nashville, Tennessee, marketing area which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of the marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which is published with this decision.

DETERMINATION OF PRODUCER APPROVAL AND REPRESENTATIVE PERIOD

January 1974 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order, as amended and as hereby proposed to be amended, regulating the handling of milk in the Nashville, Tennessee, marketing area is approved or favored by producers, as defined under the terms of the order (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the aforesaid marketing area.

Signed at Washington, D.C., on March 18, 1974.

CLAYTON YEUTTER,
Assistant Secretary.

Order[1a] Amending the Order, Regulating the Handling of Milk in the Nashville, Tennessee, Marketing Area

FINDINGS AND DETERMINATIONS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Nashville, Tennessee, marketing area. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the Nashville, Tennessee, marketing area shall be in conformity to and in compliance with the terms and conditions of the order, as amended, and as hereby amended, as follows:

The provisions of the proposed marketing agreement and order amending the order contained in the recommended decision issued by the Deputy Administrator, Regulatory Programs, on February 15, 1974, and published in the FEDERAL REGISTER on February 21, 1974 (39 FR 6614), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein subject to the following modifications in §§ 1098.7, 1098.13 and 1098.81.

1. Section 1098.7 is revised as follows:

§ 1098.7 Producer.

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted regulatory agency, which milk is received at a pool plant or diverted pursuant to § 1098.13.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him which is diverted to a

[1] Filed as part of the original document.

[1a] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to a utilization other than Class I pursuant to § 1098.46(a)(4)(ii) and the corresponding step of § 1098.46(b); and

(3) Any person with respect to milk produced by him which is reported as diverted to an other order plant if any portion of such person's milk so moved is assigned to Class I under the provisions of such other order.

2. In § 1098.9, paragraph (a) is revised as follows:

§ 1098.9 Producer-handler.

* * * * *

(a) Produces milk and operates a distributing plant;

* * * * *

3. Section 1098.10 "Approved plant" is revoked and new §§ 1098.10 and 1098.10a are added as follows:

§ 1098.10 Distributing plant.

"Distributing plant" means a plant in which fluid milk products approved by a duly constituted regulatory agency for fluid consumption, or filled milk, are processed or packaged and from which there is route disposition in the marketing area during the month.

§ 1098.10a Supply plant.

"Supply plant" means a plant from which a fluid milk product acceptable to a duly constituted regulatory agency for fluid consumption, or filled milk, is shipped during the month to a pool plant.

4. Section 1098.11 is revised as follows:

§ 1098.11 Pool plant.

Except as provided in paragraph (d) of this section, "pool plant" means:

(a) A distributing plant that has route disposition, except filled milk, during the month of not less than 50 percent of the fluid milk products, except filled milk, approved by a duly constituted regulatory agency for fluid consumption that are physically received at such plant or diverted as producer milk to a nonpool plant pursuant to § 1098.13 and that has route disposition, except filled milk, in the marketing area during the month of not less than 15 percent of its total disposition of fluid milk products, except filled milk, during the month.

(b) A supply plant from which not less than 50 percent of the total quantity of milk approved by a duly constituted regulatory agency for fluid consumption that is physically received from dairy farmers at such plant or diverted as producer milk to a nonpool plant pursuant to § 1098.13 during the month is shipped as fluid milk products, except filled milk, to pool plants pursuant to paragraph (a) of this section. A plant that was a pool plant pursuant to this paragraph in each of the immediately preceding months of August through February shall be a pool plant for the months of March through July unless the milk received at the plant does not continue to meet the requirements of a duly constituted regulatory agency or a written application is filed by the plant operator with the market administrator on or before the first day of any such month requesting that the plant be designated as a nonpool plant for such month and each subsequent month through July during which it would not otherwise qualify as a pool plant.

(c) A plant that is approved by a duly constituted regulatory agency to handle milk for fluid consumption in the marketing area, that is operated by a cooperative association, for which pool plant status has been requested by the cooperative association, and from which during the month the quantity of fluid milk products (except filled milk) shipped to pool plants qualified pursuant to paragraph (a) of this section plus the milk physically received at such plants by direct delivery from the farms of producer members of the cooperative association is not less than two-thirds of the producer milk received at or diverted from pool plants of the cooperative association plus its members' producer milk received at or diverted from all other pool plants during the same month. If the cooperative association operating a plant qualified as a pool plant pursuant to this paragraph files with the market administrator prior to the first day of any month a written request for nonpool status for such month, the plant shall be a nonpool plant for such month and for each of the next 11 months in which it does not qualify as a pool plant pursuant to paragraph (a) or (b) of this section.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) A distributing plant qualified pursuant to paragraph (a) of this section which meets the requirements of a fully regulated plant pursuant to the provisions of another order issued pursuant to the Act and from which a greater quantity of fluid milk products, except filled milk, is disposed of during the month from such plant as route disposition in the marketing area regulated by the other order than as route disposition in the Nashville, Tenn., marketing area: *Provided*, That such a distributing plant which was a pool plant under this order in the immediately preceding month shall continue to be subject to all of the provisions of this part until the third consecutive month in which a greater proportion of its route disposition is made in such other marketing area, unless the other order requires regulation of the plant without regard to its qualifying as a pool plant under this order, subject to the proviso of this paragraph: *And provided further*, On the basis of a written application made either by the plant operator or by the cooperative association supplying milk to such operator's plant, at least 15 days prior to the date for which a determination of the Secretary is to be effective, the Secretary may determine that the route disposition in the respective marketing areas to be used for purposes of this paragraph shall exclude (for a specified period of time) route disposition made under limited term contracts to governmental bases and institutions;

(3) A distributing plant qualified pursuant to paragraph (a) of this section which meets the requirements of a fully regulated plant pursuant to the provisions of another Federal order and from which a greater quantity of Class I milk, except filled milk, is disposed of during the month in the Nashville, Tenn., marketing area as route disposition than as route disposition in the other marketing area, and such other order which fully regulates the plant does not contain provision to exempt the plant from regulation, even though such plant has greater route disposition in the marketing area of the Nashville, Tenn., order; and

(4) Any supply plant which would be subject to the classification and pricing provisions of another order issued pursuant to the Act unless such plant qualified as a pool plant pursuant to paragraph (b) of this section during the preceding August through January period.

5. In § 1098.13, paragraph (c) is revoked and paragraph (b) is revised as follows:

§ 1098.13 Producer milk.

* * * * *

(b) Diverted from a pool plant to a nonpool plant that is not a producer-handler plant. Such milk shall be accounted for as received by the diverting handler at the location of the nonpool plant.

6. In § 1098.18 the title "Route" is changed to "Route disposition" and § 1098.18 is revised as follows:

§ 1098.18 Route disposition.

"Route disposition" means any delivery (including delivery by a vendor or a sale from a plant store) of any fluid milk product classified as Class I milk other than a delivery to a milk or filled milk processing plant.

§ 1098.53 [Amended]

7. In § 1098.53, the word "pool" as it appears in paragraph (a) thereof is deleted.

8. In § 1098.81, a new paragraph (c) is added to read as follows:

§ 1098.81 Payments to market administrator.

* * * * *

(c) On or before the 25th day after the end of the month each handler who operated an other order plant that was regulated during such month under an order providing for individual-handler pooling shall pay to the market administrator an amount computed as follows:

(1) Determine the quantity of reconstituted skim milk in filled milk in route disposition from such plant in the marketing area which was allocated to Class I at such plant. If there is such route disposition from such plant in marketing areas regulated by two or more market-wide pool orders, the reconstituted skim milk allocated to Class I shall be

V 39 56 MAR 21 74 XUM

prorated to each order according to such route disposition in each marketing area; and

(2) Compute the value of the reconstituted skim milk assigned in paragraph (c) (1) of this section to route disposition in this marketing area by multiplying the quantity of such skim milk by the difference between the Class I price under this part that is applicable at the location of the other order plant (but not to be less than the lowest price class) and the lowest price class.

9. In § 1098.83, paragraph (b) is revised as follows:

§ 1098.83 Butterfat and location differentials to producers and on nonpool milk.

* * * * *

(b) In making payments to producers pursuant to § 1098.82(b), the uniform price pursuant to § 1098.71 and the uniform base price pursuant to § 1098.72 for producer milk received at a plant shall be reduced according to the location of the plant, each at the rates set forth in § 1098.53; and

* * * * *

10. In § 1098.85, paragraph (c) is revised as follows:

§ 1098.85 Expense of administration.

* * * * *

(c) Class I milk disposed of from a partially regulated distributing plant as route disposition in the marketing area that exceeds Class I milk received during the month at such plant from pool plants and other order plants.

§ 1098.91 [Deleted]

11. Section 1098.91 is deleted.

12. In § 1098.92, paragraph (b) (1) and (3) is revised as follows:

§ 1098.92 Obligations of handler operating a partially regulated distributing plant.

* * * * *

(b) * * *

(1) Determine the respective amounts of skim milk and butterfat disposed of as route disposition in the marketing area;

(2) * * *

(3) Deduct the quantity of reconstituted skim milk in fluid milk products disposed of as route disposition in the marketing area:

* * * * *

[FR Doc.74-6545 Filed 3-20-74;8:45 am]

Animal and Plant Health Inspection Service

[9 CFR Part 319]

INTERPRETATION OF THE TERM "MEAT"

Notice of Proposed Rulemaking

Notice is hereby given in accordance with the administrative procedure provisions in 5 U.S.C. 553, that the Department of Agriculture, pursuant to the authority conferred by sections 7 and 21 of the Federal Meat Inspection Act, as amended (21 U.S.C. 607 and 621), proposes to amend the Federal meat inspection regulations (9 CFR 319.1) to provide an interpretation of the term "meat" when specified in relation to meat quantity requirements associated with products for which maximum fat content limits are expressed in the definitions and standards of identity or composition in Part 319.

Statement of Considerations. Any restriction in the available supplies of meat to serve as ingredients of processed products adversely influences the production of such products in quantities sufficient to satisfy consumer requirements. This situation requires that the Department consider every possible means to utilize available sources of meat ingredients without detrimental effect on the nutritional value or other important properties of consumer products.

Meats for manufacturing purposes vary greatly in their fat to lean proportions with this characteristic determined, generally, by their origin. As an example, ordinarily the lean content is comparably high in meat that is secured from cattle that are not fattened prior to slaughter. On the other hand, meat trimmed from carcasses or major carcass parts from animals that are fattened in their preparation for marketing, usually consists principally of fat. It has been normal for meat processors to blend these particular types of meats to arrive at predetermined proportions of the fat and lean components. This insures consistency in the texture of the consumer products and has a direct effect, also, on their flavor and appearance.

The Department has applied a policy for many years that requires product identified as "meat" to include at least 12 percent lean. In view of advancing technology and the need to adopt the most effective procedures for the best utilization of available protein supplies, it appears that the Department should propose that meat from cattle, sheep, swine, or goats, without regard to a specific minimum lean content, be considered as "meat" when used as an ingredient of a product for which a definition and standard of identity or composition, which specifies a maximum fat limit, is prescribed in Part 319 of the regulations. However, such meat would be required to contain visible lean tissue and the finished meat food product would be required to comply with the limits on fat content specified in the standards. Such a policy would permit the blending of supplies of manufacturing meat regardless of their lean content with the assurance that the products produced for consumer usage would not contain more than their permitted percentages of fat. It appears that implementation of this new policy would provide processors with greater manufacturing leeway which may increase the supplies of available processed products to meet consumer requirements without any lessening of the appearance, taste, or nutritive properties of the products.

Section 319.1 would be amended by designating the existing paragraph as (a) and adding a new paragraph (b) to read:

§ 319.1 Labeling and preparation of standardized products.

* * * * *

(b) When a standard of identity or composition prescribed in this Part for any product provides that such product shall contain "meat" and provides a maximum fat content limitation for the product, the meat to be used shall contain visible lean tissue but no specific percentage of lean tissue is required. However, the finished product must comply with the maximum fat content limitation.

Any person wishing to submit written data, views, or arguments concerning the proposed amendment may do so by filing them, in duplicate, with the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250, or if the material is deemed to be confidential, with the Product Standards Staff, Technical Services, Meat and Poulty Inspection Program, Animal and Plant Health nical Services, Meat and Poultry Inspec- Agriculture, Washington, D.C. 20250, by May 24, 1974.

Any person desiring opportunity for oral presentation of views should address such request to the Staff identified in the preceding paragraph, so that arrangements may be made for such views to be presented prior to the date specified in the preceding paragraph. A record will be made of all views orally presented.

All written submissions and records of oral views made pursuant to this notice will be made available for public inspection in the Office of the Hearing Clerk during regular hours of business, unless the person makes the submission to the Staff identified in the preceding paragraph and requests that it be held confidential. A determination will be made whether a proper showing in support of the request has been made on the grounds that its disclosure could adversely affect any person by disclosing information in the nature of trade secrets or commercial or financial information obtained from any person and privileged or confidential. If it is determined that a proper showing has been made in support of the request, the material will be held confidential; otherwise, notice will be given of denial of such request and opportunity afforded for withdrawal of the submission. Requests for confidential treatment will be held confidential (7 CFR 1.27(c)).

Comments on the proposal should bear a reference to the date and page number of this issue of the FEDERAL REGISTER.

Done at Washington, D.C., on: March 15, 1974.

F. J. MULHERN,
Administrator, Animal and Plant Health Inspection Service.

CIVIL AERONAUTICS BOARD

[14 CFR Part 212]

[Docket No. 26509; EDR-264]

CHARTER TRIPS BY FOREIGN AIR CARRIERS

Proposed Terms, Conditions, and Limitations

By Order to Show Cause, Order 74-3-71, issued contemporaneously herewith, the Board directed interested persons to show cause why the Board should not, subject to the approval of the President, amend Part 212 of its Economic Regulations in the manner set forth in the "Proposed Rule" attached below; and, to the extent such regulatory amendments might be deemed to constitute an amendment of foreign air carrier permits authorizing individually ticketed or individually waybilled foreign air transportation, or both, why such permits should not be so amended. The basis, purpose and principal features of the proposed amendments are set forth in that order. The amendments are proposed under the authority of sections 204(a) and 402 of the Federal Aviation Act, 72 Stat. 743, 757; 49 U.S.C. 1324, 1372.

Accordingly, notice is hereby given that, pursuant to and in accordance with Order 74-3-71, any interested person having objections to the proposed amendments, or desiring otherwise to comment with respect thereto, shall file with the Board by April 29, 1974, a memorandum stating objections or comments supported by evidence. Reply comments may be filed within twenty (20) days following the date for filing of initial comments.

Dated: March 15, 1974.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

It is proposed to amend Part 212 of the Board's Economic Regulations (14 CFR Part 212) as follows:

1. Amend the Table of Contents by adding a reference to a new § 212.3b and by revising the caption of § 212.4, the revised Table to read in part as follows:

Subpart A—General Provisions

Sec.

* * * * *

212.3b Limitation on annual number of charter trips originating in the United States.

212.4 Statement of authorization required for operation of certain charter trips.

* * * * *

2. Amend § 212.1, by deleting from the definitions set forth therein, the definitions of "Off-route charter trip" and "On-route charter trip" as follows:

§ 212.1 Definitions.

* * * * *

"Mixed charter" * * *

"Pro rata charter" * * *

* * * * *

3. Amend § 212.2 to read as follows:

§ 212.2 Applicability and scope.

(a) *Applicability.* This part establishes the terms, conditions, and limitations applicable to charter foreign air transportation performed pursuant to a foreign air carrier permit issued under section 402 of the Act authorizing direct foreign air transportation on an individually ticketed or individually waybilled basis. The limitations and regulations specified as applicable to charter trips shall be applicable to all charter trips, irrespective of whether the authority to conduct such trips derives from the linear route authority described in the carrier's permit or from any additional authority conferred in such permit, and irrespective of the points involved in such trips. The terms, conditions, and limitations applicable to charter foreign air transportation performed pursuant to foreign air carrier permits authorizing the holder to engage in charter transportation only are governed by Part 214 of the Board's Economic Regulations.

(b) *Scope.* (1) Charter trips may be performed by all direct foreign air carriers who hold currently effective section 402 permits authorizing foreign air transportation on an individually ticketed or individually waybilled basis, subject to the terms, conditions and limitations set forth in the permit or the order authorizing issuance of the permit, and to the terms, conditions and limitations of this part or any amendment thereof, or as may from time to time be prescribed by the Board. Subject to the foregoing, foreign air carriers holding such permits may, without prior Board authorization, conduct charter trips only between points in the territory of their home country and points in the United States: *Provided, however,* That prior Board authorization will be required for such charter trips, upon notification to the carrier, pursuant to § 212.4(b): *And Provided further,* That, with respect to such charter trips originating in the United States, such carrier's charter operations may not exceed, during any calendar year, the maximum number prescribed under § 212.3b.

(2) The limitation prescribed in subparagraph (1) of this paragraph, on the points between which a carrier may conduct charter trips shall not apply to the performance of a charter trip, as provided in § 212.8(a)(4-a) in cases of emergency, but such emergency charters shall be subject to the limitations and requirements prescribed by §§ 212.4(a) and 212.14.

4. Add a new § 212.3b, following the present § 212.3a, the new section to read as follows:

§ 212.3b Limitation on annual number of charter trips originating in the United States.

The maximum number of charter trips originating in the United States which a foreign air carrier may perform during any calendar year shall be determined as follows:

(a) During any calendar year in which the foreign air carrier—

(1) Operates less than 18 charter trips originating in the territory of its home country, the number of United States-originated charter trips shall not exceed those originating in the territory of such home country by more than six;

(2) Operates between 18 and 45 charter trips originating in the territory of its home country, the number of United States-originated charter trips shall not exceed those originating in the territory of such home country by more than one-third;

(3) Operates more than 45 charter trips originating in the territory of its home country, the number of United States-originated charter trips shall not exceed those originating in the territory of such home country by more than 15.

(b) For the purpose of computing the number of charter trips which may be operated, pursuant to paragraph (a) of this section—

(1) Any charter originating in one country and flown to the other, whether one-way or round-trip, will be considered as one charter trip; and

(2) Where two or more charters, each of which is for less than the entire capacity of the aircraft, are carried on the same charter trip from the territory of the home country to the United States, and any one of such charters originated in the United States, then such charter trip shall be considered as a United States-originated charter trip.

5. Amend § 212.4 to read as follows:

§ 212.4 Statement of authorization required for operation of certain charter trips.

(a) Except in cases of emergency, performance of a charter trip as provided in § 212.8(a)(4-a) may not be provided by a foreign air carrier without a Statement of Authorization: *Provided, however,* That such emergency charters for commercial traffic shall be reported in accordance with § 212.14: *And provided further,* That no such emergency charter trips may be performed on any day in each of three or more successive calendar weeks for any single direct air carrier without a Statement of Authorization. An "emergency charter," within the meaning of this section, shall not include such circumstances as cancellations of flights due to periodic overhaul of aircraft or delay in the delivery of newly acquired aircraft.

(b)(1) The Board, if it finds that the public interest so requires, may at any time, with or without hearing, notify a foreign air carrier subject to this part that it shall not perform charter trips in the absence of prior Board authorization. The Board's notification shall be effective for such period or periods and with respect to such operations as the Board may specify in accordance with this paragraph. Effective not earlier than 30 days after the date of such notice, the foreign air carrier shall not perform any charter trip falling within the specifications of the notice, unless specific authority in the form of a Statement of Authorization to conduct such charter trip has been granted by the Board.

V 39 N 56 MAR 21 74 XUM

(2) If an application for a Statement of Authorization, filed pursuant to the requirements of this subsection, has been timely filed at least 30 days in advance of the proposed flight, then, to the extent that such application relates to a charter trip or trips between points between which the applicant holds authority under a foreign carrier permit to engage in foreign air transportation on an individually ticketed or individually waybilled basis, notification of the Board's proposed failure to approve either the whole or part of such application will be submitted to the President of the United States at least 10 days prior to the date of the proposed flight. Any such failure to approve shall be subject to stay or disapproval by the President within 10 days after the date of the Board's notification.

6. Amend paragraphs (a) and (b) of § 212.5, the amended paragraphs to read as follows:

§ 212.5 Statements of Authorization; application.

(a) Application for a Statement of Authorization shall be submitted on CAB Form 433 to the Civil Aeronautics Board, addressed to the atention of the Director, Bureau of Operating Rights. Upon a showing of good cause, such application may be transmitted by cablegram or telegram or may be made by telephone: *Provided, however,* That an application for the performance of a charter transporting commercial traffic for another direct air carrier or direct foreign air carrier (as provided in § 212.8(a)(4–a)) must be submitted on CAB Form 433, and a copy thereof shall be served upon the Federal Aviation Administration, marked for the attention of Director, Flight Standards Service, and upon each certificated air carrier which is authorized to serve the same general area in which the proposed charter trips are to be performed. Each applicant shall keep on file with the Director, Bureau of Operating Rights, a copy of its current standard form of charter agreement. Each application shall contain an abstract of the charter agreement setting forth the names and addresses of the operator, the charterer, and their agents, if any: a description of the proposed operations, type of aircraft to be flown; if reciprocity has not previously been established or if any changes have occurred since the previous Board finding thereon, documentation to establish the extent to which the nation which is the domicile of the applicant grants a similar privilege with respect to U.S. air carriers; and shall refer to the bilateral agreement or understanding, if any, between the United States and the foreign nation which is the domicile of the applicant whereunder the applicant has been designated to provide the charter services covered by the application. A true copy of the charter agreement actually consummated shall be transmitted to the Director, Bureau of Operating Rights, as soon as practicable, but in no event later than fifteen (15) days after consummation.

(b) Applications for the performance of a charter transporting commercial traffic for another direct air carrier or direct foreign air carrier (as provided in §§ 212.4(a) and 212.8(a)(4–a)) shall be filed with the Board at least 45 days in advance of the date of the commencement of the proposed flights, except that applications for authority to conduct planeload cargo charters may be filed not less than 48 hours in advance of the proposed flight. Applications required pursuant to § 212.4(b), shall, unless otherwise specified by the Board, be filed not less than 30 days in advance of the proposed flight. Upon a showing that good cause exists for failure to adhere to the above requirements and that waiver of these requirements is in the public interest, applications later submitted may be considered by the Board.

• • • • •

7. Amend § 212.6, by revising paragraph (b) and deleting paragraph (b–1), the amended section to read in part as follows:

§ 212.6 Issuance of statement of authorization.

• • • • •

(b) In passing upon an application involving a charter trip or trips under § 212.8(a)(4–a), the Board will consider the following factors, among others, in making its determination as to the public interest:

(1) Whether the foreign air carrier or its agent or the charterer or its agent has previously violated any of the provisions of this part or of Part 218 of this subchapter.

(2) Whether operations under the charter will have a significant adverse competitive impact on any U.S. air carrier. In making this determination, the Board will consider such factors as: The relative size and financial strength of the U.S. air carriers and the foreign air carriers operating on the route; and whether the proposed operation will render uneconomic any U.S.-carrier operations over the route.

(3) Whether the nature of the arrangement and the benefits to be realized are such that the authority sought should be the subject of a bilateral agreement with the applicant's government.

(4) Whether the authority sought is covered by and consistent with pertinent bilateral air transport agreements to which the United States is party.

(5) Whether, and to what extent, the applicant owns and controls the charterer.

• • • • •

8. Amend subparagraphs (1) and (2) of § 212.7(a), the amended subparagraphs to read as follows:

§ 212.7 Records and record retention.

(a) • • •

(1) True copies of all passenger lists, air waybills, invoices, and other traffic documents covering charter trips performed under a statement of authorization.

(2) A copy of every contract for charter trips originating or terminating in the United States together with all traffic documents pertaining to such charters.

• • • • •

9. Amend §§ 212.8 (a) and (b) by revising subparagraphs (8) and (6), respectively, as follows:

§ 212.8 Charter flight limitations.

Charter flights (trips) shall be limited to foreign air transportation performed by a foreign air carrier holding a foreign air carrier permit issued pursuant to section 402 of the Act authorizing such carrier to engage in foreign air transportation on an individually ticketed or individually waybilled basis—

(a) Where the entire capacity • • •

(8) By a tour operator or foreign tour operator, as defined in Part 378 of this chapter.

(b) • • •

(6) By a tour operator or foreign tour operator, as defined in Part 378 of this chapter:

Provided, That with respect to paragraph (b) of this section each person engaging less than the entire capacity of an aircraft shall contract and pay for 40 or more seats: *And provided further,* That paragraph (b) shall not be construed to apply to movements of property.

10. Amend § 212.13 by revising paragraph (a) to read as follows:

§ 212.13 Waiver.

(a) Waiver of any of the provisions of this part may be granted by the Board upon the submission by a foreign air carrier of a written request therefor not less than 30 days prior to the flight to which it relates provided such a waiver is in the public interest and it appears to the Board that special or unusual circumstances warrant a departure from the provisions set forth herein: *Provided, however,* That an application for a waiver of the rules so as to permit the operation of charter trips involving points in countries other than the United States and the territory of the applicant's home country, or to permit the operation of U.S.-originating charter trips in excess of the limitation prescribed in § 212.3b will ordinarily be granted by the Board only if it finds that: (1) Such waiver is consistent with the rights of the applicant as embodied in a charter agreement which is in effect between the governments of the United States and the home country of the applicant; (2) the government of the home country of the applicant authorizes United States carriers to perform charters of the same nature and in the same volume as the aggregate of charters for which waiver is sought hereunder by the carriers of the applicant's home country; or (3) there are highly unusual and extraordinary circumstances. Notwithstanding the foregoing, waiver applications filed less than 30 days prior to a flight may be accepted by the Board in emergency situations in which the circumstances warranting a waiver did not exist 30 days before the flight.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 85]

CONTROL OF AIR POLLUTION

Exclusion and Exemption of Motor Vehicles and Motor Vehicle Engines

Notice is hereby given that the Environmental Protection Agency is considering the addition of a new Subpart R to Part 85 of Title 40 of the Code of Federal Regulations, as set forth below.

Explanatory statement. The proposed regulations are intended to clarify the Environmental Protection Agency's policy with respect to exclusion and exemption of motor vehicles and motor vehicle engines under the Clean Air Act, as amended.

The term "exclusion" as used in the proposed regulations involves the construction and application of the term "motor vehicle" which, as defined in section 213(2) of the Act, means "any self-propelled vehicle designed for the transportation of persons or property on a street or highway." Vehicles meeting the definition are, of course, within the scope of the Act and are subject to applicable standards, unless they are expressly excepted therefrom or they fall within a class of vehicles for which no standards exist. For example, motorcycles are deemed light duty vehicles of the gasoline fueled type, but even though light duty vehicle standards exist, motorcycles to date have been expressly excepted from the application of those standards by regulation. This exception will terminate when emission standards specifically applicable to motorcycles are promulgated; EPA has already published an advance notice of proposed rulemaking for motorcycles.

Similarly, heavy duty vehicles fueled by liquid propane gas need at this time not be certified, since no regulations concerning liquid propane vehicles have been promulgated.

The term "exemption" as used in the proposed regulations involves vehicles that are subject to applicable standards and for which a manufacturer requests of the Environmental Protection Agency an exemption authorized by one or more of the exemption provisions of the Act. Under section 203(b)(1) exemptions are available for vehicles and engines on the basis of research and development activities and national security; under section 203(c) exemptions are available for vehicles and engines or classes thereof for the purpose of fuel conversion; and under section 203(b)(3) a statutory exemption is available for most vehicles and engines intended solely for export.

In recent months numerous inquiries have evidenced a substantial degree of uncertainty on the part of manufacturers with regard to the Environmental Protection Agency's policy concerning both exclusion and exemption matters. With respect to exclusion, the uncertainty involves the substantive problem of ascertaining the scope of the Act's motor vehicle definition, especially in conjunction with vehicles having highly specialized functions, namely, general utility vehicles, farm vehicles and equipment, construction, mining and logging vehicles, certain military vehicles, and public welfare vehicles. With respect to exemption, the uncertainty involves the substantive problem of determining the scope of the Act's various exemption provisions and the related procedural problem of requesting an exemption, if an exemption is appropriate.

With respect to the treatment afforded exclusion matters in the proposed interpretive regulations, some general observations can be made:

(1) In general, the proposed regulations embody a series of guiding criteria whereby the applicability of the Act to most vehicles can be easily determined. The proposed criteria are constructed to be as objective as possible; however, no attempt was made to categorize all possible features in order to avoid a limitation on the general principles expressed in the criteria.

(2) Thus, § 85.1703(a)(1) excludes vehicles which cannot maintain a cruising speed of 20 m.p.h. over level, paved surfaces. Section 85.1703(a)(2) excludes vehicles which lack features customarily associated with safe and practical highway use. Section 85.1703(a)(3) excludes vehicles which exhibit features which render their use on a street or highway unsafe, impractical, or highly unlikely. Of these criteria, that of § 85.1703(a)(1), namely the speed criterion, is perceived as being the determinant in the vast majority of questions that do arise. Accordingly, comments on the appropriateness of such a criterion, the particular speed selected, and the most desirable manner of defining the speed are especially invited.

(3) The guiding criteria are intended to reflect to a large extent certain generalizations commonly made in connection with the definition of "motor vehicle" to the extent those generalizations are consistent with the case-by-case opinions rendered by the Agency in recent years. Thus, the criteria operate to exclude from the Act most farm equipment, construction equipment, mining equipment, and tracked vehicles of all types.

(4) On the other hand, it is emphasized that the criteria do not operate to exclude public welfare vehicles and military vehicles per se. Thus, most public welfare vehicles such as police cars, ambulances, fire trucks, street sweepers, and garbage trucks fail to qualify under any of the exclusion criteria of § 85.1703, but such vehicles as airport crash trucks, because of their inordinate size and minimal street or highway use, are covered by § 85.1703(a)(3) and, therefore, are excluded from the Act. Similarly, military vehicles, such as jeeps and trucks, are generally deemed motor vehicles, but other military vehicles, because of their peculiar characteristics and special uses, may be excluded from the Act by the application of the criteria in § 85.1703.

With respect to the treatment afforded exemption matters in the proposed regulations, some additional general observations can be made:

(1) In general, the proposed regulations define the substantive scope of each exemption provision of the Act and establish a procedure whereby exemptions can be requested. The exemption provision having the broadest implications is section 203(b)(1) and, accordingly, that section is the focus of the proposed regulations.

(2) A substantive issue of considerable significance, namely, the scope of the term "national security" as employed in section 203(b)(1), has been addressed. The proposed regulations embody the Agency's views that "national security" is to be viewed in the national defense sense, rather than the broader national welfare sense. The impact of this policy is that national security exemptions would not be available for such vehicles as municipal fire trucks and would be available for national defense-type vehicles but only with the endorsement of the appropriate federal agency.

(3) With regard to testing exemptions, a significant distinction has been drawn between activities of the type involving a lease or sale by the manufacturer to another party for the implementation of the test program and activities of the type wherein the manufacturer himself executes the test program. Both types of activity are accommodated by the granting of an exemption with a variety of terms and conditions attached; however, for the latter type of activity the terms and conditions are significantly less stringent.

(4) The proposed regulations apply to foreign and domestic manufacturers.

This notice of proposed rulemaking is issued under authority of the following sections of the Clean Air Act, as amended; section 301(a), 81 Stat. 504, as amended by section 15(c), 84 Stat. 1713, (412 U.S.C. 1857g(a)); section 203(b), as amended by sections 7(a)(5), 15(c)(e), 84 Stat. 1693, 1713, (42 U.S.C. 1857–2(b)(1)); section 203(c), 84 Stat. 1693, (42 U.S.C. 1857–2(c)); and section 213(2), section 101(8), 79 Stat. 994.

Interested persons may participate in the rulemaking proceeding by submitting written comments in triplicate to:

Director
Mobile Source Enforcement Division
Environmental Protection Agency
401 M Street, SW.,
Washington, D.C. 20460

All comments received on or before May 20, 1974, will be considered. Comments received pursuant to this proposal will be available for public inspection during normal working hours (8:00 a.m. to 4:30 p.m.) at the Office of Public Affairs, Room 232, Waterside Mall, Fourth and M Streets, SW., Washington, D.C. 20460.

Final regulations, modified as the Administrator deems appropriate after con-

V 39 56 MAR 21 74 XUM

sideration of comments, will be promulgated as soon as practicable after such consideration.

Dated: March 15, 1974.

JOHN QUARLES,
Acting Administrator,

PART 85—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

Subpart R—Exclusion and Exemption of Motor Vehicles and Motor Vehicle Engines

Sec.
85.1701 General applicability.
85.1702 Definitions.
85.1703 Application of section 213(2), exclusion.
85.1704 Who may request an exemption.
85.1705 Testing exemptions.
85.1706 National security exemptions.
85.1707 Export exemptions.
85.1708 Fuel conversion exemptions.
85.1709 Granting of exemptions; liability for violation of terms and conditions.
85.1710 Submission of exemption requests.

AUTHORITY: Sec. 301(a), 81 Stat. 504, as amended, sec. 15(c), 84 Stat. 1713 (412 U.S.C. 1857g(a); Sec. 203(b), as amended, Secs. 7(a) 5, 15(c)(e), 84 Stat. 1693, 1713 (42 U.S.C. 1857–2(b)(1)); Sec. 203(c), 84 Stat. 1693 (42 U.S.C. 1857–2(c)); Sec. 213(2), Sec. 101(8), 79 Stat. 994.

Subpart R—Exclusion and Exemption of Motor Vehicles and Motor Vehicle Engines

§ 85.1701 General applicability.

(a) The provisions of this subpart regarding exemption are applicable to new and in-use motor vehicles and motor vehicle engines.

(b) The provisions of this subpart regarding exclusion are applicable after the effective date of these regulations.

§ 85.1702 Definitions.

(a) As used in this subpart, all terms not defined herein shall have the meaning given them in the Act:

(1) "Export exemption" means an exemption granted by statute under section 203(b)(3) of the Act for the purpose of exporting new motor vehicles and new motor vehicles engines.

(2) "Fuel conversion exemption" means an exemption which may be granted under section 203(c) of the Act for the purpose of fuel conversion.

(3) "National security exemption" means an exemption which may be granted under section 203(b)(1) of the Act for the purpose of national security.

(4) "Pre-certification vehicle" means an uncertified vehicle which a manufacturer employs in fleets from year to year in the ordinary course of business for product development, production method assessment, and market promotion purposes, but in a manner not involving lease or sale.

(5) "Pre-certification vehicle engine" means an uncertified engine used in a vehicle which a manufacturer employs in fleets from year to year in the ordinary course of business for product development, production method assessment, and market promotion purposes, but in a manner not involving lease or sale.

(6) "Testing exemption" means an exemption which may be granted under section 203(b)(1) for the purpose of research, investigations, studies, demonstrations or training, but not including national security.

§ 85.1703 Application of section 213(2).

(a) For the purpose of determining the applicability of section 213(2) a vehicle shall be deemed not a motor vehicle and therefore shall be excluded from the operation of the Act, if any one or more of the criteria set forth below are met:

(1) The vehicle cannot maintain an average cruising speed of 20 miles per hour over level, paved surfaces; or

(2) The vehicle lacks features customarily associated with safe and practical street or highway use, such features including, but not being limited to, a reverse gear, a differential, and safety features required by state and/or federal law; or

(3) The vehicle exhibits features which render its use on a street or highway unsafe, impractical, or highly unlikely, such features including, but not being limited to, tracked road contact means, as inordinate size, or features ordinarily associated with military combat or tactical vehicles such as armor and/or weaponry.

(b) Vehicle, as used in paragraph (a) of this section, means a self-propelled device capable of and intended for transporting a person or persons, or transporting property. Property means any material, or any permanently or temporarily affixed apparatus.

§ 85.1704 Who may request an exemption.

(a) Any manufacturer may request any exemption provided by this subpart, or exempt vehicles as provided by § 85.1707. For heavy duty motor vehicle engines, exemption may be requested by the engine manufacturer or the vehicle manufacturer.

(b) Any person may request an exemption under § 85.1708 with regard to new motor vehicles or new motor vehicle engines.

§ 85.1705 Testing exemption.

(a) Any manufacturer requesting a testing exemption must demonstrate the following:

(1) That the proposed test program has a purpose which constitutes an appropriate basis for an exemption in accordance with section 203(b)(1);

(2) That the proposed test program necessitates the granting of an exemption;

(3) That the proposed test program exhibits reasonableness in scope; and

(4) That the proposed test program exhibits a degree of control consonant with the purpose of the program and the Environmental Protection Agency's (hereafter EPA) monitoring requirements. Paragraphs (b), (c), (d), and (e) of this section describe what constitutes a sufficient demonstration for each of the four above identified elements.

(b) With respect to the purpose of the proposed test program, an appropriate purpose is one which is consistent with one or more of the bases for exemption set forth under section 203(b)(1), namely, research, investigations, studies, demonstrations, or training, but not including national security. A concise statement of purpose is a required item of information.

(c) With respect to the necessity that an exemption be granted, necessity arises from an inability to achieve the stated purpose in a practicable manner without performing one or more of the prohibited acts under section 203(a). In appropriate circumstances time constraints may be a sufficient basis for necessity, but the cost of certification alone, in the absence of extraordinary circumstances, is not a basis for necessity.

(d) With respect to reasonableness, a test program must exhibit a duration of reasonable length and affect a reasonable number of vehicles and engines. In this regard, required items of information include:

(1) An estimate of the program's duration;

(2) The absolute number of vehicles and engines involved; and

(3) The fraction of the applicant's total sales represented by the absolute number of (2).

(e) With respect to control, the test program must incorporate procedures consistent with the purpose of the test and be capable of affording EPA monitoring capability. As a minimum, required items of information include:

(1) The technical nature of the test;

(2) The site of the test;

(3) The time and mileage duration of the test;

(4) The ownership arrangement with regard to the vehicles or engines involved in the test;

(5) The intended final disposition of the vehicles or engines;

(6) The vehicle identification numbers and the engine serial numbers; and

(7) The means or procedure whereby test results will be recorded.

(f) Paragraph (a) of this section applies irrespective of the engine's or vehicle's place of manufacture.

(g) Where a vehicle is a display vehicle to be used solely for display purposes, will not be operated on the public streets or highways, and will not be sold, no request for exemption of the vehicle or its engine is necessary.

(h) Paragraph (a) of this section does not apply for pre-certification vehicles or pre-certification engines. In such cases a request for exemption is necessary; however, the only information required is a statement setting forth the general nature of the fleet activities, the number of vehicles involved, and a demonstration that adequate record keeping procedures for control purposes will be employed.

§ 85.1706 National security exemptions.

A manufacturer requesting a national security exemption must state the purpose for which the exemption is required and the request must be endorsed by an agency of the Federal Government charged with responsibility for national defense.

§ 85.1707 Export exemptions.

(a) A new motor vehicle or new motor vehicle engine intended solely for export, and so labeled or tagged on the outside of the container and on the vehicle or engine itself, shall be subject to the provisions of section 203(a) of the Act, unless the importing country has new motor vehicle emission standards which differ from US EPA standards.

(b) For the purpose of paragraph (a) of this section, a country having no standards whatsoever is deemed to be a country having emission standards which differ from US EPA standards.

(c) EPA shall periodically publish in the FEDERAL REGISTER a list of foreign countries which have in force emission standards identical to US EPA standards and have so notified EPA. New motor vehicles or new motor vehicle engines exported to such countries shall comply with US EPA standards.

(d) It is a condition of any exemption for the purposes of export under section 203(b)(3) of the Act, that such exemption shall be void ab initio with respect to a new motor vehicle or new motor vehicle engine intended solely for export where:

(1) Such motor vehicle or motor vehicle engine is sold, or offered for sale, to an ultimate purchaser in the United States for purposes other than export; and

(2) The motor vehicle or motor vehicle engine manufacturer had reason to believe that any such vehicle would be sold or offered for sale as described in subparagraph (1) of this paragraph.

§ 85.1708 Fuel conversion exemptions.

Any person requesting a fuel conversion exemption must provide the following items of information:

(a) A statement that the fuel conversion modification of the certified configuration will not, on the basis of engineering judgment and/or available data, result in noncompliance with applicable emission standards;

(b) The number of vehicles affected by the modification;

(c) The specific nature of the modification; and

(d) The persons or class of persons to whom the exemption shall apply.

§ 85.1709 Granting of exemptions; liability for violation of terms and conditions.

(a) If upon completion of the review of an exemption request, the granting of an exemption is deemed appropriate, a memorandum of exemption will be prepared and provided to the manufacturer or person requesting the exemption. The memorandum will set forth the basis for the exemption, its scope, and such terms and conditions as are deemed necessary. Such terms and conditions will generally include, but are not limited to, agreements by the applicant to conduct the exempt activity in the manner described to EPA, create and maintain adequate records accessible to EPA at reasonable times, employ labels for the exempt engines or vehicles setting forth the nature of the exemption, take appropriate measures to assure that the terms of the exemption are met, and advise EPA of the termination of the activity and the ultimate disposition of the vehicles or engine.

(b) Any exemption granted pursuant to paragraph (a) of this section shall be deemed to cover any subject vehicle or engine only to the extent that the specified terms and conditions are complied with. A breach of any term or condition shall cause the exemption to be void ab initio with respect to any vehicle or engine. Consequently, the introduction or delivery for introduction into commerce of any subject vehicle other than in strict conformity with all terms and conditions of this exemption shall constitute a violation of section 203(a)(1) of the Clean Air Act, and shall render the manufacturer or person to whom the exemption is granted, and any other person to whom the provisions of section 203 are applicable, liable to suit under sections 204 and 205 of the Act.

§ 85.1710 Submission of exemption requests.

Requests for exemption or further information concerning exemptions and/or the exemption request review procedure should be addressed to:

Director
Mobile Source Enforcement Division
Environmental Protection Agency

[40 CFR Part 129]

WATER PROGRAM

Proposed Toxic Pollutant Effluent Standards; Correction

In the December 27, 1973, issue of the FEDERAL REGISTER (38 FR 35388), the Environmental Protection Agency published a notice of proposed rulemaking which would establish effluent standards for toxic pollutants under Section 307(a) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.) (the Act).

On October 26, 1973, the Environmental Protection Agency published in the FEDERAL REGISTER (38 FR 29646) a notice of the availability of the Agency's proposed Water Quality Criteria published pursuant to section 304(a)(1) of the Act. Comments were requested on the proposed criteria.

This notice amends the original notice and the proposed Water Quality Criteria to correct an error made by the Agency in publishing the proposed Criteria and in deriving the proposed effluent standards for discharges of mercury into estuarine and coastal waters. As is explained in the preamble to the notice of proposed rulemaking, the proposed standards were calculated to assure that water quality criteria would be met in most cases. The basis for the proposed effluent standards for discharges of mercury into estuarine and coastal waters was the following statement on page 275 of the proposed Water Quality Criteria published by EPA in October, 1973, pursuant to Section 304(a) of the Act: "Concentrations of mercury in excess of 1.0 $\mu g/1$ in marine or estuarine waters are unacceptable." This statement, in turn, was based upon the following recommendation on p. 252 of the National Academy of Science report, entitled "Water Quality Criteria, 1972", prepared under contract for EPA: "On the basis of data available at this time, it is suggested that concentrations of mercury equal to or exceeding 0.10 $\mu g/1$ constitute a hazard in the marine environment."

The discrepancy between these two numbers was not intentional on EPA's part, but constituted an error of transcription. Accordingly, since the proposed effluent standards for discharges of mercury into estuarine and coastal waters were based in part upon the proposed Water Quality Criteria, those effluent standards should be modified. The limitations expressed as concentrations permitted to be discharged (40 CFR 129.08c (b)(1) and (b)(2)) would not be changed by this error, since they are derived directly from data on acute toxicity. However, the limitations on total daily weight in 40 CFR 129.08c(b)(3) require revision, since they are derived directly from the proposed Water Quality Criteria. These limitations should be one tenth the levels set forth in the proposed standards.

The following amendment to the proposed regulations reflects the changes discussed above:

40 CFR Part 129, as proposed on December 27, 1973, is amended as follows:

§ 129.08c Effluent standard for mercury.

(b) • • •
(3) • • •

(iii) Estuary from any facility subject to this subpart shall not exceed 0.00432 times the receiving water body flow in m^3/sec. to give kg/day or 0.00027 times the receiving water body flow in cfs to give pounds/day, provided that no facility shall discharge in excess of 1.22 kg/day or 2.70 pounds/day regardless of receiving water flow.

(iv) Coastal water from any facility subject to this subpart shall not exceed 0.00519 times the receiving water body flow in m^3/sec. to give kg/day or 0.000324 times the receiving water body flow in cfs to give pounds/day, provided that no facility shall discharge in excess of 1.47 kg/day or 3.24 pounds/day regardless of receiving water flow.

The deadline for the submission of comments on EPA's proposed Water Quality Criteria is April 26, 1974. The Agency sees no need to modify this date. However, the deadline for the submission of comments on the proposed toxic pollutant effluent standards is March 27,

V 39 56
MAR 21 74
XUM

1974. Because this notice may significantly affect some dischargers of mercury, the deadline for the submission of comments is hereby extended to April 26, 1974, but only with respect to the proposed paragraphs (b) (3) (iii) and (iv) of 40 CFR 129.08c.

Dated: March 15, 1974.

JOHN QUARLES,
Deputy Administrator.

[40 CFR Part 180]

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

3,5-Dichloro-N-(1,1-Dimethyl-2-Propynyl) Benzamide; Proposed Tolerance

Dr. C. C. Compton, Interregional Research Project No. 4, State Agricultural Experiment Station, Rutgers University, New Brunswick, NJ 08903, on behalf of the IR-4 Technical Committee and the Agricultural Experiment Stations of Oregon and Washington submitted a petition (PP 4E1435) proposing establishment of a tolerance for combined residues of the herbicide 3,5-dichloro-*N*-(1,1-dimethyl-2-propynyl) benzamide and its metabolites (calculated as 3,5-dichloro-*N*-(1,1-dimethyl-2-propynyl benzamide) in or on the raw agricultural commodity blueberries at 0.05 part per million.

Based on consideration given data submitted in the petition and other relevant material, it is concluded that:

1. The herbicide is useful for the purpose for which the tolerance is proposed.

2. There is no reasonable expectation of residues in eggs, meat, milk, or poultry, and § 180.6(a) (3) applies.

3. The proposed tolerance represents a negligible residue and will protect the public health.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(e), 68 Stat. 514; (21 U.S.C. 346a(e))), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), it is proposed that § 180.317 be amended by revising the paragraph "0.05 part per million * * *" to read as follows:

§ 180.317 3,5-Dichloro-N-(1,1-dimethyl-2-propynyl)benzamide; tolerances for residues.

* * * * *

0.05 part per million (negligible residue) in or on blackberries, blueberries, boysenberries, and raspberries.

* * * * *

Any person who has registered or submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act containing any of the ingredients listed herein may request, by April 22, 1974, that this proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons may, by April 22, 1979, file with the Hearing Clerk, Environmental Protection Agency, Room 1019E, 4th & M Streets, SW., Waterside Mall, Washington, D.C. 20460, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. All written submissions made pursuant to this proposal will be made available for public inspection at the office of the Hearing Clerk.

Dated: March 12, 1974.

JOHN B. RITCH, Jr.
Director, Registration Division.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 240]

[Release No. 34-10668; File No. S7-515]

SHORT SALE OF SECURITIES

Request for Public Comment

The Commission today announced proposed amendments to Rule 3b-3, Rule 10a-1 and Rule 10a-2 under the Securities Exchange Act of 1934. The amendments are proposed under section 3(b), 10(a) and 23(a) of the Securities Exchange Act.

In its "Policy Statement on the Structure of a Central Market System," [1] the Commission noted that before a composite transaction reporting system becomes operational [2] it will be necessary to review current provisions for the regulation of short sales to insure that such regulation will be complete and effective.[3]

At present, trading in a particular security is subject to varying degrees of short sale regulation depending on the market in which particular transactions are effected. Trades in the "primary" exchange market for a particular security, for example, are subject to Securities Exchange Act Rule 10a-1 [4] which prohibits a short sale on an exchange of any security below the price at which the last sale was effected (a "minus tick") or at the last sale price if the immediately preceding trade was at a higher price (a "zero-minus" tick).[5] Generally, trades on a "regional" exchange are subject to the same requirement; however, paragraph (d) (8) of Rule 10a-1 permits a short sale on an exchange if necessary to equalize the price of such security with its current price in the principal exchange market for that security.[6] In practice, this exemption has permitted a short sale on a regional exchange to be effected at a price equal to the last sale of such security on the primary exchange, without regard to whether such sale would be above or below the last sale on the regional exchange or whether the last sale in the primary market was effected on a "plus" or minus tick. Finally, while section 10 (a) of the Securities Exchange Act authorizes the Commission to adopt comprehensive short sale regulation for securities "registered" on a national securities exchange, whether such sales are effected thereon or by means of another instrumentality of interstate commerce, Rule 10a-1 applies only to exchange transactions. Short sales in the over-the-counter market for listed securities (the "third market") are not currently regulated.

The implementation of a composite transaction reporting system is the first of a series of steps the Commission outlined in it Policy Statement to achieve the goal of a central market system in securities registered on an exchange.[7] Reports of transactions in certain securities registered on a national securities exchange, whether effected on the exchange with which the issuer is registered, or on one or more other exchanges, or in the third market, will be commingled in a continuous stream of information. The Commission believes it is particularly important, for the protection of investors and to ensure fair dealing in such securities, that transactions reported through the composite tape system be subject to appropriate short sale regulation.

It has long been recognized that one of the dangers of short selling is the possibility that a seller will attempt to establish new lows in a particular security with the hope that investors, observing the decline in price, will be induced to liquidate their holdings. If such seller is able to exhaust the existing bids in a particular security with his short sales, and if he is able to attract long selling to the market, his goal of accelerating the price decline of a particular security should be accomplished. Thus, it is the national dissemination of short sales, either by an exchange transaction tape, or, as contemplated, by a composite transaction reporting system, which in large part enables the short seller to accomplish his intentions. The Commission does not believe the composite transaction reporting system should provide a vehicle for such efforts. In addition, short sale regulation should ensure that transactions are not effected in one market, in a security that is traded in multiple markets, solely because of the desire of a customer to evade short sale restrictions imposed in another market.

The Commission's Advisory Committee on a Central Market System addressed itself to the form Rule 10a-1 should take upon the implementation of a composite transaction reporting system. The Committee, in its "Interim Report to the Commission on Regulation Needed To Implement a Composite Transaction Reporting System," recommended that short sales be prohibited at prices below that of the last transaction reported in the composite transaction reporting system (a minus tick) or at that price if such price was below the preceding transaction at a different price reported in that system (a zero-minus tick).[8] The Committee recognized that the effectiveness of such an approach would be dependent on prompt reporting and proper sequencing of transactions, particularly during periods of unusually active trading.[9]

In addition, the Committee considered two exemptions to its proposed rule, only one of which the Committee members agreed upon. The Committee believed that the general short sale rule suggested above should be modified to permit a short sale made pursuant to a firm, recorded, time-stamped offer to sell without regard to an intervening report in the composite transaction reporting system of another transaction at a higher price, as long as a short sale pursuant to that offer would have been in compliance with the short sale rule when the offer was recorded. Without this exemption, it may be that a market maker would be unduly restricted by the appearance of intervening trades effected in other markets reported on the composite transaction reporting system.[10]

The Committee also analyzed the "equalizing" exemption provided in paragraph (d)(6) of Rule 10a-1 for short sales effected in "secondary" exchange markets.[11] In most instances, the Committee's proposed rule would obviate the need for an equalizing exemption since permissible sales would be determined by last sale, not in the market in question, but in the composite transaction reporting system. The Committee noted, however, that a limited equalizing exemption may be necessary where a specialist on a regional exchange has granted "primary market protection" to a customer, guaranteed the customer an execution at the next sale price in the primary market or, in the case of a limit order, at the limit price if the primary market price reaches the limit order price. Without an exemption it would appear that a regional exchange specialist may be prevented from filling a customer's limit order bid since the specialist may not be "long" at the time of execution. The Committee was unable to reach agreement, however, as to whether a limited form of equalizing exemption should be continued.[12]

Several questions have been raised by interested observers as to the efficacy of the Advisory Committee's proposed short sale rule. For example, some have stated that the proposed rule may result in more opportunities for legal short sales than at present. Others have stated that it would be difficult, if not impossible, for a specialist in an unusually active market to watch the stream of information emanating from the composite transaction reporting system in order to determine permissible short sales. Still others have pointed out that there may be delays between the execution of an order and its appearance in the information stream or that, in period of unusually high volume, the system may experience transmission delays resulting in delays in the reporting of transactions. Therefore, while the Commission is publishing herein amendments to Rule 10a-1 to implement the recommendations of its Advisory Committee, interested commentators are specifically requested to address the asserted deficiencies in this approach noted above and certain policy questions, which among other things, reflect certain alternative proposals that have been suggested.

The specific policy questions on which comment is invited are as follows:

(1) If the Commission adopts the rule published in this release, should the rule provide an exemption from short sale regulation for sales made by "secondary" market makers at a price equal to last sale in the primary market pursuant to an order for which "primary market protection" has been granted? If so, should such an exemption be of temporary duration, i.e., only until other aspects of the central market system are functioning?

(2) Rather than using last sale appearing in the composite transaction reporting system as a reference point for determining permissible short sales, should the short sale rule prohibit short sales on "minus" or "zero minus" ticks in relation to last sale in the primary market for such securities? If such an approach were adopted, should "secondary" market makers be permitted to effect "equalizing" sales at the primary market price, as is presently permitted pursuant to paragraph (d) (6) of Rule 10a-1?

(3) Would it be more appropriate for short sale regulation

(a) To prohibit short sales below the lowest independent offer, or

(b) To prohibit short sales below a specified predetermined price such as previous day's closing price, previous day's low or same day's opening, or

(c) To limit short selling to a predetermined amount of the outstanding publicly-held securities?

Interested commentators should also note that the amendments published herein:

(1) Amend Securities Exchange Act Rule 3b-3 to define ownership of a security for the purpose of determining whether a particular sale is long or short; [13]

(2) Amend Rule 10a-1 to apply to sales of securities registered on a national securities exchange effected by any broker or dealer rather than merely a member;

(3) Eliminate the exemption for short sales of odd-lots;

(4) Expand the odd-lot dealer exemptions to include certain sales by Qualified Third Market Makers in securities for which such market makers file notices on Form X-17A-16(1) (17 CFR 249.631);

(5) Amend the regional exchange "equalizing" exemption to limit its availability to certain securities, trades in which are not reported in a composite transaction reporting system pursuant to Securities Exchange Act Rule 17a-15 (17 CFR 240.17a-15); [14]

(6) Add an exemption for sales pursuant to recorded, time-stamped offers established prior to an intervening transaction to which the seller was not a party;

(7) add an exemption for sales made pursuant to a plan of a national securities exchange or association to regulate short sales during temporary periods of unusual activity; and

(8) amend Securities Exchange Act Rule 10a-2 to broaden its provisions to encompass the lending of securities in certain circumstances by all broker-dealers rather than merely exchange members.

TEXT OF PROPOSED RULE

The Securities and Exchange Commission, acting pursuant to the provisions of the Securities Exchange Act of 1934, and particularly sections 3(b), 10(a) and 23(a) thereof, hereby proposes to amend Part 240 of Title 17 of the Code of Federal Regulations by amending §§ 240.3b-3, 240.10a-1 and 240.10a-2 to read as follows:

§ 240.3b-3 Definition of "Short Sale."

The term "short sale" means any sale of a security which the seller does not own or any sale which is consummated by the delivery of a security borrowed by, or for the account of, the seller. For the purposes of this section, a person shall be deemed to own a security if (a) he or his agent has title to it; or (b) he has purchased, or has entered into an unconditional contract, binding on both parties thereto, to purchase it but has not yet received it; or (c) he owns a security convertible into or exchangeable for it and has tendered such security for conversion or exchange; or (d) he has an option to purchase or acquire it and

has exercised such option; or (e) he has rights or warrants to subscribe to it and has exercised such rights or warrants: *Provided, however,* That a person shall be deemed to own securities only to the extent that he has a net long position in such securities.

§ 240.10a–1 Short sales.

(a) No person shall, for his own account or for the account of any other person, effect a short sale of any security registered on a national securities exchange, if trades in such security are included in reports of a composite transaction reporting system pursuant to § 240.17a–15, (1) below the price at which the last sale thereof, regular way, was reported in such composite transaction reporting system, or (2) at such price unless such price is above the next preceding different price at which a sale of such security, regular way, was reported in such composite transaction reporting system. No person shall, for his own account or for the account of any other person, effect on a national securities exchange a short sale of any security, if trades in such security are not included in reports of a composite transaction reporting system pursuant to § 240.17a–15, (1) below the price at which the last sale thereof, regular way, was effected on such exchange, or (2) at such price unless such price is above the next preceding different price at which a sale of such security, regular way, was effected on such exchange. In determining the price at which a short sale may be effected after a security goes ex-dividend, ex-right, or ex-any other distribution, all sale prices prior to the "ex" date may be reduced by the value of such distribution.

(b) No broker or dealer shall, by the use of any facility of a national securities exchange, or any means or instrumentality of interstate commerce, or of the mails, execute any sell order for a security registered on a national securities exchange unless such order is marked either "long" or "short".

(c) No broker or dealer shall mark any order to sell a security registered on a national securities exchange "long" unless (1) the security to be delivered after sale is carried in the account for which the sale is to be effected, or (2) such broker or dealer is informed that the seller owns the security ordered to be sold and, as soon as is possible without undue inconvenience or expense, will deliver the security owned to the account for which the sale is to be effected.

(d) The provisions of paragraph (a) of this section shall not apply to—

(1) Any sale by any person, for an account in which he has an interest, if such person owns the security sold and intends to deliver such security as soon as is possible without undue inconvenience or expense;

(2) Any broker or dealer in respect of a sale, for an account in which he has no interest, pursuant to an order to sell which is marked "long";

(3) Any sale by an odd-lot dealer or sale by a Qualified Third Market Maker in a security for which such market maker has filed a notice with the Commission on Form X–17A–16(1) (§ 249.631 of this chapter), to offset odd-lot orders of customers;

(4) Any sale by an odd-lot dealer or a sale by a Qualified Third Market Maker in a security for which such market maker has filed a notice with the Commission on Form X–17A–16(1) (§ 249.631 of this chapter), to liquidate a long position which is less than a round lot; *Provided,* Such sale does not change the position of such odd-lot dealer or such market maker by more than the unit of trading;

(5) Any sale of a security on a national securities exchange, if trades in such security are not included in reports of a composite transaction reporting system pursuant to § 240.17a–15, effected with the approval of such exchange which is necessary to equalize the price of such security thereon with the current price of such security on another national securities exchange which is the principal exchange market for such security;

(6) Any sale of a security for a special arbitrage account by a person who then owns another security by virtue of which he is, or presently will be, entitled to acquire an equivalent number of securities of the same class as the securities sold: *Provided,* Such sale, or the purchase which such sale offsets, is effected for the bona fide purpose of profiting from a current difference between the price of the security sold and the security owned and that such right of acquisition was originally attached to or represented by another security or was issued to all the holders of any class of securities of the issuer;

(7) Any sale of a security registered on a national securities exchange effected for a special international arbitrage account for the bona fide purpose of profiting from a current difference between the price of such security on a securities market not within or subject to the jurisdiction of the United States and on a securities market subject to the jurisdiction of the United States: *Provided,* The seller at the time of such sale knows or, by virtue of information currently received, has reasonable grounds to believe that an offer enabling him to cover such sale is then available to him in such foreign securities market and intends to accept such offer immediately;

(8) Any sale of a security registered on a national securities exchange effected in accordance with a special offering plan declared effective by the Commission pursuant to paragraph (d) of § 240.10b–2;

(9) Any sale made pursuant to a firm offer to sell securities, properly recorded and time-stamped prior to the reporting of a sale on a composite transaction reporting system pursuant to § 240.17a–15 at a price above that recorded offer, so long as a transaction pursuant to that offer would have been in compliance with paragraph (a) of this section when the offer was established and recorded;

(10) Any sale of a security registered on a national securities exchange effected in conformity with a plan submitted by a national securities exchange or association designed to regulate short sales during temporary periods of unusually high trading activity, or in other circumstances, if the Commission has declared such plan effective.

For the purposes of subparagraph (7) of this paragraph a depository receipt for a security shall be deemed to be the same security as the security represented by such receipt.

§ 240.10a–2 Requirements for covering purchases.

(a) No broker or dealer shall lend, or arrange for the loan of, any security registered on a national securities exchange for delivery to the broker for the purchaser after sale, or shall fail to deliver a security on the date delivery is due, if such broker or dealer knows or has reasonable grounds to believe that the sale was effected, or will be effected, pursuant to an order marked "long," unless such broker or dealer knows; or has been informed by the seller, (1) that the security sold has been forwarded to the account for which the sale was effected; or (2) that the seller owns the security sold, that it is then impracticable to deliver to such account the security owned and that he will deliver such security to such account as soon as is possible without undue inconvenience or expense.

(b) The provisions of paragraph (a) of this section shall not apply (1) to the lending of a security registered on a national securities exchange by a broker or dealer through the medium of a loan to another broker or dealer, or (2) to any loan, or arrangement for the loan, of any security, or to any failure to delivery any security if, prior to such loan, arrangement, or failure to delivery, a national securities exchange, in the case of a sale effected thereon, or a national securities association, in the case of a sale not effected on an exchange, finds (i) that such sale resulted from a mistake made in good faith, (ii) that due diligence was used to ascertain that the circumstances specified in subparagraph (1) of § 240.10a–1(c) existed or to obtain the information specified in subparagraph (2) of this paragraph, and (iii) either that the condition of the market at the time the mistake was discovered was such that undue hardship would result from covering the transaction by a "purchase for cash," or that the mistake was made by the seller's broker and the sale was at a price permissible for a short sale under section 10a–1(a).

The Commission believes that a comprehensive short selling rule to insure the proper functioning of a composite transaction reporting system is a matter of great significance to the national securities exchanges, the national securities associations, firms in the securities industry and to the investing public whose interest the Commission mandated to uphold. The Commission, therefore, is inviting all persons interestd in the future structure of the public securities markets to submit their views on the rule proposed herein and the additional policy questions. Interested persons are requested to submit comments in writing to the Office of Secretary, Securities and Exchange Commission, 500 North Capitol Street, NW., Washington, D.C. 20549 no later than May 1, 1974. All comments should refer to File No. S7–515 and will be available for public inspection.

(Secs. 3(b), 10(a), 23(a), 48 Stat. 882, 891, 901; as amended 49 Stat. 704, 1379; 15 U.S.C. 78c(b), 78j(a), 78w(a))

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[17 CFR Part 249]

[Release No. 34–10678; File No. S7–519]

NONMEMBER (SECO) BROKER-DEALERS FOR FISCAL YEAR 1974

Proposal To Modify Initial Fees and To Set Annual Assessments

The Securities and Exchange Commission has announced a proposal to modify the fees and assessments payable to the Commission by registered broker-dealers who are not members of the National Association of Securities Dealers, Inc. ("nonmember" or "SECO" broker-dealers).

Sections 15(b)(8) and 15(b)(9) of the Securities Exchange Act of 1934 ("the Act") authorize the Commission to collect such reasonable fees and charges as may be necessary to defray the costs of additional regulatory duties required to be performed with respect to nonmember broker-dealers. Pursuant to these sections of the Act the Commission has adopted Rule 15b9–1 (17 CFR 249.15b9–1) to establish initial entry fees for firms and Rule 15b9–2 (17 CFR 249.15b9–2) to provide for annual assessments. This proposal deals with the amendment of Form SECO–5 (17 CFR 249.505) under Rule 15b9–1, which sets initial fees for SECO broker-dealers, and the adoption of Form SECO–4–74 (17 CFR 249.504h) under Rule 15b9–2, which would establish the levels for annual nonmember firm assessments for the current fiscal year. The form (Form SECO–2), (17 CFR 249.502) setting initial fees payable on behalf of new associated persons would not be changed.[1]

In general, Form SECO–5, now provides for an initial levy payable by new SECO broker-dealers which is comprised of a base fee of $150. Form SECO–4–73, covering fiscal 1973, provided for an annual assessment payable by SECO broker-dealers comprised of: (1) A base fee of $175 applicable to all such brokers or dealers; and (2) a fee of $10 for each associated person engaged directly or indirectly in securities activities during the year on behalf of the broker-dealer.

[1] The initial fee required to be paid by a SECO broker-dealer on behalf of each associated person is $35.

Proposed initial fees for nonmember broker-dealers. Rule 15b9–1 provides that every broker or dealer who becomes registered with the Commission and who does not make a bona fide application for membership to a registered national securities association within 45 days of such registration shall, within such 45 day period, file Form SECO–5 and pay to the Commission the fee prescribed by the form. This fee, to be set forth on the proposed revised Form SECO–5, will be $500. This increase has been necessitated by the Commission's belief that a new broker-dealer should make a minimum financial commitment to engage in the securities business and that this Commitment should include an amount related to the approximate minimum cost (about $500) of processing his application for registration and his entry into the SECO program.[2]

Proposed annual assessments for fiscal year 1974. Each fiscal year the annual assessments is set forth on a Form SECO–4 for that particular year. This year's assessment, to be set forth on Form SECO–4–74, will include a base fee of $250 and a fee of $12 for each associated person. These increases have been necessitated by the increased costs to the Commission in administering the SECO program.

Text of proposed rule. The Securities and Exchange Commission, acting pursuant to the provisions of the Securities Exchange Act of 1934, and particularly sections 15(b) and 23(a) thereof, hereby proposes to amend Part 249 of Title 17 of the Code of Federal Regulations by adopting § 249.504(h) as follows:

§ 249.504h (Form SECO–4–74); 1974 assessment and information form for registered brokers and dealers not members of a registered national securities association.

This form shall be filed on or before June 1, 1974, pursuant to § 240.15b9–2 of this chapter accompanied by the annual assessment fee required thereunder, for the fiscal year ended June 30, 1974, by every registered broker and dealer not a member of a registered national securities association.

The Commission proposes the foregoing to be effective June 1, 1974. All interested persons may submit their comments to the Commission at its office in Washington, D.C. 20549 no later than April 12, 1974. All comments should refer to File No. S7–519. Copies of the proposed form SECO–4 (17 CFR 249.504h) and Form SECO–5 (17 CFR 249.505) to be amended have been filed with the Office of the Federal Register, and additional copies are available on request from the Commission at the above address.

[2] See also Rule 15c3–1(a)(1)–(4) under the Act with respect to minimum capital requirements of broker-dealers.

(Sec. 15(b), 48 Stat. 895, as amended 78 Stat. 565 (15 U.S.C. 78o); sec. 23(a) 48 Stat. 901, as amended, 49 Stat. 1379, sec. 8 (15 U.S.C. 78w))

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 107]

SMALL BUSINESS INVESTMENT COMPANIES

Proposed Prohibited Uses of Fund

Notice is hereby given that pursuant to authority contained in section 308 of the Small Business Investment Act of 1958 (SBI Act), Pub. L. 85–699, 27 Stat. 694, as amended, it is proposed to revise, as set forth below, section 1001(d), Part 107 of Chapter I, Title 13 of the Code of Federal Regulations (Revised at 38 FR 30836, November 7, 1973).

Prior to the final adoption of such revision, consideration will be given to any comments. Such comments should be submitted in writing, in triplicate, to the Investment Division, Small Business Administration (SBA), Washington, D.C. 20416, on or before April 10, 1974.

Information. Revised § 107.1001(d) would alter policy to permit gambling income of less than one-third of a concern's gross income from the sale of official State lottery tickets or from gaming activities in those States wherein such activities are legal.

It is proposed that Part 107 be amended to read as follows:

§ 107.1001 Prohibited uses of funds.

* * * * * * *

(d) *Public interest.* For purposes contrary to the public interest including but not limited to gambling activities to the extent that any part of the annual gross income (including rental income) of the small concern (or of any of its principal owners) is derived from gambling activities except in those cases where an otherwise eligible small concern obtains less than one-third of its annual gross income (either at financing inception or during financing term) from (1) its income or commission from the sale of official State lottery tickets under a State license, or (2) from gaming activities in those States where such activities are legal within the State.

Dated: March 13, 1974.

THOMAS S. KLEPPE,
Administrator.

DEPARTMENT OF STATE

[Public Notice CM–122]

STUDY GROUP 8 OF THE U.S. NATIONAL COMMITTEE FOR THE INTERNATIONAL RADIO CONSULTATIVE COMMITTEE (CCIR)

Notice of Meeting

The Department of State announces that Study Group 8 of the U.S. National Committee for the International Radio Consultative Committee (CCIR) will meet on March 28, 1974, at 10:00 a.m. in Room A–110, Federal Communications Commission Annex, 1229 20th Street, NW., Washington, D.C.

Study Group 8 studies matters relating to systems of radiocommunications and radiodetermination for the mobile services. The purpose of the meeting on March 28 will be to review the results of the international meeting of Study Group 8 (February 1974) and establish a program of work for the next interim period.

Members of the general public who desire to attend the meeting on March 28 will be admitted up to the limits of the capacity of the meeting room.

Dated: March 12, 1974.

GORDON L. HUFFCUTT,
Chairman,
U.S. CCIR National Committee.

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

[ER 1105–2–507]

ENVIRONMENTAL IMPACT STATEMENTS

Policy, Practice, and Procedure

On November 15, 1973, the Department of the Army, acting through the Chief of Engineers, published proposed regulations to supersede regulations published in 38 FR 9242 (April 12, 1973). These proposed revisions to these existing regulations prescribe the policy, practice and procedure to be followed by all Corps of Engineers Installations in connection with the preparation and coordination of environmental impact statements.

The Department of the Army, acting through the Chief of Engineers, is publishing herewith its final revised regulations for the preparation and coordination of environmental impact statements. This regulation is effective April 15, 1974.

The public comment period for this regulation expired on December 31, 1973. This final regulation has been revised based on comments received. The following analysis summarizes comments received on the cited paragraphs of the proposed regulations and presents a rationale for the changes made. Sources of comments are referenced by the numeral in parentheses.

(1) Environmental Protection Agency
(2) Environmental Defense Fund
(3) Massachusetts Audubon Society
(4) National Newspaper Association

Paragraph 2.

Comment. References to the NEPA program within the Corps in paragraphs 9 and 14 are not consistent with that noted in paragraph 2. (3)

References in paragraphs 9 and 14 have been revised to be consistent with the reference in paragraph 2. It should be noted that this regulation applies only to Civil Works activities of the Corps of Engineers. The effect of NEPA on Corps of Engineers military activities is covered by Department of Defense Directives and Department of the Army regulations.

Paragraph 3.

Comment. Add Executive Order 11752, "Prevention, Control, and Abatement of Environmental Pollution at Federal Facilities," and "Federal Insecticide, Fungicide, and Rodenticide Act," as references to regulation. (1)

This office does not agree. The Corps does and must comply with the legal requirements of the two environmental directives cited as well as many others. There is little point in enumerating all the many Federal and State laws now in force or which may later be enacted.

Paragraph 4a.

Comment. Paragraph 4 contains language that misstates the nature and extent of the substantive obligations created and imposed by the statute. (3)

Paragraphs 4a and 4a(2) have been revised.

Comment. Include a policy directive to the effect that "no action" be the first alternative considered. (1)

Although this point is covered in Appendix C, the words "including the initial no action alternative" have been added to paragraph 4a(2).

Comment. Reference should be made to the EPA policy of protecting the Nation's wetlands. (1)

The Corps recent regulation on wetlands which discusses the coordination between the Corps and EPA on wetlands has been added as a reference.

Paragraph 4b(2).

Comment. A higher level of review of the District Engineers "negative assessments" should be made. (2)

The District Engineer is recognized as the responsible Federal official for this purpose within the meaning of section 102(2)(C) of NEPA.

Comment. The criteria and methods presently being used by the Corps in making negative assessments should be discussed. (3)

In accordance with § 1500.6(c) of CEQ guidelines, paragraph 5 of the regulation identifies specific actions likely to require an environmental statement and paragraph 8 identifies those actions specifically excluded from the administrative requirement for the preparation of environmental statements. Paragraph 4b(2) provides guidance on other minor actions likely not to require environmental statements. A report on the progress made in developing supplemental instructions on criteria and methods to be used in identifying actions which may or may not require an environmental statement will be provided to CEQ by 30 June 1974.

Comment. A time frame of at least 15 days be specified between notice of a "negative declaration" and initiation of administrative action and that this time frame be specified in 11c(2)(b) for actions on "negative declarations" involving EPA. (1)

The 15 days time frame for actions involving EPA has been added to 11c(2)(b).

Paragraph 5.

Comment. Emergency projects involving major stream channelization should be added to this section unless already included. (1)

Major stream channelization is included in subparagraphs c, d and e of paragraph 5. However, paragraph 8 delineates specific emergency actions exempt from the requirement for an environmental statement.

Paragraph 5(1)(a).

Comment. Composite statements shall be required not only when several projects "are closely associated geographically and involve similar environmental impacts," but also "because of its interdependence of natural ecosystems." (2)

Paragraph 5f(2) has been revised to insert the requested reference to the interdependence of natural ecosystems.

Paragraphs 5f and 5g.

Comment. These sections should be revised to reference the requirement of coordination of negative declarations with EPA as shown in 11c(2)(b). (1)

The reference regarding EPA coordination in paragraph 11c(2)(b) has been cross-referenced in paragraphs 5f and 5g.

Paragraph 5g(3).

Comment. Subparagraph should be rephrased to make clear that the District Engineer should not "believe that granting the permit may be warranted" without first assessing the environmental impact. (2)

The text has been revised to clarify the point that an environmental assessment by the District Engineer is necessary prior to preparation of the environmental statement. Paragraph 16e (4) makes clear that the permit will not be issued for 30 days after the final environmental statement has been filed with CEQ and noticed in the FEDERAL REGISTER or date of delivery to the post office for mailing of the final environmental statement by the District Engineer whichever is later.

Paragraph 5g(5).

Comment. If an "umbrella statement" does not necessarily adequately cover each individual action, a supplementary statement may be needed. (1)

A sentence has been added to clarify this point.

Paragraph 5g(6).

Comment. Delete 5(g)(6) in which the Corps restricts its own NEPA duties on permit actions involving fixed structures or artificial islands on offshore lands under mineral lease from the Department of the Interior. (3)

By Act of Congress (43 U.S.C. 1333(f) the jurisdiction of the Secretary of the Army is extended to these artificial islands or structures outside the three-mile limit only for the purpose of preventing obstructions to navigation or for national security reasons. The Departments of Army and Interior have agreed that Interior is the "lead agency" for the environmental statement. This position has been sustained in the courts.

Paragraph 6a.

Comment. In addition to dredging, disposal of dredged and fill material is also an O&M action which, once taken, precludes adoption of alternative plans. (1)

The text has been revised.

Paragraph 6d.

Comment. Negative assessments on permit applications should be included in the 3-year schedules and submitted to CEQ. (2)(3)

Since most of the 8 to 10,000 annual permit applications are of a minor nature, i.e., single piling, small private dock construction or restoration, etc., and have little or no impact on the quality of the environment, more than a statistical listing in the 3-year schedule is unnecessary. Permit applications will receive appropriate public notice within the affected area.

Paragraph 7.

Comment. This section does not appear to account for revision of "negative declarations" which later prove to be erroneous due to the discovery of major environmental impact. (2)

Paragraph 7 deals only with cases when an environmental statement has been filed, not with cases of negative assessments. Paragraph 4b(2) on negative assessments covers the reversibility of negative assessments.

Comment. The 90 day and 30 day waiting periods should be observed for all revisions and supplements. (3)

This office does not agree. The 1 August 1973 CEQ guidelines do not require such for revisions or supplements after initial filing of a draft and final environmental statement. Subparagraphs a, b and c were revised in consultation with CEQ and are considered adequate. However, minor rewording has been added.

Paragraph 8.

Comment. A "program" statement should be made to cover procedures used by the Corps for emergency and disaster recovery actions (actions are excluded from the requirements of environmental statements). (1)

Since the Corps actions in question consist of a wide range of activities it is infeasible to discuss procedures used on all of these activities.

Comment. Add "and extensive stream channelization is involved" at the end of the sentence in paragraph 8c. (1)

This office does not agree since no extensive stream channelization is accomplished under this statute.

Comment. Excluding emergency and disaster recovery actions and certain land acquisition cases from NEPA is beyond CEQ guidelines. (3)

The courts have held that CEQ guidelines are not mandatory requirements for agencies. Paragraph 8 excludes emergency or hardship actions that do not permit delays necessary to process environmental statements. The paragraph has been revised to clarify this.

Paragraph 9.

Comment. "Water resources development" as a modifier of "activities" should be deleted to insure that no misunderstanding develops regarding the need for environmental impact statements on Corps activities. (1)

The first sentence has been changed accordingly.

Comment. Change the second sentence from "it should reflect accurately the detailed appraisals * * *" to "it should present accurately the detailed appraisals * * *". (3)

Sentence has been changed.

Paragraph 9c.

Comment. Reword paragraph to insure that environmental investigations are carried on simultaneously and in an interdisciplinary fashion to the same depth and scope as related engineering, economic and technical studies. (2)

Text has been changed.

Paragraph 9d.

Comment. Add at the end: "which are summarized and should indicate how such information may be obtained, in the case of documents not likely to be easily accessible." (3)

Paragraph has been changed.

Paragraph 9g(1) and (2).

Comment. Suggest minor editorial changes. (1)(2)(3)

Changes were made.

Comment. Suggest rewording: "Use objective analysis. Use general costs comparisons rather than detailed cost breakdowns to illustrate quantifiable environmental, economical or social tradeoffs necessary to achieve objectives. Although every effort should be made to obtain quantifiable values for environmental, economic or social tradeoffs, the nature and extent of non-quantifiable tradeoffs should be described and included in the analysis." See Appendix C, paragraph 4c(1).

Changed accordingly.

Comment. Suggest new subparagraph. "A list of agencies, groups, and individuals from whom comments have been requested or have been received is to be included in the draft and final environmental impact statements." (3)

Paragraph 14 amended.

Paragraph 9g(4).

Comment. In addition to a summarization of comments received, the actual comments should be appended to the final EIS. (2)

A cross-reference to Appendix C, paragraph 4k(4) has been added to address this point.

Paragraph 9g(5).

Comment. The Federal Water Pollution Control Act Amendments should be used as an example in this section. (1)

The paragraph has been changed accordingly.

Paragraph 9g(6).

Comment. Coordination with the EPA, especially with regard to Section 102(b) of the FWPCAA, should be included in the draft EIS. (1)

The paragraph has been changed accordingly.

Paragraph 11.

Comment. Suggest first sentence, "on review of draft environmental statements" be expanded to read "on review of draft, final, revised or supplemental environmental statements." (3)

A cross-reference to paragraph 7 has been added to cover this point.

Paragraph 11b.

Comment. Request clarification of this paragraph. (2)(3)

This has been done by adding a cross-reference to section 1500.11(e) of CEQ guidelines (39 FR 20556).

Comment. Suggest adding a sentence: "This section shall not shorten the normal period for comments of organized conservation and environmental groups, and other public groups or citizens known to be interested." (3)

This office does not agree. Section 1500.11(e) of CEQ guidelines (38 FR 20556) authorizes a shorter period in some circumstances.

Paragraph 12a.

Comment. Include list of Federal and State agencies which receive copies of each draft statement. (1)

A list is maintained in each District. A reference to the list has been inserted in paragraph 14 to clarify this point.

Paragraph 12f.

Comment. Object to the phrase, "* * * and organizations representing a legitimate public interest * * * and respond to reasonable and responsible request from the general public." (3)

Paragraph wording has been modified and a cross-reference to paragraph 14 mailing list has been inserted.

Paragraph 13c.

Comment. Modify to reflect pesticide use requirement. (1)

V 39 56 MAR 21 74 XUM

The paragraph has been modified accordingly.

Paragraph 15c.

Comment. Add a new subparagraph. (3) "Letters of transmittal sending out draft environmental statements will indicate that copies of the SOF are available for review in the office of the responsible District Engineers."

This office does not agree. In the Corps decision making process the SOF is not drafted until all comments on the draft environmental statement have been analyzed and balanced against the economic and social benefits of the project. The SOF is prepared in final form at the time the final environmental statement is published and is bound into the final environmental statement behind the front cover. See paragraph 15.

Paragraph 14.

Comment. Suggest specific provision should be made for express public notice of all meetings and workshops, whether or not included in ER 1105–2–502. (2) (4)

Addition made to paragraph 14.

Paragraph 16b(2).

Comment. The last sentence appears to be in conflict with paragraph 9b. (1)

There is no conflict. All environmental statements will be reviewed by District Counsel. However, counsel at higher echelons (Divisions and OCE) will only review environmental statements in cases of litigation or controversy.

Paragraph 16e (2) and (3).

Comment. Recommend making the draft environmental statement available to the public at least 30 days prior to the public meeting held in connection with the project. (2)

This office does not agree. To give more than the 15 day period in § 1500.7d(2) of CEQ guidelines (38 FR 20553) would be contrary to the total public interest in certain cases. For example, in the case of permit application pertaining to the production of energy, a delay in processing may involve a loss to the applicant and ultimately to the consumer of millions of dollars.

Appendix C, paragraph 4c.

Comment. Recommend inclusion of two recent Public Laws administered by NOAA concerning wetlands preservation and water resource conservation as a specific reference. (2)

This office does not agree. On the contrary, we have deleted the two statutes cited; there is little point in enumerating the many Federal and State laws now in force or which may later be enacted.

Appendix C, paragraph 4d.

Comment. Existing water supplies, water quality, air quality and present methods of waste disposal should be discussed in this section. (1)

Inserted in first sentence.

Appendix C, paragraph 4j.

Comment. Reference should be made to the effects of the proposed project on the water quality of both surface waters and ground water. (1)

The paragraph has been revised to cover water, land and air.

Appendix C, paragraph 4h.

Comment. Add a statement that explicitly states that land acquisition or other land use controls in the flood plain be considered as an alternative in flood control projects. (1)

The paragraph has been revised to include these items.

DEPARTMENT OF THE ARMY

Office of the Chief of Engineers
Washington, D.C. 20314

PLANNING, PREPARATION AND COORDINATION OF ENVIRONMENTAL STATEMENTS [1]

1. *Purpose.* This regulation provides guidance for preparation and coordination of Environmental Statements as required by section 102(2)(C) of the National Environmental Policy Act of 1969 (Pub. L. 91–190), the Council on Environmental Quality Guidelines for Statements on Proposed Federal Actions Affecting the Environment, dated 1 August 1973 and section 122 of the River and Harbor Act of 1970 (Pub. L. 91–611), which is covered in separate guidelines.

2. *Applicability.* This regulation applies to all elements of the Corps of Engineers with responsibilities for planning, design, construction, management, and regulation of civil works activities and is applicable to pre-authorization and post-authorization project activities.

3. *References:*

4. *Policy.*

a. *General.* From the initiation of preauthorization planning through postauthorization planning and design, construction, and operation and management, all Corps of Engineers actions will be evaluated in terms of their impact on the environment within this overall policy. NEPA mandates a view of traditional policies and missions in light of NEPA's national environmental policy which requires all Federal agencies and officials to use all practicable means and measures to enhance, preserve and protect the quality of the environment to the fullest extent possible.

(1) Early and continuing coordination will be undertaken so as to develop a full interchange of views between the Corps of Engineers officials and appropriate local, State, and Federal agencies and the interested public. These Federal and Federal-State agencies and their relevant areas of expertise include those identified in Appendix II of CEQ's guidelines (38 FR 20557).

(2) The District Engineer will develop, analyze, study and utilize or adopt all practicable means and measures, including the "no-action" alternative and other alternatives to the proposed action, which will enhance, protect and preserve the quality of the environment, restoring environmental quality previously lost, minimizing and mitigating unavoidable adverse effects; and analyze and study the environment together with engineering, economic, social and other considerations to insure balanced decision making in the total public interest.

(3) During Corps of Engineers project planning and the related decision making process, a systematic and interdisciplinary approach will be utilized to insure proper weighing and balancing of environmental effects together with the engineering, economic, and social and other considerations affecting the total public interest. Sections 102(2) (A) and (B) of NEPA and Section 122, 1970 R&HA.

b. *Preparation of the Environmental Statements.*

(1) Environmental statements are required by section 102(2)(C) of NEPA. They will constitute an integral part of the interdisciplinary plan formulation process and will serve as a summation and evaluation of the effects, both beneficial and adverse, that each alternative action would have on the environment and as an explanation and objective evaluation of the finally recommended plan.

(2) Should the District Engineer determine in assessing the impact of a minor action that an environmental statement is not required, the determination to that effect will be placed in the project file. This determination shall be made available to the public upon request and shall include a statement of the facts and the signer's basis and reasons for his decision. It will be signed by the District Engineer or higher commander and brought to the attention of the public by publication in the three-year schedule (par. 6). Where more timely notification is essential, public notices may also be used. A minor action is defined as one which, following the completion of an environmental assessment, is determined not to have a significant impact on the quality of the human environment. If the District or Division Engineer is in doubt as to whether or not a statement should be prepared, further guidance must be requested in accordance with 4d. These determinations are reversible should controversy or other later events require an environmental statement to be written.

(3) Prior to forwarding, environmental statements will be carefully reviewed by District and Division Engineers to insure that the statement fully complies with the requirements of this regulation and the references cited herein.

c. *Systematic Review.* NEPA requires an environmental statement in every recommendation or report on proposals for legislation and other major Federal actions significantly affecting the quality of the human environment. To support the spirit of NEPA fully, a systematic review of all Corps of Engineers actions will be conducted and environmental statements prepared in accordance with paragraph 4b.

d. *Further Policy Guidance.* If after taking all measures within his authority, the District or Division Engineer need further assistance in satisfying the requirements of paragraph 4b, he will report the matter to HQDA (DAEN–CWZ–P) WASH DC 20314, and request the necessary authority or guidance.

5. *Specific Actions Requiring Environmental Statements.* Listed below are types of Corps of Engineers actions that require the preparation of an environmental statement by reporting officers. For actions not identified in this paragraph, reporting officers should request further guidance from HQDA (DAEN–CWZ–P) WASH DC 20314. Environmental statements will be revised or supplemented in accordance with paragraph 7.

a. *Legislation.* Recommendations or reports to the Congress on proposals for legislation affecting Corps of Engineers programs including proposals to authorize projects (survey, review, and authorization reports) and other legislation, exclusive of appropriations.

b. *Proposals Under Continuing Authorities.* Recommendations or reports on proposals for authorization of projects by the Chief of Engineers or the Secretary of the Army under special authorities, including reports recommending approval of projects under the following special continuing authorities:

(1) Section 205, 1948 FCA, as amended (Pub. L. 87–874; 62 Stat. 1182; (33 U.S.C. 701s)).

(2) Section 107, 1960 R&HA, as amended (Pub. L. 87–645; 74 Stat. 486; (33 U.S.C. 577)).

(3) Section 103, 1962 R&HA, as amended (Pub. L. 87–874; 76 Stat. 1178; (33 U.S.C. 577)).

(4) Section 2, 1937 FCA, as amended by Section 208, 1954 FCA (Pub. L. 208, 75th Congress; 68 Stat. 1266; (33 U.S.C. 701g)).

(5) Section 3, 1945 R&HA (Pub. L. 14, 79th Congress; 59 Stat. 23 (33 U.S.C. 603a)).

(6) 1909 R&HA, as amended (Pub. L. 317, 60th Congress; 35 Stat. 818; (33 U.S.C. 5)).

(7) Section 111, 1968 R&HA (Pub. L. 90–483; 82 Stat. 735 (33 U.S.C. 426i)).

c. *Construction or Land Acquisition Not Started.* Initiation of construction or land acquisition on projects (unless exempt under provisions of paragraph 4b(2)) not yet started but for which funds have been appropriated or are provided by the current FY Appropriation Act.

d. *Requests for Initiation of Construction or Land Acquisition.* Budget submissions requesting funds for the initiation of construction or land acquisition on authorized projects.

e. *Continuing Construction or Land Acquisition.* Environmental statements for projects in continuing construction or land acquisition status will be submitted in accordance with the criteria and the schedule established in compliance with paragraph 6. The project will be covered in one comprehensive environmental statement, even if a portion or feature is funded separately. If the project is to be constructed and operated as part of a basin plan or a system of other projects, the environmental effects of the overall plan or system should be covered in reasonable depth.

f. *Operation, Maintenance, and Management.*

(1) Pursuant to the requirements of NEPA, District Engineers are to make an environmental assessment of all projects in an operation and maintenance status. If the assessment indicates that the effects of the individual O&M projects are too insignificant to warrant preparation of a statement he will prepare a written finding to that effect in accordance with the procedures in paragraph 4b(2). See paragraph 11c(2)(b)

V 39156 MAR 21 1974 XUM

for EPA Coordination. If the assessment indicates a statement is needed such statement should be prepared.

(a) Composite statements grouping several projects under a single statement may be prepared when projects serve the same general purpose, are closely associated geographically or because of the interdependence of natural ecosystems and involve similar environmental impacts. The composite statement should address the cumulative environmental impacts of the projects as a group rather than on an individual basis. Such grouping of similar projects will be confined to projects in a single class category such as Channel and Harbor, or Lock and Dam, or Flood Control Reservoirs, etc. For example; several small boat harbors along an intercoastal waterway, or several flood control reservoirs which are operated under a network plan, or several harbors either for recreation or commercial purposes in a specific geographical area, could be appropriately covered by a composite statement.

(b) Separate statements for a project should be prepared where the operation and maintenance activities are unique or where known substantial environmental conflicts presently exist or can reasonably be expected to exist.

(2) Certain administrative actions regarding utilization of project resources such as leases, permits, easements and licenses, may lead to signficant effects on the enviromnent and therefore would require separate consideration. These actions will have been included in general terms under the overall project statement; however, separate environmental statements would still be required for those specific actions that are determined by the District Engineer to significantly affect the quality of the environment or to significantly affect future land or resource use.

(3) Exceptions:

(a) Completed projects turned over to local interests for operation and maintenance.

(b) Projects where only infrequent periodic maintenance is performed. Statements may be deferred until funds for maintenance are requested.

g. *Regulatory Permits.*

(1) Subject to the guidance contained in the regulations on policies and procedures for regulatory permits, an assessment of the impact of a proposed activity on all aspects of the quality of the environment is required. That assessment will include consideration of environmental information provided by the applicant, all advice received from Federal, State and local agencies, and comments from the public.

(2) When the District Engineer determines after evaluating the environmental assessment that an environmental statement need not be prepared for the proposed activity, he will follow the procedure outlined in paragraph 4b(2). See paragraph 11c(2)(b) for EPA coordination. If a public meeting is to be held in such cases, a summary of environmental considerations will be included with the announcement of the public meeting.

(3) If, after an environmental assessment, the District Engineer believes that granting the permit may be warranted but that the proposed activity would significantly affect the quality of the human environment, he will prepare an environmental statement which shall be noted on the three-year schedule pursuant to paragraph 6.

(4) If another Federal agency is the lead agency as defined by § 1500.7(b) of the CEQ guidelines (38 FR 20553), the District Engineer will coordinate with that agency to insure that the resulting environmental statement adequately describes the impact of the activity which is subject to Corps permit authority.

(5) If the proposed activity is part of a continuing program of similar activities in an area for which an overall environmental statement has been filed with CEQ ("umbrella statement"), that "umbrella statement" will be used in the evaluation of the environmental impact of the proposed activity. However, separate supplementary environmental statements may be needed to adequately cover subsequent permit actions.

(6) If the proposed activity involves fixed structures or artificial islands on the outer continental shelf lands which are under mineral lease from the Bureau of Land Management, Department of the Interior, the District Engineer's decision to issue a Corps of Engineers permit will be based on an evaluation of the impact of the proposed activity on navigation and national security only. An environmental statement by the Corps of Engineers is not required in such cases, and inquiries concerning environmental consideration will be referred to the Department of the Interior.

h. *Non-Federal Participation in Authorized Project.* When a non-Federal agency cooperates with the Corps of Engineers by construction or other participation, a final environmental statement will be prepared by the District Engineer and filed with CEQ prior to advertisement of the work. The non-Federal agency may furnish environmental data; however, the District Engineer will be responsible for independent verification and use of the data and for the environmental statement.

i. *Disposal of Lands for Port and Industrial Uses.* For disposal of surplus project lands for development of port and industrial facilities pursuant to section 108 of River and Harbor Act of 1960 (Pub. L. 86-645; 74 Stat. 487; (33 U.S.C. 578)), the District Engineer will prepare an environmental statement and process it with the proposed action to higher authority.

j. *Research and Development.* Procedures for the development of periodic evaluations and the determination as to whether an environmental statement is required on Civil Works research and development programs, in accordance with § 1500.6(d)(2) of CEQ guidelines (38 FR 20552) will be included in ER 70-2-3. "Civil Works Research and Development Management System."

6. *Three Year Schedule of Submission of Environmental Impact Statements (Reports Control Symbol DAEN-CWO-43).* Each District will develop by the end of each fiscal year, and updated quarterly, a schedule which develops for the following three years the environmental statements to be prepared or revised on projects in Survey, Continuing Authorities, AE&D, Construction, O&M, Permits and Research and Development Status. All schedules and quarterly updates will be submitted in ten copies within 15 days of preparation to HQDA (DAEN-CWO-C) WASH DC 20314. HQDA will provide a copy of this schedule to CEQ at this time. Appendix E contains the format for the schedule.

a. Priority effort will be assigned to Continuing Construction projects for which an environmental statement has not been filed with CEQ and Operation and Maintenance projects having a significant impact on the environment or those O&M actions such as dredging operations and dredge disposal which, once taken, preclude adoption of alternative plans.

b. In so far as practicable the schedule should consider the priorities expressed by appropriate agencies, groups and individuals on the project mailing list. The schedule is to be available to the public upon request.

c. Where a composite environmental statement is prepared for a group of O&M projects the listing on the schedule should include the names of all the projects included in the statement.

d. Where the District Engineer's environmental assessment of a proposed project indicates that an environmental statement is not required, such action and the negative assessment will be noted in the three-year schedule and in the annual budget request. Permit applications for which negative assessments have been made need not be included in the three-year schedule. However, permit negative assessments will be widely distributed via public notice and mailing list and will conform to requirements in paragraph 4b(2). The mailing list will include all agencies, groups or individuals, who have ever expressed an interest in the project.

7. *Revising or Supplementing Statements.* Whenever necessary, an appropriate revision or supplement to a final environmental statement on file with CEQ shall be prepared by the District Engineer. The extent of the revision and further coordination with other agencies, groups and individuals on the project mailing list will be based on para 14 and the following:

a. If the final environmental statement previously filed clearly failed to comply with the requirements of NEPA: e.g. failed to discuss alternatives or failed to disclose the environmental impacts of the proposed action, or if there has been a major change in the plan of development or method of operation of the proposed action, a revised environmental statement (draft and final) must be prepared and filed with CEQ. The 90 and 30 day waiting periods of CEQ guidelines § 1500.11(b) (38 FR 20556) will apply. Revised draft and final environmental statements will be circulated in accordance with paragraph 12d.

b. Whenever the final environmental statement on file becomes deficient because certain environmental effects of the project were not discussed or design features or project purposes were modified significantly subsequent to the filing of the original environmental statement, an appropriate supplement to the final statement shall be prepared. The supplement will be prepared in the draft and final format with a 45-day review and comment period allowed after publication by CEQ in the FEDERAL REGISTER for the draft. The 90 and 30 day waiting periods outlined in § 1500.11 (b) of CEQ guidelines (38 FR 20556) are not applicable. The draft supplement will be circulated to agencies, groups and individuals on the project mailing list. Both the draft and final supplement will be filed with CEQ and noted in a separate category in CEQ's weekly listing in the FEDERAL REGISTER. Reporting officers will furnish five copies of all draft supplements directly to CEQ (See Appendix C for sample letter and processing instructions). Ten copies will be transmitted to higher authority (five for HQDA (as appropriate) WASH DC 20314 and five for the Division Engineer). Twenty copies of the final supplement will be transmitted to higher authority (15 for OCE and five for the Division Engineer) for processing to CEQ. OCE will notify Division and District Engineers of any revisions made in the final supplement by the Chief of Engineers or the Secretary of the Army in advance of CEQ's notice in the FEDERAL REGISTER. This will allow the District Engineer time to make necessary revisions and have sufficient copies of the final supplement available for timely distribution to agencies, groups and individuals on the project mailing list.

c. Whenever it is necessary only to clarify or amplify a point of concern raised after the final environmental statement was filed with CEQ (and such point of concern was considered in making the initial decision) or if comments on the final environmental statement are received from Federal, State or local governmental agencies or the public, the clarification, amplication or response to the comments received shall be prepared and filed with CEQ. No waiting periods are required. Reporting officers will provide 20 copies of the above cited information to higher authority (15 for OCE and five for Division Engineers) for processing to CEQ.

8. *Specific Actions Excluded from Statements.* Specifically excluded from the administrative requirement for the preparation of an environmental statement are the following emergency or hardship actions which do not permit delays necessary to process environmental statements.

a. Emergency and disaster recovery actions performed under Public Law 99, 84th Congress, 69 Stat. 186, 33 U.S.C. 701n, except that for major post-flood restoration or rehabilitation actions, an environmental assessment will be undertaken to determie the environmental consequences of the proposed action. If any formal negative assessments are completed on these actions during the previous three-month period, they will be shown on the next quarterly submission of the three-year schedule. See Appendix E;

b. Emergency Bank Protection for Highways, Highway Bridge Approaches and Public Works, Section 14, FCA of 1946, 60 Stat. 653, 33 U.S.C. 701r;

c. Emergency snagging and clearing accomplished under Section 3, R&HA of 1945, as amended, 59 Stat. 23, U.S.C. 603a; except where disposal of sedimentation and dredged materials are involved;

d. Emergency actions directed by the Federal Disaster Assistance Administration (FDAA) under the provisions of Public Law 91-606, 84 Stat. 1744, except where FDAA determines that an environmental statement is required, the District Engineer will provide all necessary information to FDAA upon request;

e. In hardship cases, acquisition of land with appropriations made for the Land Acquisition Fund, initially established by Congress in connection with the passage of the Public Works for Water, Pollution Control and Power Development and Atomic Energy Commission Appropriations Act, 1971 (Pub. L. 91-439).

9. *Considerations in Preparing a Statement.* The environmental statement is to fully discuss the primary and secondary environmental effects including the social and economic impacts of all Corps of Engineers civil works activities. It should summarize accurately the detailed appraisals and analyses of Federal and State agencies with jurisdiction by law or special expertise with respect to environmental impacts and the concerns, views and comments expressed by conservation and environmental action groups and the public and the author's evaluation thereof. These agencies and their relevant areas of expertise are listed in Appendix II of CEQ guidelines.

a. Environmental statements are public documents and may receive broad exposure in the news media and intense public scrutiny.

b. They should be prepared in coordination with and be reviewed by District Council.

c. Interdisciplinary environmental investigations leading to the preparation of environmental statements should be undertaken simultaneously with and to the same depth and scope as study or project related engineering, economic and technical studies.

d. The environmental statement will bring together and summarize the various findings of other documents with respect to environmental considerations. It will summarize information and cite sources of overall appraisals and responsible judgments of complex environmental matters and inter-relationships (e.g., water quality by EPA, fish and wildlife resources by the Bureau of Sport Fisheries and Wildlife or other authoritative sources). It should make appropriate reference to those documents which are summarized and should indicate how such information may be obtained, in the case of documents not easily accessible.

e. Where another agency is directly involved with the Corps in an action or group of actions directly related to each other because of their functional interdependence and geographical proximity, consideration should be given to the designation of a lead agency to assume responsibility for the preparation of a single environmental statement to cover all of the Federal actions involved. Section 1500.7(b) of CEQ guidelines (38 FR 20553) provides further guidance on this and multi-agency actions.

f. The environmental statement shall be considered as an integral part of the Corps planning process and is only one of the documents upon which a decision on a major Federal action is based. It must be written so as to substantively stand on its own and will be submitted as a separate document for review by the public and other governmental agencies.

g. Environmental statements will be based on CEQ "Guidelines" Appendix B; the guidance of Appendix C, and the following:

(1) Describe the proposed action concisely using simple terms. Describe the environmental impacts and effects sufficiently to provide a careful assessment, evaluation, and independent appraisal of the favorable and adverse environmental, social and economic primary and secondary effects of the recommended proposal and each considered alternative. This discussion will include the impacts associated with O&M requirements during the life of the project. In no case will possible adverse effects be ignored or slighted in an attempt to justify an action previously recommended or currently supported. Conversely, avoid overstating either favorable or unfavorable effects.

(2) Discuss significant relationships between the proposed project and other existing, proposed and anticipated developments either public or private which may be affected by the project. This should include a discussion of the geographical setting of the area with and without the project; land usage including approved Federal, State and local land use plans, policies and controls; general trends including population and economic growth characteristics and projections and cumulative impacts induced by the project and the significance of the regional, national and international impact of the project, as applicable, supported by information indicating the relative scarcity or abundance of the environmental resources in question and other regional, national and international factors.

(3) Use objective analysis. Use general costs comparisons rather than detailed cost breakdowns to illustrate quantifiable environmental, economic or social tradeoffs necessary to achieve objectives. Al-

V 39 56 MAR 21 74 XUM

though every effort should be made to obtain quantifiable values for environmental, economic or social tradeoffs, the nature and extent of nonquantifiable tradeoffs should be described and included in the analyses.

(4) Comments received in response to the draft environmental statement are to be included in the final environmental statement. See Appendix C, paragraph 4k(4). Comments can be summarized by topic with appropriate responses. All comments received must be given full consideration and analysis. Irreconcilable opposing views must be included in the final environmental statement and fully discussed.

(5) Discuss any existing State or Federal legislation, program, or study that concerns the study area or would have an effect upon it. Examples of such legislation and studies are those dealing with Wild and Scenic Rivers, Wilderness Areas, National Recreation Areas, National Parks, National Forests, Registered Historic Sites, Federal Water Pollution Control Act Amendments, etc.

(6) The draft environmental statement should discuss coordination activities with the Bureau of Sport Fisheries and Wildlife and the agencies administering the fish and wildlife resources of the concerned state or states in accordance with section 2(a) of the Fish and Wildlife Coordination Act of 1958 (reference 3m). It should include appropriate references to reports or documents prepared by these agencies and discussed in the statement and how such information may be obtained. Coordination activities with the National Marine Fisheries Service on proposed actions in the coastal zones should also be discussed. A statement concerning the effect or impact of the proposed action on threatened, rare and endangered species of fish and wildlife should be provided (reference 3.0. and Appendix G). Coordination with EPA, especially comments received under paragraph 11c(2) will be discussed.

(7) Include information indicating that the National Register of Historic Places has been consulted and that no National Register properties will be affected by the project, or a listing of the properties to be affected, an analysis of the nature of the effects, a discussion of the ways in which the effects were taken into account, and an account of steps taken to assure compliance with section 106 of the National Historic Preservation Act of 1966 (Pub. L. 89–665; 80 Stat. 915; 16 U.S.C. 470f) in accordance with procedures of the Advisory Council on Historic Preservation as they appear in the FEDERAL REGISTER of 25 January 1974 and subsequent issues (reference 3l).

(8) The environmental statement should include a discussion of Steps taken to comply with sections 2(b) and 1(3) of Executive Order 11593, Protection and Enhancement of the Cultural Environment, 13 May 1971 (see ER 1105–2–11 and ER 1105–2–12).

(9) Pertinent correspondence inclosed with the environmental statement should include a written request to the Department of the Interior for investigations of historical, archeological and paleontological resources and contact with the State Archeologist and the Historic Preservation officer of the State regarding the effect of the proposed action upon these resources within the project area. In addition to necessary coordination with these State officials prior to preparation of the environmental statement, a copy of the draft environmental statement should in all cases be provided them and the Advisory Council on Historic Preservation for review and comment. In the event the Department of the Interior advises in writing that it is unable to provide timely information on historical, archeological and paleontological resources for inclusion in environmental statements, District Engineers may contract with outside experts to provide limited, reconnaissance-level information. The scope and monetary limitation of these outside contracts has been provided by other guidance.

10. *The Annual Budget.* The time requirements for the filing of final environmental statements, prepared and coordinated in accordance with section 102(2)(C) of NEPA, have been established with a view to meeting, to the maximum extent, the requirements specified by the Council on Environmental Quality. Section 1500.12(b) of the CEQ guidelines. (38 FR 20556)

a. *Requests for Initiation of Construction and Land Acquisition.* For budget recommendations in this category, final environmental statements must have been filed with the CEQ prior to 1 September of the calendar year in which the budget recommendation is being submitted by Division and District Engineers. However, for non-controversial projects the draft environmental statement must be filed with CEQ by 1 September and the final environmental statement submitted to OCE by 1 November.

b. *Requests for Continuing Construction or Land Acquisition and Operation and Maintenance Activities.* Environmental statements on projects in these categories shall be submitted in accordance with the three-year schedule required by paragraph 6.

c. *Expression of Capability for Initiation of Construction.* Prior to the expression of any construction or land acquisition only capability on a project, a final environmental statement should be on file with the CEQ. For projects for which a draft environmental statement has been filed with CEQ and for which there is a firm schedule for filing the final environmental statement by the second quarter of the budget fiscal year, a qualified capability may be expressed subject to the actual filing of the final environmental statement.

d. *Listings.* The annual budget recommendations of Division Engineers will provide a listing of projects recommended in each budget category indicating the time of actual or scheduled submission of the final environmental statements to the CEQ.

11. *Coordination.* Use existing coordination procedures to obtain the views of agencies, groups and individuals on the project mailing list on review of draft environmental statements. For recirculation of revisions or supplements see paragraph 7. If the project is in litigation, furnish the draft or final environmental statements to all the litigants.

a. *Time Limits.* Reporting Officers should establish a time limit of not less than 45 days for reply after date of publication of Draft environmental statement by CEQ in the FEDERAL REGISTER. In the absence of a specific request for an extension of time, a lack of response may be presumed to indicate that the agency consulted has no comment to make. In unusually large and complex actions consideration should be given to a reply period longer than 45 days to allow agencies, groups and the public adequate time to review and comment on the draft environmental statement. No administrative action will be taken regarding the proposal sooner than 90 days after a draft environmental statement has been filed with CEQ and notice in the FEDERAL REGISTER, or sooner than 30 days after the final environmental statement has been made available to CEQ and the public and noticed in the FEDERAL REGISTER. The 30-day period required for public review of final environmental statements before administrative action can be taken commences on date that notice of final environmental statement is published in FEDERAL REGISTER *or* on date of delivery to post office for mailing of copies of final environmental statements to agencies, groups and individuals on the project mailing list whichever is later. Administrative actions are defined for this purpose to include initial land acquisition, advertising of the initial construction contract, and regulatory permit approval.

b. *Expedited Filing.* In certain exceptional cases where the work must be performed within critical time restraints, but does not fall within the emergency actions listed in paragraph 8, an expedited filing process may be recommended in accordance with § 1500.11(e) of CEQ guidelines (38 FR 20556). In such cases, Reporting Officers will provide all information and facts to HQDA (DAEN–CWZ–P) WASH DC 20314, and request the necessary authority and guidance. At the same time, the Reporting Officer should initiate informal coordination with the appropriate Federal, State, and local agencies to insure prompt review of the environmental statement.

c. *Federal Agencies.*

(1) Use Appendix B, CEQ "Guidelines," (38 FR 20557) to determine the Federal agencies with jurisdiction by law or special expertise to whom the draft environmental statement is to be sent for comment on the environmental impacts. See Appendix F for special coordination requirements of individual Federal agencies. Draft environmental statements on Civil Works projects to be forwarded to other headquarters elements within the Department of Defense will be submitted to OCE for necessary coordination.

(2) Section 1500.9(b) of CEQ "Guidelines" (38 FR 20555) require in addition

to normal coordination procedures, the following coordination with the Environmental Protection Agency (EPA):

(a) Comments of the Administrator or his designated representative will accompany each final environmental statement on matters related to air or water quality, noise control, solid waste disposal, pesticides, radiation criteria and standards, or other provisions of the authority of EPA.

(b) Copies of basic proposals (studies, proposed legislation rules, leases, permits, etc.) will be furnished to EPA with each environmental statement. For actions for which environmental statements are not being prepared but which involve the authority of EPA, EPA will be informed that no environmental statement will be prepared and that comments are requested on the proposal within 15 days.

d. *State and Local Agencies.* Coordination of the environmental statement with State and local agencies authorized to develop and enforce environmental standards may be obtained directly with the agencies and with the appropriate State, regional, or metropolitan clearinghouses unless the Governor has designated some other source for obtaining this review. For additional guidance, see ER 1120–2–112, "Coordination of Investigations and Reports with Clearinghouses."

12. *Availability of Statements.* Draft and final environmental statements, revisions and supplements, including comments received during review, will be made available to the public in accordance with paragraph 14 of this regulation, Section 2(b) of Executive Order 11514, "Protection and Enhancement of Environmental Quality" and § 1500.9, .10, and .11 of the CEQ "Guidelines" (38 FR 20554) as follows:

a. *Draft Environmental Statements.* The District Engineer will furnish copies of draft environmental statements to agencies, groups and individuals on the project mailing list and in addition will furnish copies in response to requests from the public and will furnish public information file copies to the Division office and the appropriate State, regional and metropolitan clearinghouses. Additional copies will be available in the responsible District Engineers office and a copy will also be available for review in the Public Affairs Office in OCE.

b. *Final Environmental Statements.* At the same time as the final environmental statement is filed with CEQ, the District Engineer will furnish copies to agencies, groups and individuals on the project mailing list including those contacted during departmental review of Survey Reports. This is to enable the agency and public an opportunity to comment on the final environmental statement to CEQ and/or the Corps if they so desire, within the 30 day period as noted in paragraph 11a prior to the administrative actions being taken. Additional copies will be available in the responsible District Engineers office and a copy will also be available for review in the Public Affairs Office in OCE. Any changes in the final environmental statement made by the Chief of Engineers or the Secretary of the Army will be communicated to the District Engineer as soon as possible to allow for necessary revisions and timely distribution.

c. *Comments of Other Agencies.* In response to specific requests from the general public, District Engineers will make available the comments received from other agencies on the draft statement prior to the availability of the final environmental statement. Such release of comments will be in accordance with the provisions of the Freedom of Information Act.

d. *Number of Copies.* In order to comply with § 1500.11(a) CEQ "Guidelines," (38 FR 20555) reporting officers will furnish five copies of all draft, revised draft, and draft supplemental environmental statements directly to CEQ and provide 10 copies to higher authority (five for OCE and five for Division Engineers) at the time coordination with agencies, groups and individuals on the project mailing list is initiated. Twenty copies of the final, revised final, and final supplemental environmental statement will be transmitted to higher authority (15 for OCE and five for Division Engineers) for further processing to CEQ. Each planning report submitted should be accompanied by an environmental statement.

e. *Public Review.* News releases concerning draft and final environmental statements, revisions and supplements by District Engineers will be given as wide a coverage as deemed sufficient to accomplish the purpose of this directive and the intent of § 1500.9(d) of the CEQ "Guidelines" (38 FR 20555). When significant environmental impacts or public concern have become apparent subsequent to the last public meeting, reporting officers will determine whether a public meeting should be held prior to or during coordination of the statement.

f. *Public Availability.* District Engineers will prepare sufficient copies of draft and final environmental statements, revisions and supplements to cover all agencies, groups and individuals on the project mailing list. See paragraph 14. In accordance with 31 U.S.C. 483, 5 U.S.C. 552, and § 1500.11(d) of CEQ "Guidelines," (38 FR 20556) charges to cover reproduction costs may be assessed generally in accordance with the following:

(1) Where cost of reproduction is insignificant compared to collection and accounting costs, draft and final statements will be furnished without charge in single copies to individuals requesting copies. For multiple copy requests, reproduction costs will be recouped from the requestor.

(2) For large environmental statements and where substantial reproduction costs are incurred, individuals requesting copies should be advised that copies are available from the District Engineer at the cost of reproduction and also advised of the nearest point at which copy is available for public inspection. They should also be advised of the availability (at cost) of the State-ment from the Environmental Law Institute, 1346 Connecticut Avenue, NW., Washington, D.C. 20036.

13. *Relationship to Project Planning, Construction and Operation.*

a. *Project Planning.* In the formulation of new project proposals, environmental considerations will be integrated into the planning process from the beginning. Preliminary identification of possible environmental impacts and effects of the project and of all alternatives considered will be made and discussed fully at early stages in the study. Consultation and coordination with all agencies, groups and individuals on the project mailing list (see paragraph 14) will be accomplished at the earliest practicable time in the planning process and will continue throughout the life of the project. Reporting officers will insure that such consultation has been sufficient to identify all significant impacts prior to forwarding of environmental statements to higher authority.

(1) *Section 122, Effect Assessment.* Effect assessment procedures in response to Section 122, 1970 R&HA are contained in ER 1105–2–105. All significant adverse effects (including environmental) of proposed Corps actions are identified and evaluated and the feasibility and cost of eliminating or minimizing such adverse effects are considered fully in the planning and decision-making process. The effect assessment procedure, particularly the study of the environmental effects of various project alternatives, will provide a valuable source of information for the Environmental Impact Statement.

b. *Authorized Projects.* On projects that were recommended, authorized or under construction prior to the National Environmental Policy Act of 1969, the opportunity to study and evaluate a full range of alternatives may be more limited. However, to the extent feasible, alternative solutions and opportunities for environmental enhancement, preservation, restoration, and mitigation will be investigated prior to preparation of the statement. Regardless of the level at which formal coordination is to take place, reporting officers will carefully examine and evaluate, in coordination with appropriate Federal, State, and local agencies and the public, the environmental impact of all reasonable alternatives prior to preparing a recommendation or an environmental statement.

c. *Operation, Maintenance, and Management.* In the development of plans for operation, maintenance, and management activities, consider all significant effects on the environment and comply with all legal requirements. Such considerations differ from those for a project in planning status and discussion should address only the environmental effects of the operation of the project and on-going O&M programs. Include alternative uses of available resources when the proposed O&M activity will change the quality of the environment, modify the beneficial uses of the environment, or serve some purposes to the disadvantage of other environmental goals. Typi-

V 39 56 MAR 21 1974 XUM

cal examples of these activities which could have an impact on the environment are as follows:

(1) Disposal of dredged material in wetlands or marshlands.

(2) Disposal of polluted dredged material in unconfined or open water areas.

(3) Debris collection and disposal activities.

(4) Resource management programs involving the cutting, sale and/or disposal of forest resources; extensive plant disease eradication; predator or vector control; and aquatic plant control.

(5) Reservoir regulation in which some environmental benefits must be sacrificed for other environmental benefits or economic considerations, e.g., drawdown to provide water for power and for downstream water quality control.

(6) Leases, licenses, rights-of-way, administrative permits, and other actions involving use by others of project resources, if impact is significant and not otherwise covered in another environmental statement.

(7) Redesignation of project land under management by the Corps from scenic buffer or "green belt," undeveloped natural area, or wild life management area to more intensive type of public use or some other type of use.

d. *Regulatory Permits.* In evaluating permit applications, the District Engineer will carefully evaluate the effect on the environment of the proposed action considering environmental information provided by the applicant, all advice received from Federal, State and local agencies and comments of the public. Where the environmental effect is believed to be significant, an environmental statement will be prepared, except when an "umbrella statement" has been filed with the CEQ (paragraph 5g above.)

14. *Public Participation.* Public participation will be planned and incorporated into the conduct of all Corps of Engineers civil works activities and must be viewed as an integral part of the planning and administrative process. Public participation is a continuous two-way communication process which involves keeping the public fully informed on the status and progress of studies and findings of plan formulation and evaluation activities; actively soliciting from all agencies groups and individuals on the project mailing list their opinions and perceptions of objectives and needs; and determining public preferences regarding resources use and alternative development or management strategies plus any other information and assistance relevant to plan formulation and evaluation. Each District maintains a list of agencies, groups, and individuals who have requested they be listed for the project in question or from whom comments have been requested or received at any stage in the planning of the project and in the preparation and coordination of the draft and final environmental statements. This list will be kept current and all revisions and supplements to the environmental statements required to be recirculated for public comment will be sent to all those listed. All those listed will be notified of all meetings, workshops and public hearings held in connection with the project. Drafts of: (1) Environmental statements (2) revisions and (3) supplements should be made available to the public at least 15 days before any public meeting or hearing.

a. *Pre-authorization Project Studies.* Public meetings, informal meetings and workshops within the project area and the use of news media are means to develop free-flowing dialogue to assist in the identification of the environmental concerns and develop appropriate measures within the proposed plan to mitigate, eliminate, or reduce environmental impact. Unresolved environmental conflicts must be clearly set forth with a full and complete discussion of both sides of the issue.

b. *Post-authorization Project Studies.* Public meetings as specified in ER 1105–2–502 will be held during post-authorization planning studies to insure that views of interested parties will be considered in the development of the plan and that all interested parties will be kept informed of study progress. Full coordination with agencies groups and individuals on the project mailing list will be maintained during post-authorization planning. A public meeting should be held in special situations such as unusual interest or controversy, unusual time lapse or significant changes in the authorized project or environmental effects where either the public or the Corps, or both, would benefit by the exchange of views and information.

15. *Statement of Findings.* A Statement of Findings (SOF) ER 1105–2–509, will accompany final environmental statements. The SOF for regulatory permits will be filed with CEQ when a decision on the permit application has been made.

a. On continuing construction and operation and maintenance projects, an SOF will accompany the final environmental statement after the agency and public review comments on the draft environmental statement have been considered and the final environmental statement is forwarded to the Division Engineer. The SOF will be signed at each level of review (i.e. District, Division, and OCE) as the final environmental statement progresses, indicating concurrences or changes, and the original copy will be returned to the reporting officer for his action file when the final environmental statement is filed with CEQ.

b. In the case of survey reports, an extracted SOF will accompany the revised draft environmental statement when the District Engineer transmits the survey report to the Division Engineer for further review and processing by Federal agencies at Washington level. The extracted SOF will be signed at each level of review (i.e. District, Division, and OCE), indicating changes or concurrences, and furnished to CEQ by the Secretary of the Army with the final environmental statement. A SOF is not required for unfavorable survey reports.

16. *Processing.* Environmental Statements will be prepared by the officer initially preparing the recommendation or report (normally the District Engineer). The initiating officer is recognized as the responsible Federal official within the meaning of section 102(2)(c) of NEPA except for such changes as reviewing authorities may deem necessary in the original proposal and covering statement, to be consistent with the policies of the Chief of Engineers and the Secretary of the Army. Agency comments and the views expressed should be directed at the environmental impacts and should be no older than 12 months for new proposals nor older than three calendar years for previously authorized projects. More recent coordination will be required if significant changes of fact have occurred in the period since filing that affect the proposal, the action being initiated, or the associated environment.

a. *Survey Reports.*

(1) A written summary of environmental considerations in the project area will be prepared and presented at the Checkpoint I Conference. This summary will be based on information developed in a project-related environmental inventory.

(2) The summary of environmental considerations which includes an analysis of probably environmental effects of the considered project alternatives will be presented at each public meeting in a degree of detail commensurate with that in which the engineering, economic or other aspects of alternatives are discussed.

(3) During the formulation stage public meeting, all anticipated environmental impacts and effects of each potentially feasible solution under active consideration will be identified and discussed. Environmental data obtained from effect assessment procedures, as required by section 122, 1970 R&HA, will provide useful data for evaluating various project alternatives. A Summary of Environmental Considerations will be attached or inclosed to the public meeting announcement in order to generate meaningful and thorough discussion during the meeting.

(4) A draft environmental statement will be prepared and circulated for review and comment at least 15 days before late stage meetings. The draft environmental statement will present and discuss the anticipated environmental effects of the plan which may be recommended by the District Engineer along with the probably environmental impacts of the alternative plans considered in the study. The statement will also reflect the information and data inputs provided by the coordination accomplished during the study with various Federal, State and local agencies.

(5) The District Engineer will circulate, together with the draft environmental impact statement, an appropriate number of copies of advance drafts of the Corps basic decision document—the survey report—to concerned Federal and state agencies for review and comment prior to the late stage meeting. The plan formulation section of the advance draft survey report will be as complete as possible. It will include appropriate discussions of project alternatives and tentative selection of the plan that the District Engineer considers to provide the best balanced solution which he may ultimately recommend. This review of the project decision document will constitute formal project review at this stage of the planning process; it will also permit the agencies to provide more substantive comments on the draft environmental statement. If the proposed plan subsequently should be modified in response to the comments received, changes will be noted by the District Engineer in later versions of the survey report and will be discussed in revised draft environmental statements.

(6) At the same time, District Engineers will circulate draft environmental statements for formal review and comment to other agencies, groups and individuals on the project mailing list. Letters of transmittal sending out draft environmental statements will indicate that copies of the advance drafts of the Corps basic decision document (the survey report) are available for review in the office of the responsible District Engineers. Five copies of the draft environmental statement will be furnished directly to CEQ (see Appendix C for sample letter and processing instructions). Ten copies will be transmitted to higher authority (five to HQDA (DAEN–CWP–E, –C or –W as appropriate) WASH, D.C. 20314, and five for the Division Engineer). The date published by CEQ in the FEDERAL REGISTER of the draft environmental statement starts the official agency review period. At the same time of the circulation of the draft environmental statement, the District Public Affairs Office will prepare and issue a news release stating that single copies of the draft environmental statement may be obtained from the District Engineer.

(7) If the District Engineer desires, he may circulate the draft environmental statement with the announcement of the Late Stage Public Meeting provided a minimum of 15 days is allowed for review and comment between the date of Public availability of the statement and the date of public meeting. In view of the extensive mailing list used in circulating the announcement, the District Engineer need provide draft environmental statements only to those agencies, groups, and individuals on the project mailing list. In either case, however, a Summary of Environmental Considerations will be attached to the announcement of the Public Meeting. The announcement will also include a specific reference indicating that the draft environmental statement is in process to or on file with CEQ and that copies are available for public review and comment upon request from the District Engineer and will also be available at the public meeting.

(8) When the District Engineer completes his report, he will finalize his recommended plan of improvement and prepare an appropriately updated and revised draft environmental statement. All comments received will be attached as Appendix A and summarized in Paragraph 9—Coordination With Others. Numerous repetitive comments received from the public should be noted with an appropriate summarization of the issues and Corps response, including a typical letter with a list of names of those submitting similar letters. Paragraph 9 should also discuss the environmental issues raised at the public meeting not included as part of the written comments in Appendix A. The District Engineer will transmit the report, the revised draft environmental statement and an extracted SOF to the Division Engineer for further review and processing to BERH and OCE. The Division Engineer will review and comment on the revised draft environmental statement when he transmits his report to the Board of Engineers for Rivers and Harbors (BERH). Interested parties also will have an opportunity to comment on the report and the environmental statement subsequent to the Division Engineer's notice when the report and environmental statement are with BERH for review.

(9) BERH and OCE will review the revised draft environmental statement at the same time it reviews the project report. A BERH staff presentation of environmental issues and impacts will be made to the Board with controversial issues receiving special consideration. The Board report will summarize the Board's views upon environmental issues. If extensive revisions are required as a result of BERH or OCE review, the revised draft environmental statement will be returned to the reporting officers for revision and resubmission to BERH or OCE as appropriate.

(10) The revised draft environmental statement will be circulated for review and comment with the survey report to the concerned State or States and Federal agencies at the Washington level in accordance with established procedures. The revised draft environmental statement, the proposed report of the Chief of Engineers, the report of BERH and supplemental economic data will be furnished CEQ by OCE at this time. Copies of the revised draft environmental statement will be provided Division and District Engineers. District Engineers will transmit public information file copies to the appropriate State, regional and metropolitan clearinghouses and to those agencies, groups and individuals on the project mailing list not contacted by OCE.

(11) Upon completion of Departmental review, all letters and comments received on the revised draft environmental statement will be sent to the District Engineer for preparation on the final environmental statement. The District Engineer will prepare appropriate responses, make necessary revisions to the main text due to comments received and forward (through Division) 25 copies to OCE. It will accompany the Chief's final report on the project to Office, Secretary of Army (OSA). All letters received in OCE during Department review will be furnished BERH or MRC for staff review as considered appropriate. Formal BERH or MRC reconsideration of its previous recommendations will only be accomplished in those instances when the Chief of Engineers determines that new information obtained is of such significance as to warrant reconsideration by the full Board or Commission.

(12) When OSA transmits the final report to Congress, it will also transmit the final environmental statement to CEQ. At the same time OCE will notify Division and District Engineers of the transmittal to allow for timely distribution of the final statement to agencies, groups and individuals on the project mailing list. OCE Public Affairs Office will prepare and issue a news release stating that a final environmental statement has been filed with CEQ, is available for review at the Office of the Chief of Engineers and that single copies may be obtained from the District Engineer.

b. *Special Projects and Continuing Authorities.* All required consultation with Federal, State and local agencies, and the public concerning the environmental aspects will be accomplished at field level by District Engineers without further referral to any of these agencies by the Chief of Engineers.

(1) A draft environmental statement will be prepared and circulated for review and comment before preparation of the final report and recommendations. The District Engineer will circulate, together with the draft environmental impact statement, an appropriate number of copies of the draft DPR to concerned Federal and state agencies for their review and comment. This review of the project decision document with the draft environmental impact statement will permit agencies to provide more substantive comments and will constitute their formal review. If the proposed plan of improvement should be significantly modified as a result of the comments received, additional coordination of the report and environmental statement will be necessary before the District Engineer completes the DPR and final environmental statement. At the same time, District Engineers will circulate draft environmental statements for review and comment to other agencies, groups and individuals on the project mailing list. When there is a late stage public meeting, this draft environmental statement will be made available to the public at least 15 days before the meeting. Letters transmitting the draft environmental statement will indicate that a copy of the draft Corps decision document, the DPR, is available for review in the office of the responsible District Engineer.

(2) Five copies of the draft environmental statement will be furnished directly to CEQ (see Appendix C for sample letter and processing instructions). Ten copies will be transmitted to higher authority (five for HQDA (DAEN–CWP–E, –C or –W as appropriate) WASH, D.C. 20314, and five for the Division Engineer). Three copies of the draft report should accompany the draft environmen-

V 39 I 56 MAR 21 74 XUM

tal statement when sent forward, to higher authority. The date of publication by CEQ in the FEDERAL REGISTER starts the official agency review period and the 90-day period before the administrative action of project approval can be taken. At the same time the District Public Affairs Office will prepare and issue a news release stating that single copies of the draft environmental statement may be obtained from the District Engineer. The District Engineer may circulate the draft environmental statement with the announcement of the late stage public meeting as discussed in paragraph 16a(6) above. If the project is in litigation or potential litigation exists, the draft environmental statement should be reviewed by Division Counsel and the Office of General Counsel, OCE.

(3) After receipt and evaluation of agency review comments, comments of the interested public and information obtained at the public meeting the District Engineer will prepare the final environmental statement and complete the project report. The report together with twenty copies of the final environmental statement will be transmitted to higher authority (15 for HQDA (DAEN–CWP–E, –C, or –W) WASH DC 20314 and five for the Division Engineer) for further processing.

(4) The Division Engineer will review the project formulation and technical aspects of the project report and the adequacy to the final environmental statement. Upon completion of Division office review, the project report and accompanying statement will be transmitted to OCE for further processing.

(5) OCE will review the project report and final environmental statement for policy and procedure. OCE or OSA will furnish the final environmental statement to CEQ, as appropriate. The 30-day period required for review of final environmental statements before administrative action can be taken commences as noted in paragraph 11a. Any changes in the final environmental statement made by the Chief of Engineers or the Secretary of the Army will be communicated to the District Engineer as soon as possible to allow for necessary revisions and timely distribution. The District Public Affairs Office will prepare and issue a news release stating that a final environmental statement has been filed with CEQ and that single copies are available for the District Engineer. District Engineers will furnish, in a timely manner, copies of the final environmental statement to agencies, groups and individuals on the project mailing list as well as provide information copies to the appropriate State, regional and metropolitan clearinghouses.

(6) OCE will provide the Division Engineers with notification of project approval and Chief of Engineers authorization to proceed with project work.

c. *Authorized Projects Not Started.* It is contemplated that all required consultation with Federal, State and local agencies and the public concerning the environmental aspects will be accomplished at field level by District Engineers without further referral to any of these agencies by the Chief of Engineers. See paragraph 14 on Public Participation for guidance on holding public meetings in connection with preparation of statements for authorized projects. Any unsolicited comments received directly by OCE will be furnished to the District Engineer with appropriate instructions.

(1) Prior to submittal of the Phase I General Design Memorandum (ER 1110–2–1150, "Post-Authorization Studies"), the District Engineer will review the environmental statement that was filed with CEQ when the project was authorized, or prepare one if none has been prepared. If the Phase I review indicates that the environmental effects of the project as proposed have not changed significantly from the authorized project, and were adequately and fully covered in the statement, no changes to the statement will be required. This will be noted in the Phase I GDM with a statement that a revised or supplemented statement will not be required. However, if the review indicates that there are changes in the project which would significantly affect the quality of the environment, or if the environmental effects of the project were not adequately covered in the statement, a new environmental statement (draft and final) must be prepared, with the final environmental statement to accompany the Phase I GDM. See paragraph 7 for procedure for revising or supplementing the final environmental statements. The physical changes in the project and/or changed environmental effects will be briefly discussed in Phase I GDM including a statement that a revised environmental statement or supplement will be prepared. For projects for which environmental statements are required (paragraph 5, Agency Actions Requiring Statements) and for which the GDM has been previqusly submitted, environmental statements will be prepared as soon as possible.

(2) The draft environmental statement will be prepared and circulated for review and comment before preparation of the final Phase I GDM. The District Engineer will circulate, together with the draft environmental impact statement, an appropriate number of copies of the draft plan formulation memorandum (Phase I GDM) to concerned Federal and state agencies for their review and comment. This review of the draft Phase I GDM along with the draft environmental impact statement will allow agencies to provide more substantive comments and will constitute their formal review. If the proposed project should be significantly modified as a result of the comments received, additional coordination of the Phase I GDM and draft environmental statement will be necessary before the District Engineer completes the Phase I GDM and final environmental statement. The draft environmental statement will be circulated at the same time by the District for review and comment to other agencies, groups and individuals on the project mailing list. When there is a late stage public meeting held in connection with the Phase I study, the draft environmental statement will be made available to the public at least 15 days before the meeting. The letter transmitting the draft environmental statement will indicate that an advance copy of the draft Phase I GDM is available for review in the office of the responsible District Engineer. Five copies of the draft environmental statement will be furnished directly to CEQ (see Appendix C for sample letter and processing instructions). Ten copies will be transmitted to higher authority (five to HQDA (DAEN–CWP–E, –C or –W as appropriate) WASH, D.C. 20314, and five for the Division Engineer). Three copies of the draft Phase I GDM should accompany the draft environmental statement when sent forward to higher authority. Date of publication of the draft environmental statement in the Federal Register by CEQ starts the official agency review period and the 90-day period before administrative action can be taken. At the same time, the District Engineer will issue a news release stating that single copies of the draft environmental statement may be obtained from the District Engineer. If the project is in litigation or potential litigation exists, the draft environmental statement should be reviewed by Division Counsel and the Office of General Counsel, OCE.

(3) After receipt of agency review comments and comments of the interested public, the District Engineer will prepare the final environmental statement and attach copies of all comments received. Numerous repetitive comments may be summarized in the comment and response section of the statement and a typical letter with a list of names of individuals submitting similar letters attached. Twenty copies of the final environmental statement will be transmitted to higher authority (15 for HQDA (DAEN–CWP–E, –C or –W) WASH DC 20314 and five for the Division Engineer) for further processing to CEQ.

(4) The Division Engineer will transmit 15 copies of the final environmental statement along with his review comments when he transmits the Phase I, GDM (if appropriate) to OCE.

(5) OCE will revise the final environmental statement where appropriate. Office, Secretary of the Army will review and furnish the final environmental statement to the CEQ. CEQ will notice it in the FEDERAL REGISTER. The 30-day period for review of the final EIS before administrative action can be taken commences as noted in paragraph 11a. The District Public Affairs Office will prepare and issue a news release stating that a final environmental statement has been filed with CEQ and that single copies are available from the District Engineer.

(6) Any changes in the final environmental statement made by the Chief of Engineers or the Secretary of the Army will be communicated to the District Engineer as soon as possible to allow for necessary revisions and timely distribution to agencies, groups and individuals on the project mailing list.

d. *Continuing Construction and Operation and Maintenance.* It is contemplated that all required consultation with Federal, State and local agencies, and the public concerning the environmental aspects will be accomplished at field level by District Engineers without further referral to any of these agencies by the Chief of Engineers.

(1) Paragraphs 5e, 5f, and 6 establish the requirements for preparation of environmental statements regarding Continuing Construction and Operation and Maintenance.

(2) Procedure for the initial submission will be the same as described in c(2) through (6) above except there will be no BERH consideration on any project in continuing construction or O&M status.

(3) For completed projects in operation where a final environmental statement has previously been filed, review will be scheduled in accordance with paragraph 6. Where this review indicates no new information or considerations affecting the previous decision on the plan of operation and no changes are found to be required in the environmental statement, the SOF shall be properly annotated by the District Engineer and concurred in by the Division Engineer. However, if significant changes in the method of operation are planned or have occurred since the statement was filed, the extent of the revision and further coordination of the environmental statement shall be in accordance with paragraph 7.

e. *Regulatory Permit Applications.* For permit actions on which environmental statements are required by paragraph 5g the preparation and coordination of an environmental statement will be accomplished at field level. In such cases the following actions shall be taken:

(1) The District Engineer will require the applicant to furnish information and an analysis of the environmental impacts of the proposed action. The District Engineer will advise the applicant that the applicant will not be allowed to undertake any work on the proposal for which the permit application is pending.

(2) The draft environmental statement will be circulated by the District for formal review and comment to agencies, groups and individuals on the project mailing list. Five copies of the draft environmental statement will be furnished directly to CEQ (see Appendix C for sample letter and processing instructions). Ten copies will be transmitted to higher authority (five for HQDA (DAEN–CWO–N) WASH, D.C. 20314 and five for the Division Engineer). Notice of the draft environmental statement in the FEDERAL REGISTER by CEQ starts the official, agency review period and the 90-day period before the administrative action can be taken. The District Engineer may circulate the draft environmental statement with the announcement of the public meeting as discussed in paragraph 16a(4) above. At the same time the District Engineer will issue a news release stating that single copies of the draft environmental statement may be obtained from the District Engineer. If the project is in litigation or potential litigation exists, the draft environmental statement should be reviewed by Division Counsel and the Office of General Counsel, OCE. If a Public Meeting is to be held, the draft environmental statement will be filed with CEQ at least 15 days prior to the meeting. A summary of environmental considerations will be included in the announcement of public meeting.

(3) After receipt of agency review comments and comments of the interested public, the District Engineer will prepare the final environmental statement and attach copies of all comments received. The final environmental statement will become a part of the official file on the permit. Twenty copies of the final statement will be transmitted to higher authority (15 for HQDA (DAEN–CWO–N) WASH DC 20314 and five for the Division Engineer) for further processing to CEQ. If a public hearing is to be held, the proposed final environmental statement must be completed and made available to the public at least 15 days prior to the hearing.

(4) Final action to issue the permit will not be taken until after the time limits for filing and distribution of the final environmental statement have been met as noted in paragraph 11a. If, however, at any time prior to the formal transmittal to CEQ, it is determined that the permit will be denied, the official so determining will inform higher authority and CEQ of the denial and that a final environmental statement will not be filed.

(5) Revisions by higher authority to the final statement will be furnished to the District Engineer as soon as possible, who in a timely manner, will distribute copies of the final environmental statement to agencies, groups and individuals on the project mailing list as well as to appropriate State, regional and metropolitan clearing-houses. The District Public Affairs Office will prepare and issue a news release announcing the filing of the final environmental statement with CEQ and advising the public that single copies are available from the District Engineer.

f. *Disposal of Land for Port and Industrial Uses.* When the District Engineer determines that disposal of surplus project property for development of public port or industrial facilities is in the public interest, he will prepare an environmental statement to accompany his report and recommendation. It is contemplated that all required consultation with Federal, State, and local agencies, and the public concerning the environmental aspects will be accomplished at field level by District Engineers without further referral to any of these agencies by the Chief of Engineers.

(1) The District Engineer will prepare a draft environmental statement utilizing information obtained from appropriate Federal, State, and local agencies and applicant. A public meeting may be used to obtain information and views from the interested public. The statement will set forth, among other things, what the applicant intends to develop on the property and the possible uses to be made of it. It will also summarize all constraints which will be placed on the new owner, such as reversionary clause, uses, needs for permits for structures or discharges into navigable waters.

(2) The draft environmental statement will be circulated by the District for formal review and comment to agencies, groups and individuals on the project mailing list and in response to requests from the general public at least 15 days before the public meeting, if one is held in connection with proposed action. Five copies of the draft environmental statement will be furnished directly to CEQ (see Appendix C for sample letter and processing instructions). Ten copies will be transmitted to higher authority (five for HQDA (DAEN–CWO–M) WASH, D.C. 20314 and five for the Division Engineer). Notice of the draft environmental statement in the FEDERAL REGISTER by CEQ starts the official agency review period and the 90-day period before the administrative action can be taken. At the same time, the District Engineer will issue a news release stating that single copies of the draft environmental statement may be obtained from the District Engineer.

(3) After receipt of agency review comments and comments of the interested public, the District will prepare the final environmental statement and attach copies of all comments received. Twenty copies of the final environmental statement together with the District Engineer's report and recommendations, as required by ER 405–1–909, will be transmitted to higher authority for further action.

(4) If higher authority decision is favorable to the request for disposal of project lands, the Office, Secretary of the Army will furnish the final environmental statement to the CEQ and will wait until the time limits noted in paragraph 11a. have been satisfied prior to the issuance of the Public Notice of Disposal as required by paragraph 32.c(2) of ER 405–1–909. The District Public Affairs Office will prepare and issue a news release stating that a final environmental statement has been filed with the CEQ and that single copies are available from the District Engineer.

(5) If higher authority decision is unfavorable to the request, the CEQ will be informed of the denial and that a final environmental statement will not be filed.

(6) Copies of the final environmental statement with all revisions clearly identified will be furnished the Division and District Engineers. District Engineers will furnish copies of the final environmental statement to agencies, groups and individuals on the project mailing list as well as provide information copies to the appropriate State,

V 39 N 56 MAR 21 1974 XUM

regional, and metropolitan clearinghouses.

For the Chief of Engineers.

RUSSELL J. LAMP,
Colonel, Corps of Engineers.

APPENDIX C

PREPARATION OF ENVIRONMENTAL STATEMENTS

APRIL 15, 1974.

1. *General.* Preparation of environmental statements will be based on considerations discussed in the CEQ Guidelines, guidelines for assessment of social, economic and environmental effects for civil works projects (section 122, 1970 R&HA) and the detailed guidance to follow. These directions are intended to assure consistency of effort in preparing statements and are not proposed to induce unthinking uniformity or limit flexibility when preparing the statements. These statements have several levels of importance with reference to the decision-making process, Corps relations with the public, and internal project planning activities. A careful, objective detailing of environmental impacts, alternatives, and implications of a proposed project should give reviewers both within and outside the Corps insight into the particular trade-offs and commitments associated with the action and will be summarized in the SOF. The general public, environmental action groups, trade and special interest associations, governmental agencies, and Congressional Committees will all expect the statements to be a valid source of information on project effects, as well as a reflection of how the agency views environmental factors and seeks to accommodate them. Since the statements will be made available to the public and may receive broad exposure in the media, it can be assumed that they will receive careful scrutiny. Most importantly, preparation of the statements should cause systematic consideration of environmental impacts. An imaginative evaluation of alternatives and their implications should begin in the earliest stages of project formulation, with planners contemplating the criteria and range of information to be employed in preparation of final statements.

2. *Effect Assessment.* In accordance with the requirements of Section 122, 1970 R&HA, final guidelines for the assessment of economic, social and environmental effects of civil works projects have been promulgated. They will be applied in reports on projects authorized under continuing authorities, in survey reports, in General Design Memoranda of all projects authorized in the River and Harbor and Flood Control Act of 1970 and in subsequent Congressional authorizations if not already applied in the survey report. Since the effect assessment procedures generally follow the same procedures as used in preparing the environmental assessment as required by NEPA, the completed effect assessment for environmental effects should be used as input for the environmental impact statement. Although section 122 specifically mentions 17 effects, additional significant environmental effects or impacts may also require identification and evaluation before the "best" alternative plan of development is selected.

3. *Format.* Environmental statements will constitute a document separate from other Corps papers and consist of the cover sheet, summary sheet, table of contents, body of the statement, letters of coordination, bibliography, plates or maps, technical appendices as required (e.g. glossary of terms, inventories of terrestrial and aquatic flora and fauna, water quality, etc.) and attached economic data. All information will be typed single spaced on both sides of the page including Appendices. Letters received will also be printed on both sides of the page. Each paragraph in each section of the body of the statement will be numbered for ease of reference. For example, the first paragraph in Section 1 will be numbered 1.01, the second 1.02, etc. Also, all pages must be numbered including letters of comments received which are attached to the statement. Pages in the main text will be numbered consecutively. Pages in the Appendices will be numbered consecutively preceded by the Appendix symbol, e.g. A–1, A–2; B–1, B–2, etc. Pages C–10 through C–15 are samples of the format for the cover and summary sheet to be followed in preparing environmental statements on all Corps proposals except survey reports. Pages C–16 through C–23 are samples of the format to be followed in preparing environmental statements on survey reports. Page C–24 provides additional processing instructions. Pages C–25 through C–30 are samples of the format to be followed in preparing transmittal letters to CEQ. Appendix G of this Regulation provides guidance in the preparation of inventories of terrestrial and aquatic flora and fauna. For the dates required in item 6 of the summary sheet, use the following: Draft statements use date of transmittal letter to CEQ, final statements use date of OSA or OCE letter to CEQ, as appropriate. Minimum periods for review and comment and administrative waiting shall be in accordance with paragraph 11a.

4. *Content of Statement.*

a. The body of the environmental statement will contain nine separate sections. These sections are: (1) Project description, (2) Environmental setting without the project, (3) Relationship of the proposed action to land use plans, (4) Probable impact of the proposed action on the environment, (5) Any probably adverse environmental effects which cannot be avoided, (6) Alternatives to the proposed action, (7) The relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity, (8) Any irreversible and irretrievable commitments of resources which would be involved in the proposed action should it be implemented and (9) Coordination and Comment and Response.

b. Each section should be of sufficient length and detail to adequately identify and develop the required information. Avoid the use of scientific jargon and technical terms. Language used should be clear and easily understood by non-specialists in the water resources field who must make decisions or form opinion on the merits of the proposed action. Provide a non-technical glossary of terms if technical terms are needed to discuss detailed data in the statement. Statements should indicate the underlying studies, reports, and other information obtained and considered in preparing the statement. The use of footnotes are acceptable provided the statement text remains essentially understandable to a reader without the need for obtaining specific reference material. Any attached bibliography will indicate the sources of all information based on other documents and how these documents may be obtained. A one page map (8 x 10½) of the project area should be included. Fold out maps and plates should not be used. Artist's sketches and selected photos may be incorporated, if they will be particularly helpful in describing the environmental setting or environmental impacts. Voluminous back-up data or technical appendices provided with the draft environmental statement need not accompany the final environmental statement provided no changes were made in the appendices. This information will be noted in the summary of the final environmental statement and in the transmittal letter to CEQ.

c. *Project Description.* Describe the proposed action by name, specific location, project dimensions and purposes, authorizing document (if applicable), current status, and benefit-cost ratio. Generally delineate the purpose of the project, what the plan of improvement entails, and how the plan would operate. It is most important that a clear work picture be presented. For reservoirs give pool storage and surface areas for all projects purposes, miles of shoreline, miles of streams inundated, total acres of project facilities, e.g., dam, spillway, recreation area, public-use areas, public access sites, mitigation lands or measures, etc., and how the project would be operated. For other proposed actions, a complete description of all structures, project dimensions and purposes, and activities included within the project should be discussed. The inter-relationship and compatibility of the project with existing or proposed Corps or other agency projects must be discussed.

(1) Corps project decision documents consist of survey, small project, and general design memorandum reports. The environmental statement is essentially a summary of the environmental portions of these reports. As a convenience for those interested parties who normally do not have immediate access to these decision documents, limited economic data consisting of total project cost, itemized average annual benefits, average annual charges and the benefits to cost ratio will be attached to draft and final environmental statements. Summary economic information will indicate the extent to which non-quantifiable environmental benefits and costs have not been reflected in benefit to cost determination. Economic data attached to draft and final environmental statements will include the statement in bold type at the top "ECONOMIC DATA, EXTRACTED FROM U.S. ARMY CORPS OF ENGINEERS (SURVEY REPORT/GENERAL DESIGN MEMORANDUM/SMALL PROJECT REPORT) (LOCATION). COMPLETE DOCUMENT IS AVAILABLE AT U.S. ARMY ENGINEER DISTRICT (LOCATION)." A discussion of project effects on the economy, including employment, unemployment, and other economic impacts will be included in the Statement of Findings.

(2) Discussion of fish and wildlife mitigation benefits and costs, which may include unquantifiable environmental effects considered in the proposed action, should also be discussed with appropriate references to the underlying reports from which the data was obtained and the rationale for selection of the mitigation plan.

d. *Environmental Setting Without the Project.* Describe the area, the present level of economic development, existing land and water uses, existing water supplies and water quality, air quality, present methods of waste disposal, and other environmental determinants. Discuss in detail the environmental setting of the immediate project area with appropriate reference and discussion of important regional aspects critical to the assessment of environmental impacts. Include appropriate information on topography, vegetation, animal life, historical, archeological, geological features, and social and cultural habits and customs. Discuss population trends and trends of agriculture and industry and describe what the future environmental setting is likely to be in the absence of the proposed project. In discussing population aspects, consideration should be given to using the rate of growth in the region contained in the projection compiled by the Bureau of Economic Analysis of the Department of Commerce and the Economic Research Service of the Department of Agriculture called "OBERS." In any case, the source of population data used should be identified. It is possible and often desirable to treat the project setting in relation to river basins, watersheds or functional ecosystems. Discuss the interrelations of projects and alternatives proposed, under construction or in operation by any agency or organization.

e. *Relationship of the Proposed Action to Land Use Plans.* Discuss how the proposed project or action conforms or conflicts with the objectives and specific terms of existing or proposed Federal, State, and local land use plans, policies and controls, if any, for the area affected. If a conflict should occur, the statement should discuss the issues completely and state the actions that the Corps has taken to reconcile its proposed action with the plan, policy or control, and the reasons for proceeding with the project notwithstanding the absence of full reconciliation.

f. *The Probable Impact of the Proposed Action on the Environment.* (1) Impacts on the environment including water, land and air, should be viewed as changes or conversions of environmental elements which result directly or indirectly from the proposed action. These impacts and effects should initially be identified and projected throughout the life of the project. Include land loss and land use changes which could be expected upstream, downstream, and adjacent to the project such as urbanization changes in water features and characteristics, air quality, aesthetics, etc. Discuss the impacts on the environment of project-induced primary and secondary economic and social effects, including cumulative effects.

Such impacts shall be detailed in a dispassionate manner to provide a basis for a meaningful discussion of the trade-offs involved in the SOF. Quantitative estimates of losses or gains (e.g., acres of marshland, miles of white-water streams inundated, etc.) will be set forth whenever practicable. Where this cannot be done, qualitative descriptions of unquantifiable environmental costs and benefits should be provided with assumptions or criteria on which judgments are based. Data developed from the effect assessment for environmental effects (section 122) should be used as input for the "with project condition."

(2) The description of the proposed action should include a summary of the population projections employed as a basis for formulation and evaluation. The source of the population data, whether OBERS or another origin, should be identified. Other projections, such as future economic activity and land use, that also bear upon a thorough understanding of the environmental impacts of the proposed action should be included along with their source. When preparing the environmental statement, care should be taken to only include information that is necessary to fully understand the proposed action and its attendant environmental impacts. In order to keep the statement brief, the environmental statement should contain references to more detailed information in the appropriate sections of the decision document. Discuss both the beneficial and adverse impacts of the environmental changes or conversions placing some relative value on the impacts described. Discuss these effects not only with reference to the project area, but in relation to any applicable region, basin, watershed, or ecosystem. Relate the impact to the river basin or regional entity in which the action is proposed; and discuss the interrelationship of projects and alternatives proposed, under construction or in operation by other agencies or organizations. A thoughtful assessment of the environmental elements should aid in determining impacts. For example, the filing of a portion of the wetlands or an estuary would involve the obvious conversion of aquatic/marsh areas to terrestial environments, the loss of wetland habitats and associated organisms, a gain in area for terrestial organisms, a change in the nutrient composition of the runoff water entering that portion of the estuary, alteration of the hydrology of some given area, perhaps the introduction of buildings or roads, curtailment of certain commercial uses, disruption of water-based recreational pursuits, conversion of wildlife aesthetics to less-pristine attributes, perhaps the removal of same portion of popular duck hunting grounds or unique bird nesting area, etc.

(3) Identify remedial, protective, and mitigation measures which would be taken as a part of the proposed action by the Corps or others, to eliminate, or compensate for, any adverse aspects of the proposed action. Such measures taken for the minor or short-lived negative aspects cannot be satisfactorily dealt with will be considered in greater detail along with their abatement and mitigation measures in paragraph e.

(4) For O&M maintenance dredging projects which are segments of a total system, i.e., the intracoastal waterway, and for which it has been determined that separate rather than a composite environmental statement be prepared, the need to discuss the interrelationship of the segments with the total project including cumulative environmental impacts over the life of project is mandatory. Points to consider in preparing the statement should include: periodicity of dredging requirements, volume of material removed to date and projected in the future, dredging methods used in past and project for future use, location and expected life of authorized spoil disposal areas, projected needs and plans for establishing new areas, experienced rate and type of revegetation and changes in wildlife values on completed and existing disposed areas, quality of dredge spoil throughout the project area with particular coverage of any areas where chronic pollution exists and how such spoil has been and will be handled, and a general description of fauna and flora within the project area including a thorough analysis of how proposed dredging operations will affect these organisms.

g. *Any Probably Adverse Environmental Effects Which Cannot be Avoided.* Discuss the detrimental or adverse aspects of the proposed action which cannot be eliminated by alternative measures of the proposed action. This discussion will identify the nature and extent of the adverse effects, the resources affected and summarize those adverse and unavoidable effects of the proposed action discussed in paragraph d. It should include a discussion of adverse effects or objections raised by others. The loss of a given acreage of wetland by filling may be mitigated by purchase of a comparable land area, but this does not eliminate the adverse effect. Certainly the effects on the altered elements will not disappear simply because additional land is purchased. Identify the nature and extent of the principal adverse effects and the parties affected. For example, the effects of the filled wetland might include the loss of shellfish through sedimentation actions (turbidity and burial), the loss of organisms through the leaching of toxic substances from polluted marsh sediments used in the fill, the loss of a popular/valuable waterfowl census site in the estuary or the burial of ancient Indian midden sites of indeterminate archeological value.

h. *Alternatives to the Proposed Action.* Describe the various reasonable structural and non-structural alternatives to the proposed action, their environmental impact, their ability to accomplish the objectives, either in whole or part, of the proposed action, specifically taking into account the alternative of no action. The "effect analysis" as required by section 122 for survey and continuing authority reports and Phase I GDM's will provide necessary information to the planner in developing the full range of effects of project alternatives to eliminate, reduce, or minimize adverse environmental effects or to enhance environmental qualities. For each viable alternative considered, particular, economic, social, and environmental effects of the planned action must be assessed and weighed against other alternatives in the SOF. A thorough discussion of this balancing analysis in the SOF will provide evidence that the decision making process has in fact taken place, that it will allow others to evaluate and balance the factors on their own, and that the final project recommendation is made in the best overall public interest.

In discussing the various alternatives to accomplish the objectives of the proposed action, three general categories should be followed: (1) Describe those alternatives which would accomplish all of the objectives of the proposed action, (2) describe those alternatives which may only provide a partial solution to all or part of the objectives of the project, as one example including land acquisition or other land use controls in the flood plain in the case of flood control projects, and (3) describe the no development alternative. Rules of reasonableness must also be followed in deciding what alternatives are proper subjects for discussion. These are summarized as follows:

(a) The fact that an alternative action cannot be implemented by the Corps does not by itself make the alternative not reasonably available. If alternatives requiring action by another agency or legislative action are not remote or speculative possibilities, they must be discussed in the statement. In discussing such alternatives, information contained in studies by other agencies, responsible journals and other agencies environmental impact statements may be used.

(b) Reasonably available alternative actions and responsible views in opposition to a proposed action which are contained in comments on the environmental impact statement submitted by interested citizens or citizens' groups must be discussed.

(c) The range of alternatives that must be evaluated in an environmental impact statement concerning a proposed action which is an integral part of a wide-spread coordinated plan must be broadened beyond those alternatives that would be considered in the case of a project of more limited scope, such as a local protection project.

(d) In the case of a proposed action intended to respond to an immediate need, an alternative action that will provide only a long-term solution is probably not a reasonably available alternative and does not have to be discussed.

i. *The relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity.* Assess the cumulative and long-term impacts of the proposed action with the view that each generation is a trustee of the environment for succeeding generations. Give special attention to considerations that would narrow the range of beneficial uses of the environment or post long-term risks to health or safety. The propriety of any action should be weighed against the potential for damage to man's life support system—the biosphere—thereby guarding against the short-sighted foreclosure of future options or needs. It is appropriate to make such evaluations on land-use patterns and development, alterations in the organic productivity of biological communities and eco-

V 39 156 MAR 21 74 XUM

systems and modifications in the proportions of environmental components (water, uplands, wetland, vegetation, fauna) for a region or ecosystem. For example, if a coastal marsh is extensively filled, the ability of an associated estuary to support its normal biota might be seriously impaired. Altered sediment, nutrient and biocide additions to the waters might well affect the inherent biological productivity of the estuary. In other words, if the estuary's marshes are modified enough to affect basic estuarine processes, certain of the amenities, biota, products, industry and recreation opportunities could be lost. The long-term implications of these changes are directly related to the degree that the losses are sizeable or unique.

j. *Any irreversible and irretrievable commitments of resources which would be involved in the proposed action should it be implemented.* Discuss irrevocable uses of resources, changes in land use, destruction of archeological or historical sites, unalterable disruptions in the ecosystem, and other effects identified in paragraph e. to the extent to which the action irreversibly would curtail the diversity and range of beneficial uses of the environment should the proposal be implemented. For example, in filling a marsh there could be a number of potential irreversible or irretrievable effects. The particular aquatic habitat filled in the marsh would be permanently lost for aquatic organisms and fill would be removed from one area and deposited in another. Include possible indirect actions—those made economically feasible, as a result of the proposed action—that would cause changes in land and water use that could not be altered or reversed under free enterprise principles.

k. *Coordination and Comment and Response.* The coordination and public participation efforts will be summarized in this section under three subheadings: Public participation, Government agencies, and Citizen Groups.

(1) Public participation. This section will briefly summarize the public participation efforts accomplished during the conduct of the study indicating number of public meetings, informal meetings and workshops conducted and a brief discussion of environmental issues identified, if any. For an authorized project or other administrative action discuss measures taken to involve or inform the public of the action and the environmental issues.

(2) Government agencies. Each government agency with whom coordination of the draft environmental statement has been accomplished will be listed. Relevant and appropriate comments will be included in the final statements incorporating changes where necessary. Additionally, each separate view expressed concerning the environmental effects of the proposal will be summarized in a comment and appropriately discussed in a response. If the comment requires a change in the main text, the paragraph changed and the page number where the change was made, will be referenced in response. If an agency did not provide comments on the statement, "No comments received" will be placed under the agency name.

(3) Citizens Groups. The objective of this section is to clearly set forth the magnitude and breadth of concerns of private citizens and conservation groups regarding specific identifiable environmental impacts related to the project. The environmental issues or impacts identified by citizens and conservation groups will be incorporated in the statement where appropriate. All views expressed, concerning the environmental effects of the proposal will be set forth in a comment and appropriately discussed in a response, as are those from government agencies. To give appropriate coverage and avoid duplication of response to the same environmental concern, District Engineers may consolidate or combine the environmental issues raised into appropriate groupings. Source of the comments should be clearly identified.

(4) Copies of all correspondence from agencies, groups and individuals on the project mailing list received concerning the proposal will be attached to the statement. Where numerous repetitive type letters are received, the principal issues can be summarized and appropriate responses made. In these instances a listing of the correspondents by name in lieu of attaching copies of each letter will be acceptable.

(5) The reporting officer will make every effort to reconcile areas of discrepancy or disagreement, where comments of reviewing agencies pose significant objection to or recommend modification of the statement. Where agreement cannot be reached within a reasonable period of time, subsequent to receipt of comments, the comments will be discussed (in (2) and (3) above) and a subsection entitled "Unreconciled Conflicts" will be added to this section of the statement. This sub-section will contain a brief, but complete and thorough discussion of the problem(s). The discussion will be a concise and objective analysis of the environmental issues, presenting both sides of the issue.

DRAFT ENVIRONMENTAL STATEMENT, HARBOR OF REFUGE AT LEXINGTON, MICH., U.S. ARMY ENGINEER DISTRICT, DETROIT, MICH., OCTOBER 1972

SUMMARY

(X) Draft
( ) Final Environmental Statement

Responsible office: (Complete Address & Phone No. of District Engineer)

1. *Name of action:*
(X) ADMINISTRATIVE
( ) LEGISLATIVE

2. *Description of action:* The Corps of Engineers has proposed the establishment of harbor facilities for small craft in southern Lake Huron at the Village of Lexington, Sanilac County, Michigan. The proposed development would provide an anchorage area protected on three sides by a breakwater system and connected to the open water of Lake Huron by an approach channel. Onsite sport fishing facilities would be enhanced by a foot-bridge connecting the main breakwater to the shore. In addition, the Michigan Waterways Commission has proposed to establish a marina with berthing docks within the harbor area and with appurtenant service facilities onshore. This harbor would supplement the program of harbors-of-refuge for light-draft vessels along the Great Lakes' shoreline.

3. (A) *Environmental impact:* The proposed harbor facilities would provide a safe anchorage for recreational craft and materially improve sport fishing opportunities. The total magnitude of public use as expressed in visitors per seasonal day should increase greatly.

(B) *Adverse environmental effects:* The actions proposed would impact on the local environment by causing changes in the configuration of the adjacent shoreline areas through the interception of littoral drift. However, it is proposed to mitigate such conditions through a program of periodic beach nourishment. Construction and maintenance operations would cause temporary and/or permanent damage to the present aquatic environment. Water quality within the harbor would be degraded through the increased boat traffic and interruption of shoreline currents. The open water setting of Lake Huron at Lexington would be altered by the proposed harbor developments. The extent of the existing public beach would be reduced by approximately 70 percent.

4. *Alternatives to the proposed action:*
(A) Moving the proposed harbor facility more southerly but along the same stretch of beach at Lexington.
(B) Moving the proposed harbor site more northerly but in the same stretch of beach at Lexington.
(C) Reduce the area of the proposed harbor by locating the north breakwater approximately 300 feet south and, in effect, reduce the total breakwater length.
(D) Constructing the harbor breakwaters by rock rubblemound rather than the proposed steel sheet pilings.
(E) Do not construct the proposed harbor at Lexington, Michigan.

5. *Comments requested:*
Michigan Department of Natural Resources
Michigan Historical Commission
Office of Planning Coofdination, Executive Ofc. of the Governor (Mich.)

National Park Service
6. Draft statement to CEQ ----------

FINAL ENVIRONMENTAL STATEMENT, GATHRIGHT LAKE, JACKSON RIVER, JAMES RIVER BASIN, VA., U.S. ARMY ENGINEER DISTRICT, NORFOLK, VA., JANUARY 1973

SUMMARY

( ) Draft
(X) Final Environmental Statement

Responsible office: (Complete Address & Phone No. of District Engineer.)

1. *Name of action:*
(X) Administrative
( ) Legislative

2. *Description of action:* Complete construction of a multiple-purpose reservoir project on the Jackson River, James River Basin, Virginia. An earth, rock-fill dam will provide 123,700 acre-feet of storage within the conservation pool and 203,600 acre-feet at the top of the flood control pool. The combination flood control, water quality control, area redevelopment, and recreation project will lie within Bath and Alleghany Counties. A cold-water trout habitat will be created in the Jackson River from the dam site downstream about 10 miles to near Covington, Virginia.

3. a. *Environmental impacts:* Provide flood control, water quality control, and recreation benefits as well as certain other economic benefits within the area arising from employment and investment opportunities. About 2,530 acres of land will be permanently inundated; agricultural lands within the Gathright Wildlife Management Area will be removed from effective production. Some 12 miles of the free-flowing Jackson River will be foregone together with attendant recreational activities such as canoeing and the present put-and-take trout fishery therein. Also, significantly changed will be about three-fourths of the Kincaid Gorge, Jackson River. The reservoir will provide a permanent warm-water fishery, and operation of the project will permit the establishment of a trout fishery below the dam.

b. *Adverse environmental effects:* Approximately 40 persons have been or will be relocated. About 12 miles of the Jackson River will be foregone as will the present river-oriented canoeing and put-and-take trout fishing. About three-fourths of the Kincaid Gorge will be transformed from the manner it existed naturally. Within the Gathright Wildlife Management Area, 1,240 acres of bottomland agricultural wildlife habitat will be lost. This includes 300 acres of cropland. Wildlife habitat beneficial to turkey and deer production will be reduced.

4. *Alternatives:* The following alternatives to either the entire Gathright project or to features incorporated therein were considered:
a. Alternative dam sites.
b. System of small dams.
c. Operation of Gathright as a dry dam.
d. Local protection works at Covington.
e. Flood plain zoning.
f. Evacuation of property on flood plain.
g. Floodproofing.
h. Flood insurance.
i. Purchase of flood plain.
j. Lagooning of pollution wastes.
k. Piping of pollution wastes downstream.
l. Complete removal of pollutants.
m. Operation of Gathright for water quality improvement.
n. Higher degrees of waste treatment.
o. Alternative to the recreational facilities constructed in Gathright project.
p. Deleting storage in Gathright project for the control of floods downstream.
q. Deleting storage in Gathright project for water quality control.
r. Deleting recreation in Gathright project.
s. Deleting the downstream trout fishery.
t. Abandonment of Gathright project.

6. Draft Statement to CEQ 28 Aug 72.
Final Statement to CEQ ----------

DRAFT ENVIRONMENTAL STATEMENT, MISSISSIPPI RIVER, EAST BANK, WARREN TO WILKINSON COUNTIES, MISS. (VICKSBURG-YAZOO AREA), U.S. ARMY ENGINEER DISTRICT, VICKSBURG, VICKSBURG, MISS., DECEMBER 1971

SUMMARY

(X) Draft Environmental Statement
( ) Final Environmental Statement

Responsible office: (Complete Address & Phone No. of District Engineer)

1. *Name of action:*
( ) Administrative
(X) Legislative

2. *Description of action:* The recommended plan of improvement consists of 11.3 miles of loop-levee to protect against the Mississippi River Project Design flood, 16.1 miles of channel improvements within the interior drainage system, installation of a water level control weir and a 200 c.f.s. pumping station with floodgates, and acquisition and development of 1,000 acres of bottomland outside of the leveed area to mitigate project-induced fish and wildlife losses.

3. a. *Environmental impacts:* Essentially complete flood protection for about 10,100 acres is expected to improve living conditions for area residents; provide for needed agricultural, industrial, commercial, and residential expansion; improve economic conditions for Warren County; and diminish fish and wildlife productivity within the area.

b. *Adverse environmental effects:* The induced clearing of bottomland forests would result in a reduction of wildlife habitat and wildlife productivity. The protective levee would damage the existing fishery by eliminating natural overflows. Intensive farming practices could further degrade aquatic habitat because of increased sedimentation and turbidity, alteration of natural water supplies, and use of pesticides.

4. *Alternatives:* Two levee alignments, non-structural alternatives (flood forecasting and warning, flood plain regulation, and permanent evacuation of the developed flood plain), and "no development."

5. *Comments requested:* List all agencies, organized groups and individuals from whom comments were requested. Two columns may be used to keep the summary as brief as possible.

6. Draft statement to CEQ ----------

REVISED DRAFT ENVIRONMENTAL STATEMENT, MISSISSIPPI RIVER, EAST BANK, WARREN TO WILKINSON COUNTIES, MISS. (VICKSBURG-YAZOO AREA), OFFICE OF THE CHIEF OF ENGINEERS, DEPARTMENT OF THE ARMY, WASHINGTON, D.C. 20314, APRIL 1972

SUMMARY

(X) Revised Draft Environmental Statement
( ) Final Environmental Statement

Responsible office (Complete Address and Phone No. of District Engineer)

1. *Name of action:*
( ) Administrative
(X) Legislative

2. *Description of action:* Same as Draft Statement except project modifications resulting from BERH and/or OCE reviews should be identified and discussed as appropriate.

3. a. *Environmental impacts:* Same as 2 above.

b. *Adverse environmental effects:* Same as 2 above.

4. *Alternatives:* Same as 2 above.

5. *Comments received (district review):* List all agencies and organizations from whom comments were received. Show one entry "private citizen or citizens" if comments were received from the general public. Two columns may be used to keep the summary as brief as possible. Do not list comments requested but not received on the summary. This information can be shown in paragraph 8 of the statement.

b. *Comments requested (departmental review):*
Department of Agriculture (Except Coastal Navigation Projects)
Department of Commerce (When Appropriate)
Department of Health, Education, and Welfare (All Projects)
Department of Housing and Urban Development (When Appropriate)
Department of the Interior (All Projects)
Department of Transportation (All Projects)
Environmental Protection Agency (All Projects)
Office of Economic Opportunity (When Appropriate)
State or States Concerned (All Projects)
(Note: Add FPC if project involves power or power potential and Regional Basin and International Commissions when appropriate.)

LETTERS RECEIVED BY THE DISTRICT ENGINEER ON THE DRAFT ENVIRONMENTAL STATEMENT

APPENDIX A

NOTE.—Provide a Table of Contents if a large number of letters are attached.

LETTERS RECEIVED BY THE CHIEF OF ENGINEERS AS A RESULT OF COORDINATION OF THE REVISED DRAFT ENVIRONMENTAL STATEMENT

APPENDIX B

PROCESSING INSTRUCTIONS

1. At the same time as the District Engineer circulates draft environmental statements, revised draft statements and draft supplements and furnishes 5 copies to CEQ, he will prepare a short letter transmitting two copies of the CEQ transmittal letter and one copy of the statement to Chief, Office of Civil Functions, Office of the Secretary of the Army, Washington, D.C. 20310. The letter will indicate the type of project and authority (survey, O&M, permit, etc.); whether or not the basic project decision has ever been reviewed by Office, Secretary of the Army, and if so, when; and whether or not the environmental impacts of the project are controversial. Briefly explain who expressed concern, what the concern was, and the Corps response. If the project is in litigation it should be noted.

2. Copies of the transmittal letter to CEQ will be attached to ten copies of the draft environmental statements forwarded to higher authority. Of the five statements forwarded to OCE, one copy will be marked to the attention of DAEN–PAP (Mr. Kelly) and the remaining four to the appropriate Divisions in OCE as noted in paragraph 16.

3. Pages C–25 through C–30 are samples of the format to be followed by the District Engineer in preparing transmittal letters for furnishing draft environmental statements to CEQ. Letters transmitting draft revised

V 39 156 MAR 21 74 XUM

statements and draft supplements will follow the same format as draft statements.

(Sample letter for transmitting survey report draft EIS's to CEQ)

MR. STEPHEN D. JELLINEK,
Acting Staff Director,
Council on Environmental Quality,
722 Jackson Place NW.,
Washington, D.C. 20006.

DEAR MR. JELLINEK: Inclosed is the draft Environmental Statement and supplemental data concerning project economics on a proposed plan for navigation improvements at Milwaukee Harbor, Wisconsin. A revised draft statement will be furnished upon completion of review by the Board of Engineers for Rivers and Harbors and the Office of the Chief of Engineers. The final statement will be furnished upon completion of coordination with concerned Federal and State agencies, consideration of the views of the public, and review by the Secretary of the Army.

The total estimated Federal cost is $8,742,000.

The release of this statement to the general public can be made with proper notation that it is a draft statement issued for the purpose of obtaining necessary views of governmental and private interests concerned with the impact of project development on the environment.

To date, no significant opposition has been indicated by any organized groups.

Sincerely yours,

1 Incl (5 cys)
As stated

(Sample letter for transmitting small project authority draft EIS's to CEQ)

MR. STEVEN D. JELLINEK,
Acting Staff Director,
Council on Environmental Quality,
722 Jackson Place NW.,
Washington, D.C. 20006.

DEAR MR. JELLINEK: Inclosed is the draft Environmental Statement for proposed improvements for navigation at the Gulf Intracoastal Waterway, Texas (tributary channel to Aransas Pass) undertaken pursuant to the small navigation project authority provided by Section 107 of the 1960 Rivers and Harbors Act, as amended. Also inclosed are supplemental data concerning project economics.

The final statement will be transmitted upon completion of coordination with concerned Federal, State and local agencies, organized conservation and environmental groups, and other public groups or citizens.

The total estimated Federal cost is $474,000.

The release of this statement to the general public can be made with proper notation that it is a draft statement issued for the purpose of obtaining necessary views of governmental and private interests concerned with the impact of project development on the environment.

No organized public group has indicated concern regarding the environmental impact of this project.

Sincerely yours,

2 Incl (5 cys ea)
As stated

(Sample letter for transmitting phase I, GDM draft EIS's to CEQ)

Mr. STEVEN D. JELLINEK,
Acting Staff Director,
Council on Environmental Quality,
722 Jackson Place NW.,
Washington, D.C. 20006.

DEAR MR. JELLINEK: Inclosed is the Phase I Draft Environmental Statement for flood control improvements on Scioto River at Chillicothe, Ohio, authorized by the Flood Control Act of 1962. Also inclosed are supplemental data concerning project economics.

The final statement will be transmitted upon completion of coordination with concerned Federal, State and local agencies, organized conservation and environmental groups, and other public groups or citizens.

The total estimated Federal cost is $6,455,000.

The release of this statement to the general public can be made with proper notation that it is a draft statement issued for the purpose of obtaining necessary views of governmental and private interests concerned with the impact of project development on the environment.

Opposition to the proposed plan of improvement has been expressed by the academic community and the Fish and Wildlife Service concerning the loss of 1.7 acres of a 6-acre stand of unusual mature bottomland forest adjacent to an existing city park. In response, the Corps notes that the proposed plan is the most feasible and that all practical means of minimizing the impact upon the bottomland forest will be observed in the design and construction of the project.

Sincerely yours,

2 Incl (5 cys ea)
As stated

(Sample letter for transmitting continuing construction draft EIS's to CEQ)

MR. STEVEN D. JELLINEK,
Acting Staff Director,
Council on Environmental Quality,
722 Jackson Place NW.,
Washington, D.C. 20006.

DEAR MR. JELLINEK: Inclosed is the draft Environmental Statement on the Onaga Dam and Lake Project, Kansas, authorized by the Flood Control Act of 1962. Also inclosed are supplemental data concerning project economics.

The final statement will be transmitted upon completion of coordination with concerned Federal, State and local agencies, organized conservation and environmental groups, and other public groups or citizens.

The total estimated Federal cost is $36,889,000.

The release of this statement to the general public can be made with proper notation that it is a draft statement issued for the purpose of obtaining necessary views of governmental and private interests concerned with the impact of project development on the environment.

To date, no significant opposition has been indicated by any organized groups.

Sincerely yours,

2 Incl (5 cys ea)
As stated

(Sample letter for transmitting operation and maintenance draft EIS's to CEQ)

Mr. STEVEN D. JELLINEK,
Acting Staff Director,
Council on Environmental Quality,
722 Jackson Place NW.,
Washington, D.C. 20006.

DEAR MR. JELLINEK: Inclosed is the draft Environmental Statement on the operation and maintenance of the flood control project, Pat Mayse Lake, Sanders Creek, Texas. The final statement will be transmitted upon completion of coordination with concerned Federal, State and local agencies, organized conservation and environmental groups, and other public groups or citizens. Operation and maintenance work is performed annually.

The estimated cost of work scheduled to be performed on the project during Fiscal Year 1974 is $252,000.

The release of this statement to the general public can be made with proper notation that it is a draft statement issued for the purpose of obtaining necessary views of governmental and private interests concerned with the impact of project development on the environment.

To date, no significant opposition has been indicated by any organized groups.

Sincerely yours,

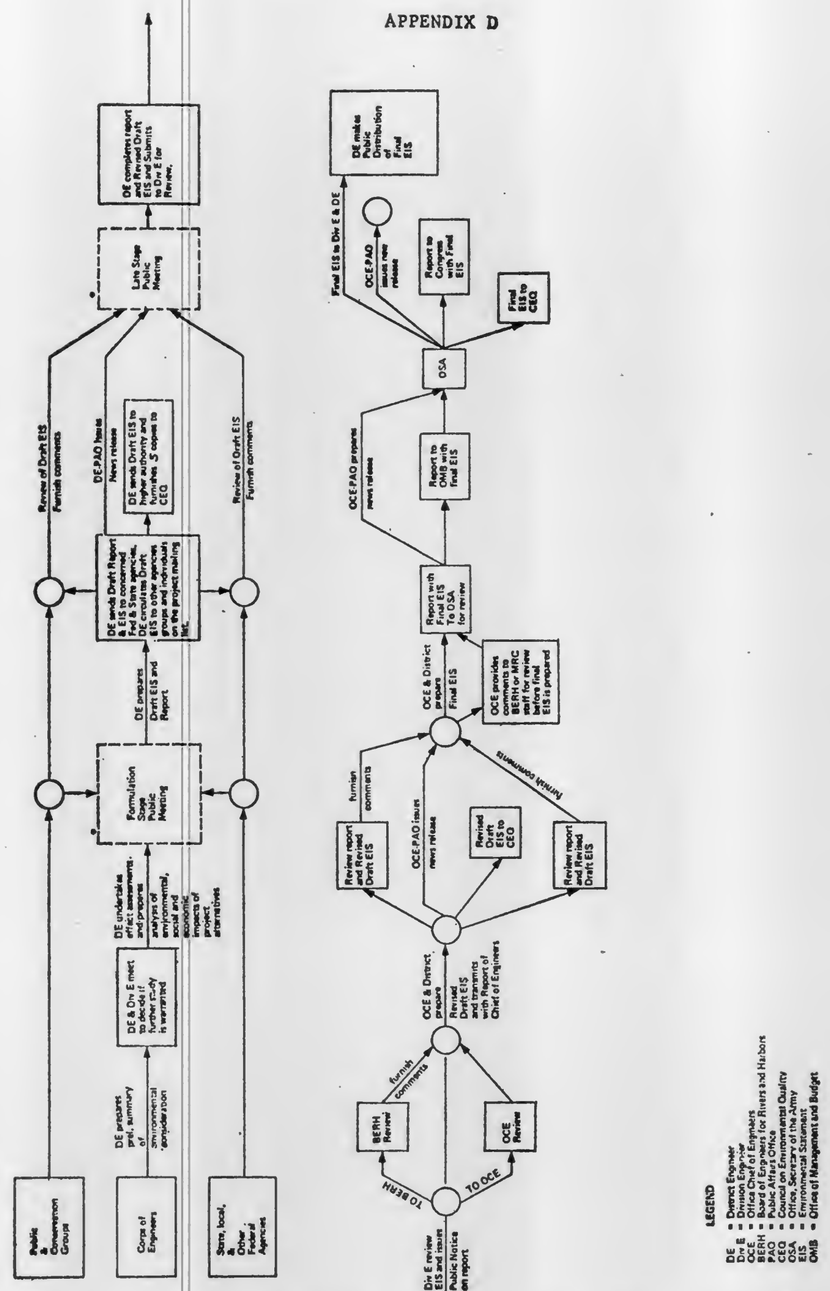
1 Incl (5 cys)
As stated

(Sample letter for transmitting permit application draft EIS's to CEQ)

Mr. STEVEN D. JELLINEK,
Acting Staff Director,
Council on Environmental Quality,
722 Jackson Place NW.,
Washington, D.C. 20006.

DEAR MR. JELLINEK: Inclosed is the draft Environmental Statement concerning a permit application made to the Corps of Engineers by Ernest W. Hahn, Inc., regarding the construction of a regional shopping center in Corte Madera, California.

This is in response to the Department of the Army's responsibility pursuant to Section 10 of the River and Harbor Act of 1899 to determine whether proposed work in navigable waters of the United States would be consistent with the public interest.



The release of this statement to the general public can be made with the proper notation that it is a draft statement issued for the purpose of obtaining necessary views of governmental and private interests concerned with the impact of the proposed construction on the environment.

There is significant organized public opposition regarding the environmental impact of this project.

Sincerely yours,

1 Incl (5 cys)

APPENDIX P

COORDINATION WITH FEDERAL AGENCIES

Coordination of environmental statements and their supporting reports will be conducted in accordance with the requirements contained in Appendix C, CEQ Guidelines (38 FR 20559), the Water Resource Council Coordination Handbook; Section X of EM 1120-2-101, "Survey Investigations and Reports, General Procedures," OMB Circular A-95, "Evaluation, Review, and Coordination of Federal and Federally Assisted Programs and Projects;" and the following special requirements established by certain Federal agencies.

Environmental Protection Agency---- F-2
Department of Housing and Urban Development ---------- F-6
Department of Commerce---------- F-8
Department of the Interior---------- F-9

ENVIRONMENTAL PROTECTION AGENCY,
OFFICE OF THE ADMINISTRATION.
Washington, D.C., October 28, 1971.

Col. J. B. NEWMAN,
Executive Director of Civil Works,
Office of the Chief of Engineers,
Department of the Army,
Washington, D.C.

DEAR COLONEL NEWMAN: The Environmental Protection Agency is in the process of strengthening its program for review of environmental impact statements under the National Environmental Policy Act of 1969. To expedite the review process, significant responsibility to evaluate environmental impact statements from other agencies has been delegated to our Regional Administrators. The regional offices have established close working relationships with State, local and Federal field offices, and are in the best position to evaluate issues which affect specific geographical areas.

Environmental impact statements submitted to the Environmental Protection Agency for comment should be directed as follows:

1. Environmental statements concerning legislation, regulations, national program proposals or other major policy issues should be directed to:

Mr. George Marienthal, Acting Director
Office of Federal Activities
Environmental Protection Agency
Washington, D.C. 20460

2. Environmental statements concerning other major Federal actions, such as highway and water resource construction projects, should be directed to the Regional Administrator in whose area the action will take place. The Regional Administrator will coordinate the EPA review.

When any EPA office is requested to comment on an environmental impact statement, please provide five copies of the statement and supporting material. A list of EPA regional offices, including a listing of the States under the jurisdiction of each region is enclosed.

Sincerely.

GEORGE MARIENTHAL,
Acting Director,
Office of Federal Activities.

Enclosure.

U.S. ENVIRONMENTAL
PROTECTION AGENCY.
Washington, D.C. 20460,
September, 29, 1972.

MR. FRANCIS X. KELLY,
Director, Office of Public Affairs,
U.S. Army Corps of Engineers
1000 Independence Avenue SW.,
Washington, D.C. 20314.

DEAR MR. KELLY: The purpose of this letter is to provide guidance in the submission of draft environmental impact statements to the Environmental Protection Agency for review and comment. This pertains only to pesticide-related (including herbicides) programs.

A recent study of our procedure for the preparation of EPA responses to draft impact statements indicated that delay in receipt of the statement in the office of the principal reviewer was our most serious problem. In order to minimize this problem, I ask that two copies of your Corps' Environmental Impact statements be sent to Mr. William M. Hoffman, Office of Pesticides Programs, Environmental Protection Agency, Washington, D.C. 20460. Copies should also be sent to the appropriate EPA Regions as has been done in the past.

I am sure that the initiation of this change will result in forwarding responsive comments consistent with our time limitation.

Sincerely yours,

SHELDON MEYERS,
Director,
Office of Federal Activities.

DEPARTMENT OF HOUSING
AND URBAN DEVELOPMENT,
Washington, D.C. 20410,
May 9, 1972.

This is to clarify the contact point for the Department of Housing and Urban Development regarding the distribution of Environmental Impact Statements in accordance with Section 102(2)(C) of the National Environmental Policy Act of 1969 and the Council on Environmental Quality Guidelines of April 1971.

Environmental Impact Statements submitted to HUD for comment should be directed as follows:

1. Environmental Impact Statements for proposed legislation, policy issuances and guidance documents, program regulations and procedures, and other policy issues should be sent to:

Samuel C. Jackson
Assistant Secretary for Community Planning and Management
Department of Housing and Urban Development
Washington, D.C. 20410
Attn: Richard H. Broun, Environmental Clearance Officer

2. Environmental Impact Statements for project actions should be sent to the HUD Regional Administrator in whose region the project is to be located. A list of the Regional Administrators and the HUD Regional Offices is enclosed.

In order to facilitate review and comment, please provide three (3) copies of each Environmental Impact Statement to the appropriate HUD office. I would appreciate your informing the component bureaus and offices in your department of this procedure. Thank you for your cooperation.

Sincerely,

SAMUEL C. JACKSON,
Assistant Secretary for Community Planning and Management.

Enclosure.

OFFICE OF THE
ASSISTANT SECRETARY OF COMMERCE,
Washington, D.C. 20230,
December 14, 1973.

Colonel JOHN V. PARISH, Jr.,
Executive Director of Civil Works,
Office of the Chief of Engineers,
U.S. Army, Corps of Engineers,
Washington, D.C. 20314.

DEAR COLONEL PARISH: In regard to environmental impact statements sent to the Department of Commerce from your agency for review and comment, it is requested that your standard distribution be increased to a total of 8 (eight) copies. This should meet our maximum need and allow for expeditious review and comment, particularly by our various field installations.

In those cases where distribution is made by component agencies of your organization, it would be appreciated if you would notify them of this request.

Sincerely yours,

SIDNEY R. GALLER,
Deputy Assistant Secretary for Environmental Affairs.

COORDINATION WITH THE DEPARTMENT OF THE INTERIOR

Contact point: Director, Office of Environmental Project Review, Department of the Interior, Washington, D.C. 20240.

Number of copies: Draft EIS, Draft Supplements and Revised. *Draft EIS (except for Revised Drafts on Survey Reports.)*

For projects *EAST* of the Mississippi River send 15 copies to contact point.

For projects *WEST* of the Mississippi River send 20 copies to contact point.

Final EIS, Final Supplements & Revised Final EIS.

For all projects send 2 copies to the contact point.

Additional instructions: For Survey Reports, Continuing Authorities (DPR's) and Phase I GDM's, a corresponding number of Draft Reports should accompany Draft EIS's when sent forward to the contact point.

APPENDIX G

PREPARATION OF BIOLOGICAL INVENTORIES

1. The inventories should list all species by both the common and scientific name.

2. Display the biotic species in a table or tables giving the status of the species in the general region, status in the project area, seasonal status (when applicable) and quantitative abundance in the general project area. It is paramount to give an explanation or definition of the terms (adjectives) used for quantification of each species, i.e., abundant, common, occasional, rare, etc. Additionally, provide a probable impact description that the project will have upon the species of mammals, birds, fishes, reptiles, amphibians, mollusks, crustaceans, etc., that normally inhabit the project area or may be influenced by the project. Specific and detailed analyses should be given to the project impacts upon the Endangered Species (see the 1973 edition of Threatened Wildlife of the U.S. by the Bureau of Sports Fisheries and Wildlife), upland game birds (turkey, quail, grouse, etc.), waterfowl (geese and ducks), big game mammals (moose, elk, deer, antelope, etc.), small game mammals (rabbits, squirrels, etc.), fur bearers (mink, beaver, muskrat, nutria, etc.), and others.

SAMPLE TABLE

Species	Habitat and/or seasonal status	Range in region or State	Abundance in region	Range in United States	Project impact
Bobwhite, *colinus virginianus.*	Permanent resident.	Statewide----------	Common-----	Eastern North America.	Minimal.
Mallard, *Anas platyrhynchos.*	Migrant----------	Waterways and marsh area regionwide.	-----do---------	United States---	None.
Cottontail, (*Sylvilagus* sp.).	Brushy areas----	Throughout region and State.	-----do----------	-----do----------	Moderate.

3. List principal native aquatic and terrestrial vegetation including trees, shrubs, grasses, herbs and other vegetation growing within the project area. Indicate relative abundance or scarcity, importance as wildlife habitat, and value for cultural, aesthetic and scientific purposes.

DEPARTMENT OF THE INTERIOR

Bonneville Power Administration

DRAFT SUPPLEMENTS TO THE FISCAL YEAR 1975 PROGRAM STATEMENT

Public Meeting

Notice of a series of public information meetings is hereby given by the Bonneville Power Administration, to solicit public comments on Draft Facility Location Supplements to BPA's Fiscal Year 1975 Program Statement.

The purpose of these public information meetings is to present to the public alternative facility or site locations relative to the specific proposals mentioned below and to elicit comments from the public with respect to the environmental impact of the proposals.

The dates, times, places, and proposals to be discussed at the meetings are as follows:

MT. PLEASANT ELECTRICAL SERVICE

On Monday, April 22, 1974, at 7:00 p.m. at the Cape Horn Sky Elementary School, the proposed construction of a new substation and tap line in Skamania County, Washington, will be discussed.

SAN JUAN ISLAND ELECTRICAL SERVICE

On Tuesday, April 23, 1974, at 7:30 p.m. at the Islander Lopez Motel, Lopez Island, Washington, the proposed construction of a 1.7 mile transmission line crossing Decatur Island, Washington, from east to west will be discussed.

EASTERN CLARK COUNTY ELECTRICAL SERVICE

On Wednesday, April 24, 1974, at 7:00 p.m. at Fishers Grange Hall in Vancouver, Washington, the proposed construction of a 1.3 mile 115-kv transmission line and expansion of the Sifton Substation in Clark County, Washington, will be discussed.

LANE ELECTRIC COOPERATIVE SERVICE EAST

An Friday, April 26, 1974, at 7:00 p.m. at Lowell High School, Lyons, Oregon, the proposed construction of a new substation near the town of Lowell located in Lane County, Oregon, will be discussed.

SKAMANIA COUNTY PUD SERVICE

On Monday, April 29, 1974, at 7:00 p.m. at the Stevenson High School, Stevenson, Washington, the proposed construction of a new substation and tap line near the town of Stevenson in Skamania County will be discussed.

Oral and written statements will be accepted at this series of meetings. Members of the public who wish to be given preference in the order of appearance should contact the BPA Area Manager in the area in which the particular meeting is to be held. However, all those present wishing to comment will be allowed to do so in the time remaining. Those wishing to comment orally are encouraged but not required to submit a written copy of their statement. All comments, whether oral or written, will be given consideration. Because of the technical nature of the subject matter, members of the public and other reviewers are also encouraged to familiarize themselves with the Draft Facility Location Supplement dealing with the above proposals before commenting.

Requests for copies of the draft supplement on the San Juan Island Electrical Service and any questions regarding this meeting should be forwarded to the Seattle Area Manager, 415 1st Avenue North, Room 250, Seattle, Washington 98109. Similar information regarding the remaining supplements and meetings should be directed to the Portland Area Manager, 919 NE. 19th Avenue, Room 201, Portland, Oregon 97232.

Written comments on the Draft Facility Location Supplements have been invited and will be accepted on or before Monday, April 29, 1974. Copies of the draft supplements are also available for inspection at the above Area Offices or at the headquarters building, Bonneville Power Administration, 1002 NE. Holladay Street, Portland, Oregon 97232.

V 39 I 56 MAR 21 74 XUM

Additional or clarifying information may be obtained by writing or calling the Environmental Office, Bonneville Power Administration, PO Box 3621, Portland, Oregon 97208; Area Code (503) 234–3361, extension 5136.

Dated: March 18, 1974.

WILLIAM H. CLAGETT,
Assistant Administrator.

Bureau of Land Management

ALBUQUERQUE DISTRICT ADVISORY BOARD

Notice of Meeting

A meeting of the Grazing Advisory Board for the Albuquerque District will be held on April 4 and 5, 1974 at the Holiday Inn in Farmington, New Mexico. The agenda for the meeting will include a field trip in the San Juan Planning Unit starting at 9:00 a.m., on April 4, 1974. On April 5, 1974, beginning at 8:30 a.m., the Board will review and make recommendations on the Bureau's Planning System as it pertains to the San Juan Planning Unit.

The meeting will be open to the public as space is available.

Dated: March 14, 1974.

R. KEITH MILLER,
District Manager.

[FR Doc.74-6505 Filed 3-20-74;8:45 am]

ARIZONA MULTIPLE USE ADVISORY BOARD

Notice of Meeting

Notice is hereby given that the Bureau of Land Management Arizona Multiple Use Advisory Board will meet in Phoenix, Arizona, as follows:

April 22, at 2 p.m., 3022 Federal Building: Wildlife Advisors from each Grazing District Advisory Board, to elect a representative to the Arizona State Multiple Use Advisory Board for the Bureau of Land Management and to consider and make recommendations on wildlife habitat problems in each District.

April 23, at 9 a.m., at the Granada Royale Hometel, 2333 East Thomas Road: members of the Multiple Use Advisory Board. The agenda for the meeting will include: election of Board officers; discussion of provisions of the Federal Advisory Committee Act of 1972, current status of land management planning, Lower Colorado River land selection program, range management program, branding requirements, policy regarding annual licenses and permits, off-road vehicle regulations, and Aravaipa Canyon Primitive Area access.

The meeting will be open to the public. Time will be available for a limited number of brief statements by members of the public. Those desiring to make public statements must notify the Chairman in writing of this intent prior to April 19, 1974. Any interested party may file a written statement with the Board for its consideration. Written statements and requests to give an oral statement to the Board should be directed to Ted Lee, Chairman, c/o State Director, Bureau of Land Management, 3022 Federal Building, Phoenix, Arizona, 85025.

Dated: March 15, 1974.

JOE T. FALLINI,
State Director.

NEW MEXICO

Navajo Refining Company; Notice of Pipeline Application

MARCH 14, 1974.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), Navajo Refining Company has applied for a crude oil pipeline right-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 17 S., R. 27 E.,
Sec. 20, S½NW¼, NE¼SW¼;
Sec. 28, SW¼NW¼, E½SW¼, SW¼SE¼;
Sec. 33, N½NE¼, SE¼NE¼; and
Sec. 34, SW¼NW¼, N½SW¼, SE¼SW¼.
T. 18 S., R. 27 E.,
Sec. 3, Lot 3, SE¼NW¼, NE¼SW¼.

The pipeline will convey crude oil crossing Federal Lands in Eddy County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with the preparation of environmental and other analysis necessary for determining whether the application should be approved, and if so, under what terms and conditions.

Interested persons should express their interest and views to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 1449, Santa Fe, NM 87501.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

Order Opening Lands to Entry

MARCH 14, 1974.

1. In an exchange of lands made under the provisions of section 8 of the Act of June 28, 1934 (48 Stat. 1269), as amended (43 U.S.C. 315g), the following described lands have been reconveyed to the United States:

NEW MEXICO PRINCIPAL MERIDIAN

T. 32 N., R. 5 W.,
Sec. 32.
T. 31 N., R. 6 W.,
Sec. 36.
T. 8 N., R. 10 W.,
Secs. 2, 16 and 36.
T. 3 N., R. 15 W.,
Sec. 21, NE¼, S½NW¼, N½SW¼ and W½SE¼;
Sec. 22, W½NW¼;
Sec. 27, S½N½, S½SW¼ and N½SE¼;
Sec. 34, W½SW¼.
T. 19 S., R. 11 W.,
Secs. 2 and 4;
Sec. 7, lots 3 and 4;
Sec. 8, W½E½ and E½NW¼;
Sec. 10, S½S½;
Sec. 15, NW¼ and E½SW¼;
Sec. 16, N½;
Sec. 17, NE¼;
Sec. 22, SW¼NE¼, N½NW¼ and SW¼NW¼.
T. 19 S., R. 12 W.,
Sec. 12, SE¼.
T. 20 S., R. 12 W.,
Sec. 14, E½NW¼.
T. 34 S., R. 15 W.,
Sec. 10, E½;
Sec. 11, W½.
T. 1 S., R. 18 W.,
Sec. 3, SE¼SW¼ and S½SE¼.
T. 34 S., R. 21 W.,
Sec. 16.
T. 34 S., R. 22 W.,
Sec. 2, lots 1, 2, 3, 4 and E½.
T. 25 S., R. 34 E.,
Sec. 13, SE¼NW¼;
Sec. 24, N½NE¼ and W½.
T. 25 S., R. 35 E.,
Sec. 20, S½NE¼ and SE¼;
Sec. 21, W½SW¼;
Sec. 26, NE¼ and S½;
Sec. 29, N½N½.

The areas described aggregate approximately 10,105.82 acres in Rio Arriba, Valencia, Catron, Grant, Hidalgo and Lea Counties.

2. The topography of the lands varies from level to moderately rolling to rough and mountainous. Soils vary from sandy loam with gravel ranging from shallow to deep. Vegetation consists of native grasses, light to heavy mesquite with shinnery oak, rabbit brush, chamise, and pinon-juniper trees.

3. Subject to valid existing rights, the provisions of existing withdrawals and requirements of applicable law, the lands described above are hereby open to petition-application, location and selection. All valid applications received at or prior to 10 a.m. on April 30, 1974, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

Inquiries concerning the lands should be addressed to Chief, Division of Technical Services, Bureau of Land Management, Santa Fe, New Mexico 87501.

MICHAEL T. SOLAN,
Chief, Division of Technical Services.

Fish and Wildlife Service

MARINE MAMMAL PERMIT

Notice of Receipt of Application and Notice of Public Hearing

Notice is hereby given that the following applicant has applied for a permit to take marine mammals for public display as authorized by section 101(a)(1) of the Marine Mammal Protection Act of 1972 [16 U.S.C. 1361–1407] governing the taking and importing of marine mammals. The Director of the Bureau of Sport Fisheries and Wildlife, United States Fish and Wildlife Service, Department of the Interior, finds the following application sufficient for consideration.

Notice is also hereby given that, as authorized by section 104 of the Marine Mammal Protection Act of 1972, a hearing will be held at 9:30 a.m., local time, April 9, 1974, at the California State Building, Room B-109, 1350 Front Street, San Diego, California. The purpose of the hearing is to consider the following application for a public display permit.

The applicant, Sea World, Inc., 1720 South Shores Road, San Diego, California, 92109, proposes to collect eight (8) Pacific walrus (*Odobenus rosmarus divergens*) in and around the offshore waters including the ice floes and/or other locations as they may inhabit around St. Lawrence Island or Little Diomede Island, or possibly from the offshore mainland of the State of Alaska.

The Applicant states that the pups will be salvaged after the females have been killed by the Eskimos under their subsistence hunting program; if the animals are not taken by Sea World, they also will be killed by Eskimos or left to die in the ocean. Therefore, the taking of these animals represents no loss to the population stocks.

The applicant further states that the animals will be taken aboard Eskimo walrus skin boats and transported to the Eskimo village where they will be cared for in an open snow pen. They will be fed a formula of fish, whipping cream, clams, squid, and other nutrients blended together which the applicant states resembles the milk obtained from female walrus under experimental conditions in both nutrients and quality.

The applicant further states that the animals will be transported on a jet aircraft to Sea World, Inc., San Diego, California, where they will be placed and cared for in a specially constructed nursery that has free access to sea water, sunning areas, etc. The animals will be transported in individual containers made of plywood and wire screen that allows full ventilation and mobility but protects them from extreme damage.

The applicant further states that the walrus will be displayed in the walrus display area. They will be displayed in pairs for short periods of time on an alternating basis. After the animals reach weaning age and are on a full solid food diet, they will be left on display as are the adult walrus.

Sea World states that once the animals are weaned they will be divided into three groups, one group will stay at Sea World, San Diego, one group will be sent via jet aircraft to Sea World of Ohio, and one group will be sent via jet aircraft to Sea World of Florida.

Concurrent with the publication of this notice in the FEDERAL REGISTER the Director is sending copies of the application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Documents submitted in connection with this application are available for public inspection during normal business hours at the Bureaus' office in Suite 600, 1612 K Street NW., Washington, D.C., and at the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1500 Plaza Building, 1500 NE Irving Street, Portland, Oregon 97208.

Interested persons may comment on this application by appearing at the hearing referred to above to present oral or written views, or by submitting written data or views, preferably in triplicate to the Director (FSF/LE), Bureau of Sport Fisheries and Wildlife, Washington, D.C. 20240. All revelant comments received no later than April 26, 1974, will be considered.

Dated: March 15, 1974.

LYNN A. GREENWALT,
Director, Bureau of Sport Fisheries and Wildlife.

[FR Doc.74-6548 Filed 3-20-74;8:45 am]

Office of Oil and Gas

NATIONAL PETROLEUM COUNCIL

Notice of Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the following meeting:

The National Petroleum Council will meet at 9:00 a.m. on March 29, 1974, in the Department of the Interior Auditorium, 18th and C Streets NW., Washington, D.C. The agenda will include interim and progress reports on current studies relating to the following topics:

1. Energy conservation—interim report.
2. Emergency preparedness (materials and manpower requirements for petroleum exploration, drilling and production)—status report.
3. Emergency preparedness (impact of embargoes on oil shipments by Arab nations)—status report.
4. U.S. petroleum storage capacity—status report.
5. Petroleum resources under the ocean floor—status report.

The meeting will be open to the public. Further information with respect to this meeting may be obtained from Ben Tafoya, Office of Oil and Gas, Department of the Interior at the Federal Energy Office, Post Office Building, 12th Street and Pennsylvania Avenue NW., Washington, D.C., telephone number 961-8601.

The purpose of the National Petroleum Council is to provide advice, information and recommendations to the Secretary of the Interior, upon request, on any matter relating to petroleum or the petroleum industry.

ROBERT L. PRESLEY,
Assistant Director, Emergency Preparedness Office of Oil and Gas, Department of the Interior.

MARCH 19, 1974.

MANTI DIVISION G-10 ADVISORY BOARD

Notice of Meeting

The Manti Division G-10 Advisory Board will hold its annual meeting on April 2, 1974.

The meeting will be held beginning at 1:30 p.m. in Room 211 of the Administration Building, College of Eastern Utah.

The meeting agenda will cover the following specific topics:

1. Proposed change in Forest Commensurability Standards.
2. Brief review of new mining laws.
3. Status of Land Use Planning on Manti-LaSal National Forest.
4. Expected Forest financing for fiscal year 1975, including possibility of accelerated range program.
5. New areas administered by Manti-La-Sal.
6. Change of annual meeting date to a more convenient date.

This meeting will be open to the public. To the extent time permits, persons may be permitted to comment on topics brought before the Board at anytime during the discussion.

Persons desiring additional information on the meeting should contact Forest Supervisor George McLaughlin, MantiLaSal National Forest, 350 East Main Street, Price, Utah 84501.

GEORGE F. MCLAGUHLIN,
Forest Supervisor.

OREGON DUNES NATIONAL RECREATION AREA ADVISORY COUNCIL

Notice of Meeting

The Oregon Dunes National Recreation Area Advisory Council met on Friday, February 22 at 9:30 a.m. in Room 105 of the State Capitol Building in Salem. This was a continuation of the February 1, 1974, meeting held in Corvallis, which recessed to be reconvened at a later date. The purpose of the meeting was to enlist the Council's help and advice in reviewing the wilderness suitability report and developing a proposed management alternative for the Oregon Dunes National Recreation Area. No recommendation was made by the Council on wilderness suitability. Several suggestions were made by Council members on a proposed management alternative for the entire NRA.

The meeting was open to the public. Written statements are permitted to be filed with the committee after the meeting. Members of the public present were: Bob Pfohman, Capital Journal, Salem; Patricia Noyes, Eugene; Joe Walicki, Wilderness Society, Eugene.

F. DALE ROBERTSON,
Forest Supervisor.

ENVIRONMENTAL STATEMENT, LAKE TAHOE BASIN

Extension of Comment Period

On August 29, 1973, the Forest Service, Department of Agriculture, filed with the Council on Environmental Quality a draft environmental statement for the proposed General Plan for Management of National Forest Lands in the Lake Tahoe Basin, USDA-FS-DES(Adm) 74-23, pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969. Notice of availability of this draft environmental statement was published in the FEDERAL REGISTER on September 13, 1973 (38 FR 25459). Comments were requested within 90 days of filing with CEQ.

Because of continued public interest and concerns regarding adequacy of opportunity for public review, the comment period for this draft environmental statement is being re-opened for 45 days, starting March 20, 1974.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service
South Agriculture Building, Room 3230
14th Street & Independence Ave. SW.
Washington, D.C. 20259.

USDA, Forest Service
California Region
630 Sansome Street, Room 531
San Francisco, California 94111

Eldorado National Forest
100 Forni Road
Placerville, California 95667

Tahoe National Forest
Highway 49
Nevada City, California 95959

Toiyabe National Forest
Charles Mapes Building
111 North Virginia Street
Reno, Nevada 89503

Lake Tahoe Basin Management Unit
1052 Tata Lane
P.O. Box 8465
South Lake Tahoe, California 95731

A limited number of single copies are available upon request to Administrator, Lake Tahoe Basin Management Unit, P.O. Box 8465, South Lake Tahoe, California 95705.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151, at a cost of $13.00 each. Please specify NTIS Accession No. EIS-CA-73-1443-D when ordering.

Copies of the environmental statement were sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Administrator, Lake Tahoe Basin Management Unit, P.O. Box 8465, South Lake Tahoe, California 95705. Comments must be received by May 6, 1974, in order to be considered in the preparation of the final environmental statement.

Dated: March 14, 1974.

RICHARD M. POMEROY,
Acting Regional Forester,
California Region.

ROUTT NATIONAL FOREST MULTIPLE USE ADVISORY COMMITTEE

Notice of Meeting

The Routt National Forest Multiple Use Advisory Committee will meet at 9:30 a.m., April 4, 1974 in the meeting room at the Yampa Valley Electric Association Building, 32 Tenth Street, Steamboat Springs, Colorado.

The purpose of this meeting is to: Discuss objectives of the committee, membership tenure, environmental education, land use planning, off-road travel restrictions and the Hayden-Ault 345 K.V. Transmission Line.

The meeting will be open to the public. Persons who wish to attend should notify the Forest Supervisor, P.O. Box 1198, Steamboat Springs, Colorado 80477, phone number 303-879-1722. Written statements may be filed with the committee before or after the meeting.

The committee has established the following rules for public participation: The chairman will provide time for the public to present oral statements and ask questions at the conclusion of the business meeting.

Dated: March 13, 1974.

W. B. METCALF,
Forest Supervisor.

Packers and Stockyards Administration

[P. & S. Docket No. 4923]

GILES LOWERY STOCKYARDS, INC., d/b/a BAY CITY LIVESTOCK COMMISSION CO.

Notice of Complaint, Order of Suspension, and Hearing

In re: Giles Lowery Stockyards, Inc. d/b/a Bay City Livestock Commission Company, Bay City, Texas—Respondent.

Notice is hereby given that on February 21, 1974, the respondent filed a proposed amendment to its current schedule of rates and charges, under Title III of the Packers and Stockyards Act, 1921, as amended, 42 Stat. 159, as amended (7 U.S.C. 181 et seq.), to become effective March 15, 1974. The proposed amended tariff reads as follows:

Section A—Commission: 3 percent—of sale price of all livestock consigned.

Section B—Yardage: 35¢ a head—cattle; 25 percent a head—sheep, goats & hogs; 50¢ a head—horses & mules.

Section C—Feed: $1.50 for hay; $4.50 for sack feed.

Section D—Special Services: Weighing (other than sale day) 35¢ head.

Notice is given hereby also that on March 13, 1974, the Packers and Stockyards Administration, United States Department of Agriculture, filed a "Complaint, Order of Suspension, and Notice of Hearing" with respect to the respondent's rates and charges. The contents of such document are as follows:

This proceeding is instituted pursuant to the provisions of Title III of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), hereinafter referred to as the Act.

I

The respondent is now, and at all times mentioned herein was, registered with the Secretary of Agriculture as a market agency to sell livestock on commission at the Giles Lowery Stockyards, Inc. d/b/a Bay City Livestock Commission Company, Bay City, Texas, which is now, and at all times mentioned herein was, a posted stockyard subject to the provisions of the Act.

II

In accordance with the requirements of the Act, the respondent has heretofore filed and presently has in effect a schedule of rates and charges for its services at the aforementioned stockyard.

III

On February 21, 1974, the respondent filed a tariff effective March 15, 1974, containing certain increases in the current rates and charges.

IV

Upon an analysis of the information available to the Packers and Stockyards Administration, United States Department of Agriculture, there is reason to believe that certain of such increases are unjust, unreasonable, or discriminatory.

V

It is concluded therefore, that a proceeding under Title III of the Act should be instituted for the purpose of determining the reasonableness and lawfulness of the rates and charges set forth in the respondent's schedule of rates and charges as modified by the tariff filed on February 21, 1974, and that pending a hearing and decision in this proceeding, the operation of the modifications of the current schedule of rates and charges should be suspended and the use of such modified rates and charges deferred.

VI

It is further concluded that a hearing should be had for the purpose of determining the lawfulness of all rates and charges of the respondent and of any rule, regulation, or practice affecting said rates and charges.

It is therefore ordered, That the operation and use by the respondent of the modifications of the current schedule of rates and charges filed on February 21, 1974, to become effective on March 15, 1974, are hereby suspended and deferred until the expiration of thirty days beyond the time when such modified rates would otherwise go into effect.

It is further ordered, That notice to the respondent shall be, and is hereby, given that a hearing concerning the matters set forth herein will be held before an Administrative Law Judge of the Department at a time and place to be specified at a later date, of which the respondent will receive adequate notice. At such hearing the respondent and all other interested persons will have a right to appear and present such evidence with respect to the matters and things set forth herein as may be relevant and material.

It is further ordered, That any and all interested persons who may wish to appear and present evidence relative to the issues in this proceeding shall give notice thereof by filing a statement to that effect with the Hearing Clerk, United States Department of Agriculture, Washington, D.C. on or before April 10, 1974.

It is further ordered, That a copy hereof be served upon the respondent.

Done at Washington, D.C., March 18, 1974.

MARVIN L. MCLAIN,
Administrator, Packers
and Stockyards Administration.

Maritime Administration

[Docket No. S-411]

SPRUCE SHIPPING CO.

Notice of Application for Operational Differential Subsidy

Notice is hereby given that Spruce Shipping Company has filed an application dated March 7, 1974, for operating-differential subsidy on three (3) tankers (to be constructed) of approximately 89,700 deadweight tons each. Said vessels will operate generally from ports in the Persian Gulf, Borneo, Indonesia, and possibly South America to Hawaiian and United States West Coast ports in the carriage of crude oil, and may be operated in other worldwide service in the carriage of liquid bulk cargoes and dry bulk cargoes not subject to the cargo preference statutes including 10 U.S.C. 2631, 46 U.S.C. 1241, and 15 U.S.C. 616a. This application supersedes the operating-differential subsidy application of November 9, 1973, filed by Hawaiian International Shipping Corporation, notice of which was published in the FEDERAL REGISTER of December 17, 1973 (38 FR 34680).

Any party having an interest in such application and who would contest a finding of the Board that the service now provided by vessels of United States registry for the worldwide carriage of liquid and dry bulk cargoes, not subject to the cargo preference statutes, moving in the foreign commerce of the United States or in any particular trade in the foreign commerce of the United States is inadequate, must, on or before April 5, 1974, notify the Secretary in writing of his interest and of his position and file a petition for leave to intervene in accordance with the Board's Rules of Practice and Procedure (46 CFR Part 201). Each such statement of interest and petition to intervene shall state whether a hearing is requested under section 605(c) of the Merchant Marine Act, 1936, as amended, and with as much specificity as possible the facts that the intervenor would undertake to prove at such hearing.

In the event that a section 605(c) hearing is ordered to be held, the purpose of such hearing will be to receive evidence relevant to whether the service already provided by vessels of U.S. registry for the worldwide movement of liquid and dry bulk cargoes in the foreign oceanborne commerce of the United States is inadequate and whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated in such service.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Maritime Subsidy Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing the Maritime Subsidy Board will take such actions as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidy (ODS))

Dated: March 18, 1974.

By Order of the Maritime Subsidy Board.

JAMES S. DAWSON, Jr.,
Secretary.

National Bureau of Standards

MEN'S PAJAMA SIZES, ET AL.

Action on Proposed Withdrawal of Commercial Standards

In accordance with § 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10, as revised; 35 FR 8349 dated May 28, 1970), notice is hereby given of the withdrawal of the following Commercial Standards:

CS 15-46, "Men's Pajama Sizes (Made from Woven Fabrics)"
CS 137-51, "Size Measurements for Men's and Boys' Shorts (Woven Fabrics)"
CS 166-50, "Size Measurements for Men's Work Trousers"
CS 187-52, "Men's Work Shirt Sizes"

It has been determined that these standards are no longer used to any significant extent. Therefore, their continued maintenance in the Department's Voluntary Product Standards inventory would serve no useful purpose.

This action is taken in furtherance of the Department's announced intentions as set forth in the public notice appearing the FEDERAL REGISTER of January 25, 1974 (39 FR 3301), to withdraw these standards.

The effective date for the withdrawal of these standards will be on or before May 20, 1974. This withdrawal action terminates the authority to refer to these standards as voluntary standards developed under the Department of Commerce procedures.

Dated: March 15, 1974.

RICHARD W. ROBERTS,
Director.

[FR Doc.74-6552 Filed 3-20-74;8:45 am]

EXPANDED VINYL FABRICS FOR UPHOLSTERY USE, AND VINYL- AND PYROXYLIN-COATED COTTON FABRICS

Action on Proposed Withdrawal of Voluntary Standards

In accordance with § 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10, as revised; 35 FR 8349 dated May 28, 1970), notice is hereby given of the withdrawal of Commercial Standard CS 273-65, "Expanded Vinyl Fabrics for Furniture Upholstery Use" and Simplified Practice Recommendation R 242-53, "Vinyl- and Pyroxylin-Coated Cotton Fabrics." It has been determined that these standards are no longer used to any significant extent. Therefore, their continued maintenance in the Department's Voluntary Product Standards inventory would serve no useful purpose.

This action is taken in furtherance of the Department's announced intentions as set forth in the public notice appearing in the FEDERAL REGISTER of January 17, 1974 (39 FR 2119), to withdraw these standards.

The effective date for the withdrawal of these standards will be on or before May 20, 1974. This withdrawal action terminates the authority to refer to these standards as voluntary standards developed under the Department of Commerce procedures.

Dated: March 15, 1974.

RICHARD W. ROBERTS,
Director.

[FR Doc.74-6554 Filed 3-20-74;8:45 am]

VITREOUS CHINA PLUMBING FIXTURES

Notice of Intent To Withdraw Commercial Standard

In accordance with § 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10, as revised; 35 FR 8349 dated May 28, 1970), notice is hereby given of the intent to withdraw Commercial Standard CS 20-63, "Vitreous China Plumbing Fixtures." It has been tentatively determined that this standard is no longer technically adequate and revision would serve no useful purpose.

Any comments or objections concerning the intended withdrawal of this standard should be made in writing to the Office of Engineering Standards Services, National Bureau of Standards, Washington, D.C. 20234, on or before April 22, 1974. The effective date of withdrawal will not be less than 60 days after the final notice of withdrawal. Withdrawal action terminates the authority to refer to a published standard as a voluntary standard developed under the Department of Commerce procedures from the effective date of withdrawal.

Dated: March 15, 1974.

RICHARD W. ROBERTS,
Director.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[NADA No 39-401V]

HOFFMAN-TAFF, INC.

Breeder Premix Medicated; Notice of Withdrawal of Approval of New Animal Drug Application

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343-351; (21 U.S.C. 360b)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), the following notice is issued:

Hoffman-Taff, Inc., P.O. Box 1246 S.S.S., Springfield, MO 65805, has requested that its NADA (new animal drug application) No. 39-401V be withdrawn in accordance with § 135.28(d) (21 CFR 135.28(d)) on the ground that the drug is not being marketed. Notice is given that approval of NADA No. 39-401V for Breeder Premix Medicated, which contains hydromycin B, bacitracin methylene disalicylate, and procaine penicillin, is hereby withdrawn.

This notice shall be effective March 21, 1974.

Dated: March 14, 1974.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.74-6473 Filed 3-20-74;8:45 am]

National Institute of Education

INFORMATION CENTER

Location and Adoption of Fee Schedule for Special Information Services

Notice is given herein of the new location of the National Institute of Education (NIE) Information Center and of adoption of a fee schedule for special information services.

The Department of Health, Education, and Welfare published on August 17, 1973, amendments to Part 5 of Subtitle A of Title 45 of the Code of Federal Regulations. (38 FR 22230) The location shown for the NIE Information Center at § 5.31 of the amended regulation is no longer accurate. The new location is Room 720-B, 1200 19th St., NW (Brown Building), Washington, D.C. 20208.

The Department's Public Information Regulation is applicable to NIE with the exception of § 5.61 Fee schedules, which applies only to the Office of the Secretary. Pursuant to 5 U.S.C. 552, the Director of NIE herewith adopts the fee schedule shown below.

Fee schedule. The fee schedule for the National Institute of Education is as follows:

(a) Search for records—$3 per hour; provided however that no charge will be made for the first one-half hour.

(b) Reproduction, duplication, or copying of records—10 cents per page; provided however that no charge will be made where the total amount does not exceed 50 cents and provided further that where records are not susceptible to photo-copying, e.g. punch cards or magnetic tapes, the amount charged will be actual cost, as determined on a case-by-case basis.

(c) Certification or authentication of records—$3 per certification or authentication.

(d) Forwarding material to destination—postage, insurance, and special fees will be charged on an actual cost basis.

It is ordinarily the policy of NIE to provide opportunity for public comment prior to publication of final rules. However, since the provision adopted is identical to the Department's, which has been published after public comment, the Director finds that public participation in rule making in this case is unnecessary.

(Catalog of Federal Domestic Assistance Program No.—13.575, Educational Research and Development.)

Dated: March 12, 1974.

THOMAS K. GLENNAN, Jr.,
Director,
National Institute of Education.

[FR Doc.74-6534 Filed 3-20-74;8:45 am]

SUPPORT FOR INTERPRETIVE STUDIES ON EDUCATIONAL RESEARCH AND DEVELOPMENT

Notice of Proposed Funding Activity

Notice is hereby given that pursuant to section 405 of the General Education Provisions Act, the National Institute of Education (NIE) intends to open a competition for awards in fiscal year 1974 for preparation of interpretive studies on educational research and development.

Funds will be awarded for the support of studies which synthesize and interpret the existing research and development knowledge on significant educational topics and problem areas. The purpose of the program is to provide practitioners and decision-makers in the educational community with research and development findings and validated current practice information for improving existing school programs or implementing new ones.

Proposals will be solicited for studies on topics perceived by the educational community as relevant to its problems and current interests. The proposer will identify the educational topic to be surveyed and present a sound rationale and need therefor. The proposal must show evidence of an existing body of research and related information on the topic, and it must demonstrate existence of the capability and resources to interpret this information in a scientifically respectable manner. The outcome is expected to be a professionally sound report on the study (approximately 100 double-spaced, typewritten pages) suitable for publication and national dissemination.

Scope. Proposals submitted under the proposed competition should be consistent with the following characteristics. These points suggest the scope of a study and its resulting report; they are not intended as an exact prescription for prospective applicants to follow:

1. Be targeted to the information needs of specific identified audiences—e.g., administrators, teachers, specialists, school boards, professors, or teacher trainers.

2. Describe the key research and development findings in the subject area.

3. Describe the operational constraints that may impinge upon the use of such findings in practice.

4. Identify and describe relevant ongoing programs, practices, and materials that show evidence of having improved or facilitated the learning process.

5. Present necessary cautions for those considering adoption/adaptation of specific educational innovations in the subject area (e.g., lack of evidence of long-term effectiveness, or equipment needed is changing rapidly in design and sophistication or is prohibitive in cost).

6. Discuss risk versus gain involved in adopting/adapting each innovation.

7. Discuss practices that should be avoided.

8. Present, wherever possible, alternative theories or solutions to a problem in practice so that a decision-maker may select the alternative or combination of alternatives most likely to succeed within the constraints and resources of a particular educational setting.

9. Identify and describe any exemplary demonstration projects applying research results in the subject area.

10. Give reasons based on research evidence and related information for the success—or lack of it—of these projects, and discuss the local conditions that should exist before such projects are attempted in other education settings.

11. Provide, depending upon the audience and the topic surveyed, cost data, planning guidelines, decision models, instructional techniques and materials, sources of additional information, evaluation techniques, and other information relevant to the topic.

Eligibility. Proposals for awards may be submitted by State and local education agencies, institutions of higher edu-

V 39 156 MAR 21 74 XUM

cation, professional associations, and other public and private, profit and nonprofit organizations, and individuals.

Priority topics or problem areas. Following is a list of suggested priority topics identified by educators as relevant to their needs. The topics are not intended to be prescriptive; rather, proposers are expected to delimit or broaden the scope of a topic as they deem necessary for their interpretive study. Also, although applicants are encouraged to develop proposals based on this list, they may submit proposals in other topical areas.

TESTING, MEASUREMENT, AND EVALUATION

The process of evaluating administrators, teachers, programs, and curriculums.

Instruments for measuring cognitive and noncognitive performance, K–12.

Assessing and reporting pupil progress: alternative grading systems.

EARLY CHILDHOOD EDUCATION

The longitudinal effects of early childhood education on learning: cognitive and affective.

State standards, certification, and comparative costs of early childhood education.

Programs for developing prereading and beginning reading skills.

SCHOOL FINANCE

Alternative methods of funding special education programs (handicapped, compensatory, bilingual, migrant, etc.).

Funding strategies for providing equal educational opportunities within a State.

Models of effective school finance programs, e.g., the coordination of local, State, and Federal funds.

INDIVIDUALIZING INSTRUCTION

Alternative approaches to individualizing instruction.

CAREER DEVELOPMENT

Responsiveness of career education programs, K–12, to manpower needs and the job market.

The roles of community groups in planning and implementing career education programs, and techniques for their involvement.

TEACHER EDUCATION

The redesign of teacher education programs for emerging needs (e.g., introduction of the metric system).

Preservice and inservice techniques for changing teacher behavior and attitudes.

Competency-based teacher education programs.

STUDENT LEARNING

The effects of motivation and attitudes on student learning.

Techniques for matching teaching styles with student learning styles.

Effective programs for developing students' problem-solving skills for living.

Techniques for coping with student learning problems.

ADULT AND CONTINUING EDUCATION PROGRAMS

Techniques for retraining adults for career changes.

Staff development programs for teachers of adults.

Effective basic education programs for adults.

EQUAL EDUCATIONAL OPPORTUNITIES

Characteristics of effective compensatory education programs.

The effects of mainstreaming handicapped students into the "regular" classroom.

Basic skills programs for the disadvantaged.

The effects of sexism/racism on learning and achievement.

Bilingual/bicultural education programs and practices.

Alternative approaches to racial and sexual equality of opportunity in classroom and nonclassroom settings.

NEW APPROACHES TO EDUCATION

Alternative schools, programs, and classroom practices for more effective learning (e.g., year-round schools, open education, multigraded classrooms, etc.): an analysis and evaluation.

PLANNING

Needs assessment techniques for planning at the State and district levels.

Coordination and utilization of Federal, State and local resources in planning.

Citizen participation in planning for educational improvement at the local level.

Project parameters and scheduling. Applicants should design projects requiring approximately 6 months to complete. A project would require the equivalent of 4 person-months of professional staff in addition to the necessary secretarial support and travel to gather information, e.g., to selected school sites operating promising programs in the subject area, and for audience involvement.

Although awards will be made prior to June 30, 1974, projects may be started as late as September 1, 1974. Four months following the start date, a draft of the interpretative study report will be due in NIE for review. The remaining time in the grant period will be devoted to revising and strengthening the report on the basis of suggestions of the reviewers. The final report should be received in NIE on or before the expiration of the grant period.

Approximately ten awards will be made. The deadline for receipt of proposals is expected to be April 23, 1974.

This notice is published for general information purposes and not to solicit proposals. Final regulations on this activity will be published in the FEDERAL REGISTER.

SUPPORT FOR RESEARCH IN LOCAL PROBLEM-SOLVING

Notice of Proposed Funding Activity

Notice is hereby given that pursuant to section 405 of the General Education Provisions Act, the National Institute of Education (NIE) intends to open a competition for awards in fiscal year 1974 to study the potential of various organizational arrangements for helping urban schools sustain a process of continuous improvement. The NIE Research Program on Organizational Strategies for School Improvement will (1) initially provide grants to support the further development or extension of programs for accomplishing the above objective, and (2) under a separate competition in fiscal year 1975, contract for documentation and evaluation analyses of these grant-supported projects in order to develop generalizable information which NIE can use to assist other schools considering similar programs.

Under the grant competition, the Institute will invite proposals to support the further development of organizational arrangements—internal and/or external to an urban school or cluster of schools—that will encourage and enable people in the school(s) to engage in an ongoing process of "problem-solving," which might consist of the following general elements:

Problem identification.

Searching for or devising appropriate solutions to those problems.

Implementing those solutions in effective ways.

Monitoring performance, assessing the effectiveness of particular solutions, and when appropriate, redefining the problems.

Under the separate contract(s) for documentation and evaluation, information will be collected from the grant-supported projects about the effectiveness of their organizational models. This information will be used to assist policy formulation at the Federal, State, and local levels; to advance current knowledge about the dynamics of organizational change and about strategies for improving urban schools; and to help people in school systems and local communities establish or adapt similar arrangements appropriate to local conditions.

Among the strategies that may be proposed for grant assistance under this program are interventions based outside the school such as teacher centers, advisories, information and resource services; and organizational changes within the school such as new governance systems, staffing and scheduling patterns, and other structural arrangements that provide incentives and opportunities for school staffs to continuously improve their performance.

Because of the limited funds available, proposals will be invited which extend, refocus, or add new components to existing activities or organizational arrangements. Proposals from these existing programs may request funds to extend their current activities, to develop a formative evaluation component, to train additional staff, and to provide technical assistance to other groups or individuals. Funds under this program are not intended to support the core staff of a project or to provide other basic operational costs.

State and local education agencies, colleges, universities, and other profit or non-profit organizations are eligible for awards. However, the program proposed must be targeted at a public school or cluster of schools having at least a 50 percent enrollment of students from low-income families. These schools must be located in one of the nation's fifty largest cities as indicated in Table 66, General Population Characteristics, United States Summary, 1970 Census of the United States. These cities are listed below.

Atlanta, Georgia
Baltimore, Maryland
Birmingham, Alabama
Boston, Massachusetts
Buffalo, New York
Chicago, Illinois
Cincinnati, Ohio
Cleveland, Ohio
Columbus, Ohio
Dallas, Texas
Denver, Colorado
Detroit, Michigan
El Paso, Texas
Fort Worth, Texas
Honolulu, Hawaii
Houston, Texas
Indianapolis, Indiana
Jacksonville, Florida
Kansas City, Missouri
Long Beach, California
Los Angeles, California
Louisville, Kentucky
Memphis, Tennessee
Miami, Florida
Milwaukee, Wisconsin

Table 66 "excludes Puerto Rico and outlying areas." Nonetheless, the following cities, on the basis of their population, are also eligible under this competition:

San Juan, Puerto Rico

NIE anticipates supporting the projects for a period of three years. Each project will be funded initially for twelve months, with further funding (not to exceed two additional years) contingent on the availablity of funds and NIE approval of the grantee's continuation proposal. Six to ten awards will be made in fiscal year 1974, with an aggregate funding total of approximately $800,000 for the first year of operation of the projects. The deadline for receipt of proposals is expected to be April 22, 1974.

This notice is published for general information purposes and not to solicit proposals. Final regulations on this activity will be published in the FEDERAL REGISTER.

ALLERGY AND IMMUNOLOGY RESEARCH COMMITTEE

Notice of Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Allergy and Immunology Research Committee, National Institute of Allergy and Infectious Diseases, April 25 and 26, 1974, National Institutes of Health, Westwood Building Conference Room C. This meeting will be open to the public on April 25, from 9:00 a.m. until 9:30 a.m., to discuss administrative matters relating to the allergy and immunology research programs of the Institute. Attendance by the public will be limited to space available. The meeting will be closed to the public on April 25 from 9:30 a.m. until adjournment on April 26 to discuss and evaluate institutional fellowship grant applications in accordance with the provisions set forth in section 552(b)4 of Title 5, U.S. Code, and section 10(d) of Pub. L. 92–463.

Mr. Robert L. Schreiber, Chief, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, National Institutes of Health, Building 31, Room 7A34, telephone 496–5717, will provide summaries of meetings and rosters of committee members.

Dr. Luz A. Froehlich, Executive Secretary of the Allergy and Immunology Research Committee, National Institute of Allergy and Infectious Diseases, National Institutes of Health, Westwood Building, Room 703, Bethesda, Maryland, telephone 496–7131 will provide substantive program information.

BIOHAZARD CONTROL AND CONTAINMENT WORKING GROUP

Notice of Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Biohazard Control and Containment Working Group, National Cancer Institute, April 11, 1974, 9:00 a.m., National Institutes of Health, Building 31, Conference Room 3. This meeting will be open to the public from 9:00 to 9:30 a.m., to discuss the past year's progress in Biohazard Control. Attendance by the public will be limited to space available. The meeting will be closed to the public from 9:30 a.m. to adjournment for the discussion and review of contract proposals in the fields of viral oncology, in accordance with the provisions set forth in section 552(b)4 of Title 5 U.S. Code and 10(d) of Pub. L. 92–463.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 3A16, National Institutes of Health, Bethesda, Maryland 20014 (301/496–5708) will furnish summaries of the open/closed meeting and roster of committee members. Dr. Garrett V. Keefer, Executive Secretary, Building 550, Frederick Cancer Research Center, Frederick, Maryland 21701 (301/663–7305) will provide substantive program information.

BIOLOGY AND IMMUNOLOGY SEGMENT ADVISORY GROUP

Notice of Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Biology and Immunology Segment Advisory Group, National Cancer Institute, April 19, 1974, 9:00 a.m. to 3:00 p.m., National Institutes of Health, Building 37, Conference Room 3A15. This meeting will be open to the public from 2:00 to 3:00 p.m. to discuss possible new activities of the Biology and Immunology Segment. Attendance by the public will be limited to space available. The meeting will be closed to the public from 9:00 a.m. to 2:00 p.m. to discuss and review seven contracts and one new proposal in the field of biology and immunology of cancer in accordance with the provisions set forth in section 552 (b) 4 of Title 5, U.S. Code and section 10(d) of Pub. L. 92–463.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 3A16, National Institutes of Health, Bethesda, Maryland 20014, (301/496–5708) will furnish summaries of the open/closed meeting and roster of committee members.

Dr. Virginia C. Dunkel, Executive Secretary, Landow Building, Room A-306, National Institutes of Health, Bethesda, Maryland 20014 (301/496–5471) will provide substantive program information.

CANCER CLINICAL INVESTIGATION REVIEW COMMITTEE

Notice of Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Cancer Clinical Investigation Review Committee, National Cancer Institute, April 22–24, 1974, 8:30 a.m. to 5:00 p.m., National Institutes of Health, Building 31C, Conference Room 6. This meeting will be open to the public from 8:30 a.m. to 1:00 p.m., April 22, to discuss program and operating procedures of the Cancer Clinical Investigation Review Committee. Attendance by the public will be limited to space available. The meeting will be closed to the public from 1:00 p.m., April 22, until adjournment April 24, to review grant applications in the fields of clinical research, in accordance with the provisions set forth in section 552(b)4 of Title 5 U.S. Code and 10(d) of Pub. L. 92–463.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 3A16, National Institutes of Health, Bethesda, Maryland 20014 (301/496–5708) will furnish summaries of the open/closed meeting and roster of committee members.

John E. Lane, Executive Secretary, Westwood Building, Room 10A11, National Institutes of Health, Bethesda, Maryland 20014 (301/496–7903) will provide substantive program information.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. D–74–273]

ASSISTANT SECRETARY FOR ADMINISTRATION

Delegation of Authority

The Assistant Secretary for Administration is authorized to exercise the power and authority of the Secretary to execute and issue on the Secretary's behalf notes and other obligations issued to the Secretary of the Treasury to finance program activities authorized by the College Housing Program (Pub. L. 81–475, title IV, section 401, 12 U.S.C. 1749); Public Facility Loans Program (Pub. L. 84–345, title II, section 202, 42 U.S.C. 1493); Urban Renewal Program (Pub. L. 81–171, title I, section 102, 42 U.S.C. 1452); and Flood Insurance Program (Pub. L. 90–448, title VIII, section 1309, 42 U.S.C. 2414(e) and 4016).

(Sec. 7(d), Department of HUD Act, 42 U.S.C. 3535(d)).

Effective date. This delegation of authority shall be effective March 21, 1974.

JAMES T. LYNN,
Secretary of Housing and Urban Development.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

COMMITTEE ON LICENSES AND AUTHORIZATIONS

Notice of Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice

V 39 156
MAR 21 74
XUM

is hereby given of a meeting of the Committee on Licenses and Authorizations of the Administrative Conference of the United States, to be held at 11:00 a.m. on March 27, 1974 in the Hughes Room, National Lawyers Club, 1815 H Street, NW., Washington, D.C.

The Committee will meet to consider a report and proposed recommendation regarding Department of the Interior procedures affecting mining claims on public lands.

Attendance is open to the interested public, but limited to the space available. To the extent that time permits the Committee Chairman may allow public presentation of oral statements at the meeting. Any member of the public may file a written statement with the Committee before, during or after the meeting. For further information concerning this committee meeting contact George P. Smith, Suite 500, 2120 L Street, NW., Washington, D.C. 20037 or phone 202–254–7065. Minutes of the meeting will be available on request.

Dated: March 15, 1974.

RICHARD K. BERG,
Executive Secretary.

ATOMIC ENERGY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON NAVAL REACTORS

Notice of Meeting

MARCH 18, 1974.

In accordance with the purposes of section 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards' Subcommittee on Naval Reactors will hold a meeting on March 27, 1974 in Room 1046, 1717 H Street NW., Washington, D.C. The subject scheduled for discussion is naval nuclear propulsion safety matters.

I have determined, in accordance with subsection 10(d) of Pub. L. 92–463, that the discussion at the meeting will consist of classified matters which fall within exemptions (1) and (3) of 5 U.S.C. 552 (b) and it is essential to close this meeting to protect the discussion of these classified matters.

JOHN C. RYAN,
Advisory Committee Management Officer.

[FR Doc.74–6667 Filed 3–20–74;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON REGULATORY GUIDES

Notice of Meeting

MARCH 18, 1974.

In accordance with the purposes of sections 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards' Subcommittee on Regulatory Guides will hold a meeting on April 10, 1974, in Room 1046, 1717 H Street NW., Washington, D.C. The purpose of this meeting will be to discuss Regulatory Staff drafts of the following proposed Regulatory Guides in Division 1 of the Regulatory Guide series.[1]

(1) Proposed Revision 2 of Regulatory Guide 1.3, Assumptions Used for Evaluating the Potential Radiological Consequences of a Loss-of-Coolant Accident for Boiling Water Reactors, Draft 1.

(2) Proposed Revision 2 of Regulatory Guide 1.4, Assumptions Used for Evaluating the Potential Radiological Consequences of a Loss-of-Coolant Accident for Pressurized Water Reactors, Draft 1.

(3) Proposed Regulatory Guide 1.XX, Preoperational Testing of Instrument Air Systems, Draft 1.

(4) Proposed Revision 1 of Regulatory Guide 1.21, Measuring, Evaluating and Reporting Radioactivity in Solid Wastes and Releases of Radioactivity in Liquid and Gaseous Effluents from Light-Water Nuclear Power Plants, Draft 2.

(5) Proposed Regulatory Guide 1.XX, Inservice Inspection of Steam Generator Tubes, Draft 2.

(6) Proposed Regulatory Guide 1.XX, Collection, Storage and Maintenance of Nuclear Power Plant Quality Assurance Records, Draft 1.

(7) Proposed Revision 1 of Regulatory Guide 1.26, Quality Group Classifications and Standards for Water-, Steam-, and Radioactive Waste-Containing Components of Nuclear Power Plants, Draft 1.

(8) Proposed Regulatory Guide 1.XX, Construction Criteria for Class I Components in Elevated Temperature Reactors, Draft 1.

(9) Proposed Regulatory Guide 1.XX, Sumps for Emergency Core Cooling and Containment Spray Systems, Draft 1.

(10) Proposed Revision 1 of Regulatory Guide 1.35, Inservice Inspection of Ungrouted Tendons in Prestressed Concrete Containment Structures, Draft 1.

(11) Proposed Regulatory Guide 1.XX, Code Case Acceptability—ASME Section III Design and Fabrication, Draft 1.

(12) Proposed Regulatory Guide 1.XX, Code Case Acceptability—ASME Section III Materials, Draft 2.

(13) Proposed Regulatory Guide 1.XX, Assumptions Used for Evaluating the Habitability of a Nuclear Power Plant Control Room During a Postulated Hazardous Chemical Release, Draft 3.

(14) Proposed Regulatory Guide 1.XX, Protection Against Postulated Piping Failures in Fluid Systems Outside of Containment, Draft 2.

The following constitutes that portion of the Subcommittee's agenda for the above meeting which will be open to the public:

Wednesday, April 10, 1974, 9:00 a.m. until the conclusion of business.

Discussion with representatives of the AEC Regulatory Staff regarding the proposed Regulatory Guides which are agenda items.

In connection with the above agenda items, the Subcommittee may hold Executive Sessions, not open to the public, at 8:30 a.m. and at the end of the day to exchange opinions and formulate recommendations to the ACRS.

In addition to the Executive Sessions, the Subcommittee and any of its consultants that may be required will meet in closed session with members of the Regulatory Staff for the purpose of discussing a Regulatory Staff working paper concerning requirements for instrumentation to assess plant conditions during and following an accident.

I have determined, in accordance with Subsection 10(d) of Pub. L. 92–463, that the above-noted closed sessions will consist of exchanges of opinions and formulation of recommendations, the discussion of which, if written, would fall within exemption (5) of 5 U.S.C. 552(b) and the closed session with the Regulatory Staff will also involve discussion of a Regulatory Staff working paper which falls within exemption (5) of 5 U.S.C. 552(b). It is essential to close such portions of the meeting to protect the free interchange of internal views and to avoid undue interference with Subcommittee and agency operation.

Practical considerations may dictate alterations in the above agenda or schedule.

The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

With respect to the public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda items may do so by mailing 25 copies thereof to the Executive Secretary, Advisory Committee on Reactor Safeguards, U.S. Atomic Energy Commission, Washington, D.C. 20545. Comments for consideration at this meeting should be postmarked no later than April 3, 1974. Such comments shall be based upon the subject matter of the proposed Regulatory Guides which are agenda items and related documents which are on file and available for public inspection at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545. Single copies of drafts of proposed Regulatory Guides to be discussed in open session at this meeting may be obtained directly upon request to the Director of Regulatory Standards.

(b) Those persons submitting a written statement in accordance with paragraph (a) above may request an opportunity to make oral statements concerning the written statement. Such requests shall accompany the written statement and shall set forth reasons justifying the need for such oral statement and its usefulness to the Subcommittee. To the extent that the time available for the meeting permits, the Subcommittee will receive oral statements during a period of no more than 30 minutes at an appropriate time, chosen by the Chairman of the Subcommittee, between the hours of 1:30 p.m. and 3:30 p.m. on April 10, 1974.

(c) Requests for the opportunity to make oral statements shall be ruled on by the Chairman of the Subcommittee, who is empowered to apportion the time

[1] It is possible that one or more of these draft guides may be removed from the agenda prior to the meeting. It is therefore advisable to contact the Office of the Executive Secretary as specified in subparagraph (d) for any changes to the agenda.

available among those selected by him to make oral statements.

(d) Information as to whether the meeting has been cancelled or rescheduled and in regard to the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted, can be obtained by a prepaid telephone call on April 9, 1974, to the Office of the Executive Secretary of the Committee (telephone 301–973–5651) between 8:30 a.m. and 5:15 p.m., Eastern Daylight Time.

(e) Questions may be propounded only by members of the Subcommittee and its consultants.

(f) Seating for the public will be available on a first-come, first-served basis.

(g) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(h) A copy of the transcript of the open portions of the meeting will be available for inspection during the following workday at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545. Copies of the transcript may be reproduced in the Public Document Room or may be obtained from Ace Federal Reporters, Inc., 415 Second Street NE., Washington, D.C. 20002 (telephone 202–547–6222) upon payment of appropriate charges.

(i) On request, copies of the Minutes of the meeting will be made available for inspection at the Atomic Energy Commission Public Document Room, 1717 H Street NW., Washington, D.C. 20545 after June 10, 1974. Copies may be obtained upon payment of appropriate charges.

JOHN C. RYAN,
Advisory, Committee Management Officer.

[Docket No. 50–293]

BOSTON EDISON CO.

Establishment of Atomic Safety and Licensing Board To Rule on Petitions

Pursuant to delegation by the Commission dated December 29, 1972, published in the FEDERAL REGISTER (37 FR 28710) and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's regulations, all as amended, an Atomic Safety and Licensing Board is being established to rule on petitions and/or requests for leave to intervene in the "Proposed Issuance of Changes to Technical Specifications of Facility Operating License", as published by the Commission on February 7, 1974 (39 FR 4798), in regard:

Boston Edison Co. (Pilgrim Nuclear Power Station) Docket No. 50–293; Facility Operating License No. DPR–35.

The members of the Board are:

Edward Luton, Esq., Chairman
Dr. A. Dixon Callihan
Dr. M. Stanley Livingston

Dated at Washington, D.C., this 15th day of March 1974.

ATOMIC SAFETY AND LICENSING BOARD PANEL,
NATHANIEL H. GOODRICH,
Chairman.

[FR Doc.74–6530 Filed 3–20–74;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON EMERGENCY CORE COOLING SYSTEMS

Notice of Meeting

MARCH 19, 1974.

In accordance with the purposes of sections 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards' Subcommittee on Emergency Core Cooling Systems will hold a meeting on March 28, 1974 in Room 1062, 1717 H Street NW., Washington, D.C. The subject scheduled for discussion is the Regulatory Staff plan for review of vendor models formulated to meet ECCS criteria.

The Subcommittee is meeting with their consultants and Regulatory Staff participants as part of the process of formulation of recommendations to the full ACRS regarding the above subject.

I have determined, in accordance with subsection 10(d) of Pub. L. 92–463, that the meeting will consist of an exchange of opinions, the discussion of which, if written, would fall within exemption (5) of 5 U.S.C. 552(b). It is essential to close this meeting to protect the free interchange of internal views and to avoid undue interference with agency or Committee operation.

JOHN C. RYAN,
Advisory Committee Management Officer.

CIVIL AERONAUTICS BOARD

[Docket No. 26509]

CHARTER REGULATIONS APPLICABLE TO FOREIGN ROUTE AIR CARRIERS

Order To Show Cause

MARCH 15, 1974.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 15th day of March, 1974. Virtually all foreign air carriers authorized to engage in scheduled route service hold permits authorizing them to engage in charter air transportation, "subject to the terms, conditions, and limitations prescribed by Part 212 of the Board's Economic Regulations." Part 212 imposes significant restrictions on both "on-route"[1] and "off-route" charter operations.[2]

With the exception of recent amendments to Part 212, the charter regulations are basically an outgrowth of the *Foreign Off-Route Charter Service Investigation*, 27 CAB 196 (1958). Thus, in large part they reflect charter conditions as they existed more than fifteen years ago. Prior to the *Off-Route Charter Investigation*, only on-route charters were authorized to foreign scheduled carriers, and this authorization was considered only incidental to the general authority of the foreign air carrier to engage in scheduled transportation of passengers, property and mail between the points on its authorized route. Similarly, the authority granted to foreign carriers to perform off-route charters in the *Off-Route Charter Investigation* was considered as a right incidental to the primary rights to perform scheduled route service, and the grant of such authority was not considered of major economic significance. Rather, the primary purpose of the *Off-Route Charter Investigation* was to provide a means for the grant of what were then considered rather insignificant ancillary rights, without the necessity of subjecting the affected foreign carriers and the Board to the procedural burdens of *ad hoc* foreign air carrier permit amendment proceedings.[3]

In contrast to the majority of scheduled authorizations which have their

[1] **An on-route charter** is defined in § 212.1 as a charter "performed by a foreign air carrier between points between which it holds authority under a foreign air carrier permit to engage in foreign air transportation on an individually ticketed or individually waybilled basis * * *," including beyond-homeland charters which operate via and land at the homeland terminal point named in the foreign air carrier's permit. An off-route charter consists of any charter which is not within the definition of an "On-route charter trip."

[2] The restrictions applicable to "on-route" charters include (1) a prohibition against providing charter services other than charters as defined in the regulation (§ 212.3); (2) a requirement that prior Board approval be obtained in the form of a Statement of Authorization for wet-lease charter trips performed by a direct air carrier (§§ 212.8(a)(4–a), 212.6(b)(2), 218.3); (3) a prohibition against performing inclusive-tour charters as defined in Part 378 of the Regulations, other than between the homeland of the foreign air carrier and the United States, unless prior aproval in the form of a Statement of Authorization for such service has previously been granted by the Board (§§ 212.8(a)(8), 212.6(b–1); and (4)) a provision pursuant to which the Board may require prior approval of on-route charters, and—subject to Presidential stay or disapproval—may disapprove such charters if it finds such action to be in the public interest (§ 212.4(b)). Every "off-route" charter, in addition to complying with the other requirements of Part 212, requires prior approval in the form of a Statement of Authorization (§212.4(a)).

[3] See, Foreign Off-Route Charter Service Investigation, 27 CAB at 197–98.

V 39 156
MAR 21 74
XUM

foundation in the reciprocal grant of rights pursuant to bilateral Air Transport Agreements, charter operations, including on-route charter operations, were not, until recently the subject of bilateral agreements.[4] Thus, the foundation for charter authority must rest upon the principles of comity and reciprocity. Nevertheless, because of the concept of charters as merely ancillary to scheduled service rights, such reciprocity frequently does not exist in fact.

	1963	1972	Percent increase
Total passengers[5]	2,498,000	10,965,000	339
Scheduled passengers	2,155,000	8,342,000	287
Charter passengers	343,000	2,622,000	665

As the Board has heretofore observed,[6] the whole concept of charters and their place in the spectrum of foreign air carrier transportation services has changed enormously since the basic concepts embodied in the present Part 212 charter regulations were formulated. Thus, in 1963, only 13.7 percent of the total transatlantic passenger traffic was attributable to charters. In 1972, only 9 years later, the proportion of passenger charter transportation in the transatlantic market increased 96.2 percent to 24.0 precent of the total transatlantic passenger traffic.[8] Similarly, while total passenger traffic in the transatlantic market has increased 339 percent in the 10-year period between 1963 and 1972, and scheduled passenger traffic increased some 287 percent in this period, charter passenger traffic in the transatlantic market during this period increased some 665 percent, or nearly twice the total passenger movements, and 2⅓ times as much as scheduled passenger movements.[7]

With this enormous growth in charter demand and charter services, there has evolved a corresponding major revolution in the nature of the charter service provided. Thus, at the time of the *Off-Route Charter Investigation*, the Board was considering basically affinity charters, which were open only to individuals who were pre-existing members of a sponsoring organization. Today members of the general public can participate in group charter travel in the form of inclusive-tour charters where the charter group has a common purpose of joint travel and accommodations for a specfic period of time (Inclusive-Tour Charter Regulations, Part 378); or merely as a member of a group which has been formed for the purpose of travel, if the group is formed sufficiently in advance of departure (Travel Group Charter Regulations, Part 372a). In addition, agreements have been entered into with several foreign countries pursuant to which the United States and the foreign party to the agreement agree, within certain limits, to abide by the regulations applicable where the charter originates; [9] and the United States has embarked upon a program of negotiation of bilateral air transport agreements specifically related to charters.[8]

It is therefore apparent that charter authorizations should no longer be considered as rights merely incidental to the scheduled route service of foreign scheduled carriers. Rather, an authorization to provide charter service constitutes a valuable economic right of a nature which is now, and may soon be expected much more commonly to be, the subject of bilateral exchanges of rights. Thus, to the extent that the grant of such authority is based on the principles of comity and reciprocity, the Board is of the view that this Government should insure that reciprocity in fact exists. The Board has therefore determined that its charter regulations should be revised to reflect the changed role of charters, and to provide a solid foundation for such operations on the basis of a bilateral exchange of charter rights, or the existence of reciprocity in fact.

In consideration of the foregoing, the Board tentatively finds that its charter regulations should be revised in accordance with the "Proposed Rule" attached to the notice of proposed rulemaking issued contemporaneously herewith (EDR-264). In principal effect these rules will:

(1) Abolish the distinction between on-route and off-route charters;

(2) Permit foreign route carriers to operate charters only between the carrier's homeland and points in the United States, without prior approval (regardless of whether the charters are performed on or off the carrier's scheduled routes), but subject to (a) a limitation on the number of U.S.-originated charters that may be carried based on a 4 to 3 ratio to the number of homeland-originated charters carried in a calendar year; and (b) a provision which permits the Board to require prior approval of any or all authorized charters if it finds that the public interest so requires.[10]

The present dichotomy between on-route and off-route charters is a product of the original charter regulations which conceived of charter operations as only incidental to scheduled rights. We believe the public can be better served by authorizing, without prior approval, charters between the homeland of the carrier and the points of actual destination of the charter group in the United States. In effect, foreign route carriers will be granted the same freedom of homeland-U.S. charter operations as presently authorized for foreign charter carriers.

The Board will, nevertheless, retain the authority presently incorporated in § 212.4(b) to require prior approval of any or all charters if it finds that the public interest so requires. A failure to approve such a request for prior approval will be made subject to the stay or disapproval of the President of the United States, with respect to those charters that are subject to this requirement under the present regulations.[11]

Conversely, the Board tentatively proposes to authorize only those charters which are performed between points in the homeland of the carrier and points in the United States. Thus, the regulations will not authorize charters neither originating nor terminating in the homeland of the foreign route air carrier (so-called "fifth freedom" charters), or operating via or to points in a third country.[12] The present liberal authorization of such charters creates the potential for many carriers to concentrate their charter development efforts in major markets outside their homeland. The Board believes that the development of charter air transportation, and accordingly the promotion of better service to the public, will be enhanced by encouraging all foreign carriers to concentrate their charter development efforts in charter transportation to and from points in their homeland. Such a program should help to resolve the potential for an excess of charter capacity in presently developed markets, and should encourage development of charter markets which have yet to be developed. Further, the development of charter transportation in this manner will be in conformity with reciprocity, which generally provides a foundation only for operations to or from the homeland of the foreign air carrier.

For similar reasons, the Board has tentatively concluded that a reasonable relationship should be maintained between the carriage of charters originating in the United States and those originating in the homeland of the foreign air carrier. The development of foreign charter markets by a country's national carriers will not be encouraged if foreign carriers concentrate their entire energies toward the carriage of charters originating in the United States. Nor will reciprocity be maintained where the development of a charter market between two countries relies excessively on the carriage of citizens of only one of those countries. Thus, for many years the permits of foreign charter carriers have included the so-called "uplift ratio" pursuant to which such carriers are required to generate at least three foreign-originating charters in their homeland, for each four charters originating in the United States. A similar ratio will be applied here.[13]

The Board recognizes that there will be occasions where the performance of "fifth freedom" charters by certain foreign air carriers may be justified. Thus, it may be that the right to perform such "fifth freedom" charters has been specifically agreed upon by the United States and a foreign Government under the terms of an applicable bilateral charter Air Transport Agreement. Similarly, there may be occasions where a foreign government's liberality in permitting operations by United States air carriers of "fifth freedom" charters justifies, under the principles of reciprocity, the grant of a reciprocal privilege in volume and kind for the foreign air carrier to perform such "fifth freedom" charters to and from the United States. In addition, various extraordinary circumstances might also arise which justify relaxation of the restriction.

The Board therefore proposes to include in the regulations a provision for waiver of the regulatory restrictions which will be applicable (1) where charter rights, not encompassed within the terms of the regulations, are granted pursuant to a bilateral charter agreement; (2) where the foreign carrier has demonstrated that its government authorizes United States carriers to perform charters of the same nature and in the same volume as the aggregate volume of such charters conducted by such foreign government's national carriers; or (3) in other extraordinary circumstances. The Board would not contemplate granting such waivers in circumstances other than those outlined.[14]

The proposed regulations will not affect the present definition of permissible charters. Those are retained basically as they presently appear in § 212.8, subject to technical modifications to incorporate the foregoing revisions.

The Board has considered the question of appropriate procedures which will permit all interested parties to have a full opportunity to present their views and arguments, and such evidence as may be material to the matters being considered herein. The proposed rule changes are of general applicability and legislative in nature. Moreover, all outstanding foreign air carrier permits of foreign route carriers presently authorize foreign charter air transportation only "subject to the terms, conditions, and limitations prescribed by Part 212 of the Board's Economic Regulations." The Board therefore tentatively concludes that the proposed amendments to its charter regulations constitute rulemaking only, and do not constitute amendments of outstanding foreign air carrier permits. Accordingly, it is the Board's view that procedural requirements applicable to foreign air carrier permit amendments need not be followed.[15]

The Board nevertheless recognizes that the revisions being made will have a significant impact upon the future operations of charters in international air transportation, and that foreign policy considerations may be involved. Therefore, the Board proposes to submit its final rules to the President for approval.

In any event, the Board does not consider that the question as to whether or not the proposed amendments to the charter regulations might be technically considered a permit amendment is one that need be definitively resolved. Even if the regulatory revisions should be deemed to constitute permit amendments, no oral evidentiary hearing would be required in the absence of a demonstration by the parties that there exist disputed factual issues which necessitate an oral evidentiary hearing for their reasonable resolution. It appears to the Board, on the basis of the information presently before it, that the matters here in issue are primarily questions of U.S. international charter policy, as to which all factual issues are either so plain as to be incapable of a material dispute, or would otherwise be irrelevant or immaterial. The Board is, therefore, tentatively of the view that, whether or not this proceeding be considered to be technically a permit amendment proceeding, no oral evidentiary hearing will be required, nor would such a hearing be productive of any useful purpose, and would not be in the public interest.[16] However, all interested persons will be given a period of 45 days to file comments on the proposed rule, and a period of 20 days will be provided for the filing of comments in response to the initial comments. The Board will consider any comments of interested persons directed toward the question of future procedures in this proceeding, that may be necessary or desirable, to the end that a fair procedural opportunity will be given to all parties to adequately and fully present their views, arguments, and such evidence as may be material and relevant. The Board's final determination as to the appropriate procedure to be followed will be reserved until after the receipt of all such comments.[17] To insure that such rights will be preserved, all foreign route air carriers, and applicants for such authority, will be made parties to this proceeding.

The proposed amendments to Part 212, effectuating the above-described revisions, are set forth in the "Proposed Rule" attached to the Notice of Proposed Rule Making, EDR-264, issued contemporaneously herewith.

Accordingly, pursuant to sections 204 (a) and 402 of the Federal Aviation Act.

It is ordered, That: 1. All holders of, and applicants for, foreign air carrier permits authorizing individually ticketed or individually waybilled foreign air transportation, or both, and other interested persons, be and they hereby are directed to show cause why the Board should not, subject to the approval of the President, amend Part 212 of the Board's Economic Regulations, in the manner set forth in the "Proposed Rule" attached to the Notice of Proposed Rule Making EDR-264 issued contemporaneously herewith; and, to the extent such regulatory amendments might be deemed

---

[4] See, On-Route Charter Authority of Foreign Air Carrier Permits, Order 70-7-58; Japan Air Lines, Foreign Air Carrier Permit, Order E-24295, October 14, 1966.

[5] See, IATA Agreements Relating to Charters, Orders 72-3-112 and 72-6-91; On-Route Charter Authority of Foreign Air Carrier Permits, Orders 70-7-58 and 73-1-71; Application of Polskie Linee Lotnicze, Order 72-12-56.

[6] In 1972, the transatlantic charter market represented almost three-fourths of the total U.S. charter market.

[7] The number of transatlantic passengers and percentage increases in 1963 and 1972, were as follows:

[8] Specifically, the United Kingdom (April 2, 1973); Federal Republic of Germany (April 16, 1973); France (May 7, 1973); Ireland (July 2, 1973); and the Netherlands (July 18, 1973).

[9] Such agreements have been signed with Belgium, effective October 17, 1972, and Yugoslavia, effective September 27, 1973; and agreements *ad referendum* have been negotiated with Canada and Jordan.

[10] These proposed revisions will dispose of that portion of the petition of the National Air Carrier Association for rulemaking which remains outstanding. See Order 73-8-11, Docket 24713 (see FR Doc. 74-6566 [14 CFR Part 212]). It also disposes of certain issues in the petition of Certain Trunkline Carriers for Rulemaking, Docket 25674.

[11] In other words, with respect to charters to be performed between points in the homeland of the carrier, and points in the United States which are authorized for scheduled service in the carrier's foreign air carrier permit, the Board will advise the President of its proposed failure to approve any such charter, and such action of the Board may be stayed or disapproved by the President within 10 days of the date of such notification.

[12] An exception will be made for "emergency" charters performed on behalf of another carrier authorized to perform these charters. Such charters, even if not to or from the homeland of the carrier, will be authorized subject to the existing reporting requirements of section 212.14.

[13] Like the existing foreign charter carrier uplift ratio, a minimum of six United States-originating charters will be permitted, even if no charters originating in the homeland have been performed in the applicable calendar year; and, where as many as 45 charters originating in the United States are performed, the ratio will revert to a one-to-one uplift restriction.

[14] On the other hand, to the extend appropriate, *i.e.*, the grant of right pursuant to the terms of a bilateral charter Air Transport Agreement, such a waiver might be granted in blanket form, subject only to restrictions appropriate under the circumstances.

[15] The courts have held that rulemaking proceedings will suffice even for modification of existing license rights by general rules, despite a statute requiring an evidentiary hearing for amendment of a particular license. See, O'Donnell v. Shaffer, 34 Ad. L. 2d 176 (C.A.D.C., 1974); Saturn Airways v. CAB, 483 F.2d 1264 (C.A.D.C., 1973); Regular Common Carrier Conference v. U.S., 307 F. Supp. 941 (U.S.D.C., D.C., 1969); WBEN, Inc. v. U.S., 396 F.2d 601 (C.A. 2, 1968), cert. denied 393 U.S. 914 (1968); California Citizens Band Ass'n., 375 F.2d 43 (C.A. 9, 1967); American Airlines v. CAB, 359 F.2d 624 (C.A.D.C., 1966); and Air Line Pilots Ass'n., Int. v. Quesada, 276 F.2d 892 (C.A. 2, 1960).

[16] See, U.S. v. Florida East Coast Railway Co., 410 U.S. 224 (1973); Ruan Transport Corporation v. United States, 361 F. Supp. 371 (U.S.D.C., S.D. Iowa, 1973); U.S. v. Allegheny Ludlum Steel Corp., 406 U.S. 742 (1972); Citizens for Allegan County v. FPC, 414 F.2d 1125 (C.A.D.C., 1969); and Siegel v. AEC, 400 F.2d 778 (C.A.D.C., 1968).

[17] The Board recognizes that it may be desirable to defer applicability of the regulations so as not to disrupt any specific charter season, and will accordingly also consider comments directed to the appropriate timing of the applicability of the proposed revisions.

V 39 I 56 MAR 21 74 XUM

to constitute an amendment of the foreign air carrier permits held by such foreign air carriers, why such permits should not be so amended.

2. Any interested person having objections to the proposed amendments, or desiring to otherwise comment with respect to this matter, shall file with the Board, within forty-five (45) days from the date of this order, a memorandum stating such objections or comments, and supported by any evidence which may be considered material to the issues.[18]

3. Reply comments may be filed within twenty (20) days following the date for filing of initial comments.

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived and the Board may proceed to enter an order adopting final rules in accordance with the tentative findings and conclusions set forth herein, and in accordance with the "Proposed Rule" set forth in EDR-264.

5. If timely and properly supported objections are filed, full consideration will be accorded the matters and issues raised by any memoranda in opposition before further action is taken by the Board: *Provided*, That the Board may proceed to enter an order in accordance with the tentative findings and conclusions herein, and adopt the Rule proposed in EDR-264, or such modifications thereof as may appear to be in the public interest, if the comments fail to demonstrate the existence of relevant and material disputed factual issues which warrant an oral evidentiary hearing.

6. All holders of, and applicants for, foreign air carrier permits authorizing individually ticketed or individually waybilled foreign air transportation, or both, be and they hereby are made parties to this proceeding.

7. This order shall be served upon all holders of, and applicants for, foreign air carrier permits; all holders of certificates of public convenience and necessity; and the Departments of State and Transportation.

This order shall be published in the FEDERAL REGISTER, and a copy shall be transmitted to the President of the United States.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[Docket No. 26510]

DOMESTIC NIGHT COACH FARE INVESTIGATION

Order of Investigation

MARCH 18, 1974.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 18th day of March, 1974.

Among the issues litigated in the Fare Structure Phase of the *Domestic Passenger-Fare Investigation*, Docket 21866-9, was the lawfulness of existing night coach fares, and the conditions under which such service is provided. After reviewing the evidence submitted, the Board found that, on the available record, it was unable to come to any reasoned conclusions either as to the lawful level of night coach fares, or upon the conditions under which such services may be appropriately provided, and accordingly determined to institute a separate investigation of such fares.[1] This order implements that determination.

Historically, the Board has encouraged the provision of reduced-fare off-peak services as a means of obtaining reductions in unit costs through increased utilization of facilities and equipment. The record in Phase 9, however, contained little evidentiary material bearing upon equipment utilization or other cost-related matters associated with night coach service. Accordingly, we will expect the parties to direct their attentions particularly to the long-run impact on unit operating costs of reduced-fare off-peak services. Of particular significance are the following: (1) The effect on equipment utilization of night coach services presently offered: (2) the extent to which existing night coach fares stimulate or divert traffic from normal coach fares, with particular reference to the extensive night coach services now offered during periods other than those traditionally considered to be off-peak; (3) the extent to which cost savings result from the lower level of passenger amenities available to night coach passengers; (4) whether or not any other forms of cost savings are achieved by operating during off-peak periods; and finally (5) a quantification of these cost factors through adoption of a cost-based fare for night coach service, and a determination of the circumstances and conditions under which such service may be lawfully provided.

Accordingly, the Board finding that the existing night coach fares and services may be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and should be investigated pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404, and 1002 thereof,

It is ordered, That: 1. An investigation is instituted to determine whether the fares and provisions described in Appendix A attached hereto (including future revisions of such fares and provisions), and rules, regulations or practices affecting such fares and provisions, are or will be, unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and if found to be unlawful, to determine and prescribe the lawful fares and provisions, and rules, regulations, and practices affecting such fares and provisions;

2. The investigation ordered herein be assigned before an Administrative Law Judge of the Board at a time and place hereafter to be designated; and

3. Copies of this order be filed with the tariffs listed in the Appendix and served upon American Airlines, Inc., Braniff Airways, Inc., Continental Air Lines, Inc., Delta Air Lines, Inc., Eastern Air Lines, Inc., National Airlines, Inc., Northwest Airlines, Inc., Trans World Airlines, Inc., United Air Lines, Inc., Western Air Lines, Inc., Allegheny Airlines, Inc., Frontier Airlines, Inc., Ozark Air Lines, Inc., Southern Airways, Inc., and Texas International Airlines, Inc., which are hereby made parties to this proceeding.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

[SEAL] EDWIN Z. HOLLAND,
Secretary.

APPENDIX A

TARIFF C.A.B. NO. 202 ISSUED BY AIRLINE TARIFF PUBLISHERS INC., AGENT

All FN and YN class fares between points within the area consisting of the 48 contiguous states and the District of Columbia of the United States, and the application thereof, applicable to American Airlines, Inc., Braniff Airways, Incorporated, Continental Air Lines, Inc., Delta Air Lines, Inc., Eastern Air Lines, Inc., National Airlines, Inc., Northwest Airlines, Inc., Trans World Airlines, Inc., United Air Lines, Inc., and Western Air Lines, Inc.

All SN class fares between points within the area consisting of the 48 contiguous states and the District of Columbia of the United States, and the application thereof, applicable to Allegheny Airlines, Inc., Frontier Airlines, Inc., Ozark Air Lines, Inc., Southern Airways, Inc., and Texas International Airlines, Inc.

The YNITI class fares and the application thereof between Dallas/Ft. Worth and Phoenix applicable to American Airlines, Inc., and Delta Air Lines, Inc.

COMMISSION ON CIVIL RIGHTS

VERMONT STATE ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Vermont State Advisory Committee (SAC) to this Commission will convene at 7:30 p.m. on March 21, 1974, at the Tavern Motor Inn, Montpelier, Vermont 05602.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Northeastern Regional Office of the Commission, Room 1639, 26 Federal Plaza, New York, New York 10007.

The purpose of this meeting shall be to finalize plans in preparation for the Conference on Minority Students.

This meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated in Washington, D.C., March 14, 1974.

ISAIAH T. CRESWELL, Jr.,
Advisory Committee Management Officer.

[FR Doc.74-6572 Filed 3-20-74;8:45 am]

[18] Since provision is made for responses to this order, petitions for reconsideration of this order will not be entertained.

[1] Order 74-3-82, March 18, 1974.

VIRGINIA STATE ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Virginia State Advisory Committee (SAC) to this Commission will convene at 2:30 p.m. on March 22, 1974, in the Fifth Floor Conference Room, New City Hall, 900 East Broad Street, Richmond, Virginia 23219.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Mid-Atlantic Regional Office of the Commission, Room 510, 2120 L Street, NW., Washington, D.C. 20245.

The purposes of this meeting shall be (1) to discuss followup activities to the Virginia SAC report on Judicial Selection, and (2) to begin selecting and planning new projects to be undertaken by the Virginia SAC.

This meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, D.C., March 14, 1974.

ISAIAH T. CRESWELL, Jr.,
Advisory Committee Management Officer.

DELAWARE RIVER BASIN COMMISSION

PUBLIC HEARING

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on Wednesday, March 27, 1974, in Room 603, City Hall Annex, Juniper and Filbert Streets in Philadelphia, beginning at 2 p.m. The subjects of the hearing will be as follows:

A. A proposal to amend the Comprehensive Plan so as to include therein the following projects:

1. *Monroe County:* A regional sewerage plan for the Boroughs of Stroudsburg, East Stroudsburg and Delaware Water Gap, and portions of Smithfield and Stroud Townships, Monroe County, Pa. Sewage collection systems would be constructed in Stroud and Smithfield Townships and extended in other areas. Regional interceptors would serve a new regional treatment plant near the Delaware River scheduled for operation in 1977. Existing sewage treatment plants would be upgraded and expanded as necessary to meet needs on an interim basis until completion of the regional system.

2. *Pennsylvania Department of Environmental Resources:* Marsh Creek dam and reservoir project, Chester County, Pa. A proposed revision in one of the operating policies applicable to this existing project having the effect of reducing downstream release requirements from the dam when the flow of Brandywine Creek at the Chadds Ford stream gauge is greater than 140 cubic feet per second.

3. *Wrightstown Municipal Utilities Authority:* A well water supply project to augment public water supplies in the Borough of Wrightstown, Burlington County, N.J. Existing Well No. 1 has an estimated yield of 100,000 gallons per day. New Well No. 2 is anticipated to yield 200,000 gallons per day.

4. *Lake Louise Marie Water Co., Inc.:* A well water supply project to serve the development known as Emerald Green in the Town of Thompson, Sullivan County, N.Y. Two new wells, Nos. 1 and 2, are estimated to have a combined yield of about 288,000 gallons per day.

5. *Broad Run Water Co., Inc.:* A well water supply project to provide service in the development known as Broad Run Community in West Bradford Township, Chester County, Pa. Wells Nos. 1 and 2 are expected to have a combined yield of about 216,000 gallons per day.

6. *U.S. Soil Conservation Service:* Modification of the Assunpink Creek Watershed Work Plan in Mercer and Monmouth Counties, N.J. A revision is proposed to the flood retarding structure at site No. 6 to control a 22 square-mile drainage area and provide 1,880 acre feet of storage. Site No. 15 of the original Watershed Work Plan will be deleted.

7. *New Castle County Dept. of Public Works:* A project to enlarge a temporary sewage treatment plant serving the South Christina interceptor in New Castle County, Del. Capacity of the plant will be increased to two million gallons per day and will provide 91 percent removal of BOD_5. Treated effluent will discharge to a tidal portion of None Such Creek.

8. *Borough of Medford Lakes:* Upgrading of a sewage treatment plant serving the Borough of Medford Lakes, Burlington County, N.J. The proposed additions will provide treatment capacity of 550,000 gallons per day and for removal of 90 percent of BOD, and suspended solids and 98 percent of soluble phosphorus. Treated effluent will discharge to a tributary of Birchwood Lakes on the Southwest Branch of Rancocas Creek Watershed.

9. *City of Easton:* Expansion of the City's sewage treatment plant in Northampton County, Pa. Capacity will be provided to handle 10 million gallons per day of sewage flow and provide 92 percent removal of BOD_5 and 90 percent removal of suspended solids. Treated effluent will discharge to the Delaware River.

10. *New Hanover Township Authority:* A sewage treatment project to provide municipal service in New Hanover Township, Montgomery County, Pa. The treatment plant will provide a capacity of 225,000 gallons per day and remove up to 90 percent of BOD_5 and suspended solids. Treated effluent will be subject to disposal by spray irrigation.

11. *Greenbriar Development Co.:* A sewage treatment project to provide treatment at the Shohola Falls Trails End Campground in Shohola Township, Pike County, Pa. The treatment plant will provide a capacity of 75,000 gallons per day and provide for removal of 95 percent of BOD_5 and suspended solids. Treated effluent will discharge to an unnamed tributary of Shohola Creek.

12. *Jersey Central Power & Light Co.:* A proposed addition to the Gilbert generating station in Holland Township, Hunterdon County, N.J. The addition consists of a 130-MW steam turbo-generator utilizing the waste heat from four existing combustion turbines through the use of heat recovery steam generators. A mechanical draft wet cooling tower, waste treatment facilities, expansion of the switchyard and associated appurtenances are also part of the project. On-site oil tank storage will be utilized for fuel oil.

B. Applications for water quality certification pursuant to section 401 of the Federal Water Pollution Control Act:

1. *Pennsylvania Power & Light Co.:* A project to dredge the Delaware River between the main channel of the river and the water intake structure for Units 3 and 4 of the Martins Creek generating station in Northampton County, Pa.

2. *Burlington County Board of Chosen Freeholders:* Replacement of Skeales Bridge over Assiscunk Creek in Burlington Township, Burlington County, N.J.

C. A proposal to amend section 2-2.4 of the Commission's rules of practice and procedure. Section 2-2.4 provides for the adoption of the annual Water Resources Program in the month of February. It is proposed to change this section so as to require adoption annually without reference to any particular month of the year.

Documents relating to the items on this hearing notice may be examined at the Commission's offices. Persons wishing to testify are requested to notify the Secretary prior to the hearing.

Dated: March 15, 1974.

W. BRINTON WHITALL,
Secretary.

[FR Doc.74-6555 Filed 3-20-74;8:45 am]

MARTINS CREEK STEAM ELECTRIC GENERATING STATION EXPANSION

Environmental Statement

In accordance with the National Environmental Policy Act of 1969 and the Delaware River Basin Commission's rules of practice and procedure (Section 2-3.5.2) notice is hereby given of the availability of the final environmental statement as of March 15, 1974 which discusses the environmental impact of the proposed expansion of the Martins Creek Electric Generating Station located on the west bank of the Delaware River (Delaware River Mile 190.9) approximately 10 miles north of Easton, Pennsylvania. The final statement has been prepared by the Commission based on the Pennsylvania Power and Light Company's environmental studies, the Commission's draft environmental impact statement and extensive comments received from other Federal, state and local agencies and concerned organizations and citizens.

The proposed development includes construction of Units No. 3 and No. 4 which are oil-fired steam electric generating units each with a capacity of 800 electric megawatts, alongside two existing coal-fired operating units of 150 MW each. Units No. 3 and No. 4 are scheduled to be in operation in 1975 and 1977, respectively. Facilities to be constructed to support each of the generators would include a natural draft cooling tower 414 feet high with a water flow of 280,000 gallons per minute; a chimney 600 feet high; a transformer of 930,000 kva; a 95,000-barrel-capacity tank to store fuel oil; and water inlet works to provide a maximum of 19.6 cfs of water for each unit, of which an average of 13.7 cfs would be evaporated. Facilities constructed to support Units No. 3 and No. 4 jointly, include fire protection facilities; a 12,000 barrel capacity tank for light oil; an on-site domestic waste system; a 42-acre retention pond, with an effective holding capacity of

V 39156 MAR 21 74 XUM

216,000 cubic yards (132 acre feet); an additional switchyard; and new transmission lines.

The final environmental impact statement may be examined in the library at the office of the Delaware River Basin Commission, 25 State Police Drive, West Trenton, New Jersey, and in the library of the Water Resources Association of the Delaware River Basin, 21 South 12th Street in Philadelphia. A limited number of copies of the final statement are available to persons or agencies upon request.

W. BRINTON WHITALL,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

AMERICAN CYANAMID CO.

Notice of Filing of Petition Regarding Pesticide Chemicals

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(1), 68 Stat. 512 (21 U.S.C. 346a (d)(1))), notice is given that a petition (PP 4F1462) has been filed by American Cyanamid Co., Post Office Box 400, Princeton, NJ 08540, proposing establishment of tolerances (40 CFR Part 180) for combined residues of the insecticide dimethoate (*O,O*-dimethyl *S*-(*N*-methylcarbamoylmethyl) phosphorodithioate) including its oxygen analog *O,O*-dimethyl *S*-(*N*-methylcarbamoylmethyl) phosphorothioate in or on the raw agricultural commodities corn forage at 1 part per million and corn grain at 0.1 part per million (negligible residue).

The analytical method proposed in the petition for determining residues of the insecticide is a gas-liquid chromatographic procedures using a flame photometric detector equipped with a phosphorus filter (526 nanometers).

Dated: March 12, 1974.

JOHN B. RITCH, Jr.,
Director,
Registration Division.

CHEMAGRO DIVISION OF BAYCHEM CORP.

Notice of Filing of Petition Regarding Pesticide Chemical

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(1), 68 Stat. 512; (21 U.S.C. 346a(d)(1))), notice is given that a petition (PP 4F1472) has been filed by Chemagro Division of Baychem Corp., Post Office Box 4913, Kansas City, MO 64120, proposing establishment of tolerances (40 CFR Part 180) for combined residues of the insecticide fenthion (*O,O*-dimethyl *O*-[3-methyl-4-(methylthio) phenyl] phosphorothioate) and its cholinesterase-inhibiting metabolites in the raw agricultural commodities meat, fat, and meat byproducts of hogs at 0.1 part per million.

The analytical method proposed in the petition for determining residues of the insecticide is a gas chromatographic procedure using thermionic emission detection.

Dated: March 12, 1974.

JOHN B. RITCH, Jr.,
Director,
Registration Division.

[FR Doc.74-6471 Filed 3-20-74; 8:45 am]

CHEMAGRO DIVISION OF BAYCHEM CORP.

Notice of Withdrawal of Petitions Regarding Pesticide Chemical

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(1), 68 Stat. 512 (21 U.S.C. 346a (d)(1))), the following notice is issued:

In accordance with § 180.8 *Withdrawal of petitions without prejudice* of the pesticide procedural regulations (40 CFR 180.8), Chemagro Division of Baychem Corp. (formerly Chemagro Corp.), Kansas City, MO 64120, has withdrawn its petitions (PP 2F1292, PP 1F1166, and PP 0F0984), notices of which were published in the FEDERAL REGISTERS of July 29, 1972 (37 FR 15340), November 4, 1971 (36 FR 21224), and June 10, 1970 (35 FR 8954), respectively, proposing establishment of tolerances for residues of the insecticide *O,O*-dimethyl *S*-[4-oxo-1,2,3-benzotriazin-3(4H)-ylmethyl] phosphorodithioate in or on the raw agricultural commodities corn fodder and forage at 5 parts per million and corn grain and fresh corn including sweet corn (kernels plus cob with husk removed) at 0.1 part per million (PP 2F1292); pasture grass hay at 5 parts per million and pasture grass at 2 parts per million (PP 1F1166); and sorghum grain at 7 parts per million (PP 0F0984).

Dated: March 12, 1974.

JOHN B. RITCH, Jr.,
Director,
Registration Division.

AIR POLLUTION CHEMISTRY AND PHYSICS ADVISORY COMMITTEE

Notice of Meeting

Pursuant to Pub. L. 92-463, notice is hereby given that a meeting of the Air Pollution Chemistry and Physics Advisory Committee of the Science Advisory Board will be held at 9:00 a.m., April 8 and 9, 1974, in Room 220 of the Regional Office of the U.S. Environmental Protection Agency, 100 California Street, San Francisco, California, 94111.

This is the regular spring meeting of this committee. The agenda will include (a) smog chamber and field studies of the emissions-air quality relationships, (b) minority institution research support program, and (c) measurement of sulfuric acid and sulfates in ambient and source atmospheres.

The meeting will be open to the public. Any member of the public wishing to participate or present a paper should contact Dr. Basil Dimitriades, Chemistry and Physics Laboratory, Office of the Director, Environmental Protection Agency, Research Triangle Park, North Carolina (919-549-8411, extension 2706).

Dated: March 15, 1974.

JOHN L. BUCKLEY,
Acting Assistant Administrator for Research and Development.

MARYLAND TRANSPORTATION CONTROL PLAN

Notice of Availability of Technical Support Document

The Technical Support Document for the Transportation Control Plan for the Metropolitan Baltimore Intrastate Region, referenced in the December 12, 1973 FEDERAL REGISTER (38 FR 34347) is now available for general public inspection at the Region III EPA Office in Philadelphia, Pennsylvania and at the Freedom of Information Center, EPA, Washington, D.C.

Although the material in this document had been available to the Administrator prior to the December 12 promulgation, it had not been prepared in final typed form which could be reproduced for the general public at that time. This task has now been completed and the document may be inspected during normal business hours at the EPA Region III Office, Room 255, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pennsylvania, and at the Freedom of Information Center, Room 232 West Tower, 401 "M" Street, SW., Washington, D.C.

Since the development and implementation of adequate controls to reduce hydrocarbon and carbon monoxide is a continuing process and the Agency desires to have the most up-to-date information possible in the event that revisions prove necessary or appropriate, public comment is specifically invited on the material presented in this document for a period of thirty days. Comments should be addressed to the Regional Administrator, EPA, Attention: Mr. C. C. Miese, Room 255, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pennsylvania, 19106.

Dated: March 14, 1974.

ROGER STRELOW,
Acting Assistant Administrator for Air and Water Programs.

[FR Doc.74-6590 Filed 3-20-74; 8:45 am]

[OPP-32000/27]

RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 979), and its procedures for implementation. This policy provides that EPA will, upon receipt of every application, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by the applicant will be available for examination at the Environmental Protection Agency, Room EB-37, East Tower, 401 M Street, SW., Washington, D.C. 20460.

On or before May 20, 1974, any person who (a) is or has been an applicant, (b) desires to assert a claim for compensation under section 3(c)(1)(D) against another applicant proposing to use supportive data previously submitted and approved, and (c) wishes to preserve his opportunity for determination of reasonable compensation by the Administrator must notify the Administrator and the applicant named in the FEDERAL REGISTER of his claim by certified mail. Every such claimant must include, at a minimum, the information listed in this interim policy published on November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy in regard to usage of existing supportive data for registration will be processed in accordance with existing procedures. Applications submitted under 2(c) will be held for the 60-day period before commencing processing. If claims are not received, the application will be processed in normal procedure. However, if claims are received within 60 days, the applicants against whom the particular claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after this 60-day period.

APPLICATIONS RECEIVED

EPA File Symbol 5481-RAL. Amvac Chemical Corporation, 4100 East Washington Blvd., Los Angeles, California 90023. *Alco Dibrom 8 Emulsive Naled Insecticide.* Active Ingredients: Naled 58.0%; Aromatic Petroleum Derivative Solvent 27.5%. *Method of Support.* Application proceeds under 2(c) of interim policy.

EPA File Symbol 2553-ET. Buhl Chemical Company, Box 626, Weirsdale, Florida 32695. *Zee-Tox 5% Chlordane Powdered Insect Killer.* Active Ingredients: Chlordane (Technical) 5%. *Method of Support.* Application proceeds under 2(c) of interim policy.

EPA File Symbol 1660-TN. Chemical Specialties Co., 5155 Nassau Ave., Brooklyn, New York 11222. *Dro Automatic Indoor Fogger.* Active Ingredients: Petroleum Distillate 19.0%; Pyrethrins 0.20%; Technical Piperonyl Butoxide 0.80%. *Method of Support.* Application proceeds under 2(c) of interim policy.

EPA File Symbol 8550-GG. Del Chemical Corp., 1175 Glendale Road, Sparks, Nevada 98431. *Del X It Oil Soluble Insecticide.* Active Ingredients: (5-Benzyl-3-furyl) methyl 2,2-dimethyl-3-(2-methylpropenyl) cyclopropanecarboxylate 0.200%; Related compounds 0.027%; Aromatic petroleum hydrocarbons 0.265%; Petroleum distillate 99.500%. *Method of Support.* Application proceeds under 2(c) of interim policy.

EPA File Symbol 5905-GAE. Helena Chemical Company, Suite 2900, Clark Tower, 5100 Poplar Avenue, Memphis, Tennessee 38117. *Helena Animal Health Roach & Ant Spray.* Active Ingredients: O,O-diethyl O-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate 0.500%; Pyrethrins 0.052%; Technical piperonyl butoxide (equivalent to 0.80% [butylcarbityl] [6-propylpiperonyl] ether and 0.20% other related compounds) 0.261%; Petroleum distillate 68.966%. *Method of Support.* Application proceeds under 2(c) of interim policy.

EPA File Symbol 2693-OT. International Paint Company, Inc., Elmwood & Morris Avenues, Union, New Jersey 07083. *Supertrop Antifouling Paint 45 Blue.* Active Ingredients: Cuprous oxide 23.6%. *Method of Support.* Application proceeds under 2(c) of interim policy.

EPA File Symbol 9803-EO. Munichem Corporation, 850 Industial Way, Sparks, Nevada 98431. *Muni X Oil Soluble Insecticide.* Active Ingredients: (5-Benzyl-3-furyl) methyl 2,2-dimethyl-3-(2-methylpropenyl) cyclopropanecarboxylate 0.200%; Related compounds 0.027%; Aromatic petroleum hydrocarbons 0.265%; Petroleum distillate 99.500. *Method of Support.* Application proceeds under 2(b) of interim policy.

EPA Reg. No. 432-505. S. B. Penick & Company, 100 Church Street, New York, New York 10007. *24.3% SBP-1382-2 E.C.* Active Ingredients: (5-Benzyl-3-furyl) methyl 2,2-dimethyl-3-(2-methylpropenyl) cyclopropanecarboxylate 24.30%; Related compounds 3.30%; Aromatic petroleum hydrocarbons 66.40%. *Method of Support.* Application proceeds under 2(b) of interim policy.

EPA File Symbol 3635-ROU. Oxford Chemicals, P. O. Box 80202, Atlanta, Georgia 30341. *Oxford 2515 Aerosol.* Active Ingredients: (5-Benzyl-3-furyl) methyl 2,2-dimethyl-3-(2-methylpropenyl) cyclopropanecarboxylate 0.250%; Related compounds 0.034%; Pyrethrins 0.150%; Piperonyl butoxide technical 0.600%; Aromatic petroleum hydrocarbons 0.331%; Petroleum distillate 18.125%. *Method of Support.* Application proceeds under 2(c) of interim policy.

EPA File Symbol 228-RUO. Riverdale Chemical Company, 220 East 17th Street, Chicago Heights, Illinois 60411. *Riverdale Turf Weed Killer.* Active Ingredients: Diethanolamine salt of 2-(2 methyl-4 chlorophenoxy) Propionic Acid 4.39%; Diethanolamine salt of 2,4-Dichlorophenoxyacetic acid 4.08%. *Method of Support.* Application proceeds under 2(c) of interim policy.

EPA File Symbol 4000-AN. Southern Chemical Products Co., P.O. Box 205, 430 Lower Boundary, Macon, Georgia 31202. *Lemon Hospital Disinfectant.* Active Ingredients: Isopropanol 67.50%; Essential Oils 0.45%; Orthophenylphenol 0.15%; N-alkyl (C14 1%, C16 25%, C18 8%, C10 66%) N-ethyl morpholinium ethylsulfate 0.03%. *Method of Support.* Application proceeds under 2(b) of interim policy.

EPA File Symbol 117-RRU. Virginia Chemicals, Inc., 3340 West Norfolk Road, Portsmouth, Virginia 23703. *Virchem Ultra Aerosol Insecticide.* Active Ingredients: Pyrethrins 1.95%; Technical piperonyl butoxide 3.00%; N-Octyl bicycloheptene dicarboximide 2.00%; Petroleum distillates 18.05%. *Method of Support.* Application proceeds under 2(c) of interim policy.

EPA File Symbol 9782-GE. Woodbury Chemical Company of Homestead, P.O. Box 4319, Princeton, Florida 33030. *Heptachlor 3E Emulsifiable Concentrate.* Active Ingredients: Heptachlor 32.1%; Related Compounds 12.5%; Petroleum Distillate 50.4%. *Method of Support.* Application proceeds under 2(c) of interim policy.

REPUBLISHED ITEMS

The following items represent corrections and/or changes in the list of applications received previously published in the FEDERAL REGISTER of March 12, 1974 (39 FR 9572).

FARM CREDIT ADMINISTRATION

[Order No. 771]

DEPUTY GOVERNOR ET AL.

Delegation of Authority

MARCH 13, 1974.

1. The Deputy Governor and Director of Credit Service shall, subject to the jurisdiction and control of the Governor of the Farm Credit Administration, execute and perform all power, authority, and duties relative to supervision of the credit function of the institutions of the Farm Credit System and to all matters incidental thereto, and to administration of all provisions of law pertinent to such supervision.

2. In the event the Deputy Governor and Director of Credit Service, Farm credit Administration, is absent or is not able to perform the duties of his office for any other reason, the officer who is highest on the following list and who is available to act is hereby authorized to exercise and perform all functions, powers, authority, and duties pertaining to the office of Deputy Governor and Director of Credit Service:

(1) Deputy Director
(2) Senior Assistant Director, Credit Review
(3) Assistant to the Director
(4) Assistant Director, Central Region

V 39156 MAR 21 74 XUM

(5) Assistant Director, Eastern Region
(6) Assistant Director, Western Region

3. This order shall be effective on the above written date and revokes Farm Credit Administration Orders No. 752, dated April 12, 1972 (37 FR 7646); No. 748, dated January 1, 1972 (37 FR 238); No. 739, dated November 12, 1970 (35 FR 17753); and No. 733, dated December 11, 1969 (34 FR 19830).

E. A. JAENKE,
Governor,
Farm Credit Administration.

[FR Doc.74-6464 Filed 3-20-74;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[FCC 74-260]

FAILURE OF BROADCAST LICENSEES TO CONDUCT CONTESTS FAIRLY

Public Notice

MARCH 15, 1974.

Over the years, the Commission has received many complaints regarding the manner in which broadcast station licensees have conducted contests over the air. One result of these complaints was the issuance in 1966 of a Public Notice entitled, "Contests and Promotions Which Adversely Affect the Public Interest," 2 FCC 2d 464, 6 RR 2d 671. The 1966 Public Notice listed examples of various contests and promotions and stated that among the adverse consequences of some of them were: Alarm to the public about imaginary dangers; infringement of public or private property rights or the right of privacy; annoyance or embarrassment to innocent parties; hazards to life and health; and traffic congestion or other public disorder requiring diversion of police from other duties. Contests and promotions having the adverse effects cited in that Notice and contests that are not fairly conducted or are misleadingly or falsely advertised continue to cause complaints, and short term renewals have been granted or other measures taken because of the manner in which contests have been advertised or conducted since the issuance of the 1966 Public Notice.[1]

The Commission has made clear in a number of public statements that a licensee's contests should be conducted fairly and substantially as represented to the public, and that a failure to do so falls short of the degree of responsibility expected of licensees. See KOLOB Broadcasting Company cited in footnote one.

In addition to the practices described in the 1966 Public Notice, the Commission believes that serious questions would be raised as to the sense of responsibility of a broadcast licensee who engages in the following practices: (1) Disseminating false or misleading information regarding the amount or nature of prizes; (2) failing to control the contest to assure a fair opportunity for contestants to win the announced prizes; (3) urging participation in a contest, or urging persons to stay tuned to the station in order to win, at times when it is not possible to win prizes; (4) failing to award prizes, or failing to award them within a reasonable time; (5) failing to set forth fully and accurately the rules and conditions for contests; (6) changing the rules or conditions of a contest without advising the public or doing so promptly; [2] and (7) using arbitrary or inconsistently applied standards in judging entries. In some instances, licensees, after carefully planning contests to avoid problems of this type as well as those listed above from the 1966 Public Notice, failed adequately to instruct employees in the procedures to be followed during the contest, or failed adequately to supervise their employees to assure that the instructions were carried out.
